ABSTRACT

Most of the 150 tests cited in this bibliography are geared to the elementary secondary level. There are some for adults and college students. The instruments are basically achievement tests that assess competence in fundamental skills basic to learning or everyday functioning such as reading, mathematics, and language skills. Many of the tests described are included because one or more of their subtests measure some aspect of basic, multi-faceted knowledge. This document is one in a series of topical bibliographies from the Test Collection (TC) at Educational Testing Service (ETS) containing descriptions of more than 18,000 tests and other measurement devices prepared by commercial publishers, teachers, educational institutions, professional associations, departments of education, counselors, etc. Each description contains the following basic information: TC Accession Number (a six-digit identification number assigned by the Test Collection); the title of the instrument; personal or institutional author; year of publication or copyright; availability source; grade level for which test is suitable; age level for which test is suitable; and abstract. Other information, which is provided when known, includes subtests, number of test items, and time required to complete the test. Information on accessing the Test Collection via Internet concludes the document.

INTRODUCTION

Scope of Bibliography

Most of the tests described in this bibliography are geared to the elementary-secondary level. There are some for adults and college students. The instruments are basically achievement tests that assess competence in fundamental skills basic to learning or everyday functioning reading, mathematic and language skills.

Availability

Copies of the tests described on the following pages must be obtained directly from the publisher, as stated in the AV AVAILABILITY section of each test citation. Generally, the Test Collection does not have distribution rights for its holdings. However, in special instances, the Test Collection has been granted permission from individual authors to distribute their tests, which are primarily research instruments. The AV AVAILABILITY information for these instruments will be Tests in microfiche, Test Collection, Educational Testing Service, Princeton, NJ 08541.

Guide to Citation Elements

The following is a guide to the various elements which may be present in a test citation:

- AN - Six-digit identification number assigned by the Test Collection
- TI - Name of the instrument
- DT - Components within the overall test which assess particular skills or factors
- AU - Personal or institutional author
- YR - Year test was published or copyrighted
- AV - Test publisher or distributor; the organization which sells or distributes the instrument

Copyright (c) 1992 by Educational Testing Service. All rights reserved.

GL - List of grades for which test is suitable

TG - List of ages for which test is suitable

AB - A description of the test and its purpose

 AB ABSTRACT: This computerized testing program uses adaptive testing
 methods to provide a basic skills assessment useful in placing
 incoming freshmen in entry-level courses. The adaptive testing
 procedures move the test taker directly to test items that are at the
 correct level, thereby eliminating time consuming testing with
 questions that are too easy or too difficult. Items on the College
 Level Mathematics test are designed to measure student mastery of
 intermediate algebra, college algebra, precalculus. This test may be
 administered separately or with other tests in the series. Scoring
 is completed by the computer as soon as the student has finished the
 untimed testing. Additional questions about students' background can
 be added by the user college.

The adaptive testing procedures move the test taker directly to test items that are at the correct level, thereby eliminating time consuming testing with questions that are too easy or too difficult. Items on the Sentence Skills test consists of sentence corrections that test understanding of sentence structure and "construction shift" items that ask the test taker to select the most appropriate construction for a given sentence from several options to improve the sentence without changing meaning. Content of passages and items includes art, human relationships, practical affairs, social and physical sciences. The adaptive testing procedures move the test taker directly to test items that are at the correct level, thereby eliminating time consuming testing with questions that are too easy or too difficult. Items on the Reading Comprehension test consist of short passages with questions about the passages and others based on the relationships between two sentences. Content of passages and items include art, human relationships, practical affairs, social and physical sciences. Items involve statements relating to main or secondary ideas in passages, inferences, and applications. Scoring is completed by the computer as soon as the student has finished the untimed testing. AB ABSTRACT: This instrument measures mastery of basic concepts that are fundamental to understanding verbal instruction and necessary for early school achievement among children whose first language is Spanish. It was designed to help teachers of Spanish-speaking students, both in the United States and in Spanish-speaking countries, to identify students with basic concept deficiencies and target specific concept areas for further instruction. Basic concepts measured are relational concepts, a subset of concepts children use to make relational decisions about persons, objects, and situations. Concepts targeted in test also involve judgments that can be made across the contexts of space, quality, and time, at increasingly complex levels of abstraction. This tool can be used by special education teachers, speech and language pathologists, school psychologists, and early childhood specialists. Test is administered orally to individual students or small groups. Spanish norms are not available for this test.

 AB ABSTRACT: This test of applied literacy skills covers the broad range of skills used in work, home, community and educational settings. It is comprised of simulation tasks. These tasks require the use of printed materials encountered in real life, e.g., advertisements, maps, news stories. Respondents are given several questions about each stimulus material and then read or perform arithmetic calculations. There are two parallel forms. Test may be group administered by non-professional staff. Scoring determines whether the test taker is above, below, or at literacy level. For use in vocational and basic skills education.

AB ABSTRACT: Contains cognitive and achievement batteries for children aged 2.5 through 17 years. Diagnoses and analyzes children's learning disabilities and learning difficulties. Profiles a child's strengths and weaknesses. Cognitive Battery consists of two levels, preschool and school-age. Subtests are appropriate to the developmental level of the child. The Achievement Battery portion provides a standardized screening of literacy and numeracy skills. The two batteries combined provide a comprehensive picture of a child's current cognitive and intellectual functioning. Individually administered. For use by school and clinical psychologists and other trained professionals.

AB ABSTRACT: Achievement tests which measure the basic skills of reading, language, spelling, mathematics, study skills, science, and social studies. Eleven levels cover kindergarten through Grade 12. Three separate formats, Complete Battery, Survey, and Benchmark are available. All formats place achievement on the same normative scale and results can be directly compared. Complete Battery has two forms at each of the levels and includes all areas. A Basic Skills Battery, consisting only of the areas of Reading, Spelling, Language, Mathematics and Study Skills, is available at Level 12 and above. Survey Tests are for those test users who need only a quick survey of achievement levels, have no need for curriculum-referenced information and for whom testing time is the major consideration. Survey Tests have the same basic content as the Complete Battery, are about half as long, and take about half the time to administer. Benchmark Tests are for users who want only norm-referenced scores of

the highest degree of accuracy and have no need for curricular-referenced information. Benchmark Tests have the same basic content structures as the Complete Battery and are about the same length.

 AB ABSTRACT: Achievement tests which measure the basic skills of reading, language, spelling, mathematics, study skills, science, and social studies. Eleven levels cover kindergarten through Grade 12. Three separate formats, Complete Battery, Survey, and Benchmark are available. All formats place achievement on the same normative scale and results can be directly compared. Complete Battery has two forms at each of the levels and includes all areas. A Basic Skills Battery, consisting only of the areas of Reading, Spelling, Language, Mathematics and Study Skills, is available at Level 12 and above. Survey Tests are for those test users who need only a quick survey of achievement levels, have no need for curriculum-referenced information and for whom testing time is the major consideration. Survey Tests have the same basic content as the Complete Battery, are about half as long, and take about half the time to administer. Benchmark Tests are for users who want only norm-referenced scores of the highest degree of accuracy and have no need for curricular-referenced information. Benchmark Tests have the same basic content structures as the Complete Battery and are about the same length.

AB ABSTRACT: Designed to measure "eminent literacy" in young children from prekindergarten through beginning first-grade students. Assesses a prereading child's understanding of the function of print (that print carries messages), and the conventions of print (what people do when they read). Measures writing and drawing concepts that have been validated in predicting reading readiness. The Concepts of Printing and Writing components are also included in the Developing Skills Checklist, which is one component of the CTB Early Childhood System.

 AB ABSTRACT: Designed to assess the school-related skills of students in grades one through three who do not speak English or who exhibit language delays or deficits. Assesses children's concept development through their spontaneous drawings; their eye-hand coordination by having students copy a sentence; their understanding of sets of relationships between concepts and patterns in relationships by a figural task; and their entry-level mathematics skills by a visual math exercise. Includes two sets of instructions for administration, one for students with English language competence, the other for students with limited English competence. Results may be used to develop a curriculum which will ready the children for school.

 AB ABSTRACT: A screening test designed to identify children in grades kindergarten through three who have a high risk for encountering academic and adjustment problems at school. Consists of five subtests: Self Concept and School Adjustment Index; Visual Skills; Auditory Skills; Figure Copying; and Basic Knowledge. The last four of these subtests produced a Total Readiness score. Teachers also complete a 40-item rating scale for each student which evaluates classroom behavior. The child's results on the assessment and the teacher's ratings are used to generate a report for each child. Information on reliability and validity are included. Also contains several descriptive statistics, correlations and differences among grade level and between males and females.

AB ABSTRACT: A measurement tool designed for adult English as a Second
 Language (ESL) learners at the survival and pre-employment skills
 level. Uses real life materials and tasks to measure student
 performance of basic language competencies. Can be used for
 placement, progress monitoring, diagnosis, screening, and progress
 evaluation. Contains two separate components: an Oral Interview
 Section and a Literacy Skills Section, which together provide six
 separate language skills scores.

AB ABSTRACT: This test, with its companion instrument the Survey of Problem Solving Skills, evaluates the connection between problem solving strategies, learning processes and educational outcomes. The SEDS is designed to identify processes and strategies used to perform reading, writing, spelling, and mathematical tasks. The test administrator records results and rates student performance during the examination. A summary profile provides a synopsis of findings. Included are measures of reading comprehension, vocabulary, decoding; writing in terms of organization, alphabet production, language usage, overall productivity; spelling recognition and retrieval; mathematics operations, computation, concepts, application. These are criterion-referenced measures.

AB ABSTRACT: Norm-referenced tests designed to measure achievement in reading, mathematics, language, and spelling, the subjects most commonly found in adult basic education curricula. Test focuses on the basic skills required for an individual to function in society. Tests combine the characteristics of norm-referenced and criterion-referenced tests and provide information about the relative ranking of examinees against a norm group and specific information about the instructional needs of the examinees. Results allow teachers and administrators to diagnose, evaluate, and place examinees in adult education programs. There is a correlation between scores on this test and the scores on the General Educational Development (GED) tests. Items on this test reflect language and content appropriate for adults and measure the understanding and

application of conventions and principles. Test items are not intended to measure specific knowledge or recall of facts. There are four overlapping levels and two parallel forms for each level. The four levels and their estimated grade ranges are: E (easy) with a grade range of 2.6 - 4.9; M (medium) with a grade range of 4.6-6.9; D (difficult) with a grade range of 6.6-8.9; and A (advanced) with a grade range of 8.6-12.9. There is also a survey form which is a subset of the complete battery and can be used to quickly screen examinees for appropriate placement in programs of instruction. See entries TC015041-TC015043 for additional information.

 AB ABSTRACT: Designed to measure college level communication skills that students should have attained by the end of the sophomore year, and college level computation skills. This achievement test consists of subtests in essay, writing, reading, and computation. Each subtest has one score. In the State of Florida a passing score must be attained on all four subtests before an associate's degree is awarded. Content includes: critical and literal comprehension in both reading and listening; multiple-choice writing skills and an essay; speaking skills; problem solving and concepts in arithmetic, geometry and measurement, algebra, statistics, including probability, and logical reasoning. Not available for purchase. Special arrangements for use by others are at the discretion of CLAST officials.

 AB ABSTRACT: A criterion-referenced measure designed to test listening comprehension, speaking, reading, and writing skills at an elementary level. It is intended for use with limited-English-speaking adults for whom information on the attainment of basic functional language skills is needed. The oral interview requires a series of real life listening and speaking tasks, a reading task, and a writing task. Those who screen successfully are given a literacy skills test, administered in a group or individually, that consists of a variety of everyday reading and writing tasks. May be used for placement in ESL classes, to measure proficiency in functional English and for student diagnoses and to assess readiness for subject matter instruction given in English. This is the 1984 version developed originally by the Office of Refugee Resettlement of the Department of Health and Human Services. The manual and scoring sheets have been revised extensively.

 AB ABSTRACT: An achievement battery in Spanish. Assesses basic reading and mathematics skills commonly taught to Spanish-speaking students in Grades 1 through 8. Statistical links with the Comprehensive Tests of Basic Skills, Forms U and V and the California Achievement Tests, Form E and F permit comparison of performance on Spanish Assessment of Basic Education (SABE) with performance on these two English-language batteries. Spanish-language reference group norms permit comparison of student

performance with that of students having a similar language background. Developed in Spanish, not translated. Based on the skills and vocabulary used in the most widely accepted Spanish basal reading and mathematics texts. Level 6 covers grades 6.6-8.9.

AB ABSTRACT: A series of tests in reading, mathematics, and language arts designed to measure students' basic competencies. Each test covers specific educational objectives based on the learning objectives of 35 states. Provides educational prescriptions for remediation. Assesses knowledge and mastery of skills, determines strengths and weaknesses of particular students. May be used at the beginning of the year for curriculum development based on student needs and at year's end to describe performance. Fourteen tests each contain 80-150 objective-referenced items covering 20-35 objective clusters. Items are multiple choice with graphics and audio. Online administrations are scored online. Paper and pencil testing requires a scanner and special software for scoring. All equipment for administration is purchased from WICAT. Also runs on IBM-PC and Apple IIe.

- AB ABSTRACT: A statewide testing and remediation program for students in grades 3, 5, and 8 that measures levels of knowledge and skills in reading and mathematics. Students whose skills are below level become eligible for remedial instruction. It is designed to identify problems early in a child's school career. Objectives in reading are concerned with vocabulary, literal comprehension, inferential comprehension and life study and reference, and, for grade 8, critical comprehension. Mathematics Objectives include operations, numeration, fractions, measurement, problem solving, graphing, geometry, signs and symbols, decimals, whole numbers, pre-algebra, ratio, proportion and percent. - AB ABSTRACT: An assessment program designed to measure basic skills (Language Usage, Reading and Numeric) of students planning to attend career schools and colleges and other postsecondary institutions offering specific, job-related educational programs. Information from this instrument can be used to determine remediation strategies; and, when used with specialized follow-up reports, can provide information on the effectiveness of these strategies. A Student Information Section gathers information on the student's background and goals which can be used in advising and retention efforts, marketing activities, and institutional reporting.

AB ABSTRACT: Battery of tests measuring the level of educational

achievement among adults. Determines general educational level of adults who have not completed twelve years of schooling and evaluates efforts to raise the educational level of these adults. Has adult oriented content and a non-threatening format. Covers basic skills in reading, mathematics and the language arts. Easy to administer. No single subtest requires more than thirty-five minutes. Content of ABLE, second edition, is totally new. The three levels were developed to accommodate meaningful segments of twelve years of schooling. The grade designation of each level refers to the achievement level that can be assessed most readily. At each level, two forms are available, Form E and Form F, which are parallel in content and difficulty. Two forms are to be used when reevaluation or periodic testing is desired. SelectABLE is a screening device to determine which level is most suitable for a particular individual if prior educational information is not available. Level 3 is for adults who have had at least eight years of schooling, but who have not graduated from high school (the high school grades).

 AB ABSTRACT: One of three test batteries that comprise the Basic Skills Assessment Program, a comprehensive, standardized testing program designed to assess student achievement and abilities. The Iowa Tests of Basic Skills (ITBS) were developed to assess student progress in the basic skills. Assesses readiness and achievement in the basic skills and content areas appropriate to the grade covered. Behavioral objectives to which test items at each level are written coordinate with those of state and local courses of study and instructional materials and methods. The early primary battery consists of five subtests at level 5 and six subtests at level 6. All level 5 and 6 tests, except reading, are untimed and are orally administered. Levels 7 and 8 of the primary battery and levels 9 through 14 of the multilevel edition are available in either a basic battery or a complete battery. The basic battery has fewer tests than the complete battery and is ideal for use when testing time is limited. For the multilevel edition, a supplementary social studies/science test booklet is also available. For levels 9-14, separate test booklets for each level are also available and each separate level booklet contains all 11 subtests of the complete battery plus the social studies and science tests. Optional writing and listening tests are also available for levels 9-14.

 AB ABSTRACT: One of three test batteries that comprise the Basic
 Skills Assessment Program, a comprehensive standardized testing
 program designed to assess student achievement and abilities. The
 Tests of Achievement and Proficiency (TAP), levels 15-18, comprise
 an assessment program for students in grades 9-12. Each test level
 provides comprehensive measurement of basic skills and basic
 curricular areas. TAP is available in a basic battery and a
 complete battery. Both batteries include four tests: reading
 comprehension, mathematics, written expression, and using sources of
 information. The complete battery also includes tests in social
 studies and science. The four tests common to both batteries
 include items that measure skills needed in adult life and assess
 how effectively students use the basic skills and respond to basic
 tasks they need to function in everyday society. There are also
 optional listening and writing tests. The complete battery takes
 240 minutes and the basic battery takes 160 minutes to complete.
 The Iowa Tests of Basic Skills, the Cognitive Abilities Test, and
 the Tests of Achievement and Proficiency were normed concurrently.

AB ABSTRACT: An assessment-advising program developed to identify basic skill levels of students as they enter two-year postsecondary institutions. Primary goal of the program is to gather information about individual student's skills, needs, and plans in order to assist student in developing and implementing a sound program of study to meet student needs and goals. As part of the program, students complete educational planning forms, take tests in the areas of language usage, reading, and numerical skills, and participate in advising sessions.

AB ABSTRACT: A battery of norm-referenced, standardized tests in basic curriculum areas for grades K-12. Designed to survey students' general academic achievement. Contents of tests are based on learner objectives most commonly taught in the United States. Two forms are available, forms P and Q. An optional test to include with the achievement battery is the Educational Ability Series (EAS)

which provides an estimate of general learning ability for students in grades K-12. The EAS assesses those factors most closely associated with overall academic performance, such as verbal, numerical, and reasoning abilities. Test administrators may decide to do out-of-level testing with the Survey of Basic Skills for special groups of students, such as Chapter I, special education, gifted or high-achieving students. Levels 34 through 37 are multilevel tests designed for use from the spring of grade 4 through high school. The reference materials, social studies, and science subtests are optional.

 AB ABSTRACT: The six diagnostic criterion areas in this assessment instrument are appropriate for mildly handicapped students in the regular classroom as well as those served in resource and self-contained settings. Mildly handicapped generally refers to students identified under PL 94-142 and other non-categorical underachievers who may profit from a criterion-referenced skill assessment. No attempt should be made to assign grade level achievement to the six areas which are: Reading; Primary Language Concepts; Arithmetic; Spelling; Counting and Numerals; and Time Telling. There is a list of behavioral objectives with each area which may be used in the development of individual education programs (IEPs). A Spanish version is available for four of the tests: Arithmetic; Counting and Numerals; Time Telling and Primary Language Concepts.

 AB ABSTRACT: A restandardization of the Wide Range Achievement Test available in two levels. Level 1 is designed for use with children from age 5 through age 11. Level 2 is designed for use for people from age 12 through age 74. The purpose of the WRAT is to measure the codes needed to learn the basic skills of reading, spelling, and arithmetic. It was intentionally designed to eliminate as much as possible the effects of comprehension. Can be used to determine if and where individual is having difficulty and to prescribe remedial/educational programs to treat the deficit.

 AB ABSTRACT: A revision of the former West Virginia Assessment and Tracking System used to assess adaptive behavior in moderately to severely handicapped persons of all ages. Designed for following uses: to provide picture of person's functioning in 20 skill areas; to provide comprehensive descriptions of clients; to permit monitoring of changes in functioning; to assist in establishing relevant training priorities; to monitor overall programs involving numbers of individuals. The 20 skills are arranged in three categories: sensory, primary (nine basic skills), and secondary (eight skills appropriate for older, higher-functioning persons). Scales may be administered in one of three ways: by interview, by informant, by direct observation. Scales are both criterion-referenced and curriculum-referenced to many programs. The author says that although the scales have undergone field testing and data-based revision, data are best viewed as preliminary and potential users should consider whether additional information is needed.

 AB ABSTRACT: Test battery which comprises ability and achievement tests, as well as reports of school plans, career plans, and interests. Ability measures cover non-verbal and verbal cognitive skills. Achievement tests cover reading, language arts, mathematics, reference skills, science, and social studies. Provides a single report for all areas and permits teacher, counselor or administrator to examine and evaluate each student from

broadest possible perspective, while allowing for comparisons among students. Test results may be analyzed to identify students who may need counseling because of conflicts among achievement, ability, and school/career plans. Several battery formats are available: complete battery, core achievement battery, basic skills battery, or cognitive and basic skills battery. Test battery should be administered over three sessions.

Inventory contains 203 skill sequences to be assessed in the areas of reading, listening, research and study skills, spelling, language and mathematics. Forms A and B are available for 51 of the skill sequences. Inventory may be used as an assessment instrument for screening and diagnostic purposes, as an instructional guide for educational objectives, a record-keeping and tracking system, a tool to develop and communicate individualized instructional plans, and as a resource for curriculum and staff development.

AB ABSTRACT: Used to assist teachers and other educational personnel in assessing abilities of young children. Test has four main uses: to identify children performing significantly below their peers in the areas measured; to reveal specific strengths and weaknesses for instructional purposes; to document progress resulting from intervention programs; to use in research studies involving young children. Also suitable for use with older children who function within the developmental range of 4 to 6 years, such as retarded, underachievers, slow learners, learning disabled, educationally handicapped, or developmentally young. There are no time limits on test; time will vary but generally should not exceed 30 minutes.

AB ABSTRACT: Designed for use with educationally disadvantaged adults to test basic reading and arithmetic skills. Four levels of difficulty for reading vocabulary, reading comprehension, and arithmetic computation. Levels are advanced, high intermediate, basic intermediate, and fundamental. Arithmetic reasoning forms are available at advanced, intermediate and fundamental levels. Reading vocabulary tests contain fourteen items. Reading Comprehension tests contain twelve items. The advanced and high intermediate levels of arithmetic computation have fourteen items each; basic intermediate level has fifteen items; and fundamental level has twenty items. Advanced and intermediate arithmetic reasoning forms have twelve items; fundamental level has fourteen items. The Wide Range Scale is a screening test which can be administered in approximately fifteen minutes. It determines the level of BOLT to use with the individual being tested. The BOLT is intended for use

primarily by State Employment Security Agencies. This test is available for release to certain individuals and organization at the discretion of the appropriate State Employment Security representative.

AB ABSTRACT: The test is designed to measure word discrimination, sentence meaning, and paragraph interpretation. The test is based upon the reading vocabulary of students in 4th to 9th grades. Reliability is .91. The questions for each reading selection should measure a student's ability to 1) understand the general meaning of the selection; 2) evaluate factual material in the selection; 3) interpret the author's feelings or attitudes; and 4) appreciate the literary form of the selection.

 AB ABSTRACT: Part of a series which provides for comprehensive and continuous assessment of student progress in widely accepted secondary school goals in basic skills and basic curricular areas. Tests emphasize skills and ability to use information rather than being content specific. In addition to the four subtest scores, there is an applied proficiency skills score, based on test items which reflect types of out-of-school tasks necessary for functioning in society. Score on these items reflects how effectively students can apply practical skills in reading, mathematics, written expression and finding and interpreting information.

 AB ABSTRACT: Primary battery is the beginning of a series of tests which provide for continuous measurement of achievement from kindergarten through high school. Measures growth in fundamental skills necessary for learning activities. In levels 5 and 6, emphasis is on readiness skills. The number of subtests for levels 5-8 varies from 5 to 13, depending on level being used. Test battery is given in five sessions and takes from 115 to 235 minutes, depending on level being administered. Four levels in primary battery allow choice of test which is appropriate for students' developmental levels. Tests were normed concurrently with Canadian Cognitive Abilities Tests. Tests assess following skills: listening, word analysis, vocabulary, reading, oral language, written language, work study skills; mathematics.

 AB ABSTRACT: Individually administered test that measures oral reading ability, based on short narratives. It provides measures of reading accuracy, comprehension, and rate, and detailed diagnostic information about children's reading difficulties. This instrument is designed to set up a dialogue between teacher and student to explore ways of facilitating acquisition of literacy in its broadest sense. Students beyond the age of 12 years and some adults can be tested on appropriate passages to obtain a general level of reading ability and for diagnostic purposes. Data are available on standardized scores, validity, norms, and reliability

 AB ABSTRACT: Developed mainly for use in the initial screening of new trainees or employees, in situations where academic qualifications may not be available or may be absent. Can be used for employee selection for lower level positions or for screening individuals who need remedial help or training. Consists of two tests: literacy and numeracy. The literacy test measures reading comprehension and information seeking and writing ability (optional). The numeracy test covers calculating, approximating, and problem solving. Some of the major uses of the test are screening applications for a job or course, identifying individuals' training needs, doing pre- and post-evaluations, and providing background information for individuals in the process of self assessment.

AB ABSTRACT: Assesses literacy and numeracy skills in major areas of school curriculum. Assesses five basic skills: reading, language, numbers, measurement and space. For each skill, a set of skill levels or "bands" are defined. These skill levels show the level of achievement. Teachers can diagnose the individuals' strengths and weaknesses. Year 6 emphasizes the relevance of mathematics and language learning to everyday activities. Measurement and space items are covered in Year 6 only.

ETS TEST COLLECTION VIA INTERNET

The ERIC Clearinghouse on Assessment and Evaluation has mounted on its gopher site a database to help locate tests. This database can be used by accessing the gopher at the address: GOPHER.CUA.EDU. The ERIC/ETS Test Collection is located under: Special Resources/ ERIC Clearinghouse on Assessment and Evaluation/ Test Locator/.

To search the database, enter keywords from the title or descriptors. For example, if you would like to search for tests on oral language proficiency, you could type in all three words, or oral and proficiency. You may get slightly different results, but you will have information on a lot of tests to look at. If you know the title of the test, the best way to search is to use the main words in the title, not necessarily all of the words in the title. If you are looking for the Wechsler Intelligence Scale for Children-Revised, the most efficient way to search is with the words Wechsler, intelligence, and children.

INTRODUCTION TO THE ETS TEST COLLECTION

The Educational Testing Service (ETS) Test Collection database contains records on over 9,500 tests and research instruments. These records describe the instruments and provide availability information. The Test Collection encompasses virtually all fields from vocational interest inventories for adults to instruments that measure shyness or predict recidivism in released criminal offenders, to assessment of managerial style, as well as education-related achievement and aptitude tests. The test descriptions are indexed with ERIC Thesaurus terms for subject accessibility.

This is a joint project of ETS and ERIC_AE. ETS Library and Reference Services Division prepares the descriptions. ERIC_AE maintains the database and hosts the Search System. ERIC_AE has also begun to put ETS prepared test descriptions into the ERIC *Resources in Education* database. About 15 descriptions are added each month.

You may download individual and small groups of test descriptions and you may point to this service from any Gopher Site.

WHAT KIND OF TEST ARE DESCRIBED?

The Test Collection database collects a variety of instruments: achievement tests, aptitude tests, personality measures, attitude measures, career/vocational interest measures, occupational tests such as nursing or sales skills inventories. Many research instruments are collected as well as tests from commercial publishers.

WHAT INFORMATION IS AVAILABLE ABOUT THE TESTS?

The title, author, publication date and source appear in the record. An abstract describing the instrument, intended population, and uses accompanies the record. Subject terms give the age and grade level information as well as ERIC Thesaurus terms that describe the test.

DOES THE TEST COLLECTION DATABASE REVIEW THE TESTS?

No, other reference guides such as Mental Measurements Yearbooks, Tests: A Comprehensive Reference for Assessments in Psychology, Education, and Business, and Test Critiques distributed by Pro-Ed fill that role. You can search the tables of contents for the MMY and Test Critiques through the ERIC_AE Gopher Site.

ARE ALL THE TESTS IN THE DATABASE CURRENTLY IN PRINT?

No, some of the items are out of print. We suggest contacting the publisher for permission to use out-of-print materials. Phone numbers can be located using another menu option on the ERIC_AE Gopher Site.

WHERE CAN I SEE THE ACTUAL TEST INSTRUMENTS?

Availability information is provided in the records. Many colleges and universities have test collections in their libraries. Talk to you local librarian for more information.

WHAT IS TESTS IN MICROFICHE?

Tests in Microfiche is a subcollection of unpublished research instruments that are available for purchase in microfiche from the ETS Test Collection. The collection includes instruments appropriate for diverse populations (infants, learning disabled, adults, etc.) Each set spans a wide range of topics such as job satisfaction and attitudes towards school. More than 800 tests are available.

DOES THE TEST COLLECTION PROVIDE REFERENCE SERVICES?

No, the descriptive information in the database should help answer most questions people may have. And the publisher of the particular test is the most competent source of information. You can, however, route general inquiries to ERIC_AE@CUA.EDU.
