ABSTRACT

This report provides 31 charts showing trends in enrollment; transfer students; and ethnic and gender characteristics of students, faculty, and staff at Diablo Valley College (DVC), in California, up to fall 1992. Following a brief introduction highlighting statewide trends, charts are provided for the following areas: (1) DVC fall enrollments from 1984 to 1992; (2) student type (e.g., continuing, first-time, etc.), level of educational attainment, gender, part- and full-time status, ethnicity, and age for 1987-1992; (3) spring high school graduates, 1990 to 1992, highlighting graduates from the Acalanes, Mt. Diablo, and San Ramon school districts and percentages enrolled at DVC; (4) number of high school students tested and percent enrolled at DVC by district for 1991 and 1992; (5) DVC fall grade distributions, 1986 through 1991; (6) number of transfer students and destinations, 1986-87 through 1990-91; (7) the top ten community colleges with respect to numbers of students transferred, 1986-87 through 1990-91; (8) ethnic distribution of new faculty hires and all faculty, 1984-85 through 1992-93; (9) ethnic distribution of full-time and all employees, fall 1992; (10) gender distribution of new faculty hires, 1984-85 through 1992-93; (11) gender distribution of full-time employees, fall 1992; (12) average daily attendance (ADA) at DVC's main, Pleasant Hills, and San Ramon campuses, 1990-91; and (13) full year ADA/full time equivalency comparisons for the three sites, 1987-88 through 1991-92. DIABLO VALLEY COLLEGE FALL 1992

This report is about the enrollment patterns of students at Diablo Valley College which includes students at the Pleasant Hill campus and the San Ramon campus.

DVC continues to grow each year. For 1991 and 1992 growth has been at about 2% per year.

Even though there will be some enrollment changes starting in the spring 1993 because of increases in student fees all studies point to the fact that growth in the community colleges will continue.

The California Postsecondary Education Commission (CPEC) in their October 1992 report "Eligibility and Participation at California's Public Universities in the Year 2000" made some comparisons from 1986 to 1990 and then made some predictions about the year 2000.

- 1. The proportion of high school graduates eligible for freshmen admission to:
- * UC increased from 14.1% in 1986 to 18.8% in 1990.
- * CSU increased from 27.5% in 1986 to 34.6% in 1990.

This increase occurred for both men and women as well as each of the major racial and ethnic groups.

- 2. California elementary and secondary schools are growing. It is predicted that there will be a 45% increase in the number of graduates by the year 2000.
- 3. Assuming there is no change in the percent of high school graduates that will become UC and CSU eligible there will be an increase of 45.3% in the number of students who would be eligible to enter UC or CSU as freshmen.

The total cost of this increase in 1990-91 dollars for instruction, student services, and plant maintenance and expansion would be several billions of dollars. "Because the fiscal outlook for the State in general and for the support of its public universities in particular is quite pessimistic, expecting funding for a constant participation rate is unrealistic."

The students that cannot be accommodated at UC or CSU "may seek admission to independent California or out-of-state universities, they may alternatively seek placement at a California Community College." Private colleges and universities have room to accommodate many of the eligible students, but their cost is significantly more than the public institutions. This "coupled with declining student financial aid," will make the private schools "difficult choices for graduates from low-income and middle-income families."

If they choose to attend a community college it will exacerbate the demand because community colleges will also experience growth in their historical student population.

"Even if current eligibility and participation rates remain static -- a conservative estimate at best -- unless opportunities within the public segments are expanded as the numbers of eligible students grow, California's opportunity to invest in and subsequently benefit from this expansion in the potential productivity of its citizenry may be lost. Californians may increasingly opt to go out of state to continue their education. Moreover, if California is not willing or able to provide additional enrollment opportunities commensurate with the growth in the pool of eligible high school graduates, the loss of human capital and public revenues they would generate could be staggering. Yet, the fiscal realities of the 1990s indicate just such an outcome, requiring careful reconsideration of the means by which California can optimize the development of its human capital through its post-secondary institutions."

Will we be able to manage our growth effectively to minimize the negative effects this could have on our constituency?

The fall of 1984 was the last year of a six year enrollment decline that started with the passage of proposition 13 in 1979. There was also a \$30 million cut in community college funding in 1982, a \$100 million cut in 1983, and the implementation of student fees in 1984.

DVC implemented matriculation in the fall of 1990. That semester the growth was only 0.3%. But in 1991 and again in 1992 the growth was about 2%.

DVC has grown by 38% since 1984.

DIABLO VALLEY COLLEGE ENROLLMENT TRENDS FALL SEMESTER, FIRST CENSUS

	1984	1985	1986	1987	1988	1989	1990	1991	1992
Number Enrolled	16,843	17,111	18,992	20,087	20,980	22,265	22,327	22,804	23,196
Percent Change	-5.4%	1.6%	11.0%	6.8%	4.4%	6.1%	0.3%	2.1%	1.7%

Source: CR89 A:\CR89\enrol Lee Birdes# 10/29/

DEFINITIONS

Continuing: Students who were enrolled in spring 1992.

First Time: Students who never attended a post secondary institution.

First Time Transfer: Students who attended another post secondary institution and this is their first semester at DVC.

Returning: Attended DVC before but not in the spring 1992.

Returning Transfer: Attended DVC before went to another post secondary institution and now is back.

From 1991 the number of: Continuing students <u>decreased</u> by 5.3%.

First Time students increased by 15.7%.

First Time Transfer students increased by 2.7%.

Returning students increased by 3%.

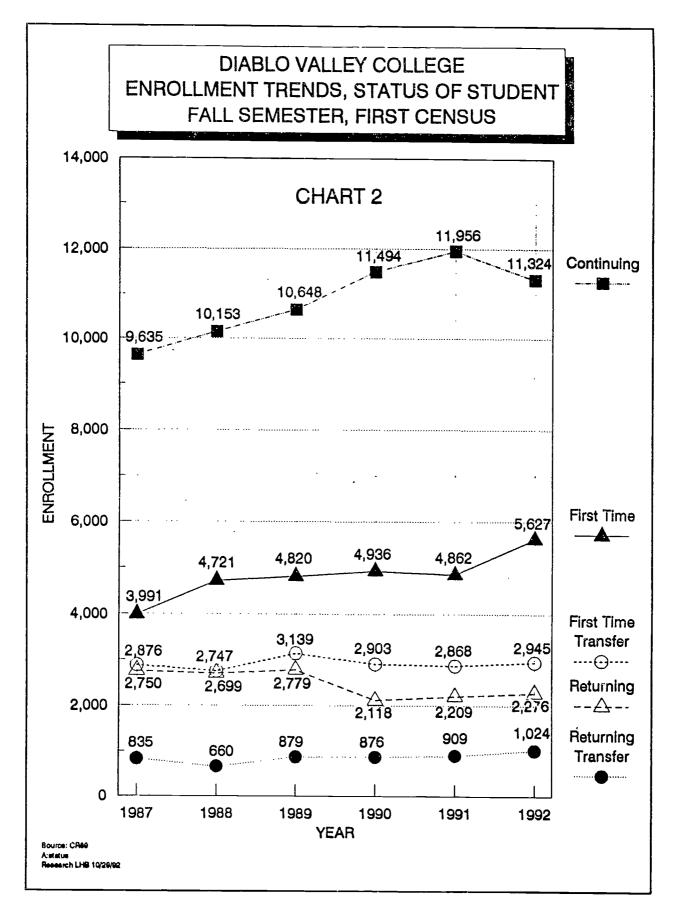

Returning Transfer students increased by 12.7%.

It is important to explore reasons why the number of continuing students decreased. We know many classes closed early and that some continuing students wait to enroll the first day of class.

Did students leave because they had reached their goal?

Further study is needed.

DEFINITIONS

Freshmen: students who have earned less than 30 units.

Sophomore: students who have earned 30 or more but less that 60 units.

Other Undergrad: students who have earned 60 or more units but do not have a degree.

High School: students who are also enrolled in high school.

Since 1989 the number of:

Freshmen students have <u>decreased</u> by 4.8%.

Sophomore students have increased by 20.1%.

BA Degree students have increased by 8.6%.

Other Undergraduate students have increased by 35.8%.

AA Degree students have increased by 18.5%.

High School students have decreased by 42.5%.

Because DVC has not been funded for all enrolled students, high school students have not been encouraged to enroll at DVC while still in high school.

This fall there has been:

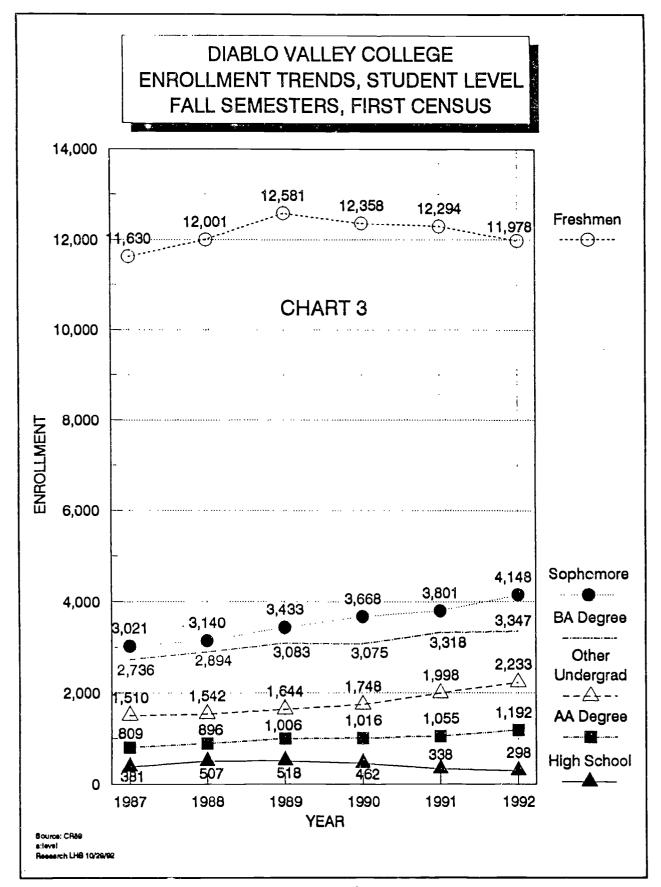

- * a 9.1% increase in Sophomores,
- * a 11.8% increase in Other Undergraduates, and
- * a 9.5% decrease in continuing students.

This indicates that much of the decline in continuing students was students who had completed less than 30 units.

Further study of the Freshmen students is needed.

Ĭi

Since 1974 there have been more women students at DVC than men.

DVC's enrollment declined after proposition 13 until 1985 when it started to increase. However, only the number of women students increased in 1985. The number of men did not increase until 1986.

Since 1987 the number of:

- * women has increased by 13.4%,
- * men has increased by 18.2%.

In 1987 women made up 56.5% of the students and in 1992 they made up 55.5% of the students.

The number of women decreased in the fall of 1990 which is when matriculation was implemented at DVC. Since 1990 the number of women has increased by 4.2% and the number of men has increased by 3.5%.

This fall the number of women increased by 3% and the number of men only increased by 0.1%.

CHART 5

DEFINITIONS

Full-time students: students who are enrolled in 12 units or more.

Part-time students: students who are enrolled in less than 12 units.

There has been little change in the ratio of full-time to part-time students at DVC since 1987.

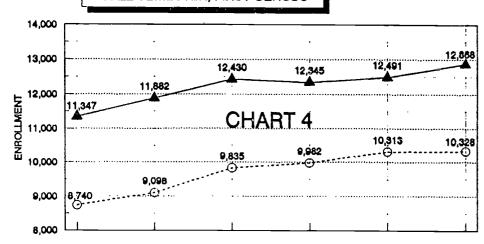

- * In 1987 32.7% of the students were full-time and in 1992 32.7% were full-time.
- * Since 1987 the number of full-time and part-time students has increased by 15.5%.

The number of part-time students decreased in the fall of 1990 which is when matriculation was implemented at DVC. Since 1990 the number of part-time students has increased by 2.8% while the number of full-time students has increased by 5.5%.

DIABLO VALLEY COLLEGE ENROLLMENT TRENDS, TYPE OF STUDENT FALL SEMESTER, FIRST CENSUS

PERCENT OF ENROLLMENT

YEAR	1987	1988	1989	1990	1991	1992
PART TIME	67.3%	67.9%	68.8%	67.8%	68%	67.3%
FULL TIME	32.7%	32.1%	31.2%	32.2%	32%	32.7%
			A.b a all			

In the fall of 1990, the first year of implementation of matriculation at DVC:

- * there was a 2.2% decline in the number of women who attend parttime and a 3.4% increase in the number of women who attend fulltime.
- * there was a 0.3% increase in the number of men who attend parttime and a 3.5% increase in the number of men who attend full-time.

In the fall of 1992:

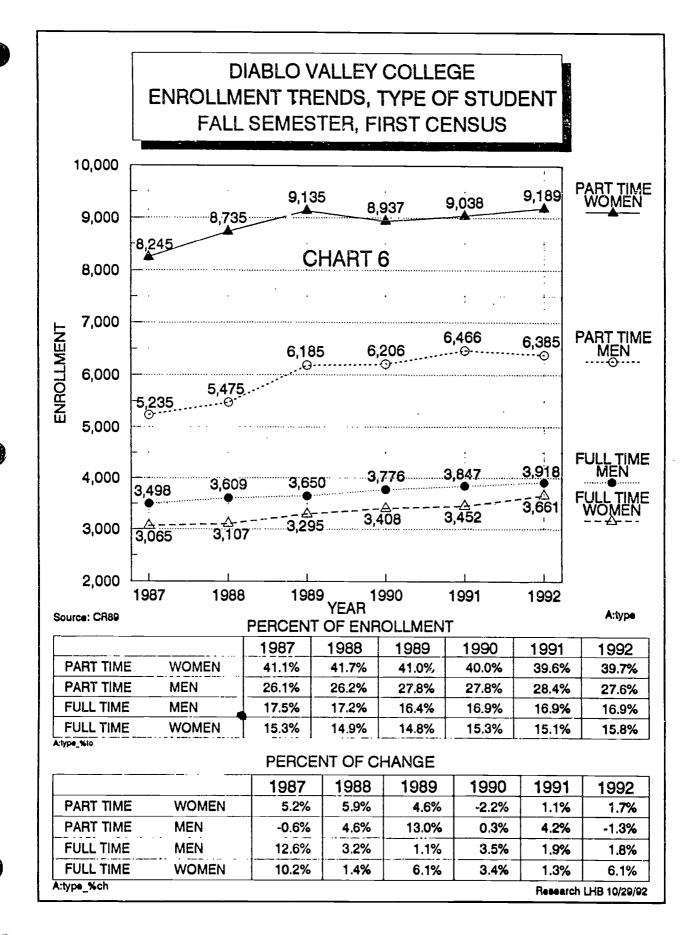

- * the number of women who attend part-time increased by 1.7% and the number of women who attend full-time increased by 6% for a total increase of 3%.
- * the number of men who attend part-time decreased by 1.3% and the number of men who attend full-time increased by 1.8% for a total increase of 0.1%.

Women who attend part-time is the largest single group of students at DVC. However, of the full-time students there are more men than women.

Since 1987 the number of:

- * women who attend part-time has increased by 11.4%.
- * women who attend full-time has increased by 19.4%.
- * men who attend part-time has increased by 22%.
- * men who attend full-time has increased by 12%.

This chart is separated into three groups; students who indicate they are white, students who indicate their ethnicity/race is different than white, and those who do not tell us.

The not reported (unknown) category decreased to 488 in the fall of 1990 but has increased in 1991 and 1992.

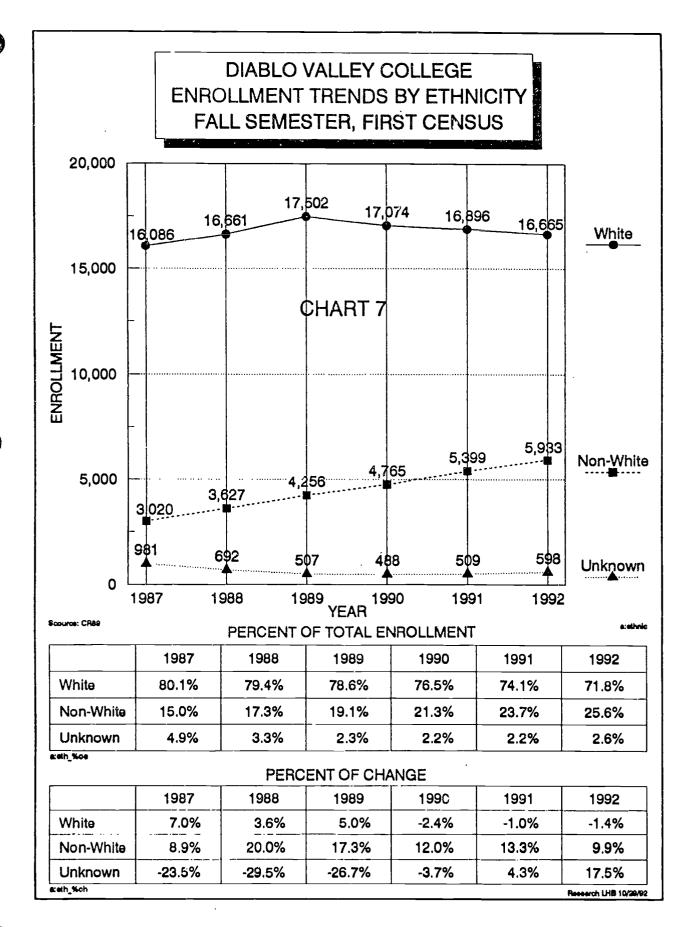

Since 1989:

- * the number of white students decreased by 4.8%.
- * the number of non-white students increased by 39.4%.
- * the number of not reported increased by 17.9%.

Since 1987

- * the number of non-white students increased by 96.5%.
- * the percent of white students changed from 80.1% of the students to 71.8% of the students.

The number of American Indian students reached a high of 176 students in 1989. In 1992 the number is almost what it was in 1987.

The other four groups have increased at a significant rate.

Since 1987 the number of:

* the Filipino students has increased by	426%,
--	-------

CPEC predicts that the number of high school graduates will increase from 1990 to the year 2000;

Asi in by 79%

African American by 13%

Latino by 123%

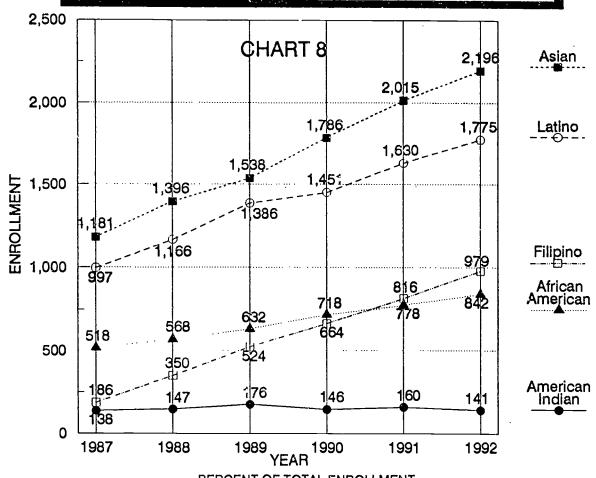

White by 9%

DVC's students will continue to become more diverse.

^{*} the African American students has increased by 63%.

DVC Matriculation and Research Office, 11/92

Up until the fall of 1990 students less than 20 years of age were the largest single age group attending DVC. Since that time it has been the 20 to 24 year age group.

* This fall the 25 to 29 age group declined by 4.5% after increasing for several years.

Since 1988;

- * the less than 20 age group decreased by 10.3%,
- * the 20 to 24 age group increased by 30.3%,
- * the 30 to 49 age group increased by 16.1%,
- * the 25 to 29 age group increased by 4.9%, and
- * the 50 and over age group increased by 27.5%.

Since 1988;

- * the less than 20 age group went from 29.2% of the students to 23.6% in 1992.
- * the 20 to 24 age group went from 25.2% to 29.6% of the students in 1992.
- * the 50 and over age group went from 6.9% to 7.5% of the students in 1992.

The mean age of all students is 28.8.

The median age (50% of the students are below and 50% are above) is 23.1.

- * The largest age group for women is 30 to 49. There are twice as many women in this age group as men.
- * The largest age group for men is 20 to 24.
- * There is almost twice as many women in the 50 & over age group than men.

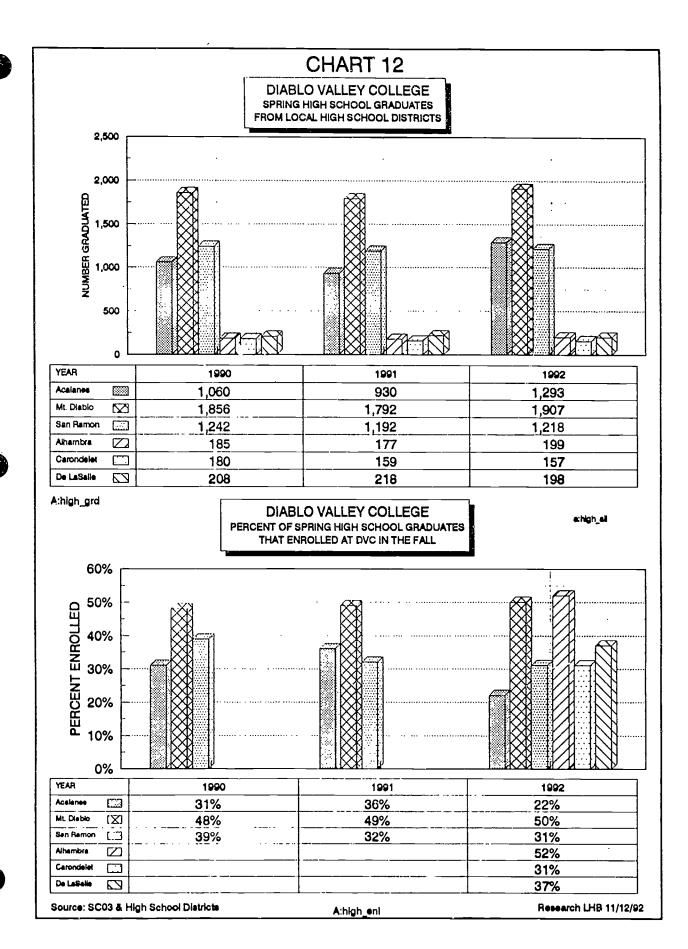

Four high school districts are considered DVC's feeder high schools; Acalanes, Alhambra, Mt. Diablo, and San Ramon. There are also several private high schools, the two largest are Carondelet and De LasSalle.

The data is not available for Alhambra, Carondelet, and De LaSalle on their students attending DVC in the fall of 1990 and 1991.

The largest district is the Mt. Diablo school district. It is also the district that gives DVC the largest number of students and for 1992 50% of the graduates enrolled in classes at DVC.

- * 52% of Alhambra's 1992 graduates enrolled at DVC.
- * The Acalanes district's participation rate dropped from 36% in 1991 to 22% in 1992.

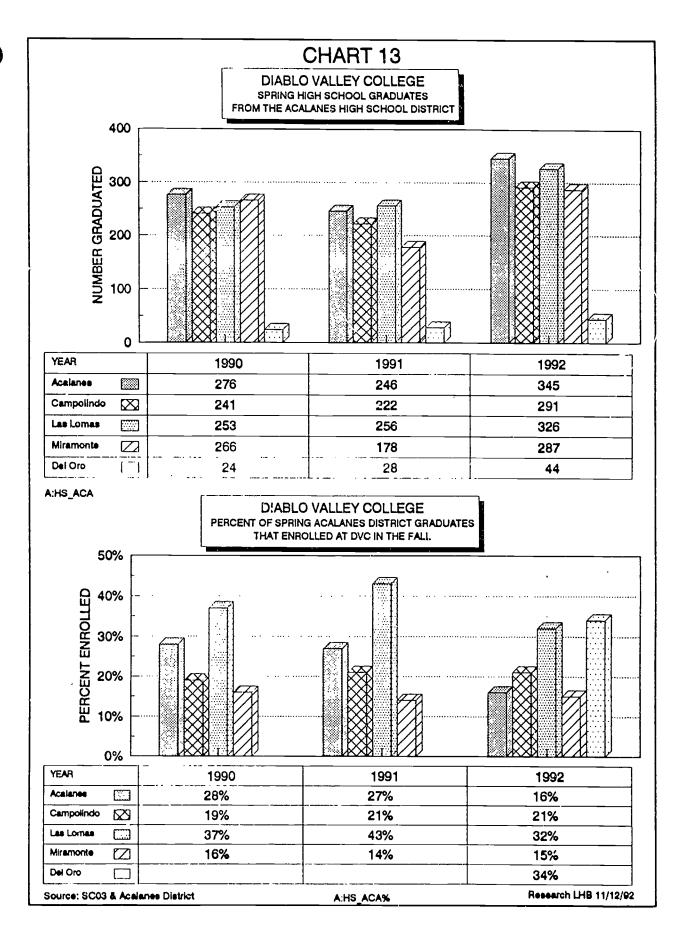

- * The Acalanes High School's participation rate dropped from 27% in 1991 to 16% in 1992.
- * The Los Lomas High School's participation rate dropped from 43% in 1991 to 32% in 1992.

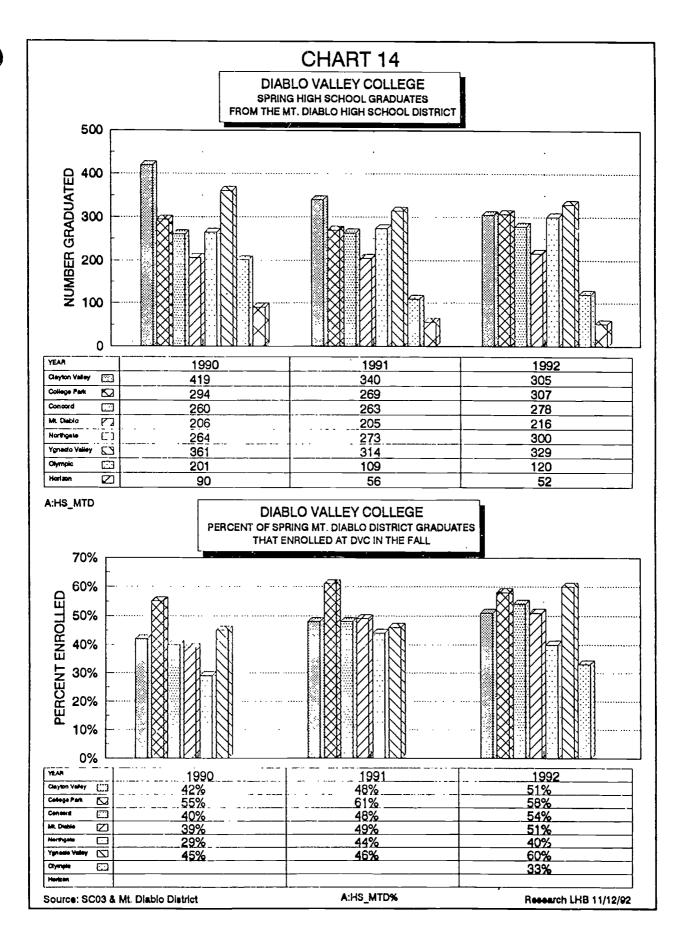

- * All of the Mt. Diablo district high schools have over a 50% participation rate except for Northgate which was 40% in 1992.
- * Northgate's 40% participation rate is significantly higher than any of the Acalanes district high schools.
- * Ygnacio Valley has a 60% participation rate.

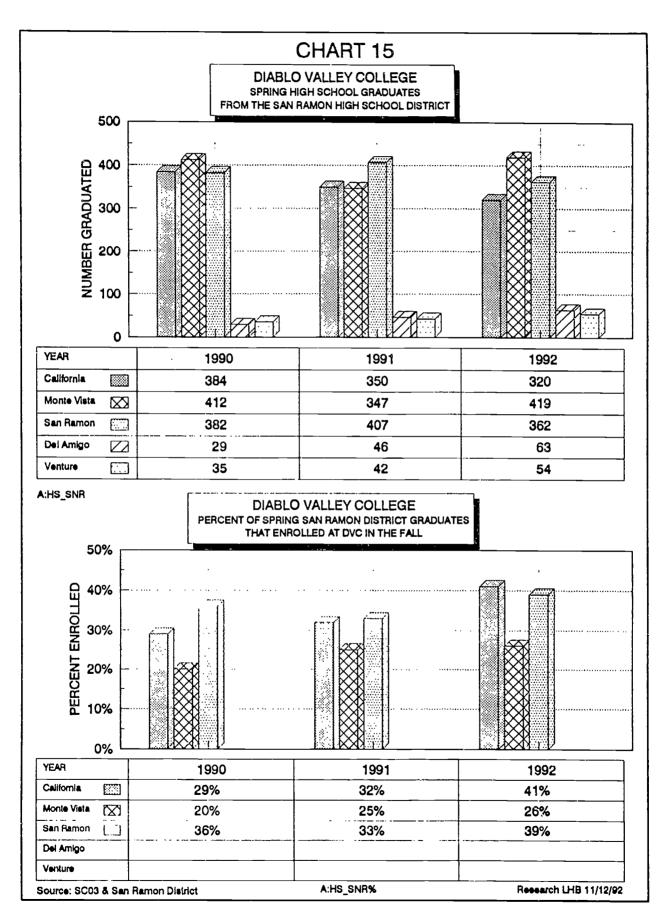

- * California high school's participation rate increased from 29% in 1990 to 41% in 1992.
- * Monte Vista's participation rate increased from 20% in 1990 to 26% in 1992.

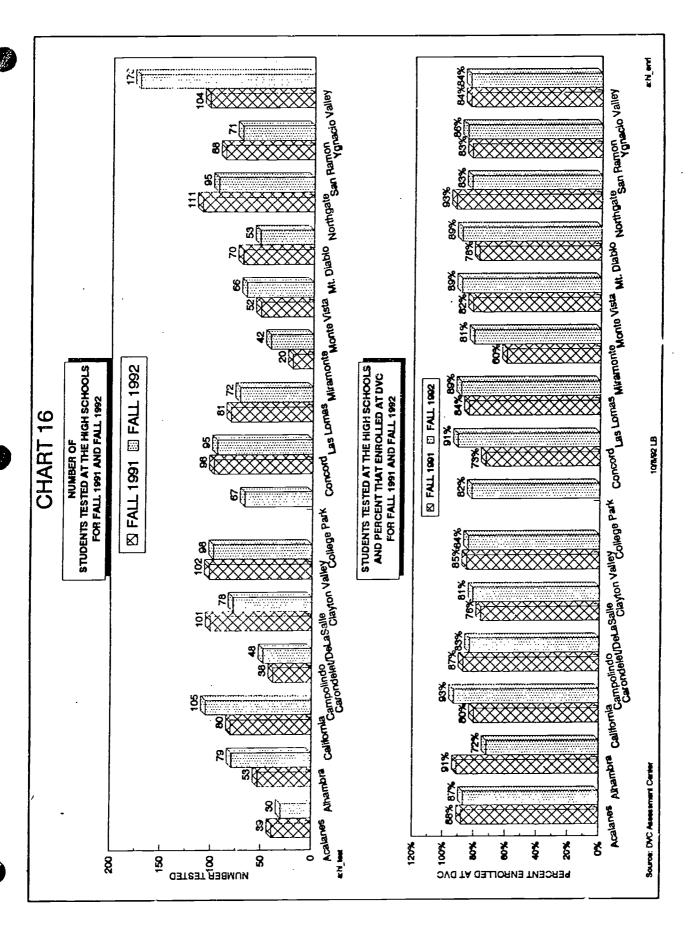

Starting in the spring of 1991 advisory placement testing was done at the local high schools for students who might attend DVC in the fall semester.

In 1991 College Park High School requested that their students be tested at DVC. In 1992 they requested that the test be given on their campus.

Except for Alhambra, more than 80% of the students that are tested at the high schools in the spring enroll in classes at DVC in the fall.

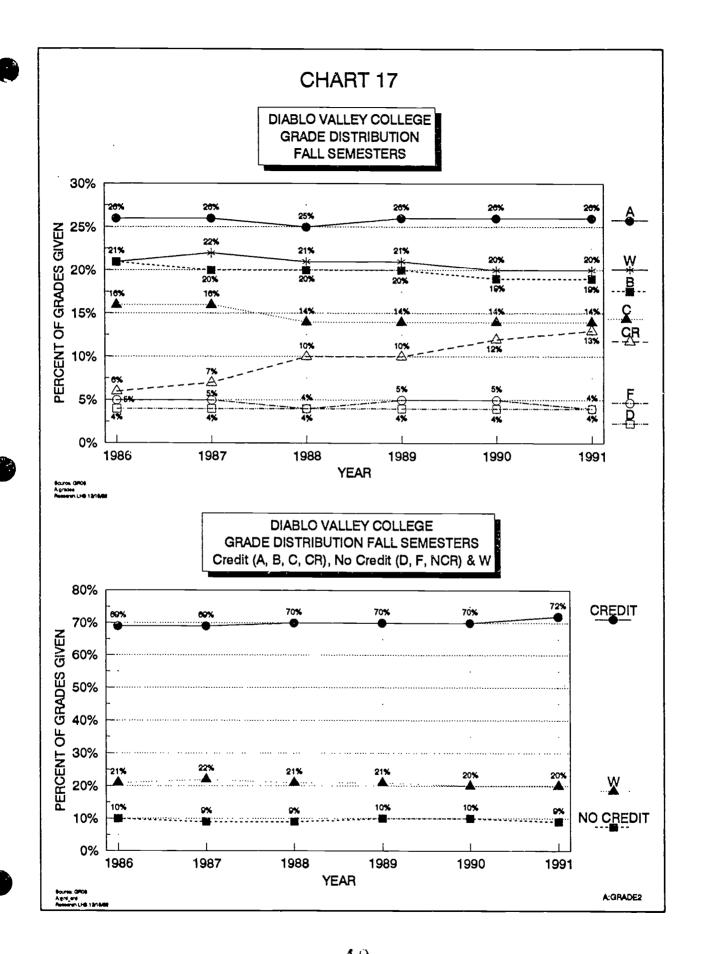

The grade distribution charts are through the fall of 1991. The data for the fall of 1992 will not be available until the end of January.

The percent of A's, D's, F's, and W's has changed little since 1986. However, the percent of B's and C's has decreased by two percentage points. The decrease was picked up by the increase in the percent of CR grades students received.

When one looks at whether students received credit, no credit, or a W little change in the distribution has occurred since 1986.

- * DVC's number of transfers has increased every year since 1986-87.
- * DVC's total number of transfers increased by 21.3% since 1986-87.
- * DVC's number of transfers to UC increased by 60.1% since 1986-87.

In the 1990-91 academic year Diablo Valley College was again the number one transfer community college in California.

However, DVC is not the largest. Only American River College and Fullerton have smaller enrollments than DVC in this group of top ten.

TOP TEN COMMUNITY COLLEGE TRANSFER SCHOOLS TO UC'S AND CSU'S

FULL YEAR 1990 - 91

	UC TRANSFERS	CSU TRANSFERS	TOTAL ENROLLMENT

9/29/92 LB

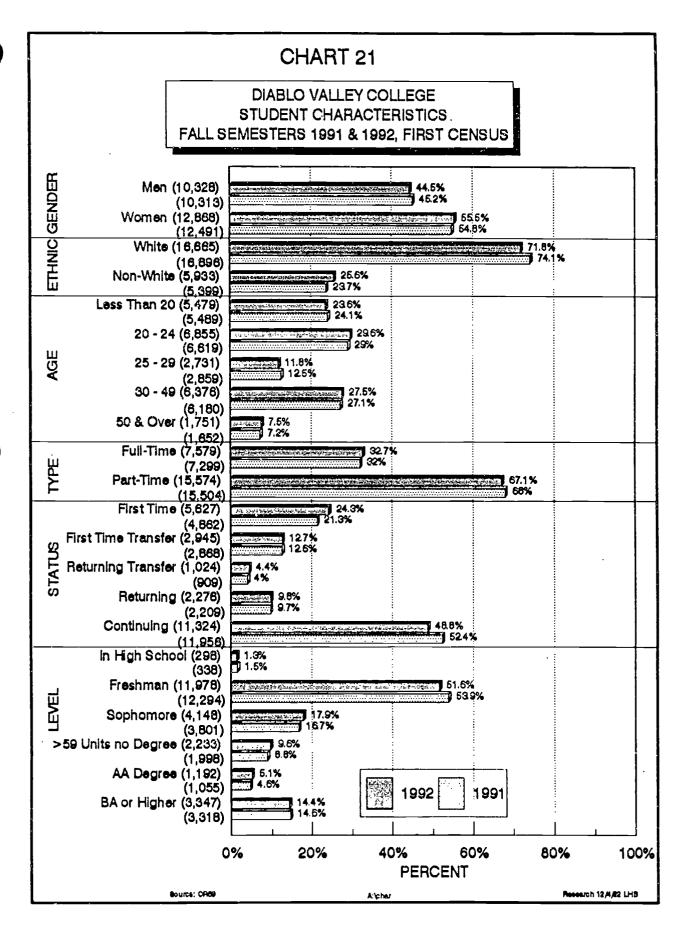

In 1986-87 and in 1987-88 DVC was second in the number of transfers to UC and CSU. However, DVC was first in the number of transfers to UC. Since that time DVC has been first in the total number of transfers to UC and CSU.

This chart provides a quick reference of several of the indicators.

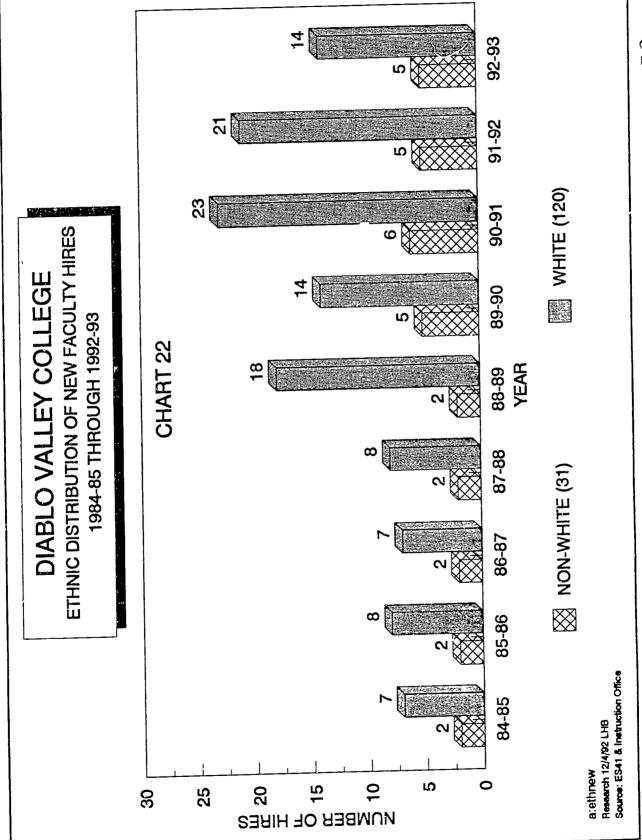

In the fall of 1992 there were 289 full-time faculty.

Since the 1984-85 academic year DVC has hired 151 full-time faculty. This is 52% of the full-time faculty at DVC.

About 21% were non-white.

ERIC Full feat Provided by ERIC

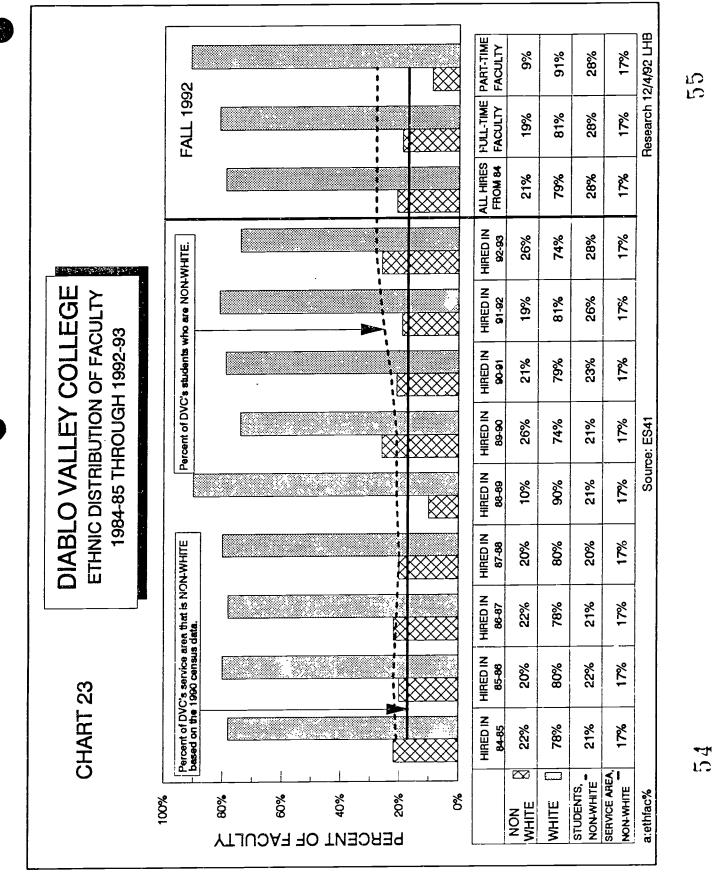

Since 1984 about 20% of all full-time faculty positions have been filled by individuals who are considered to be non-white. In 1988-89 only 10% were non-white but in 1989-90 and in 1992-93 26% were non-white.

The percent of non-white students at DVC has been about 21% of the enrolled students until the fall of 1990 when it increased to 23% and has been increasing ever since. In the fall of 1992 it was 28%.

In the fall of 1992, 19% of the full-time faculty were non-white and 28% of the students were non-white. However, the 1990 census indicates that 17% of DVC's service area is non-white.

In the fall of 1992 only 9% of the part-time faculty were non-white.

This chart depicts the number of non-white and white full-time employees at DVC as of the fall of 1992.

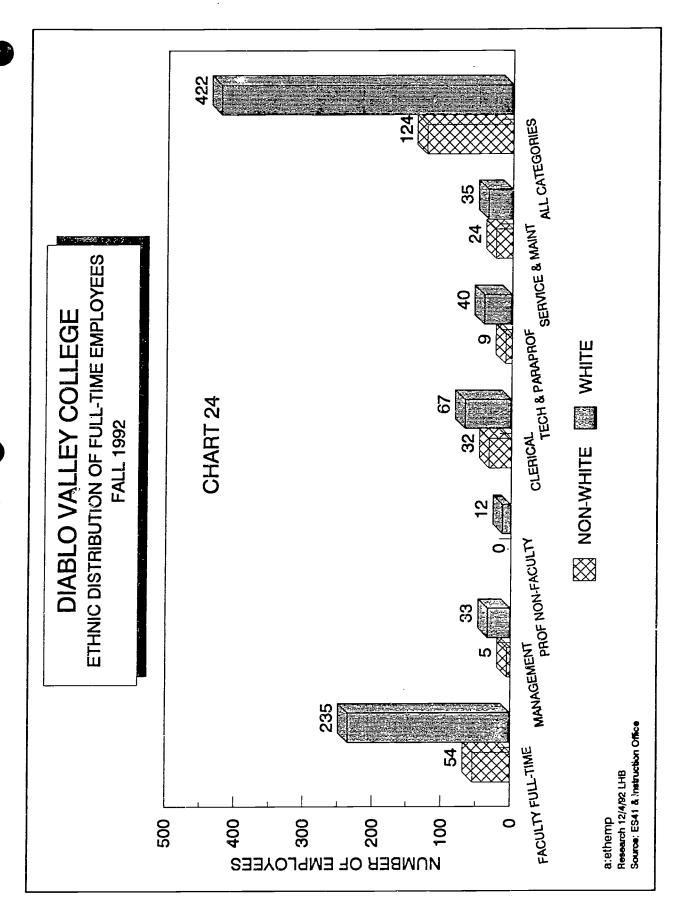

PROF NON-FACULTY is a category of employees who are certificated but not faculty such as: transfer center coordinator and learning and physical disabilities specialists.

Full-time faculty make up 53% of all full-time employees at DVC and 44% of all non-white full-time employees.

- * 37% of the full-time faculty are women.
- * 96% of the full-time clerical employees are women.
- * 21% of the full-time service and maintenance employees are women.
- * 53% of all managers at DVC are women.
- * 69% of all full-time technical and para-professional staff are women.
- * 56% of DVC's fall 1992 enrollment were women and according to the 1990 census 51% of the population in DVC's service area are women.

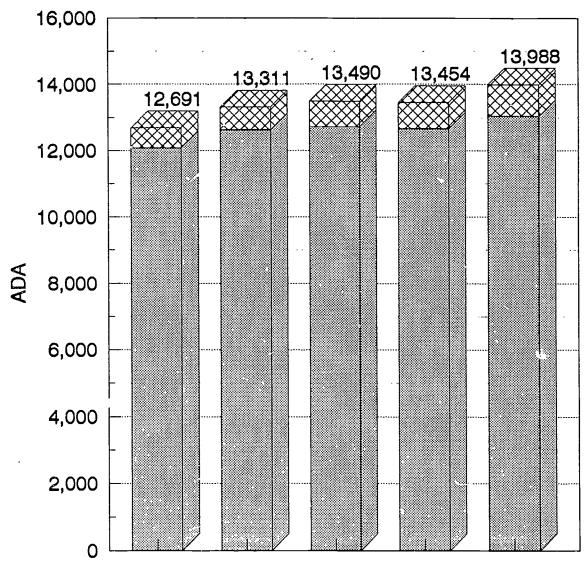

Funding for Diablo Valley College has been based on average daily attendance (ADA). DVC's ADA has been increasing every year except in 1990-91 when there was a slight decrease from the previous year.

The ADA decrease in 1990-91 only occurred at the Pleasant Hill campus.

The San Ramon campus' (CHE) ADA has increased by 52% since 1987-88.
