#### **ABSTRACT**

This is the fourth annual report on Tennessee's progress toward meeting statewide higher education goals delineated in the 1989 "Tennessee Challenge 2000" program. For the first time it also includes data on independent colleges and universities within the state. The report outlines the six goals, specific benchmarks for each goal, and the progress toward such goals and benchmarks accomplished over the last several years. The goals stipulate that by the year 2000, Tennessee will: (1) be among the leading Southern states in providing college education to its citizens; (2) be a national leader in improving the quality of instructional programs; (3) have colleges and universities ranked among the nation's best in teacher preparation; (4) have improved both the quality and quantity of research and public service at higher education institutions; (5) have colleges and universities able to compete for the very best faculty and staff; and (6) allocate sufficient resources to higher education institutions to allow them to meet the goals of the Tennessee Challenge 2000 program. The report contains 21 appendixes, which present data on enrollment trends, degrees awarded, persistence-to-graduation, transfers, admissions, standardized test scores, accreditation, job placement, and expenditures. Executive Summaryi
Introductioniii
Goal A: Educational Attainment
Goal B: Quality and Performance8
Goal C: Teacher Education
Goal D: Research and Public Service
Goal E: Faculty and Staff
Goal F: Resources
Appendices A - U

## DURING THE PAST TWO YEARS (1991-92 THROUGH 1992-93), THE FOLLOWING PROGRESS AND CONTRIBUTIONS HAVE BEEN MADE IN TENNESSEE HIGHER EDUCATION:

- ♦ Enrollment in public institutions has grown by 4.45%
- Enrollment in independent institutions has grown by 1.75%
- Graduate and professional school enrollment in public institutions has grown by 11.22%
- Graduate and professional school enrollment in independent institutions has grown by 7.05%
- ◆ The need for any remedial or developmental coursework by entering college freshmen in public institutions has declined by almost 2% (from 57.3% to 55.1%).
- The need for significant remedial or developmental coursework (more than one course) by entering college freshmen in public institutions has declined by almost 8% (from 38% to 30.1%).
- ◆ Persistence-to-graduation rates at public universities has risen to 43.28% and is at national averages for public institutions.
- Persistence-to-graduation rates at two-year public institutions has risen by 4.5% and stands at 29.4%.
- Persistence-to-graduation rates at independent institutions is 52.3% and is at national averages for independent institutions.
- Enrollment of African-American students in undergraduate programs in public institutions has risen to 15.5% and is very near population levels of the state.
- Transfer rates of students who graduate from public two-year institutions into public universities has risen to almost 50%.
- Transfer rates of African-American students who graduate from public two-year institutions into public universities has risen to 47.5% and is very near the rate of transfer of White students.
- Transfers from two-year public institutions to independent colleges and universities increased 49% between 1990-91 and 1992-93.

### Quality and Performance

- Scores on most licensure examinations remain at or above national averages.
- Purchases of library volumes has risen by 72.4% since 1989-90.

5

- Over 90% of major programs at public universities are accredited.
- 100% of major programs at public two-year institutions are accredited.
- Placement rates of vocational graduates at area vocational/technical schools is 93%
- Placement rates of vocational graduates at public two-year institutions is 94.2%

#### Teacher Education

- ♦ There has been a 13.9% increase in total graduates from teacher education programs at public institutions.
- ♦ There has been a 44.4% increase in African-American graduates from teacher education programs at public institutions.

#### Research and Public Service

- Research expenditures at public institutions have risen by over 19%; public service expenditures by 22.6%.
- Research expenditures at independent institutions have risen by 7.72%; public service expenditures by over 13%.

In the original *Tennessee Challenge 2000* goals, the figure of 24,000 was projected as the average enrollment over four quarters. A more accurate gauge of AVTS enrollment has been developed, a total unduplicated headcount of an entire year's enrollment. Based on this change, the goal has been changed to 35,000 students by the year 2000.

Due to the change in methodology of calculating two-year college completion rates, explained in the body of the report, this goal has been reset to 35% of students within six years of enrollment.

### Tennessee Challenge 2000

Responding to an Act of the General Assembly in 1989, the Tennessee Higher Education Commission developed goals for public higher education in the state for the final decade of the 20th century. The Commission determined that an annual report, titled *Tennessee Challenge 2000*, would be made to the legislature of progress toward those goals. In the Second Session of the 97th General Assembly, an act was passed (Public Chapter 739) which expanded the *Tennessee Challenge 2000* report. Incorporated in this publication is the fourth annual report on progress toward the goals of *Tennessee Challenge 2000*.

### Report on the Contributions of Independent Higher Education

In 1993, an Act of the General Assembly directed the Commission to produce a triennial study of Tennessee's independent degree-granting colleges and universities which are accredited by the Commission on Colleges of the Southern Association of Colleges and Schools. The purpose of the study is to provide information to the **Tennessee Higher Education Commission** to assist it in incorporating the contributions of these independent higher education institutions into its statewide Master Planning efforts.

### A Combined Report

After evaluation of the Act, and after discussions with representatives of the Tennessee Independent Colleges and Universities, Commission staff determined that the results of the study could be most effectively incorporated into the annual *Tennessee Challenge 2000* report. Commission staff have recommended that, although the studies will focus on a three-year cycle of research and assessment, the results should be reported annually. This will allow a continuous and uninterrupted flow of information to the Legislature, Administration, and public of the State of Tennessee concerning the accomplishments of both of these components of higher education in the state. In future reports, information relating to other sectors of postsecondary education in the state will be incorporated into the annual report.

It should be noted that data for public institutions referred to in these reports are drawn from the state's higher education data systems and is carefully edited and audited. Financial data are drawn from records of the Commission and the Department of Finance and Administration. Information for independent colleges comes from several sources. Some of it is supplied by the Tennessee Independent Colleges and Universities and comes from surveys of self-reported data. Other information is drawn from IPEDS (Integrated Postsecondary Education Data Systems) information collected by the U.S. Department of Education.

By the year 2000, Tennessee will be among the leading Southern states in providing college education to its citizens.

#### Benchmarks:

1. By the year 2000, the combined headcount undergraduate enrollment of public higher education institutions in Tennessee will be over 206,000 students.

Figure 1 presents the overall trend of undergraduate enrollment in public and independent higher education in Tennessee over the past three years. The growth of over 7,000 students in public institutions since 1991 continues a strong upward trend which

Figure 1: Undergraduate Enrollment

			1	% Change
1	1991	1992	1993	1991-1993
Public	163,882	170,409	171,170	4.46%
Independent	38,308	38,250	38,979	1.75%
Total	202,190	208,659	210,149	3.94%

began five years ago. The Fall 1993 undergraduate enrollment is over 3,000 students beyond initial projections made when the goals were set in 1989. Undergraduate enrollment in public institutions has increased over 17% since 1989. Since 1989, undergraduate enrollment in independent institutions has increased 3.8%. These data do not include Area Vocational/Technical School enrollments which are addressed in another section of this report.

Figure 2: Enrollment of Tennessee Students

		% of								
	1989	Total	1990	Total		Total		Total		Total
Public Inst.	149,658	87.29%	157,016	87.54%	165,501	87.91%	172,316	88.39%	174,316	88.07%
independent inst.	21,801	12.71%	22,346	12.46%	22,764	12.09%	22,643	11 61%	23,613	11.93%
Total	171,459		179,355		188,265		194,959		197,929	

Figure 2 reveals the distribution of Tennessee students between public and independent institutions in the state. The percentage of Tennesseans enrolled in public institutions increased from 87.3% in Fall 1989 to 88.1% in Fall 1993. Of 46,392 students enrolled in independent institutions in Fall 1993, 23,613 (50.9%) were Tennessee residents. Of 193,342 students enrolled in public institutions in Fall 1993, 174,316 (90.2%) were Tennessee residents.

Figure 3: Undergraduate Enrollment by Institution Type

Туре	1991	% of	Ī	% of Total	1993	% of Total	
Public Universities	92,567	45.78%	94,262	45.18%	93,749	44.51%	1.28%
Public Two Year	71,315	35.27%	76,147	36.49%	77,421	36.84%	8.56%
Independent Universities	36,970	18.28%	36,929	17.70%	37,944	18.06%	2.63%
Independent Two Year	1,338	0.66%	1,321	0.63%	1,035	0.49%	-22.65%
Totals	202,190	•	208,659		210,149		3.94%

Figure 3 depicts the shift in enrollment between public universities and two-year institutions which has occurred in recent years. Enrollment growth in public two-year institutions has been at rates 6 to 7 times those of public universities.

What appears to be an opposite trend in independent institutions is a result of the conversion of two former two-year institutions to four-year institutions. Actual distribution between the two types of institutions has remained stable in the independent sector.

Following a national trend, the rate of enrollment of female students in public undergraduate institutions has increased at

Figure 4: Undergraduate Enrollment by Gender for Public Institutions

							% Change in
		% of		% of		% of	Enrollment
Gender	1991	Total	1992	Total	1993	Total	1991-1993
Female	90,588	55.28%	95,505	56,04%	98,150	56.17%	6.14%
Male	73,294	44.72%	74,904	43.96%	75,020	43.83%	2.35%

a faster rate than that of male students. This trend is seen in Figure 4. The enrollment of female students increased 6.14% between 1991 and 1993 while enrollment of male students increased only 2.35% during that period.

The same phenomenon has not been reflected in Tennessee's independent colleges. Increases in enrollment of male and female students have been very similar between 1991 and 1993 as can be seen in Figure 5.

Figure 5: Total Enrollment by Gender for Independent Institutions

Gender	1991	% of Total	1992	% of Total	1993	% of Total	% Change Enrollment 1991-1993
Female	24,508	54 18%	24,714	54 67%	25,148	54 21%	2.61%
Maie	20,725	45.82%	20,488	45.33%	21,244	45.79%	2.50%

A complete listing of enrollments in all Tennessee public and independent higher education institutions in Fall 1993 is found in Appendix A. A chart depicting the trend in enrollments during the past ten-years may be found in Appendix B

2. By the year 2000, 50% of recent high school graduates will enroll in public higher education institutions in Tennessee.

One important means of improving the level of education of Tennessee's citizens is to encourage more high school graduates to attend college. Figure 6 indicates trends over the past three years in the enrollment of recent high school graduates.

The statistics found in Figure 6 are derived through indirect statistical methods. The figures are rough estimates since we do not yet have an exact means of

Figure 6: Enrollment of Recent H.S. Graduates in Tennessee Public Colleges

	1990-91		1991-92			
I	H.S. Grads	Enrollees	H.S. Grads	Enrollees	H.S. Grads	Enrollees
Number	42,515	17,231	42,678	17,507	42,003	17,413
Percent	•	40.53%		41.02%		41,46%

tracing Tennessee high school graduates into college enrollment. Instead, the number of Tennessee residents under the age of 19 is compared with the previous year's number of high school graduates. The resulting number does not include graduates of independent secondary schools and makes no correction for those students who enroll in out-of-state institutions. It is projected that, toward the end of the decade, administrative tracking systems being developed by the Tennessee Department of Education will allow improved linkage with the Student Information System of the Tennessee Higher Education Commission. Estimates in past years by the Department of Education suggest that around half of Tennessee's high school graduates enroll in a college in the fall term following their graduation. Tennessee Higher Education Commission staff estimate that 5% to 10% of these students enroll in out-of-state institutions or in non-public institutions within the state. It is not known how many others enroll in any college in later years. This number is not inconsiderable since today's high school graduates may work for several years before pursuing further education.

While the percentages in Figure 6 are only estimates, they are adequate to establish a trend. It should be noted that the percentage has increased slightly each of the past two years.

3. By the year 2000, graduate and professional enrollment in public universities will be adequate to meet the human resource needs of business, industry, government, education, and research in Tennessee.

Graduate and professional school enrollment in Tennessee's public institutions, as shown in Figure 7, has increased by more than 11% since 1991. Graduate and professional school enrollment has grown by over 7% in Figure 7: Graduate & Professional School Enrollment

				% Change
	1991	1992	1993	1 <del>991-199</del> 3
Public .	19,936	20,983	.22,172	11.22%
independent	6,925	7,108	7,413	7.05%

independent colleges and universities and 25% of Tennessee's graduate and professional school enrollment is at independent institutions. Appendix C of this report gives a listing by academic area, and by institution, of enrollments in public graduate and professional schools.

4. By the year 2000, headcount enrollment in area vocational/technical schools will reach 24,000 students per year.

As revealed in Figure 8, both headcount and FTE enrollments in Tennessee's area vocational/technical schools have decreased between 1991 and 1993. This decline in enrollment continues to be of concern to the Commission since the programs offered in the area schools provide critical skills to Tennessee citizen

area schools provide critical skills to Tennessee citizens and these skills will prove vital to the economic viability of the state as it moves into the next decade.

5. By the year 2000, enrollment of students over the age of 25 in public universities and colleges in Tennessee will increase to 50%.

Enrollment patterns in the various age groups fluctuate from year to year. Currently, around 35% of college students are over the age of 25. These enrollment patterns are controlled by various factors, not the least

Figure 9: Undergraduate Enrollment by Age Group for Public Institutions

Group	1991	% of Total	1992	% of Total		% of Total	
Under 25	102,697	62.67%	105,148	61.70%	110,450	64.53%	7.55%
25 to 30	24,615	15.02%	26,045	15.28%	23,313	13.62%	-5.29%
31 to 45	30,733	18.75%	32,697	19.19%	31,526	18.42%	2.58%
Over 45	5,837	3.56%	6,519	3.83%	5,881	3.44%	0.75%

of which is economic climate. In times of recession, citizens in the 20 to 30 year age group are most often affected by fluctuations in employment opportunities. When the economy moves out of a recessionary period, it is this group which first returns to the work force. Since the state's economy is in a period of recovery from the most recent recession, it is not surprising that the enrollment of students between the ages of 25 and 30 has decreased almost 12% between Fall 1992 and Fall 1993. The master plan for Tennessee higher education, Higher Education Serving Tennessee, identified the student aged 25 to 45 as a key element in preparing Tennessee with skills necessary for a healthy economy. Serving this age group continues to be a high priority for public higher education. Figure 9 depicts enrollment trends in four age groups from 1991 through 1993.

Enrollment patterns for independent colleges tend to give slightly more emphasis to traditional college-age (18 to 25) groups. Tennessee is no exception; almost 70% of enrollment in independent colleges and universities in the state is under the age of 26. Figure 10 shows the Fall 1993 enrollment by age group in independent institutions.

Figure 10: Enrollment by Age Group for Independent Colleges

Age Group	1993	% of Total
Under 26	31,689	68.31%
26 to 29	3,297	7.11%
30 to 45	5,189	11.19%
46 and over	1,547	3.33%

<sup>&</sup>lt;sup>1</sup> In the original Tennessee Challenge 2000 goals, the figure of 24,000 of 24,000 was projected as the average enrollment over four quarters. A more accurate gauge of AVTS enrollment has been developed, a total unduplicated headcount of an entire year's enrollment. Based on this change, the goal has been changed **13,000 students** by the year 2000.

6. By the year 2000, public universities in Tennessee will graduate at least 51% of students within six years of enrollment.

Benchmark 6 and 7 both address persistence-to-graduation data and the reports on both are combined following Benchmark 7.

7. By the year 2000, two-year institutions in Tennessee will graduate at least 25% of students within three years of enrollment.

Commission staff have done considerable research into methods of calculating persistence-to-graduation statistics for Tennessee's public institutions. In developing the statistics for this part of the report, a cohort is identified as all students enrolling as first-time, full-time, degree-seeking students in a particular Fall term. Graduation records for all state institutions are compared with the cohort for a six-year period. Any record of a successful completion is found and credited to the institutions which initially enrolled that student. Some examples: A student enrolling at a university or two-year institution who completes a degree at that institution is counted as a successful completion. A student enrolling at a two-year institution who transfers to a university and later receives a degree there is counted as a successful completion.

Formerly, calculation of persistence-to-graduation statistics for two-year institutions were traced only for a three-year period. This three year span is reasonable for students who enter college relatively well prepared and who are able to attend full time. However, most students in Tennessee public two-year institutions are employed and only able to attend college on a part-time basis. Over 70% of students who ultimately graduate from such schools begin as part-time students. In addition, increased admissions requirements at universities and open-door admissions policies at two-year institutions have resulted in more students enrolling at two-year institutions who need moderate or extensive remedial or developmental coursework to prepare them for college-level work. Because of these factors, the methodology of calculating two-year college completion rates has been altered to allow for tracking students over six years after initial matriculation. It must be recognized that completion statistics are, at best, estimates of the actual rates. Large numbers of students are not included in the cohort which is traced to completion. Those ignored by current calculations include any student who first enrolls as a part-time student or any student who begins at an independent institution or an out-of-state institution and who transfers to a Tennessee public institution.

Figure 11 depicts completion statistics for public universities and two-year institutions for the past three years and the most recent statistics for independent institutions. Readers will note a slight increase in public universities' completion rates and a sharp increase in

Figure 11: Persistence to Graduation (Percent)

0	•		•	
		1985-91	1986-92	1987-93
Public Universities	•	43.06%	42.92%	43.28%
Independent Universities	•		· •	52.30%
Public Two-Year Institution	18	25.00%	25.21%	26.87%
Indep. Two-Year Institution	18	1	. i	47.10%

completion rates of public two-year institutions. It is likely that these increases are due to the more stringent admissions standards at universities, more rigorous high school completion requirements, and the increased success of developmental programs in all the public institutions. Great care must be taken in interpreting graduation statistics. It has been suggested that the reverse of these statistics can be regarded as a "drop-out" rate. That is not the case since graduation statistics are very limited in that they trace a particular cohort of students (full-time, first-time, degree-seeking) and trace them to completion. The statistics do not reflect other successful completions and/or transfers. Completion rates for independent institutions, as shown in Figure 11, compare favorably with national averages for such institutions. Much research has been done on factors with affect persistence-to-graduation rates. Among the most important factors are selectivity of admissions criteria, residence status of students, accessibility

Due to the change in methodology of calculating two-year college completion rates, explained in the body of the report, this goal has been reset to 35% of students within six years of enrollment.

of faculty by students, and increased involvement of students in campus activities. Figure 12 shows completion rates at the state's area vocational/technical schools. Appendix D presents detailed information for all state institutions.

Figure 12: Persistence at Area Vocational-Technical Schools

Much research has been done to determine factors which influence graduation rates and one which seems to bear very strongly on these rates in an institution's ability to retain students from their initial enrollment as freshmen into their sophomore year. Most of students Figure 13: Retention from Freshman to Sophomore Year Freshmen Fall '93 Fall '92 Percenta 9,181 Public Two-Year Institutions 5,568 10,427 Public Universities 12,963 80.44 22,144 15,995 72.23 All Public Institutions 5,707 72.77 All Independent Institutions 7,843

52,131

who fail to graduate drop-out during the first year of college. Some of these students will return at a later date and these students are often successful at that stage. Figure 13 tracks student retention in Tennessee by identifying all full-time, first-time freshmen in Fall 1992 and identifying how many of that cohort were still enrolled in college in Fall 1993.

Figures 14 and 15 present the numbers of graduates in all public and independent colleges in the state.

Figure 14: Degrees and Other Awards from Public Institutions, 1992-93

	Certif.	Assoc.	Bach.	Prof.	Mast.	Ed.S.	Doct.	Total
Universities	99	519	13,499	644	3,597	103	447	18,908
Two-Year Schools	976	4,855				1		5,831
Total	1,075	5,374	13,499	844	3,597	103	447	. 24,739

Figure 14 includes the most recent year for public institutions, 1992-93. The increase in the total number of awards from the previous year was 6.5%. This increase was driven by a 6.3% increase in baccalaureate awards, a 7.8% increase in associate degrees, and a sharp 36% increase in certificate awards at two-year institutions. Appendices E, F, and G give detailed listing of awards by discipline area in state universities, two-year institutions, and area vocational/technical schools.

Figure 15 includes the most recently available year for independent institutions, 1989-90. Although it is impossible to make exact comparisons for

Figure 15: Degrees and Other Awards from Independent Institutions, 1989-90

	Assoc.	Bach.	Prof.	Mast.	Ed.S.	Doct.	Total

Two-Year Schools	372		1	1	1		· 372
Total	681	6,145	647	1,433	0	246	9,152

statistics of different years, it is important to note that independent colleges and universities in the state produce a number of professional degrees. These awards include professional degrees in Theology which are not present in public institutions. Efforts are underway to present more recent award data from independent institutions in future reports. Independent institutions accounted for 14% of associate degrees, 34% of bachelor's degrees, 30% of master's degrees, 50% of professional degrees, and 31% of all degrees awarded in 1989-90.

8. By the year 2000, 75% of students completing university parallel degree programs at public community colleges will enroll in baccalaureate degree programs at state universities.

Figure 16 provides a view of the most recent data on the immediate transfer of community college graduates into the state

Figure 16: Transfers of Community College University Parallel Majors

	1990-91	Transfers	1991-92	Transfers	1992-93	Transfers

Percent	1 ' 1	46.12%	]	50.45%		49.31%

universities. The state's twelve community colleges offer Associate of Arts and Associate of Science degrees which are intended to prepare students for transfer into university level study. These are called university parallel programs. The tracking method currently in use to measure the success of these programs follows all two-year college graduates and identifies those who enroll at a state university during

the fall term following their graduation. It must be recognized that a percentage of students in university parallel programs do not immediately enroll at a university following their graduation from a two-year college. Another complicating factor is that some students who graduate from applied science degree programs may decide after graduation that they wish to pursue a baccalaureate degree program. Another fact to be considered is that some students transfer without completing the two-year college program and receiving an associate degree.

The present generation of college students is far more mobile than were previous generations. It is not unusual for a student to attend two or more institutions before receiving a degree. The pattern of transfers is often pictured as occurring in only one direction, from two-year institutions to universities. However, it is increasingly common for students to

Figure 17: Transfers to Public Universities

	1992	1993

Totals	8,840	9,248

transfer from a university to a two-year institution, often transferring back to the originating university or another institution at a later date. There are also other patterns of transfer involving transfers between universities, transfers between two-year institutions, transfers between public and independent colleges, and out-of-state transfers. In any given Fall term, between 10% and 15% of students who enroll in a Tennessee public institution was enrolled in another institution the previous year. Figure 17 shows the patterns of transfers to the state's public universities. It is interesting to note that, while overall enrollment at state universities was down slightly from the previous year, the enrollment of transfer students was up by 4.6%. Almost 10% of the total enrollment are transfer students.

Figure 18 shows the patterns of transfers to public twoyear institutions. As in the case with state universities, transfer students make up almost 10% of the total enrollment. It is also significant that, in relation to total enrollment, almost as many students transfer from a university to a two-year institution as from a two-year institution to a university. Both types of

Figure 18: Transfers to Public Two-Year Institutions

	1992	1993
From Public Universities	2,286	2,780
From other 2-year institutions	930	1,207
From Independent Institutions	661	769
From Out-of-state Institutions	2,346	2,830
Totals	6,223	7,586

institutions accept a number of out-of-state transfer students each year. In all public institutions, out-of-state transfer students make up around 3.4% of the total enrollment.

There is also considerable transfer activity between the independent sector and public two-year institutions. Figure 19 shows that activity for the past two years. Appendices H and I provide more detailed information on the transfer activity in this section of the report.

Figure 19: Transfers Between Independent Colleges and Universities and Public Two-Year Institutions

	1992	1993
From Independent to 2-year	661	769
From 2-year to Independent	1,327	1,502

9. By the year 2000, the racial composition of enrollments in public higher education institutions will be sufficient to ensure that all Tennesseans, regardless of race, will have access to higher education.

Enrollment of African-American citizens of Tennessee in public institutions continues to increase. There were 26,498 African-Americans enrolled as under-

Figure 20: Undergraduate Enrollment by Race for Public Institutions

Race	1991 % of 1	otal	1992 %	of Total	1993	% of Total
Black	24,280 14.	60% 25	936	15.22%	26,498	15.48%
White	135,979 81.	75% 139	884	82.09%	139,873	81.72%
Other		46% 4	.588	2.69%	4,799	2.80%

graduates and 1,926 enrolled as graduate or professional students. Figure 20 shows the undergraduate enrollment patterns by race for the past three years. It can be seen that the percentage of African-American undergraduate students has risen from 14.6% in 1991 to almost 15.5% in Fall of 1993. During that same period, the enrollment of White students has changed slightly, from 81.75% to 81.72%. Figure 21 indicates the growth in graduate and professional school enrollment. Enrollment of African-American students in these schools has increased slightly, from around 8% to around 8.7% of the total enrollment.

Enrollment of White students has changed slightly, from around 83.9% to 83.2% of the total. Other race enrollment (primarily Asian and Hispanic) has risen in both undergraduate and graduate

Figure 21: Graduate & Professional School Enrollment by Race

Race	1991 7	4 of Total	1992	% of Total	1993	% of Total
Black	1,589	7.97%	1,751	8.34%	1,926	8.69%
White	16,734	83.94%	17,556	83.67%	18,442	83.18%
Other	1,613	8.09%	1,676	7.99%	1,804	8.14%

schools. Appendix J contains an analysis of African-American enrollment in public institutions for the past five years.

Enrollment of African-American students in the independent sector is comparable to that of public institutions. Over 14.5% of total enrollment in independent

Figure 22: Total Enrollment by Race for Independent Institutions

		•			
1991	% of Total	1992	% of Total	1993	% of Total
6,607	14.61%	6,507	14.35%	6,736	14.52%
35,663	78.84%	35,398	78.04%	36,163	77.95%
2.963	6.55%	3,297	7.27%	3,493	7.53%
	6,607 35,663	6,607 14.61% 35,663 78.84%	6,607 14.61% 6,507 35,663 78.84% 35,398	6,607 14.61% 6,507 14.35% 35,663 78.84% 35,398 78.04%	6,607 14.61% 6,507 14.35% 6,736 35,663 78.84% 35,398 78.04% 36,163

institutions is African-American. A fairly high proportion of that enrollment is in five historically black institutions. Figure 22 shows a history of enrollment by race in all independent institutions for the past three years.

Enrollment of African-American students in the area . Figure 23: AVTS Enrollment by Race vocational/technical schools, as shown in Figure 23, has continued to decrease. There has been an overall decrease in enrollment in these institutions of over 8% since 1991 but African-American enrollment has decreased by 11.5% during that period.

	1991	1992	1993	% Change 1991-1993
Black	3,549	3,155	3,139	-11.55%
White	29,764	27,448	27,446	-7.79%
Other	436	327	385	-11.70%

10. By the year 2000, rates of persistence to graduation will be the same for Blacks as for other racial groups.

The change in methodology for calculating persistence statistics (as detailed under Goal A, Benchmarks 6 and 7) has revealed an increase in persistence rates for African-American students at both university and two-year college level. Figure 24 shows that the university

Figure 24: Persistence to Graduation by Race (Public Institutions)

		1985-91	1986-92	1987-93
Universities	Black	24.03%	27.80%	30.47%
	White	46.84%	45.96%	45.61%
		1985-91	1986-92	1987-93
Two Year	Black	12.28%	9.96%	13.22%
	White	28.11%	29.00%	30.00%

persistence rate for African-American students has increased over 6% since 1991.

By the year 2000, Tennessee will be a national leader in improving the quality of instructional programs and demonstrating this improvement through statewide and institutional assessment.

### Benclimarks:

1. By the year 2000, the average ACT COMP scores of graduates of Tennessee's public universities will average 188.5.

Figure 25 is a chart which shows the general education outcome scores. ACT COMP (American College Testing College Outcomes Measures Program) scores

Figure 25: General Education Outcomes Averages

		1982-84	1984-86	1986-88	1988-90	1990-92	1993
ACT COMP	Tennessee	184.1	185.4	185.4	184.7	182.2	181.8
	Norm Group	185.4	185.2	185.2	184.6	183.1	180.1
COLLEGE BASE	Tennessee						306.4
	Norm Group			·	L.		304.7

from 1982 to 1993 are shown and the 1993 score for the College Base test is included. The 1992-93 academic year was the beginning of a new cycle of Performance Funding. As a part of the revised standards for Performance Funding, institutions were allowed to choose whether they would continue to use the ACT COMP as a measure of general education outcomes or would change to either of two other nationally standardized tests. Approximately half of the universities and half of the two-year institutions chose to continue the ACT COMP and the others chose to use the College Base test which is published by Riverside Publishing Company. Since 1992-93 was the first year for the College Base test, that is the only year for which scores can be given. The most important fact to be gleaned from the chart is that, after two years in which Tennêssee graduates slipped slightly below national norms on the ACT COMP, they are again above the national norm. What appears to be a drop in the national norm is actually a result of the shifting norm group with which Tennessee is compared. Several of the institutions which chose to use the College Base Examination were among those with the highest admission standards. That reduced the norm group scores for the state for those institutions who chose to remain with the ACT COMP Examination. Appendix K provides scores for each institution including ACT COMP scores for the past three years. It should be noted that the average Tennessee ACT COMP score has gained slightly each of the past three years. The first year of testing with the College Base test also produced scores above national averages.

Additional reports which are related to this goal are presented in the appendices. They are:

Appendix L - A report of the percentages of students accepted into institutions from those who applied for admittance and percentages of students enrolling who were regularly admitted as well as those admitted under alternative methods. It should be noted that, in Fall 1993, Tennessee's public institutions accepted slightly higher numbers of students from those who applied for admission that they did in Fall 1992. In Fall 1992, 24,650 students (75.1%) were accepted from the 32,827 who applied. In Fall 1993, 23,653 (78.6%) were accepted from the 30,076 who applied. Alternative admissions were down considerably from 1992. In Fall 1992, 1,730 (7.0%) students were accepted through alternative means. In Fall 1993, that number dropped to 1,118 (3.4%).

**Appendix M** - Average entering ACT scores for each institution. These scores are taken from ACT reports and reflect the average entering score for all students who took the ACT Examination and who were accepted by the institution in Fall 1993.

**Appendix N** - Numbers and percentages of students enrolled in remedial and developmental courses. Reports on remedial and developmental coursework can sometimes be subject to misinterpretation since

they do not separate the student who merely needs one course, perhaps a writing course or a refresher math course, from the student who needs significant course work in order to be fully ready to begin college work. In the three rightmost columns of Appendix N an attempt is made to look only at students who need significant help; that is, who are taking more than one remedial or developmental course. Other columns in Appendix N also contain relevant information. The total number of students enrolled in remedial or development coursework from 1991 through 1993 are found in the fifth, sixth, and seventh columns of the chart. In all institutions, the total percentage of students enrolled in any amount of remedial or developmental coursework has declined from 57.3% in 1991 to 55.1% in 1993.

Appendix O shows the need for remedial or developmental coursework of students 18 years of age or younger. These are students who graduated only three months before matriculation into college.

Figure 26: Need for remedial or Developmental Coursework of 1993 High School Graduates

	Taking No R&D	Taking Only Developmental	Taking Only Remedial	Taking Mix of R&D
Universities	72.44%	22.40%	1.64%	3.52%
Two-Year Institutions			7.08%	23.42%
All Levels	57.20%	1 1	3.55%	10.49%

Figure 26 is a summary of data in Appendix O. It should be noted that over 72% of these students who entered the public universities needed no remedial or developmental coursework. In all institutions, only 3.55% of the students were taking only remedial coursework and only around 14% were taking any remedial coursework at all.

2. By the year 2000, passing rates on professional licensure examinations of graduates of Tennessee's public higher education professional schools will remain above national levels.

Figure 27 (next page) depicts licensure examination pass rates for the past three years. Tennessee graduates perform at or above national averages on licensure examinations. It is particularly gratifying to note the sharp improvement in engineering scores from a passing rate of 49.4% in 1991 to a rate of 55.2% in 1993. This puts the state's public engineering schools just

Figure 27: National Licensure Examinations Pass Rates

	1991		1992		1993	
Test	Number	Percent	Number	Percent	Number	Percent
Medical Technology	25	88.0%	23	87.0%	34	79 7%
Dental Hygiene	32	89.2%	43	92.9%	39	90.0%
Engineering	581	49.4%	476	52.8%	643	55.2%
Nursing	481	91.1%	468	92.0%	449	93.7%
Law	221	82.5%	218	85.7%	207	85.6%
Dentistry	54	82.0%	56	95.5%	62	87.4%
Pharmacy	69	97 1%	69	98.6%	72	100.0%
Physical Therapy	51	100.0%	56	100.0%	80	100.0%
Medicine, Part I	191	84.8%	199	86.0%	214	89.2%
Medicine, Part II	174	93.7%	190	92.6%	184	89.1%

under the national average of 56.9%. Tennessee's nursing schools are clearly above the national average passing rate with 93.7% passing. The national rate is 91.2%. Two programs, Physical Therapy and Pharmacy, achieved a 100% pass rate in 1993.

- 3. By the year 2000, 75% of students completing university parallel degree programs at public community colleges in Tennessee will enroll in baccalaureate degree programs at state universities. (See Goal 8, Benchmark 8 for data concerning transfer rates.)
- 4. By the year 2000, rates of transfer from public community colleges to state universities in Tennessee will be the same for Blacks as for other racial groups.

Figure 28 reveals transfer rates for African-American students and total transfer rates. There

Figure 28: Transfer Rates by Race-University Parallel Students at Community Colleges

	Grade	At Univ.		Grads	At Univ.		Grads	At Univ.	
l	1000.01	Fail '91	Percent	1991-92	Fall '92	Percent	1992-93	Fall '93	Percent
	90	26	28.89%	120	56	46.67%	137	<b>6</b> 0	47.4570
Black			46.12%				1,440	710	49.31%
10(2)	1,108	<del></del>	40.1270	1,0 (0					

has been significant improvement in the rates of transfer for African-American students, both in terms of

numbers and percentages. In 1991, only 26 African-American graduates of two-year institutions transferred to universities. These 26 students represented only 29% of two-year college graduates who subsequently transferred. In 1993, 65 students representing almost half (47.5%) transferred. This rate of transfer is only around 2% less than the total transfer rate. If only three more students had transferred, the rates would have been the same.

5. By the year 2000, a Superior Teaching Program will be fully funded and implemented across the state.

Funding for the first phase of the Superior Teaching Program, statewide awards for college and university teachers, has not yet been available.

6. By the year 2000, cumulative collections of materials in libraries at Tennessee public institutions will be current and these libraries will be able to provide ready access to materials necessary to support their instructional and research needs.

A very important indicator on an institution's commitment to currency in its library collection is the number of volumes purchased in a given year. Figure 29 compares the number of volumes added to

Figure 29: Expenditures on Books

	_		% Change
	1989-90	1992-93	1989-1993
Volumes Added	146,516	252,637	72.43%
Expenditures on Books (X 1000)	\$3,423	\$7,077	106.75%

collections in 1989-90 with those added during the past year in all public colleges and universities in the state. While the number of volumes added was 72.4% more than in 1989-90, the cost of adding those publications was more than double (106.8%). This is an indication of the rapidly rising cost of maintaining and acquiring volumes in our libraries.

#### Other Benchmarks of Quality

One important area is the accreditation of academic and professional programs. Figure 30 reports the status of accreditation of specialized programs in public institutions. Appendices O and P list accreditation by program for all institutions.

Some of the reports included in *Tennessee* Challenge 2000 come from studies which are not done on an annual basis. In those cases, data reported will be from the previous year. Data from one such report may be found in

Figure 30: Accreditation

	Accreditable	Accredited	% Accredited
Universities	361	328	90.86%
Two-Year Institutions	.67	- 67	100.00%

Figure 31 which is a report on the percentage of courses taught by full-time faculty, adjunct faculty, and graduate assistants (in universities). Data reported are taken from the third annual *Tennessee Challenge* 2000 report in January 1993. These percentages and the alumni survey are collected every two years and will be reported in alternate year reports.

Job placement rates for vocational programs at Tennessee's two-year colleges and area vocational/technical schools continue to be among the highest in the nation. The cumulative placement rate for two-year institutions for 1992-93 was 94.2% and the placement rate for area schools was 93%. A report by institutions may be found in Appendix S.

Legislation requires that this report present the numbers of students enrolled at correctional institutions. In Fall 1993 there were 91 students enrolled at sites identified as correctional institutions. This number represents less than one-half of one percent of the total enrollment. It cannot be said with assurance that all these students are inmates since guards and other correctional employees may also enroll in these courses.

By the year 2000, Tennessee's colleges and universities will be among the nation's leading institutions in preparing graduates with the knowledge and skills essential for effective teaching.

### Benchmarks:

1. By the year 2000, 1,800 individuals will complete teacher education programs in Tennessee public universities each year. Of that number, 396 (22%) will be Black.

Figure 32 is a report on teacher education completers since 1990-91. This table does not include persons seeking graduate degrees but does include all baccalaureate program completers and those completing teacher education requirements who already possessed a degree. While total numbers of teacher training graduates have increased by

Figure 32: Teacher Education Completers % Change 1992-93 1991 - 1993 1990-91 1991-92 13.92% Public Total 1,379 1,799 1,571 78 44.44% Black 54 61 -4.19% 883 891 846 Independent Total 36 -2.70% 43 Black 37 6.85% 2,262 2,690 2,417 Total Total 25.27% 114 Black

6.9% since 1991, it is notable that the numbers of African-American teacher education graduates at public universities increased by 44.4%. Independent colleges and universities, graduated 35% of teachers in 1992-93.

2. By the year 2000, 95% of teacher education graduates in Tennessee's public universities will pass the NTE or an equivalent examination.

Figure 33 contains statistics concerning pass rates on the National Teacher Examination. The apparent drop in pass rates from 1989-90 to 1991-92 is due to changes in state policy which raised the cut-off scores for passing the Exam.

Figure 33: NTE Pass Rate

		1989-90	1990-91	1991-92
Public	No. Passed	1,640	1,486	1,668
	% Passing	96.59%	94.68%	87.61%
Independent	No. Passed	826	855	912
Моролови	% Passing	89.83%	96 84%	87.17%

BY THE YEAR 2000, TENNESSEE WILL HAVE IMPROVED BOTH THE QUALITY AND QUANTITY OF RESEARCH AND PUBLIC SERVICE SO THAT THE STATE IS RECOGNIZED FOR ITS SUPERIOR RESEARCH AND SERVICE ACTIVITIES.

### Benchmarks:

1. Expenditures on research at universities from restricted accounts will reach \$230,000,000 by the year 2000.

Figure 34 contains data showing growth in research expenditures at public universities. These increases have been

Figure 34: Research Expenditures at Public Universities						
	1990-91	1991-92	1992-93	% Change 1991-1993		
Actual Expenditures Adjusted for inflation	\$93,612,000 \$84,812,000		\$111,455,000 \$93,734,000	19.06% 10.52%		

gratifying. The increase in 1992-93 over 1990-91 was over 19%. These expenditures are from grants and other private sources and do not include money from state appropriations for higher education.

2. Expenditures on public service at universities from restricted accounts will reach \$43,000,000 by the year 2000.

Figure 35 shows the growth in public service expenditures. The growth of spending from 1990-91 to 1992-93 has slightly exceeded that of research

Figure 35: Public Service Expenditures at Public Universities

				% Change	
	1990-91	1991-92	1992-93	1991-1993	
Actual Expenditures	\$31,445,000	\$32,199,826	\$38,539,000	22.56%	
Adjusted for Inflation	\$28,978,429	\$27,978,429	\$32,411,000	11.85%	

spending with a growth rate of 22.6%. These expenditures are from grants and other private sources and do not include money from state appropriations for higher education.

Tennessee's independent colleges and universities play an important part in research and public service. Figure 36 depicts expenditures for research and public service for all independent institutions for the past two years. The

Figure 36: Research and Public Service, Independent Institutions

	.		% Change
	1991-92	1992-93	1992-1993
Research Expenditures	\$71,279,295	\$77,527,779	8.77%
Public Service Expenditur	\$56,119,683	\$61,222,189	9.09%

expenditure of research and public service efforts are not evenly distributed across all institutions in the independent sector; the bulk of the expenditures occur at three institutions, Vanderbilt University, Meharry Medical College, and Southern College of Optometry.

By the year 2000, Tennessee's higher education institutions will be able to compete for the very best faculty and staff.

### Benchmarks:

1. By the year 2000, faculty salaries at Tennessee public institutions will be above those of their peers in other states.

Figure 37 gives 1992-93 salary comparisons with peer institutions. In every case, there was an improvement in the relationship between peers and Tennessee faculty between 1991-92 and 1992-93. At the University of Tennessee, Knoxville the improvement was from 90.1% to 94.9%,

Figure 37: 1992-93 Salary Comparisons Peer % of Average Salary Average Peer \$49,000 94.90% \$46,500 University of Tennessee, Knoxville 96.44% Memphis State University \$42,360 \$43,925 \$39,050 \$38,675 100.97% All Other Universities 98.88% \$30,330 \$30,675 All Two-Year Institutions

Memphis State University improved from 94.3% to 96.4%, other universities improved from 95.8% to 101%, and two-year institutions improved from 98.5% to 98.9%.

Figure 38 shows percentage comparisons for the past three years. Caution should be exercised in comparing percentages across years. The 1992-93 salary averages are based on the new peer institutions

Figure 38: Percentage Comparisons

	% in 1990-91	% in 1991-92	% in 1992-93
University of Tennessee, Knoxville	92.20%	90.10%	94.90%
Memphis State University	94 50%	. 94 30%	96 44%
All Other Universities	98.00%	95.80%	100.97%
All Two-Year Institutions	97.30%	98.50%	98.88%

recommended by the Formula Task Force and adopted by the Tennessee Higher Education Commission.

BY THE YEAR 2000, TENNESSEE'S HIGHER EDUCATION INSTITUTIONS WILL HAVE GARNERED SUFFICIENT RESOURCES TO ACHIEVE THE HIGH QUALITY AND ACCESS ENVISIONED IN THE GOALS OF TENNESSEE CHALLENGE 2000.

### Benchmarks:

1. By the year 2000, Tennessee's public higher education institutions will merit a proportion of state dollars above that currently received.

Tennessee's public higher education institutions have always worked assiduously to merit the confidence placed

Figure 39: State Appropriations for Higher Education

FY 1989	FY 1990	FY 1991	FY 1992	FY 1993
\$693,186,247	\$707,245,600	\$709,434,000	\$876,442,900	\$758,406,200

in them by the citizens of Tennessee and their elected representatives. An example of Tennessee's commitment to higher education can be found by examining the changing state appropriation for higher education. Figure 39 is based on the latest available data from the Department of Finance and Administration. Tennessee's General Assembly continues to support higher education. In a national study, Tennessee was found to be second in the nation in the percentage increase in state spending for higher education over the years 1991 and 1992.

#### Financial Health of Independent Colleges and Universities

The financial health of independent colleges and universities is critical to these institutions' continued contribution to higher education in Tennessee. Figure 40 presents four key financial ratios which are used to evaluate financial health of higher education institutions. The first of these, the net revenue ratio, is

Figure 40: Key Financial Ratios, Independent Colleges

Year	Net Revenue Ratio	Tuition & Fees Contribution Ratio	Gifts and Grants Ratio	Instructional Cost Ratio
1986-87	. 1.45%	44.33%	16.49%	30.95%
1987-88	-0.02%	44.95%	14.55%	29.63%
1988-89	2.19%	45.38%	13.72%	28.73%
1989-90	0.15%	45.50%	12.54%	33.11%
1990-91	1.79%	46.17%	12.45%	32.90%
1991-92	1.84%	45.50%	<b>13.17%</b>	33.57%
1992-93	1.03%	46.33%	12.81%	32.29%

calculated by subtracting the total current expenditures from the total current fund revenues and dividing the result by the total current expenditures. A positive ratio of one to three percent over a three to five year trend line indicates a strong financial condition.

The second ratio, tuition and fees contribution, is calculated by dividing total tuition and fee revenue by total educational and general expenditures. Ideally, this ratio should decline over the long term as gifts and endowment are developed to contribute to educational and general expenditures. A dramatic rise in this index might signal an over-reliance on tuition revenue to support the institution. Most liberal arts colleges with small endowments maintain a ratio of between 70 and 80 percent on this index.

The third ratio, gifts and grants, results from dividing the revenue from private gifts and grants by total educational and general expenditures. Most liberal arts colleges with small endowments range between 10% and 15% on this index. Falling below 10% is a sign of an over-dependency on tuition revenue. The decline in the gifts and grants ratio in Tennessee is reflective of a decrease in support from private sources at many independent institutions over the last six years. It is likely that this decrease was a result of the downturn in the economy, It is hoped that, with the current improvement in the economy, this trend will reverse in coming years.

The fourth ratio, instructional cost, is calculated by dividing the direct expenditures for instruction by total educational and general expenditures. This index reflects an institution's ability to maintain academic quality through its shifting of resources to support the instructional program over a given time period. This should be a relatively stable index. Colleges seeking to strengthen their academic quality should be increasing their instructional cost ratio as time passes. Most liberal arts colleges with small endowments maintain a ratio on this index of 30% to 40%. In Tennessee, more campus resources have been shifted to faculty salaries and instructional materials to continue the institutions' emphasis on teaching.

A chart detailing the figures used in these calculations is found in Appendix T.

### Declared Enrollment Capacity of Independent Institutions

A survey of independent institutions conducted by the Tennessee Independent Colleges and Universities conducted in Fall 1993 requested campus administrators to estimate their enrollment capacity. The resulting composite figure was 47,433 FTE. Since the total FTE enrollment of independent institutions in Fall 1993 was 41,991 the resulting difference is 5,442 students. A complete listing of the institutional estimates and the supporting data is found in Appendix U of this document. More detailed analysis of this survey must be done since the methods used by institutions to estimate capacity are not consistent. For example, at some institutions the declared capacity would result in doubling the student-to-faculty ratio and in others, the declared capacity would result in a dramatic reduction in the ratio of students to available instructional space.

Of the independent institutions' 24,272 spaces in residence halls available in Fall 1993, 21,162 were in use. This left 3,110 spaces vacant, a vacancy rate of 12.8%.

Tennessee Student Assistance Award Program - Figure 41 is an analysis of the distribution of funds (\$14,410,000) under the Tennessee Student Assistance Award for Fall 1992, the latest year for which final figures are available.

On May 31, 1993, Governor McWherter signed a bill of the General Assembly titled "The Tennessee Student Assistance Awards Restoration Act." The stated purpose of this act was "to restore the value of the Tennessee Student Assistance Award maximum grant to approximate its value in 1981 constant dollars and to provide financially needy students enrolled at Tennessee independent colleges and universities with a state grant of sufficient size to reduce the impact of institutional price on their higher education enrollment decision." The Act linked the maximum award under TSAA to 50% of the amount of out-of-state tuition and fees charged by public institutions. The Act provided \$1.25 million to enable the Tennessee Student Assistance Corporation to carry out the intent. Figure 42 is a study of trends since 1989 in the distribution of TSAA funds. The figures for 1993-94 are not final figures; they are estimates as of December 31, 1993. The number of awards for independent institutions in 1992-93 was 3,524. This accounted for 18% of the total number of awards. As of December 31, 1993, the number

Area Vocational/Technical Schools	9 0.2.30						

of awards for independent institutions in 1993-94 was 3,410 or 16.7% of the total number of awards. Since a smaller number of students received awards, the Tennessee Student Assistance Corporation was able to increase the maximum award for those students from \$1,482 in 1992-93 to \$1,890 in 1993-94. Therefore, the effect of the Act was that, although fewer students received the awards, the total dollar amount of awards to independent institutions increased. In 1992-93, independent institutions received 31.7% of the total amount of funds awarded; in 1993-94, that percentage increased to 34.7%. Reference to Figure 2 on Page 2 will show that independent institutions enrolled approximately 12% of Tennessee citizens in higher education institutions within the state in Fall 1993.

Tennessee Academic Scholars Program - The Tennessee Academic Scholars Program encourages academically talented Tennessee high school graduates to attend college in Tennessee. Applicants for the scholarships must have at least a 3.5 cumulative grade point average and be in the upper 5% of scores on national college entrance tests. The total award is \$5,000 per year. Of this amount, half comes from state funds and half from the institution which accepts the student. The student must attend college full-time and maintain a high grade average to remain eligible for the grant. Figure 43 shows the institutions in which recipients of the grants were enrolled in 1992-93.

Rhodes College			

Tennessee Teacher Loan/Scholarship Program - The Teacher Loan/Scholarship Program was authorized by the Comprehensive Education Reform Act of 1984 to encourage outstanding students to enter the teaching profession and to allow existing teachers to retrain in an academic area in which there was a shortage of teachers. These are forgivable loans and are available to Tennessee residents who agree to teach in the Tennessee public K-12 schools upon graduation. The Tennessee General Assembly appropriated \$360,000 for the program for 1992-93. Figure 44 shows the institutions in which these prospective teachers were enrolled in 1992-93.

Figure 44: Tennessee Teacher Loan/Scholarship Program (Total of 181 recipients)

Minority Teaching Fellows Program - The State of Tennessee established the Minority Teaching Fellows Program to encourage talented minority Tennesseans to select teaching as a career choice. The award is for \$5,000 per year to a maximum of \$20,000. Those who receive the award incur an obligation to teach in some Tennessee public school one year for each year of the award. Nineteen such awards are available for freshmen each year. Figure 45 shows the institutions in which these prospective teachers were enrolled in 1992-93.

Contract Education Program - Tennessee contracts with independent colleges and universities within the state to provide spaces for Tennessee residents in programs which are needed by the state and which are not available in public institutions. Some of these spaces are provided through the Southern Regional Education Board's Regional Contract-for-Services Program and others are contracted directly with institutions.
