 TITLE State Higher Education Profiles. A Comparison of State Higher Education Data for Fiscal Year 1991. Seventh Edition.
 INSTITUTION National Center for Education Statistics (ED), Washington, DC.
 REPORT NO ISBN-0-16-045355-0; NCES-94-341
 PUB DATE Oct 94
 NOTE 1,254p.
 AVAILABLE FROM U.S. Government Printing Office, Superintendent of Documents, Mail Stop: SSOP, Washington, DC 20402-9328.
 PUB TYPE Statistical Data (110)
 EDRS PRICE MF10/PC51 Plus Postage.
 DESCRIPTORS College Faculty; Colleges; *Comparative Analysis; Degrees (Academic); Demography; Enrollment; Ethnicity; Expenditures; *Higher Education; Income; Postsecondary Education; Race; Statistical Data; Student Characteristics; *Tables (Data); Teacher Salaries; Universities
 IDENTIFIERS *Integrated Postsecondary Education Data System; *State Characteristics

ABSTRACT

This volume offers a comprehensive state-by-state look at higher education in the United States using data from the Integrated Postsecondary Education Data System. The book contains 14 basic tables for each state, the District of Columbia, and the nation as a whole. The data for each state is as follows: Table 1 indicates the number and average size of institutions in the context of all postsecondary institutions in a state; tables 2 and 3 describe enrollment in higher education institutions by distribution of full-time equivalent students and by control and level of institution; table 4 presents the average salary of full-time faculty; tables 5 and 6 show education and general revenues; tables 7 and 8 display how institutions spend their money; table 9 shows scholarship and fellowship expenditures per students and expenditures per full-time faculty; table 10 indicates the labor-intensiveness of certain institutional functions; tables 11 through 13 present the distribution of degrees and other awards; and table 14 shows enrollment by race-ethnicity, data included for the first time in this edition. Extensive appendixes contain a glossary of terms, a list of institutions by state, technical notes, tables showing instructional activity at institutions in 1990-91, instructional activity by state, and the basic 14 tables for Puerto Rico. Foreword

The *State Higher Education Profiles: Seventh Edition (SHEP)* is the National Center for Education Statistics' annual profile report on higher education for the nation, each of the 50 states, the District of Columbia, and Puerto Rico. This edition of the SHEP presents data for fiscal year 1991. Like its predecessors, this edition of the SHEP presents various statistics and indicators that can be used to address a myriad of questions relating to state involvement, support, and performance in higher education. It also indexes each state statistic to the national average for that statistic and ranks states on selected statistics.

This report continues to rely almost entirely on data from higher education institutions collected by the Center through its Integrated Postsecondary Education Data System (IPEDS).

As the National Center for Education Statistics continues to broaden its perspective on postsecondary education through individual-based survey systems and through the continuing evolution of the IPEDS, the Center will gradually expand the scope of SHEP in both its coverage of institutions and its statistical content. This year, for the first time, SHEP is including a table on enrollment

by race-ethnicity. Also, appendix D of this edition compares full-time equivalent enrollment (FTE) derived from credit/contact hour institutional activity data with FTE's derived from fall enrollment headcounts. We welcome additional suggestions for augmenting the content of this publication or for improving its format or analysis.

In recognition of the responsibility of presenting individual state data and state ranking tables, the introduction suggests several general cautions in the use of the data for comparative purposes and specific caveats are presented preceding each state's data as necessary. Users should be aware of these cautions in interpreting the data. These caveats notwithstanding, we feel sure that anyone with an interest in higher education will find this volume informative and useful.

Acknowledgments

Many individuals made significant contributions to SHEP. The authors gratefully acknowledge their efforts. The State Higher Education Executive Officers (SHEEO)/National Center for Education Statistics (NCES) Network Advisory Committee for Fiscal Year 1987 (SHEEO/NCES Network) provided suggestions for the broad content of the first edition of SHEP. An advisory group composed primarily of current and former state higher education finance officers took part in the initial detailed planning and design. They were: Brenda Albright (Tennessee), Lucie Lapovsky (Maryland), Tom McCord (New York), J. Michael Mullen (Virginia), C. Gail Norris (Utah), and James C. Wallace (New Jersey), as well as Robert D. Newton of Penn State University and John Wittstruck, Director of the SHEEO/NCES Network from 1981 to 1988. Lucie Lapovsky, Brenda Albright, and John Wittstruck reviewed the tables and interim drafts of the first edition. Thomas Fallon (Director of Research, Information Systems and Assessment, Massachusetts Higher Education Coordinating

Council), John Wittstruck (now Associate Commissioner for Policy Analysis and Data Services at the Missouri Coordinating Board for Higher Education), and Meredith Ludwig (of the American Association of State Colleges and Universities) served on the final technical review committee for the combined fifth and sixth editions of SHEP.

In addition, critical technical review was provided by NCES staff members Mike Cohen, Gerald Malitz, and Tom Snyder. Editorial review and publication support were provided by Gerard Devlin, Phil Carr and Wilma Greene of the Publications Branch of the Public Information Division. The staff of the Institutional Studies Branch in the Postsecondary Education Statistics Division of NCES supervised the collection and file construction of the 1990-91 IPEDS data used in this report; and Clevie Gladney provided technical consultation for the data processing and presentation.

Introduction

Using the Data

The *State Higher Education Profiles Seventh Edition* (SHEP: Seventh Edition) continues to offer a comprehensive look at higher education in the United States. This edition incorporates data from fiscal year 1991 (July 1, 1990–June 30, 1991). It is the fifth of this series to make use of data from the Integrated Postsecondary Education Data System (IPEDS). Previous editions of SHEP (1985 and 1988) and its predecessor, *Higher Education Financing in the Fifty States*, used data from the Higher Education General Information System (HEGIS), which IPEDS superseded. HEGIS collected data from the universe of institutions with accreditation at the college level recognized by the U.S. Secretary of Education. These institutions are generally recognized as higher education institutions.

IPEDS, on the other hand, collects data from the universe of postsecondary institutions in the United States and therefore encompasses all institutions whose primary mission is to provide postsecondary education, regardless of accreditation. That is, IPEDS provides data on all institutions that provide programs designed for individuals who have completed a high school diploma or its equivalent. Higher education institutions are a distinguishable subset of the IPEDS institutional universe.

As with previous editions of the SHEP, the primary focus of this edition is on the higher education institutions in IPEDS, rather than on its more extensive postsecondary institutional universe. This focus was maintained for several reasons. First, there was a strong interest in the higher education community, especially among state agencies, to maintain a consistent universe in the SHEP reporting series. Second, as diverse as state organization and control are for higher education institutions, they are even more diverse with regards to nonhigher education institutions. As a result, state-by-state presentations of data for all postsecondary education may not be meaningful or relevant. Finally, because of the large number of institutions in the less-than-2-year private nonprofit and private for-profit sectors, these two sectors were surveyed on a sample basis rather than as a census of institutions, for all surveys except for the Institutional Characteristics Survey. Since the sample of these two sectors of institutions is designed to provide national estimates, not state-level estimates, presenting state-by-state data is not possible.

The book contains 14 basic tables for each state, the District of Columbia, and the nation. Appendix E contains the 14 basic tables for Puerto Rico. The tables cover higher education enrollment, full-time faculty, revenues, expenditures, financial aid, and degrees and other formal awards conferred. In addition, table 1 of the *SHEP: Seventh Edition* places SHEP's higher education institutions into the context of all postsecondary institutions in a state. These postsecondary universe tables are possible on a state-by-state basis because the IPEDS Institutional Characteristics Survey is sent to all known postsecondary institutions in the country.

Some of the basic state tables include or are composed of statistical indicators such as instructional expenditures per full-time equivalent student and research expenditures per full-time faculty member. These indicators depict the status of higher education in a particular institutional sector by adjusting for the size of the sector where size is defined as either the number of full-time equivalent (FTE) students or the number of full-time faculty. Several indicators also adjust for the size of the population served, defined as the number of individuals 18 years of age or older, or for table 14 as the number of individuals between 18 and 24 years old.

While some indicators adjust for the size of a sector, many other generic factors are not considered in the analysis. These include geographic price differences, economies of scale, the mix of academic programs in a state, the relative distribution of public and private nonprofit institutions in the state, and the wealth of the state however defined. Since these factors may account for many of the observed differences among states, comparisons among states and even sectors within a state should be approached tentatively at best, particularly comparisons of the revenues and expenditures (finance) data.

Additionally, while the IPEDS Finance Survey collects some data on states' accounting practices and funding principles (such as the state's treatment of capital expenditures, retirement system payments, and student financial aid), these data have not been used as explanatory or adjustment factors in this edition of SHEP.

It should also be noted that all finance data in the SHEP are presented in current dollars; they have not been adjusted for inflation.

In all basic state tables, each state-level statistic is accompanied by an index. The index is the percentage difference between the state statistic and the national average for the statistic. It was calculated by taking the ratio of the difference between the state statistic and the national average to the national average and multiplying the resulting value by 100. Thus, when a state statistic is equal to the national average, the index has a value of zero. If a state statistic differs from the national average by 10 percent, the index has a value of (+) 10 or (-) 10, depending on whether the state statistic is higher or lower than the national average. This index has a lower bound of -100 and an unlimited upper bound. These indexes put each state's report into a common context and provide a metric on which states can be ordered. The state ranking tables in chapter 2 present such an ordering by selected statistics.

In the state ranking tables, states for which a particular statistic was not relevant have an index of -100 for that statistic and are listed alphabetically at the bottom of the table. Appendix C, table C1, lists those states that had no institutions in a particular institutional sector. It should also be noted that in the state ranking tables, states with equal indexes were assigned the same rank. Because indexes were rounded to the nearest whole number, states with different ranks but ostensibly equal indexes are an artifact of the rounding convention used.

In the basic state tables, table 1 indicates the number and average size of institutions (in total headcount) that comprise the higher education and other postsecondary institutional universes. From table 1, for example, the percentage of all students (both full- and part-time) enrolled in higher education institutions in 1990-91 (91 percent) may be derived.

Tables 2 and 3 describe enrollment in higher education institutions from two different perspectives: the distribution of full-time equivalent (FTE) students, by control and level of institution; and the distribution of students by level within institutions of a given control and level.

Table 4 presents the average salary of full-time faculty, by rank of faculty and length of contract as well as the number of full-time faculty that were used in computing the average.

Tables 5 and 6 are concerned with education and general (E&G) revenues. Table 5 presents the percentage distribution of E&G revenues by source, as well as the percentage of total E&G revenues that are restricted. Table 6 presents indicators that are selected E&G revenues adjusted for the number of FTE students and/or the size of the population served.

Tables 7 and 8 display how institutions spend their money in terms of the percentage of total E&G expenditures allocated to various institutional functions (table 7) and expenditures per FTE student for each of the various functions (table 8).

The first part of table 9 presents scholarship and fellowship expenditures per FTE student by the source of the funds for the expenditures. The second part of the table presents selected functional expenditures per full-time faculty.

Table 10 indicates the labor-intensiveness of certain institutional functions by representing salaries as a percentage of total E&G expenditures and of each appropriate function. This table also displays fringe benefits as a percentage of total compensation (salary plus fringe benefits) aggregated over all employees.

Tables 11 through 13 present the distribution of degrees and other formal awards conferred by level of award and by the program area in which the degrees were awarded. This includes a disaggregation of less-than-4-year awards into associate degrees and all other less-than-4-year awards.

A table on enrollment by race-ethnicity has been added to the seventh edition of SHEP. Table 14 compares the racial-ethnic distribution of undergraduate enrollment in the nation and each state by the racial-ethnic distribution of the nation's and each state's 18-to-24-year-old population. This table also displays the ratio of undergraduate enrollment to the population of 18-to-24-year-olds.

As with previous editions of SHEP, the number of FTE students reported in table 2 and used for the calculation of financial indicators in tables 6, 8, and 9 were derived from fall enrollment headcount data (the number of full-time students plus 1/3 of the number of part-time students as described in appendix C). Future editions of SHEP may derive the number of FTE students from institutions' total credit/contact hour activity data over a 12-month period. Activity data for the 1990-91 fiscal year were collected by the 1991-92 IPEDS Institutional Characteristics Survey.

Appendix D (table D1) contains the number of FTE students as derived from fall headcounts with the number derived from credit/contact hour activity in both the fall term and over a 12-month period. Table D1 also indicates how these different estimates of FTE students compare by displaying the ratio of the number of FTE students derived from fall enrollment data to the number derived from credit/contact hour activity over the fall term and over a 12-month period by level of student (undergraduate, graduate, and first-professional). Table D2 indicates how selected financial indicators would be affected by using an FTE count based on 12-month credit/contact hour activity rather than an FTE count derived from fall enrollment as the measure of size.

Prior to finalizing the data in SHEP, each state higher education finance officer was asked to review his or her state's data to provide comments that would explain any anomalies in them and to note factors that would make the state's data even less comparable to data from other states. These individuals were also asked to review the data for accuracy and reasonableness. Except for editorial changes, comments explaining anomalies appear as received by NCES in the notes preceding presentation of the state's data. They should be read carefully.

In all cases where comments concerning the accuracy and reasonableness of the state's data were received, the events that went into processing the problematic data were thoroughly examined to determine the source of the problem. If the source of the problem was in the processing or tabulation rather than in the reporting, adjustments were made to resolve the problem and the data were subsequently reanalyzed.

Special Considerations in Using the Data

In examining the data for each state, the reader is urged to consider all of a state's data in their entirety and not focus just on one or another specific measure. The reader is also cautioned not to form conclusions simply from the state's rank in a given table without checking to see if there are state data or explanatory notes preceding the presentation of the state's data which may furnish an added dimension to the interpretation of its rank. For example, in some states (e.g., Massachusetts, New Jersey) there is only one public doctoral institution with a medical school, and it is a free-standing institution. That is, there are few or no undergraduate students and most full-time faculty are clinical faculty that are not reported on the IPEDS Salary Survey. For this institutional

sector, these states will have extreme per FTE student and per full-time faculty revenue and expenditure values and indexes.

The reader should also pay special attention to the definitions of specific terms used in this report to fully understand the data. They appear in the Glossary of Terms, appendix A.

Finally, it should be noted that the statistics on higher education in this report are, for the most part, input measures rather than measures of the outcomes of higher education. They represent the results of much planning, numerous deliberations on providing services in light of competing demands for limited resources, and vastly different perspectives on the objectives of higher education and the needs of students. All these factors must be considered when interpreting the data in the report.

The Data and the Approach to the Analysis

Since this report describes higher education in the 1991 fiscal year it should be noted that these data are 2 years old as of this writing and should be viewed in that context.

The data in this report are based almost entirely on information reported to the National Center for Education Statistics through its Integrated Postsecondary Education Data System (IPEDS). There are two exceptions to this: the appropriations data in state ranking table Y; and the population statistics used to develop indicators adjusted for the size of the population served. The source and reliability of these data are presented in the Technical Notes, appendix C.

IPEDS collects data on institutional characteristics, enrollment, finance, staff, full-time faculty, instructional activity (i.e., the number of credit/contact hours produced by an institution in the fall term and over a 12-month period), and completions for the universe of institutions with accreditation at the college level recognized by the U.S. Secretary of Education, that is, higher education institutions. While this set of institutions may change from one fiscal year to the next, it is consistent within the same fiscal year.

For the national data in table 1, as noted previously, the institutional universe is all institutions in the 50 states and the District of Columbia whose primary purpose is providing postsecondary education except for U.S. service schools

(e.g., West Point). This includes all higher education institutions (institutions with recognized accreditation) as well as all other postsecondary institutions. It should be noted with regard to table 1 that the number of higher education institutions in the nation or in any individual state changes from year to year because institutions were added to, or deleted from, the higher education institutional universe. The total number of postsecondary institutions may have changed because two or more institutions or campuses merged into a single institution or a single institution was split into two or more institutions or campuses, or institutions opened or closed.

For all tables in this report except table 1, the SHEP institutional universe is a subset of the higher education institutional universe. It includes only nonprofit institutions in the 50 states and the District of Columbia that are either publicly or privately controlled. Higher education institutions that are operated for-profit (proprietary), U.S. service schools and military academies, and institutions in outlying areas including Puerto Rico were excluded as were all other postsecondary institutions.

The list of institutions included in the SHEP universe is available in appendix B by the state in which the institutions are located and by their institutional classification.

Data for Puerto Rico are available in appendix E. These data were not included in developing national averages or U.S. totals to maintain consistency in the data series. However, interested readers can compare the status of higher education in Puerto Rico with that of the aggregated 50 states and the District of Columbia, or with any individual state.

The data collected through IPEDS for any one year represent two distinct time periods. The institutional characteristics, enrollment, and full-time faculty data represent an institution at one point in time, the fall of the school year; the finance, institutional activity, and completions data cover the entire 12-month period of the fiscal year. Therefore, for some indicators fall data are used in conjunction with 12-month data in this report, and readers should be cognizant of the differences in time period represented.

This report presents four types of statistics: actual counts (of individuals or dollars), percentage distributions, ratios (means and indicators), and indexes. For a full explanation of how these statistics were derived for this report, please see the Technical Notes, appendix C.

Chapter One

The National Data

Table 1.— Number of institutions and mean size, by SHEP status and by control and level

Control and level of institution	SHEP institutions		Non-SHEP institutions	
	Number	Mean size	Number	Mean size
Total	3,210	4,243	6,937	191
Public	1,565	6,916	558	649
4-year-and-above	565	10,275	15	183
Doctoral with medical	93	17,390	—	—
Doctoral w/o medical	131	15,251	—	—
Master's	265	7,370	—	—
Baccalaureate	76	3,043	—	—
2-year	1,000	5,021	256	673
Less-than-2-year	—	—	287	651
Private nonprofit	1,645	1,695	1,210	142
4-year-and-above	1,461	1,841	374	197
Doctoral with medical	60	7,854	—	—
Doctoral w/o medical	388	2,192	—	—
Master's	428	1,877	—	—
Baccalaureate	585	960	—	—
2-year	184	533	472	115
Less-than-2-year	—	—	364	119
Private for-profit	—	—	5,169	152
4-year-and-above	—	—	118	639
2-year	—	—	824	359
Less-than-2-year	—	—	4,227	101

Table 2.— Percentage distribution of total FTE, full-time, and FTE of part-time enrollment, by control and level of SHEP institution

Control and level of SHEP institution	Total FTE	Full-time	FTE of part-time
Total	9,877,408	7,629,156	2,248,252
Public	100.0	100.0	100.0
4-year-and-above	47.8	52.4	32.3

Arizona

The reader is advised of the following conditions reported by Arizona about its data.

Tuition and fees revenues are collected by each university, remitted to the state and reallocated back to the universities as part of their state and local appropriations. Applicable to the public 4-year-and-above sector for tables 5 and 6.

Fall Enrollment 1990-91

Arkansas

The reader is advised of the following conditions reported by Arkansas about its data.

1. Finance data include the teaching hospital of the University of Arkansas Medical Sciences Campus and indigent care for the teaching hospital. Applicable to the public doctoral with medical sector for tables 5 through 10.
2. Finance data include the System Administration, the Agricultural Experiment Station, the Cooperative Extension Service, and the Archaeological Survey of the University of Arkansas Main Campus. Applicable to the public doctoral without medical sector for tables 5 through 10.

Fall Enrollment 1990-91

NOTES.— Nonresident aliens are not included.

— Indexes enclosed in parenthesis are based on U.S. average of 0.

California

The reader is advised of the following conditions reported by California about its data.

Data for San Diego State and San Francisco State are included with public doctoral without medical level institutions. However, the doctoral programs for these two institutions were jointly administered with the University of California. San Diego State and San Francisco State are not considered traditional doctoral level institutions. Applicable to the public doctoral without medical sector for tables 1 through 10 and 14.

Colorado

The reader is advised of the following conditions reported by Colorado about its data.

1. Tuition and fee revenues reflect a large number of out-of-state students paying out-of-state tuition. Applicable to the public sector for tables 5 and 6.
2. The state legislature provides no general fund appropriations for out-of-state students. Applicable to the public sector for tables 5 and 6.

Connecticut

The reader is advised of the following conditions reported by Connecticut about its data.

Expenditures from general fund appropriations do not include fringe benefit expenses. These costs are paid by another state agency. Also does not include expenses of the central administrative offices of state universities, regional community colleges, and state technical colleges. Applicable to the public sector for tables 7 through 10.

NOTES.— Nonresident aliens are not included.

— Indexes enclosed in parenthesis are based on U.S. average of 0.

Delaware

The reader is advised of the following conditions reported by Delaware about its data.

The high percentage of out-of-state students enrolled at the University of Delaware distorts, for interstate comparisons, the ratio of tuition and fees revenue to state and local government appropriations. Applicable to the public doctoral without medical sector for tables 5 and 6.

Hawaii

The reader is advised of the following conditions reported by Hawaii about its data.

Public institutions deposit tuition revenues into the state general fund for reallocation. Revenues listed under tuition and fees in public institutions represent revenues from fees only. Revenues from state and local government appropriations include actual appropriations and the reallocated tuition revenues. Applicable to the public sector for tables 5 and 6.

— Indexes enclosed in parenthesis are based on U.S. average of 0.

Illinois

The reader is advised of the following conditions reported by Illinois about its data.

1. Those doing trend analysis should note that the data for public 2-year institutions excludes the Chicago Urban Skills Institute. Applicable to the public 2-year sector for tables 1 through 10 and table 14.
2. Tuition and fees revenue is initially deposited in the State Income Fund and then appropriated to the public 4-year-and-above institutions as part of their state and local appropriations. Applicable to the public 4-year-and-above sector for tables 5 and 6.
3. Includes institutional support expenditures for the University of Illinois Central Administration, although central office expenditures for three other public systems in Illinois are not included. Applicable to the public doctoral with medical sector for tables 7 through 10.
4. Revenues do not include funds appropriated in FY 1989 and FY 1990 to other state agencies for unemployment insurance, workmen's compensation, and health and life insurance of higher education employees. In other states, these funds are included in higher education appropriations. Applicable to the public sector for tables 5 and 6.

Kansas

The reader is advised of the following conditions reported by Kansas about its data.

Revenues from federal appropriations include Haskell Indian Junior College, which is a federally funded institution receiving no state or local funds and with only an estimated 3 percent of its students from Kansas. Haskell's federal appropriation revenues for FY 1991 totaled \$9,005,120. Applicable to the public 2-year sector for tables 5 and 6.

Kentucky

The reader is advised of the following conditions reported by Kentucky about its data.

1. Revenues from state and local government appropriations include the following: appropriations for debt services; appropriations for medical and dental services provided by the health science centers at the University of Kentucky and the University of Louisville (in accordance with reporting definitions, revenues from hospitals are not included); appropriations for land grant institutions' agriculture research and public service activities; and appropriations for other research and public service activities. These revenues totaled approximately \$205.7 million in FY 1989 and \$218.8 million in FY 1990. The inclusion of these revenues which are not directly related to student instruction significant, overstate Kentucky's state and local government appropriation per FTE student. Applicable to the public sector for tables 5 and 6.
2. Although Northern Kentucky University is the one institution in Kentucky categorized as a doctoral without medical institution, it is actually a limited master's institution containing only one professional program (law). Applicable to the public doctoral without medical and the public master's sectors for tables 1 through 10 and table 14.

Maryland

The reader is advised of the following conditions reported by Maryland about its data.

The University of Maryland University College, included in the public master's sector of tables 1 through 10, and table 14 has a worldwide program and receives no state appropriations. The enrollment (tables 1 through 3 and 14), degree (tables 11 through 13), and faculty (table 4) data in this report reflect only that portion of the University College program offered in Maryland. The finance (tables 5 through 10) data include data from the entire worldwide operation of the University College. This results in a significant overstatement of expenditures and revenues per student at public master's level institutions in Maryland.

Individuals who need further information about the Maryland data should contact Mary Bode at the Maryland Higher Education Commission, 16 Francis Street, Annapolis, Maryland 21401.

Michigan

The reader is advised of the following conditions reported by Michigan about its data.

State and local government appropriations include \$40 million for FY 1990 in table 5 earmarked for the Cooperation Extension and the Agricultural Experiment Station at Michigan State University. These revenues do not fund student activities and inflate the revenues per FTE student in table 6 for public 4-year doctoral with medical institutions. Applicable to the public 4-year doctoral with medical sector for tables 5 and 6.

NOTES.— Nonresident aliens are not included.
— Indexes enclosed in parenthesis are based on U.S. average of 0.

New Jersey

The reader is advised of the following conditions reported by New Jersey about its data.

1. New Jersey's faculty salaries and per FTE student and per full-time faculty revenues and expenditures are not comparable to most of the other states (see the introduction, "Special Considerations in Using the Data"). Applicable to public doctoral with medical sector for tables 4 through 9.
2. Because of the closing of Fairleigh Dickinson University (FDU) dental school, New Jersey no longer has any private doctoral with medical institutions. All FDU data are now included in the private doctoral without medical sector. In SHEP editions five and six, all were shown in private doctoral with medical; in editions one through four, separate FDU campus data were presented as follows: one campus in the private doctoral with medical sector, two in the private master's, and one in the private two-year. The reader should bear this in mind when comparing data from different editions of this report. Applicable to the private non-profit sector for all tables.

NOTES.— Nonresident aliens are not included.

— Indexes enclosed in parentheses are based on U.S. average of 0.

New York

The reader is advised of the following conditions reported by New York about its data.

1. State and local grants and contracts revenues are underreported by \$209.8 million in FY 1989 and by \$230.7 million in FY 1990. Not included are \$50.3 million and \$51.1 million granted, respectively, in FY 1989 and FY 1990 to students at public (CUNY) institutions and \$159.5 million and \$179.6 million granted, respectively, in FY 1989 and FY 1990 to students at private institutions under the New York State Tuition Assistance Program. These amounts are included in tuition and fees revenues. Applicable to all sectors for tables 5 and 6.
2. Scholarships and fellowships expenditures are underreported by \$209.8 million in FY 1989 and by \$230.7 million in FY 1990. Not included are \$50.3 million and \$51.1 million granted, respectively, in FY 1989 and FY 1990 to students at public (CUNY) institutions and \$159.5 million and \$179.6 million granted, respectively, in FY 1989 and FY 1990 to students at private institutions under the New York State Tuition Assistance Program. Applicable to all sectors for tables 7 and 8. Applicable to state and local source for scholarships and fellowships expenditures in table 9.
3. Educational and general mandatory transfers may be understated because the City University (CUNY) 4-year and 2-year colleges and the State University (SUNY) community colleges did not report capital debt service on the IPEDS form. Applicable to the public sector for tables 7 and 8.

1. Number of institutions and mean size, by SHEP status and by control and level

NOTES.— Nonresident aliens are not included.

— Indexes enclosed in parenthesis are based on U.S. average of 0.

Oregon

The reader is advised of the following conditions reported by Oregon about its data.

Data for Oregon State University are included with public doctoral w medical level institutions because of Oregon State's veterinary medicine program. However, that program is a cooperative one with Washington State University. The medical part of the program is at Washington State University. The Oregon State students are sent to Washington State for that part of the program. Applicable to the public doctoral with medical sector tables 1 through 10 and table 14.

Fall Enrollment 1990-91

South Carolina

The reader is advised of the following conditions reported by South Carolina about its data.

1. Enrollment data for FY 1990 were imputed using FY 1989 data. Applicable to all sectors for tables 1, 2, and 3.
2. Degrees and other formal awards conferred data for FY 1989 were imputed using FY 1988 data. Applicable to all sectors for tables 11, 12, and 13.

Tennessee

The reader is advised of the following conditions reported by Tennessee about its data.

1. The high percentage and high average amounts per student and per faculty member of federal grants and contracts are attributable, in large part, to the administration of the Job Training Partnership Act program by a number of 2-year institutions. The institutions are reimbursed only for the administrative costs of the program. Applicable to the public 2-year sector of tables 5 and 6.
2. The high percentage and high average amounts per student of public service expenditures are attributable primarily to the administration of the Job Training Partnership Act program by a number of 2-year institutions. Applicable to the public 2-year sector of tables 7 and 8.

NOTES.— Nonresident aliens are not included.

— Indexes enclosed in parenthesis are based on U.S. average of 0.

Utah

The reader is advised of the following conditions reported by Utah about its data.

Financial data and related calculations are omitted for the private nonprofit doctoral without medical sector. The only Utah institution in this sector is Brigham Young University, which did not respond to the IPEDS financial surveys. Applicable to the private nonprofit doctoral without medical sector for tables 5 through 10.

— Indexes enclosed in parenthesis are based on U.S. average of 0.

Washington

The reader is advised of the following conditions reported by Washington about its data.

1. The eight public 4-year-and-above institutions include two new branch campuses operated by the University of Washington: University of Washington-Bothell and University of Washington-Tacoma. The only data available for these campuses in FY 1991 was total enrollment, which was collected on the 1991-92 Institutional Characteristics survey. Applicable to the public baccalaureate sector for table 1.
2. Tuition and fees revenues are collected by the state and appropriated to all institutions in the public sector as part of their state and local appropriations. Applicable to the public sector for tables 5 and 6.

Wisconsin

The reader is advised of the following conditions reported by Wisconsin about its data.

1. Enrollment data for FY 1990 were imputed using FY 1989 data. Applicable to the public 4-year-and-above sector for tables 1, 2, and 3.
2. Degrees and other formal awards conferred data for FY 1989 were imputed using FY 1988 data. Applicable to the public 4-year-and-above sector for tables 11, 12, and 13.

NOTES.— Nonresident aliens are not included.

— Indexes enclosed in parenthesis are based on U.S. average of 0.

Appendix A

Glossary of Terms

Academic Rank (assistant professor, associate professor, professor, and other). The academic ranks of assistant professor, associate professor, and professor are defined by the institutions. "Other" includes instructors, lecturers, and faculty with no academic rank as defined, again, by the institutions.

Academic Support (expenditures). Expenditures for the support services that are an integral part of the institution's primary mission of instruction, research, or public service. Includes expenditures for museums, galleries, audiovisual services, academic computing support, ancillary support, academic administration, personnel development, and course and curriculum development. Also includes expenditures for veterinary and dental clinics if their primary purpose is to support the institutional program. Excludes expenditures for libraries. [Note: This definition is an operational definition used in this and all previous editions of SHEP and may not be consistent with the terms used in the 1987 IPEDS glossary.]

Appropriations of State Tax Funds For Operating Expenses of Higher Education. Under "Appropriations Data (table Y)" in appendix C, see explanation of data collected in the description of survey and methodology.

Associate's Degree. An award that normally requires at least 2 but less than 4 years of full-time equivalent college work.

Attendance Status. Designates students as either full-time or part-time. See definitions of "full-time student" and "part-time student."

Baccalaureate Institution. Any institution whose highest degree awarded in the fiscal year for which data are being reported was a baccalaureate degree.

Bachelor's Degree. An award that normally requires at least 4 but not more than 5 years of full-time equivalent college-level work. This includes all bachelor's degrees conferred in a cooperative or work-study plan or program. A cooperative plan provides for alternate class attendance and employment in business, industry, or government; thus, it allows the student to combine actual work experience with college studies. Also includes bachelor's degrees in which the normal 4 years of work is completed in 3 years.

Control of Institution. Includes public, private nonprofit, and private for-profit institutions.

Doctor's Degree. An award that requires work at the graduate level and terminates in a doctor's degree. The doctor's degree classification includes such degrees as Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and the Doctor of Philosophy degree in any field such as agronomy, food technology, education, engineering, public administration, ophthalmology, or radiology. For the Doctor of Public Health degree, the prior professional degree is generally earned in the closely related professional field of medicine or of sanitary engineering.

Doctoral with Medical Institution. Any institution that awarded a medical degree during the fiscal year for which data are being reported. Medical degree programs include dentistry, medicine, osteopathy, and veterinary medicine.

Doctoral without Medical Institution. Any institution that awarded a doctoral degree or first-professional degree, other than a medical degree (see above), during the fiscal year for which the data are being reported.

Educational and General (E&G) Expenditures. Educational and general expenditures include current fund expenditures for instruction, research, public service, academic support, student services, institutional support, operation and maintenance of plant, scholarships and fellowships, and educational and general mandatory transfers. Educational and general expenditures exclude expenditures for auxiliary enterprises, hospitals, and independent operations. Pell Grants are excluded.

Educational and General (E&G) Mandatory Transfers (expenditures). Those transfers that must be made to fulfill a binding legal obligation of the institution. Includes mandatory debt-service provisions relating to academic and administrative buildings, including (1) amounts set aside for debt retirement and interest, and (2) required provisions for renewal and replacements to the extent not financed from other sources. Also includes the institutional matching portion for Perkins Loans when the source of funds is current revenue.

Educational and General (E&G) Revenues. Consists of current fund revenues from federal, state, and local appropriations; tuition income; government grants and contracts; private gifts, grants, and endowment income; sales and services of educational activities; and other revenues. Excluded from E&G revenues are income from sales and services of auxiliary enterprises,

sales and services of hospitals, independent operations, and revenues for capital purposes. E&G funds include only those funds intended for operating purposes. Pell Grants are excluded.

Endowment Income (revenues). Includes the unrestricted income of endowment and similar funds; restricted income of endowment and similar funds to the extent expended for current operating purposes; and income from funds held in trust by others under irrevocable trusts. Does not include capital gains or losses. Such gains when spent for current operations are treated as transfers, not revenues.

Enrollment Level. The level of the degree toward which a student is working and/or the number of years of postsecondary education the student has completed as reflected by the number of credit hours earned. Includes undergraduate, first-time first-year, other undergraduates, first-professional, and graduate students.

Fall Instructional Activity. The total credit and/or contact hours attempted by all students during the fall term of the year for which data are being reported.

Federal Appropriations (revenues). Includes dollars appropriated or made available by the federal government to public or private institutions of higher education for current operating expenses and not for specific projects or programs. Examples are federal land-grant appropriations and federal revenue sharing funds. Federal appropriations received through state channels are included in the total for federal appropriations. Federal grants and contracts are excluded.

Federal Grants and Contracts (revenues). Includes revenues from federal agencies that are for specific research projects or other types of programs such as administrative allowances for student aid. Examples are research projects, training programs, and similar activities for which amounts are received or expenditures are reimbursable under the terms of a government grant or contract. Includes indirect costs recovered. Pell Grants awarded to student are excluded, although the administration allowance for Pell Grants are included.

Field of Study (based upon the program codes provided in *A Classification of Instructional Programs*, NCES, 1981, Washington, DC).

Agriculture. Includes *Classification of Instructional Programs* (CIP) 2-digit program codes 01 (Agribusiness and Agricultural Production), 02

(Agricultural Science), 03 (Renewable Natural Resources) and 31 (Parks and Recreation).

All Other (table 11). Includes CIP 2-digit program codes 04 (Architecture and Environmental Design), 05 (Area and Ethnic Studies), 12 (Consumer, Personal, and Miscellaneous Services), 21 (Industrial Arts), 22 (Law), 24 (Liberal/General Studies), 25 (Library and Archival Sciences), 28 (Military Sciences), 29 (Military Technologies), 30 (Multi/Interdisciplinary Studies), 32 (Basic Skills), 33 (Citizenship/Civic Activities), 34 (Health-Related Activities), 35 (Interpersonal Skills), 36 (Leisure and Recreational Activities), 37 (Personal Awareness), 41 (Science Technologies), 46 (Construction Trades), 47 (Mechanics and Repairs), 48 (Precision Production), and 49 (Transportation and Material Moving).

All Other (table 12). Includes CIP 2-digit program codes 04 (Architecture and Environmental Design), 05 (Area and Ethnic Studies), 12 (Consumer, Personal, and Miscellaneous Services), 16 (Foreign Languages), 21 (Industrial Arts), 22 (Law), 23 (Letters), 25 (Library and Archival Sciences), 26 (Life Sciences), 27 (Mathematics), 28 (Military Sciences), 29 (Military Technologies), 30 (Multi/Interdisciplinary Studies), 32 (Basic Skills), 37 (Personal Awareness), 38 (Philosophy and Religion), 39 (Theology), 40 (Physical Sciences), 41 (Science Technologies), and 42 (Psychology).

Business. Includes CIP 2-digit program codes 06 (Business and Management), 07 (Business and Office), and 08 (Marketing and Distribution).

Chiropractic. Includes CIP 6-digit program code 18.0301 (Chiropractic).

Communications. Includes CIP 2-digit program codes 09 (Communications) and 10 (Communication Technologies).

Computer and Information Sciences. Includes CIP 2-digit program code 11 (Computer and Information Sciences).

Dentistry. Includes CIP 6-digit program code 18.0401 (Dentistry, General).

Education. Includes CIP 2-digit program code 13 (Education).

Engineering. Includes CIP 2-digit program codes 14 (Engineering) and 15 (Engineering and Engineering-Related Technologies).

Foreign Languages. Includes CIP 2-digit program code 16 (Foreign Languages).

Health. Includes CIP 2-digit program codes 17 (Allied Health) and 18 (Health Sciences).

Home Economics. Includes CIP 2-digit program codes 19 (Home Economics) and 20 (Vocational Home Economics).

Law. Includes CIP 6-digit program code 22.0101 (Law).

Letters. Includes CIP 2-digit program code 23 (Letters).

Liberal (General Studies). Includes CIP 2-digit program code 24 (Liberal/General Studies).

Life Sciences. Includes CIP 2-digit program code 26 (Life Sciences).

Mathematics. Includes CIP 2-digit program code 27 (Mathematics).

Medicine, General. Includes CIP 6-digit program code 18.1001 (Medicine, General).

Optometry. Includes CIP 6-digit program code 18.1201 (Optometry).

Osteopathic Medicine. Includes CIP 6-digit program code 18.1301 (Osteopathic Medicine).

Other. Includes CIP 6-digit program code 80.9999. (Specify: The "Other" category is used for first-professional degrees within the 10 professions except for those specifically named in connection with those professions.)

Pharmacy. Includes CIP 6-digit program code 18.1401 (Pharmacy).

Philosophy, Religion and Theology. Includes CIP 2-digit program codes 38 (Philosophy and Religion) and 39 (Theology).

Physical Sciences. Includes CIP 2-digit program code 40 (Physical Sciences).

Podiatry. Includes CIP 6-digit program code 18.1501 (Podiatry).

Psychology. Includes CIP 2-digit program code 42 (Psychology).

Public Affairs and Protective Services. Includes CIP 2-digit program codes 43 (Protective Services) and 44 (Public Affairs).

Social Sciences. Includes CIP 2-digit program code 45 (Social Sciences).

Theological Studies. Includes CIP 6-digit program code 39.0601 (Theological Studies).

Trade and Industrial. Includes CIP 2-digit program codes 46 (Construction Trades), 47 (Mechanics and Repairs), 48 (Precision Production) and 49 (Transportation and Material Moving).

Veterinary Medicine. Includes CIP 6-digit program code 18.2401 (Veterinary Medicine).

Visual and Performing Arts. Includes CIP 2-digit program code 50 (Visual and Performing Arts).

First-Professional Degree. An award that requires completion of a program that meets all of the following criteria: (1) completion of the academic requirements to begin practice in the profession; (2) at least 2 years of college work before entrance to the program; and (3) a total of at least 6 academic years of college work to complete the degree program, including prior required college work plus the length of the professional program itself.

First-professional degrees may be awarded in the following 10 fields:

Chiropractic (D.C. or D.C.M.)	Pharmacy (D.Pharm.)
Dentistry (D.D.S. or D.M.D.)	Podiatry (Pod.D. or D.P.)
Medicine (M.D.)	Veterinary Medicine (D.V.M)
Optometry (O.D.)	Law (L.L.B., J.D.)
Osteopathic Medicine (D.O.)	Theology (M.Div. or M.H.L. or B.D.)

First-Professional Student. A student enrolled in any of the following degree programs:

- Chiropractic (D.C. or D.C.M.) Pharmacy (D.Pharm.)
- Dentistry (D.D.S. or D.M.D.) Podiatry (Pod.D. or D.P.)
- Medicine (M.D.) Veterinary Medicine(D.V.M.)
- Optometry (O.D.) Law (L.L.B., J.D.)
- Osteopathic Medicine (D.O.) Theology (M.Div. or M.H.L. or B.D.)

First-Time First-Year Students. Includes students attending any institution for the first time at the undergraduate level. For institutions that designate first-year students as freshmen, includes entering freshmen who have never attended any college, and students enrolled in the fall term who attended college for the first time in the prior summer term. Also includes students who entered at the freshman level with advanced standing (college credits earned before graduation from high school). [Note: This definition is an operational definition used in the SHEP:1989 and may not be consistent with the terms used in the 1987 IPEDS glossary.]

4-Year-and-Above Institution. Any institution whose highest degree awarded in the fiscal year for which data are being reported was a baccalaureate or higher.

Fringe Benefits (expenditures). Cash contributions in the form of supplementary or deferred compensation other than salary. Excludes the employees' contribution.

Full-Time Enrollment. See definition of "full-time student."

Full-Time Equivalent (FTE) Enrollment. The sum of the number of full-time students and the full-time equivalency of part-time students.

Full-Time Equivalent (FTE) of Part-Time Enrollment. Full-time equivalent of part-time enrollment is a numeric conversion through which a student attending part-time is considered some fraction of a full-time student. The actual fraction used on the conversion is a function of the part-time student's enrollment intensity (e.g., number of credits in which enrolled). The sum of the fractions assigned to each part-time student is the total full-time equivalency of part-time students for a given institution or entity. The operational definition is available in appendix C. Part-time students were

converted by data providers into full-time equivalents by one of the following methods:

- (1) Use of a method already employed at the institution of the data provider to compute FTEs for some other purpose;
- (2) An institution data provider could have totaled the credit hours for part-time students and divided by the normal full-time credit-hour load. The normal full-time credit-hour load was usually determined by dividing the total number of credits required for completing a program by the institutionally defined length of program in terms, or by the number of terms required of a fully engaged student to obtain such credits. Data providers were advised that FTE of part-time students was *not* the minimum number of credit hours required for a student to be classified full-time (75 percent of a normal full-time load). Therefore, the institution data providers divided by the normal full-time load, not by the minimum full-time load. For most institutions, this figure was 15 credit hours (not 12); and
- (3) Institutions (data providers) were advised, also, that they could assign a fractional value of full-time to each part-time student, appropriate to the institution, such as 1/4, or 1/2. A student taking 3/4 (75 percent) or more of a normal full-time load could be classified as a full-time student.

Full-Time Student.

Undergraduate: A student enrolled for 12 or more semester credits; or 12 or more quarter credits; or 24 contact hours a week each term.

Graduate: A student enrolled for 9 or more semester credits, or 9 or more quarter credits.

First-professional: As defined by the institution.

Graduate Student. A student who holds a bachelor's or first-professional degree, or equivalent, and is taking courses at the postbaccalaureate level. These students may or may not be enrolled in a graduate degree program.

Index. The amount by which the state figure differs from the national average figure, expressed as a percentage (either plus or minus) of the national figure.

It is calculated as follows:

$$\frac{\text{State figure} - \text{minus national figure} \times 100}{\text{national figure}}$$

Institutional Support (expenditures). Expenditures for the day-to-day operational support of the institution. Includes expenditures for general administrative services, executive direction and planning, legal and fiscal operations, and public relations/development. Excludes expenditures for physical plant operations.

Instruction (expenditures). Expenditures of the colleges, schools, departments, and other instructional divisions of the institution and expenditures for departmental research and public service that are not separately budgeted. Includes expenditures for credit and noncredit activities. Excludes expenditures for academic administration where the primary function is administration (e.g., academic deans). This category also includes general academic instruction, occupational and vocational instruction, special session instruction, community education, preparatory and adult basic education, and remedial and tutorial instruction conducted by the teaching faculty for the institution's students.

Length of Contract (9-month and 12-month). Salaries of faculty are reported on either a 9-month or a 12-month basis. Faculty are reported as having 9-month or 12-month salaries on the basis of their contract period, not on the basis of the number of installments in which salaries are paid. The term "9-month salary" applies to faculty who teach for two semesters, three quarters, two trimesters, two 4-month sessions or the equivalent. The term "12-month salary" applies to faculty employed for the entire year. These faculty are usually employed for 11 months of teaching with one month of vacation.

Less-Than-4-Year Awards. Awards below the baccalaureate degree level. Includes associate's degree, postsecondary award, certificate or diploma (less than one academic year), postsecondary award, certificate or diploma (at least 1 but less than 2 academic years of full-time equivalent work), and postsecondary award, certificate or diploma (at least 2 but less than 4 academic years of full-time equivalent work). [Note: This definition is an operational

definition used in this and all previous editions of SHEP and may not be consistent with the terms used in the 1987 IPEDS glossary.]

Less-Than-2-Year Institution. Institutions or subsidiary elements whose purpose is the provision of postsecondary education and all of whose programs are less than 2 years long. These institutions must offer, at a minimum, one program at least 3 months long that results in a terminal occupational award, or is creditable toward a formal 2-year or higher award.

Level of Institution. A classification of an institution based on the highest degree certificate or diploma awarded during the fiscal year for which data are being reported.

Libraries (expenditures). Expenditures for all print material, microfilm, microfiche, audiovisual materials such as records and films, and computer software. Excludes expenditures for hardware of any kind (e.g., computer terminals, microfiche readers, record players, and projectors).

Master's Degree. An award that requires the successful completion of a program of study of at least the full-time equivalent of 1 but not more than 2 academic years of work beyond the bachelor's degree.

Master's Institution. Any institution whose highest degree awarded during the fiscal year for which data are being reported was a postbaccalaureate degree or certificate below the doctorate level (includes master's degrees, postbaccalaureate certificates, and post-master's certificates).

Mean Size of Institutions. Mean size of the institutions is the total enrollment in a sector divided by the number of institutions reporting enrollment in that sector.

Operation and Maintenance of Plant (expenditures). Expenditures for operations established to provide service and maintenance related to campus grounds and facilities used for educational and general purposes.

Other Sources (revenues). Includes sales and services of educational activities and revenues derived from the sales of goods or services that are incidental to the conduct of instruction, research, or public service. Examples include film rentals, scientific and literary publications, testing services, university presses, and dairy products. Also includes all items or revenues not covered elsewhere.

Examples are interest income and gains (net of losses) from investments of unrestricted current funds. Includes revenues resulting from the sales and services of internal service departments to persons or agencies external to the institution (e.g., the sale of computer time).

Other Undergraduate. First-year students who entered the institution before the summer of 1987, second-year, third-year, and fourth-year and beyond students, unclassified students, and nondegree seeking students.

Part-Time Student.

Undergraduate: A student enrolled for either 11 semester credits or less, or 11 quarter credits or less, or less than 24 contact hours per week.

Graduate: A student enrolled for either 8 semester credits or less, or 8 quarter credits or less.

Pell Grant Expenditures. Expenditures for scholarships and fellowships funded by Pell Grants. Pell Grants are a type of federal student financial aid that provides eligible undergraduate students with need-based grants to help them defray the cost of postsecondary education. (Public Law 92-318, as amended, Public Law 94-482, Education Amendments of 1972, Title IV; 20 USC 107a-1976)

Per 1,000 Capita. The total population of individuals in a state 18 years of age and older divided by 1,000.

Postsecondary Award, Certificate or Diploma (less than 1 academic year). Requires completion of an organized program of study at the postsecondary level in less than 1 academic year (two semesters or three quarters) or in less than 900 contact hours by a student enrolled full-time.

Postsecondary Award, Certificate or Diploma (at least 1 but less than 2 academic years). Requires completion of an organized program of study at the postsecondary level in at least 1 but less than 2 full-time equivalent academic years, or designed for completion in at least 30 but less than 60 credit hours, or in at least 900 but less than 1,800 contact hours.

Postsecondary Award, Certificate or Diploma (at least 2 but less than 4 academic years). Requires completion of an organized program of study at the

postsecondary level in at least 2 but less than 4 full-time equivalent academic years, or designed for completion in at least 60 but less than 120 credit hours, or in at least 1,800 but less than 3,600 contact hours.

Private Gifts, Grants, and Contracts (revenues). Revenues from private donors for which no legal consideration is involved and from private contracts for specific goods and services provided to the funder as stipulation for receipt of the funds. Includes only those gifts, grants, and contracts that are directly related to instruction, research, public service, or other institutional purposes. Includes monies received as a result of gifts, grants, or contracts from a foreign government. Also includes the estimated dollar amount of contributed services.

Private For-Profit Institution. An educational institution that is under private control and whose profits, derived from revenues, are subject to taxation.

Private Nonprofit Institution. An educational institution which is controlled by an individual or by an agency other than a state, subdivision of a state, or the federal government, which is usually supported primarily by other than public funds, and the operation of whose program rests with other than publicly elected or appointed officials.

Public Service (expenditures). Funds budgeted specifically for public service and expended for activities established primarily to provide noninstructional services beneficial to groups external to the institution. Examples are seminars and projects provided to particular sectors of the community, and expenditures for community services and cooperative extension services.

Public Institution. Includes all educational institutions under the control of—or affiliated with—federal, state, local, or state-related agencies.

Race-Ethnicity. Categories used to describe groups to which individuals belong, identify with, or belong in the eyes of the community. The categories do not denote scientific definitions of anthropological origins. A person may be counted in only one group. The groups used to categorize U.S. citizens and resident aliens are:

American Indian or Alaskan Native. A person having origins in any of the original peoples of North American and who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander. A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or Pacific Islands. This includes people from China, Japan, Korea, the Philippine Islands, American Samoa, India, and Vietnam.

Black, Non-Hispanic. A person having origins in any of the black racial groups of Africa (except those of Hispanic origins).

Hispanic. A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.

White, Non-Hispanic. A persons having origins in any of the original peoples of Europe, North Africa, or the Middle East (except those of Hispanic origin).

Research (expenditures). Funds expended for activities specifically organized to produce research outcomes and commissioned by an agency either external to the institution or separately budgeted by an organizational unit within the institution.

Restricted Educational and General (E&G) Revenues. Those funds available for financing operations but which are limited by donors and other external agencies to specific purposes, programs, departments, or schools. Externally imposed restrictions are to be contrasted with internal designations imposed by the governing board on unrestricted funds.

Salaries (expenditures). Funds expended for salaries and wages. Includes salaries and wages of all personnel, full- and part-time paid through each functional account. Does not include expenditures for employee fringe benefits or for college work-study programs.

Scholarships and Fellowships (expenditures). Expenditures given in the form of outright grants and trainee stipends to individuals enrolled in formal coursework, either for credit or not. Excludes Pell Grants. Includes aid to students in the form of tuition or fee remissions. Excludes those remissions that are granted because of faculty or staff status. Also excludes College work-study program expenses.

Institutional. Expenditures for scholarships and fellowships from revenues generated by the institution such as tuition and fees revenues,

endowment income, sales and services of educational activities, and other sources.

Other Federal. Expenditures for scholarships and fellowships, excluding Pell Grants, received from federal government agencies.

Private. Expenditures for scholarships and fellowships received from private sources such as businesses, foundations, individuals, and foreign governments.

State and Local. Expenditures for scholarships and fellowships provided by state and local governments.

SHEP/Non-SHEP Institutions. SHEP institutions are either public or private nonprofit and must have awarded at least one associate's degree in 1988-89. These institutions must be accredited at the college level by an agency recognized by the U.S. Secretary of Education. All other institutions are considered non-SHEP.

State and Local Appropriations (revenues). Dollars appropriated or made available by state and local governments to public or private postsecondary institutions for current operating expenses and not for specific projects or programs. Grants and contracts are excluded. Charges for room, board, and other services rendered by auxiliary enterprises are not included here.

State and Local Grants and Contracts (revenues). Includes revenues from state and local government agencies which are for specific research projects or other types of programs such as student aid. Examples are research projects, training programs, and similar activities for which amounts are received or expenditures are reimbursable under the terms of a government grant or contract. Includes indirect costs recovered.

Student Services (expenditures). Funds expended for admissions, registrar activities, and activities whose primary purpose is to contribute to students' emotional and physical well-being and to their intellectual, cultural, and social development outside the context of the formal instructional program. Examples are career guidance, counseling, financial aid administration, and student health services (except when operated as a self-supporting auxiliary enterprise).

Tuition and Fees (revenues). Charges assessed against students for educational purposes. Includes tuition and fee remissions or exemptions even though there is no intention of collecting from the student. Includes those tuitions and fees that are remitted to the state as an offset to the state appropriation. Excludes charges for room, board, and other services rendered by auxiliary enterprises.

12-Month Instructional Activity. The total credit and/or contact hours attempt by all students during the entire year for which data are being reported.

2-Year Institution. Any institution whose highest degree awarded during the fiscal year for which data are being reported was an associate's degree, or a certificate, or diploma in a program of at least 2 but less than 4 years in length.

Undergraduate. A student enrolled in a 4-year or 5-year bachelor's degree program, in an associate's degree program, or in a vocational or technical program below the baccalaureate.

Technical Notes

1091

1092

Data for the seventh edition of the SHEP came primarily from the 1990-91 IPEDS data collection. Data were derived from five different IPEDS surveys: Fall Enrollment 1990; Completions 1990-91; Finance 1990-91; Institutional Characteristics 1991-92; and Faculty Salaries 1990-91. In addition to IPEDS data, the population data by age and race-ethnicity in the nation and in each state that was used as a size adjustment for certain of the indicators in the report was obtained from the U.S. Census Bureau. Data on state appropriations for higher education that are used in state ranking table Y were obtained from the Grapevine summary tables for 1991, 1992, and 1993. The Grapevine summary tables are based on a survey of state higher education fiscal agencies conducted by the Center for Higher Education at Illinois State University. This section briefly describes these surveys and their data collection methodology.

Since a given statistic in the SHEP may have been derived from more than one source, this section also provides detailed information on how specific data elements were treated for this report, relevant analytic methodology, and any caveats that might affect the use and interpretation of the data. This information will be included under the data element's primary source.

Data reported in SHEP that were collected in the fall of 1990 (such as the number of institutions, enrollment, and faculty data) will differ somewhat from numbers reported in other NCES publications because the data in SHEP are summarized by updated institutional characteristics from the 1990-91 Completions Survey. This survey is reported at the end of the fiscal year. If an institution had closed during the year it was excluded from SHEP. If an institution merged with another institution during the year but enrollment or faculty data had been reported separately in the fall it was deleted as a separate institution from SHEP and its enrollment and/or faculty data were added to that of the merged institution. However if an institution had merged with another institution but its enrollment and faculty data had been imputed in the fall then not only was the institution excluded but its data were not added to that of the merged institution. This procedure was designed to preclude the possibility of double counting the merged institution's data (i.e., it has been considered a nonresponding institution on the fall surveys). If it was found that an institution lost higher education institution accreditation status during the year, the institution would have been classified as a non-SHEP institution and its data would be excluded from all but table 1. If an institution gained accreditation status in the spring, the institution would be classified as a SHEP institution, and its data would be included in all tables.

Additionally, data reported in SHEP will differ from other NCES publications on higher education because private for-profit higher education institutions are

not included as SHEP institutions and U.S. service schools (e.g., West Point, Annapolis) are excluded entirely.

Institutional Characteristics, 1991-92

Description of Survey and Methodology: This survey makes available data on the characteristics of all postsecondary institutions in the United States and its outlying territories. It is the only universe survey in the IPEDS. A postsecondary institution is defined by IPEDS as any institution that is open to the general public and whose primary mission is to provide formal instructional programs that are designed primarily for students who have completed the requirements for a high school diploma or its equivalent. The key data elements collected and updated annually include such vital information as the institution's address, control, highest level of offering, tuition and required fees, and accreditation status. Responses to items on this survey determine which of the IPEDS surveys, and which form of a survey, an institution will receive. Thus, this survey serves as the basic control file for the entire IPEDS. Specifically, the 1991-92 survey is the control file for the 1990-91 Completions and Finance surveys.

The Institutional Characteristics Survey is mailed in July, at the beginning of the fiscal year, to the known universe of postsecondary institutions and institutions that are identified as possible additions to the IPEDS universe. Survey responses are edited for internal and inter-year consistency. If data reported by the institution were out of line with previous year's data, the data were verified with the institution. Extensive followup for nonresponse is conducted between mid-September through April, initially by reminder letters encouraging nonresponding institutions to complete and return their forms, and subsequently by a Postsecondary Education Telephone System (PETS) wherein only critical data were requested. As part of the IC survey process, institutions on the file that do not fit the IPEDS definition of a postsecondary institution are deleted, as are institutions that have closed or are identified as duplicates on the file. Additionally, there is an intensive effort to identify institutions that opened during the 12-month period between IC surveys. Thus, the response rate reflects institutions that have been deleted or added to the IC survey universe and is calculated as the percentage of respondents relative to all in-scope, nondeleted institutions.

The 1991-92 Institutional Characteristics Survey collects data on credit and contact hour instructional activity from 4-year, 2-year and public-less-than-2-year

tutions for the 12-month period and for the fall term of the 1990-91 fiscal year. Data on credit and contact hour activity are collected from private less-than-2-year institutions for the 12-month period only (instruction at these institutions may start up more frequently, as often as every 2 weeks, so these institutions generally do not have a fall term in the traditional sense). The total unduplicated counts of students by level of enrollment for the 12-month period is collected from all institutions.

Unlike other data on the IC survey, the instructional activity data (specifically credit and contact hour activity and the unduplicated count) are imputed for partial and total nonresponse to these items. A summary of response conditions based on the final universe and responses to the institutional activity items is provided below:

Sector	Final universe	Respondents		Respondents to institutional activity	
		Number	%	Number	%
Total	10,148	9,353	92.2	6,896	68.0
4-year					
Public	625	614	98.2	591	94.6
Nonprofit	1,881	1,636	87.0	1,517	80.6
For-profit	121	96	79.3	82	67.8
2-year					
Public	1,255	1,204	95.9	1,126	89.7
Nonprofit	631	589	93.3	435	68.9
For-profit	811	719	88.7	501	61.8
Less-than-2-year					
Public	278	266	95.7	206	74.1
Nonprofit	351	328	93.4	207	59.0
For-profit	4,195	3,901	93.0	2,231	53.2
Higher education	3,669	3,410	92.9	3,276	89.3
Other postsecondary	6,479	5,943	91.7	3,620	55.9

Completions, 1990-91

Description of Survey and Methodology: This survey collects data on the number of recognized completions (degrees or other formal awards) in academic, vocational, and continuing professional education programs in a fiscal year. The survey requests data by sex for each award category and program specialty, and by sex and racial-ethnic categories for each award category and discipline division. The award categories include certificates and diplomas by the length of the program for which they are awarded; as well as associate's, bachelor's, master's, doctoral and first-professional degrees.

The Completions Survey is mailed to all accredited institutions of higher education and nonaccredited institutions that grant bachelor, master's, doctoral or first-professional degrees. In addition, the Consolidated (CN) survey form, which also requests completions data, was mailed to other nonaccredited institutions. Forms are mailed in July, and survey results are collected from October through March. Followup for nonresponse begins in November and is conducted by letter and telephone. The nonresponding institution is contacted directly or through an IPEDS state coordinator responsible for the nonresponding institution. The Postsecondary Education Telephone System (PETS) is used to solicit data from nonrespondents to the CN survey and nonrespondents from all other sectors for which IPEDS state coordinators are not responsible for followup. Institutions responding through PETS are asked to provide only the total number of completions, by award level and sex. Racial-ethnic data are not requested.

During editing, all forms are checked for CIP (Classification of Instructional Programs) code validity and addition errors. Total lines are generated for 6-digit program specialty and racial-ethnic categories and are compared to the reported totals for each 2-digit program category. If these are within an acceptable range, the generated total replaces the reported total, otherwise institutions are contacted to resolve discrepancies. Also data are checked for consistency with their prior year's response.

Imputation for institutions that do not respond were based on their prior year's reported response to the survey. For institutions that did not respond to the previous year's survey, imputation was done as follows: 1) Using the current year Institutional Characteristics Survey, the level of awards to impute was determined; 2) For institutions that responded to the Completions Survey and the

previous year's Fall Enrollment Survey, group ratios of total awards per FTE are calculated by level of award; 3) For nonresponding institutions that reported fall enrollment, the group ratios were multiplied by the FTE of the nonresponding institutions of the group to yield the completion counts. FTE was calculated by taking all of the full-time students plus one-third of the part-time students as reported in the IPEDS Fall Enrollment Survey. For institutions without prior year's fall enrollment data, group means (total awards per number of institutions) were calculated and used to impute the completion counts of nonresponding institutions of the group. Data for 54 institutions in 1990-91 were not imputed. Special manual procedures were used for rabbinical institutions and 4-year nonaccredited institutions that were nonrespondents.

A summary of the response conditions is provided below:

Sector	Final universe	Respondents	
		Number	%
Totals	6,419	5,781	90.1
4-year			
Public	622	604	97.1
Nonprofit	1,852	1,577	85.2
For-profit	117	86	73.5
2-year			
Public	1,226	1,169	95.4
Nonprofit	598	530	88.6
For-profit	750	604	80.5
Less-than-2-year			
Public	248	210	84.7
Nonprofit	95	94	98.9
For-profit	911	907	99.6
Higher education	3,630	3,396	93.6
Other postsecondary	2,789	2,385	85.5

Response rates by state and by institutional control and level (SHEP classifications) are available in table C1.

Level of Institution (tables 1 thru 10, 14, D1, and D2)

Source: 1990-91 IPEDS Completions Survey
1991-92 IPEDS Institutional Characteristics Survey

An institution's highest level was based on the highest level of degree awarded in the fiscal year as reported on the Completions Survey. If an institution did not respond to this survey or did not have the chance to respond to this survey because it was not part of the sample of less-than-2-year private institutions, the institution's report of its highest level of offering on the IPEDS Institutional Characteristics Survey (a universe survey) was used.

Control of Institution (all tables)

Source: 1990-91 IPEDS Completions Survey
1991-92 IPEDS Institutional Characteristics Survey

Since the IPEDS Completions Survey defines the level of institutions used in SHEP and its data were collected late in the data collection cycle, institutional control reported on this survey was considered more accurate than that reported on the earlier fall surveys. Therefore, the Completions Survey file (augmented when necessary with the Institutional Characteristics Survey file) served as the basis for the designation of institution control in this edition.

SHEP/Non-SHEP Institutions (table 1)

Source: 1990-91 IPEDS Completions Survey
1991-92 IPEDS Institutional Characteristics Survey

Table 1 consists of all postsecondary institutions in the United States. It excludes only U.S. service schools. It divides institutions into SHEP institutions and non-SHEP institutions. [SHEP institutions are either public or private nonprofit and must have awarded at least one associate's degree in the fiscal year or must have indicated that an associate's degree was its highest level on the Institutional Characteristics Survey. To be consistent with previous editions of SHEP, these institutions must be accredited at the college level by an agency recognized by the Secretary of Education (HEGIS institutions)]. All other institutions are considered non-SHEP. Non-SHEP institutions include all private for-profit institutions, all non-higher education institutions, and any institution whose highest degree awarded was less than an associate's degree.

Fall Enrollment, 1990

Description of Survey and Methodology: This survey makes available enrollment data for the fall of an academic or fiscal year for all postsecondary education

institutions in the United States and the outlying areas. This survey includes students enrolled in courses creditable toward a degree or other formal award; students enrolled in courses that are part of a vocational or occupational program; and high school students taking regular college courses for credit. Data are collected from all institutions by attendance status, level of enrollment, race-ethnicity, and sex. The survey includes data collected from all institutions of higher education accredited at the college level by an agency recognized by the Secretary of Education. In odd years, the survey also collects student enrollment data by age, and in even years the survey collects residence data for first-time freshman.

Survey forms are mailed in early September and nonresponding institutions are contacted by letter in November and by telephone beginning in December. Institutions contacted by phone are asked to provide total male and female enrollments or at minimum total enrollment. All data are edited for major reporting and processing errors. Data from institutions that respond to the Fall Enrollment Survey are checked for consistency with the prior year's data. Total lines are generated and compared to reported totals. If differences between these are within an acceptable range, the generated total replaces the reported total. Otherwise institutions are contacted to resolve discrepancies.

Imputation for institutions that do not respond or provide only a partial response are based on prior years' response to the survey. If no prior data are available (e.g., for institutions new to the IPEDS universe) but total enrollment is available, imputations are effected by matching institutions based on sector and state, and applying the selected institution's distribution of enrollment by attendance status and student level to the reported total enrollment. If no prior data are available and there is no reported total enrollment, both the number enrolled and the enrollment distribution of the matched institution is applied to the nonresponding institution.

Differences between reported totals and racial-ethnic details (balances) were allocated line by line on a gender and institutional basis by distributing the differences in direct proportion to the reported distributions. Racial-ethnic enrollment proportions by state, level, control, and gender (for responding institutions) were applied to institutions that did not report racial-ethnic data. Data reported as "race-ethnicity unknown" were distributed back in proportion to the reported data in a similar manner as the balances were distributed, however, "race-ethnicity unknown" data were not distributed to the nonresident alien category.

Fall enrollment data used in SHEP include institutions that submitted or resubmitted survey forms after the final data file was created. A summary of the response conditions is provided below:

Sector	Final universe	Respondents	
		Number	%
Total	6,486	5,817	89.7
4-year			
Public	620	606	97.7
Nonprofit	1,840	1,556	84.6
For-profit	110	78	70.9
2-year			
Public	1,213	1,093	90.1
Nonprofit	595	552	92.8
For-profit	683	602	88.1
Less-than-2-year			
Public	256	239	93.4
Nonprofit	117	110	94.0
For-profit	1,052	981	93.3
Higher education	3,598	3,274	91.0
Other postsecondary	2,888	2,543	88.1

Response rates by state and institutional control and level (SHEP classifications) are available in table C2.

Mean Enrollment (table 1)

Source: 1990 IPEDS Fall Enrollment Survey
1991-92 IPEDS Institutional Characteristics Survey

Table 1 includes all postsecondary institutions found in the IPEDS Institutional Characteristics Survey. To determine the size of an institution, fall enrollment data were used for all 4-year, 2-year, public less-than-2-year institutions, and the sample of private less-than-2-year institutions from which fall enrollment data had been collected. For nonsampled private less-than-2-year institutions (and any other institutions that had no fall

enrollment data reported or imputed through the regular survey process), total enrollment or enrollment totaled over the institution's six largest programs reported on the Institutional Characteristics Survey was used. Once an enrollment count was established for each institution in the IPEDS universe, the number of institutions and their enrollments were aggregated by control and level for SHEP institutions and non-SHEP institutions. Mean size was calculated by dividing the total enrollment in a sector by the number of institutions having an enrollment count. If an institution had no enrollment count, it was excluded from the calculation of mean size, but included in the total count of institutions.

Full-time Equivalent Enrollment (tables 2, 6, 8, 9, D1, and D2)
Source: 1990 Fall Enrollment Survey

Full-time equivalent enrollment (FTE) reported in tables 2 and D1 and used in the calculation of financial indicators in tables 6, 8, 9, and D2 was imputed using fall headcount enrollment data for all SHEP institutions because institutionally reported FTE was not requested on the Fall Enrollment Survey. Credit/contact hour production, which is now collected on the IPEDS Institutional Characteristics Survey, may be used in future editions of SHEP to compute FTE. For a detailed discussion of FTE derived from credit/contact hour production please see appendix D, technical notes on institutional activity data. FTE derived from fall enrollment was imputed as follows:

For each institution the ratio of the full-time equivalent of part-time enrollment reported on the 1985 Fall Enrollment Survey to the part-time enrollment reported in 1985 was calculated separately for undergraduate, graduate, and first-professional students.

If there were no enrollment data for an institution in 1985, ratios—aggregated for all institutions with 1985 data by control and level of institution—were determined and used as that institution's ratio. These ratios were multiplied by the reported 1990 part-time enrollment to obtain an estimate of the 1990 full-time equivalent of part-time enrollment.

Total FTE is equal to the sum of full-time enrollment and the full-time equivalent of part-time enrollment for all students.

Total Enrollment (table 3)

Source: 1990 Fall Enrollment Survey

The number of students by control and level of institution in the fall of 1990 will differ somewhat from numbers reported in other NCES publications because the data in SHEP are summarized by updated institutional characteristics and because private for-profit higher education institutions are not included as SHEP institutions.

Undergraduate enrollment (tables 3 and 14)

Source: 1990 Fall Enrollment Survey

Undergraduate enrollment as a percentage of total enrollment reported in table 3 is not equivalent to number of undergraduates enrolled in table 14 because table 14 does not include nonresident aliens.

Salaries, Tenure and Fringe Benefits of Full-time Instructional Faculty, 1990-91

Description of Methodology: This survey collects data on the number of full-time instructional faculty and their salary outlays by contract length (9- or 12-month), sex, and academic rank. It also collects information on the number of tenured faculty, the benefits available to faculty, and institutional outlays for these benefits.

The salary universe was developed by selecting from the 1990-91 IPEDS universe all accredited higher education institutions (including the accredited less-than-2-year institutions) and nonaccredited institutions that grant bachelor, master's, doctoral, or first-professional degrees. Institutions must have full-time, salaried faculty who were not teaching exclusively in a preclinical or clinical medical program, or who were not contributing services (such as members of a religious order), or were not all military personnel.

The forms are mailed in July and survey results are collected between November and April. Followup for nonresponse begins in January by telephone and letter. Data are edited for major reporting and processing errors. Generated totals are compared to the reported totals. If differences between them are within an acceptable range, generated totals replace reported totals; otherwise, institutions

are contacted to resolve discrepancies. Also, data for accredited institutions were checked for consistency with their prior year's response. Data are imputed for total nonresponding institutions only. Partial responses are resolved through editing procedures. Two procedures are used to impute data for nonresponding institutions.

To impute for nonresponding institutions in 1990-91 that had reported faculty data in 1989-90, the rate of change in number of faculty and total salary outlays was determined for institutions of the same level and control that had reported data in both years. Separate rates of change were calculated for faculty on 9- or 10- and 11- or 12-month contracts by sex and academic rank. These rates of change were then applied to reported 1989-90 faculty and salary data for each academic rank for each 1990-91 nonrespondent.

For institutions that did not respond to the 1989-90 Faculty survey a modified hot deck procedure was used. All responding institutions were grouped by institutional level and control and region. Four-year institutions were further disaggregated into: 1) institutions granting 30 or more doctoral degrees; 2) institutions granting 30 or more postbaccalaureate degrees, but not 30 or more doctoral degrees; and 3) all other institutions. For each of the identified groups the average total number of faculty per FTE and the total salary outlay per FTE was computed and then was multiplied by the FTE of each nonrespondent yielding an estimate for the total number of faculty and salary outlays for the nonrespondent. FTE was calculated by taking all of the full-time students plus one-third of the part-time students as reported in the IPEDS Fall Enrollment Survey. To distribute the estimated total number of faculty and salary outlays across the various academic ranks, a reporting institution was randomly selected from the same group as the nonrespondent. Percentages of total faculty and salary outlays by sex and academic rank were calculated for the randomly selected institutions and these percentages were then multiplied by the total estimated number of faculty and salary outlays of the nonrespondent. This imputation was done separately for faculty on 9- or 10- and 11- or 12- month contracts. Tenure status was not imputed, nor was part B of the survey form.

If the number of full-time faculty members in any institutional sector in a state table was less than 3, the average faculty salary for that sector was not presented in the state's faculty salary table. However, these faculty salaries were included in calculating average faculty salaries for the nation, the state in which the small sector was located, and either all private or all public institutions in the state, depending on the control of the suppressed institutional sector.

Faculty and salaries data used in SHEP includes institutions that submitted or resubmitted survey forms after the final data file was created. A summary of the response conditions is provided below:

Sector	Final universe	Respondents	
		Number	%
Total	3,581	2,920	81.5
4-Year			
Public	593	578	97.5
Nonprofit	1,535	1,203	78.4
For-profit	70	30	42.9
2-year			
Public	973	903	92.8
Nonprofit	153	110	71.9
For-profit	240	96	40.0
Less-than-2-year			
Private	17	0	0.0
Higher education	3,404	2,879	84.6
Other postsecondary	177	41	23.2

Detailed response rates by state and institutional control and level (SHEP classification) are available in table C3.

Finance 1990-91

Description of Survey and Methodology: The Finance Survey collects data on multiple aspects of institutional finance. Three of the several parts of the Finance Survey were used in this edition of SHEP: restricted, unrestricted and total current operating revenues by the source of the revenue (a subset of current operating revenues are education and general revenues, or E&G revenues, part A); restricted, unrestricted and total current operating expenditures by expenditure function (a subset of current operating expenditures are E&G

expenditures, part B); total expenditures for salaries by E&G expenditure function (part B); and scholarship and grant expenditures by source (part E).

Finance Survey forms are mailed in July and results are collected from November through April. Followup for survey nonresponse begins in February by letter and telephone. When contacted by telephone, institutions are asked to provide current funds revenues and expenditures by selected categories such as tuition and fee revenues, total revenues, instruction and scholarship/fellowship expenditures and total expenditures.

Data are inspected for major reporting and processing errors; however, editing is limited to correcting line and column addition. Generated sums are compared to the reported totals and replace the reported totals if the differences are less than 10 percent. If the differences are greater than 10 percent the institutions are contacted to resolve the discrepancies. Also, data are edited for consistency with prior year's data.

Imputation is first based on using reported data from a prior year. A rate of change of current fund revenues and current fund expenditures between the current year's survey and the previous year's survey is calculated for all institutions that responded to both surveys. These rates are calculated by control and level (defined by the highest degree granted) of institution. Nonresponding institutions' previous year's reported revenue and/or expenditure data are then adjusted by the rate of change appropriate to the institution's control and level.

Nonresponding institutions with no previously reported data are sorted into hot deck groups formed as a combination of control, highest degree granted, geographic region, state (if public), and presence of a medical (M.D., D.D.S., D.V.M., O.D. degree) or medical-related (chiropractic, optometric, or podiatric) institution. A donor institution is selected from the same hot deck group as the nonresponding institution. Fall enrollment data (1990) are used to compute a full-time equivalent enrollment (FTE) figure for both the nonresponding institution and its matched institution. The ratio of donor institution FTE to the recipient institution FTE is computed. This ratio is multiplied by the donor institution's reported values for those revenue and expenditure items which enrollment directly affects: tuition and fees, government appropriations, grants and contracts, auxiliary operations, instruction, student services, and scholarship and fellowship expenditures. All other finance items in parts A, B, and E are imputed without adjustment from the donor record.

Item imputation was performed prior to imputing for nonresponding institutions. A summary of response conditions of higher education institutions is provided below:

Sector	Final universe	Respondents	
		Number	%
Higher education	3,646	3,163	86.8
Central offices	16	16	100.0
4-year			
Public	610	597	97.9
Nonprofit	1,513	1,301	86.0
For-profit	72	35	48.6
2-year			
Public	991	935	94.3
Nonprofit	172	132	76.7
For-profit	251	135	53.8
Less-than-2-year			
Public	1	1	100.0
Nonprofit	1	0	0.0
For-profit	19	11	57.9

Detailed response rates by state and institutional control and level (SHEP classification) are available in table C4.

Education and General Revenues and Expenditures (tables 5-8)
Source: Finance Survey, 1990-91 and 1989-90

To be consistent with previous editions of SHEP, Pell Grant expenditures were excluded from scholarship and fellowship expenditures reported in tables 7 and 8 and excluded from revenues from federal grants and contracts reported in tables 5 and 6. Also, nonmandatory expenditures were excluded from total E&G expenditures in tables 7 and 8.

Adjusted Education and General Revenues and Expenditures

(tables 6, 8, and 9)

Source: Finance Survey, 1990-91

Calculations of E&G revenues or expenditures per full-time equivalent student included only those institutions that had a reported or imputed nonzero value for total E&G revenues and also had a nonzero value for full-time equivalent enrollment. Calculations of E&G revenues or expenditures per full-time faculty include only those institutions that had a reported or imputed nonzero value for E&G revenues, expenditures, and number of full-time faculty.

Scholarship and Fellowship Expenditures per FTE (tables 8 and 9)

Source: Finance Survey, 1988-89 and 1989-90

The scholarship and fellowship expenditures per FTE student in table 8 are not equivalent to those reported in table 9 for two reasons. First, scholarship and fellowship expenditures per FTE student shown in table 8 were calculated by subtracting Pell Grant expenditures from the total scholarship and fellowship expenditures reported in part B of the Finance Survey. In table 9, scholarship and fellowship expenditures per FTE student were calculated from part E of the Finance Survey, expenditures for scholarships and grants by source of expenditure. Total expenditures for scholarships and grants per FTE displayed in table 9 include Pell Grant expenditures.

Second, institutions with data imputed from reported 1985-86 finance data were included in table 8 but excluded from the calculation of sources of scholarship and fellowship expenditures per FTE for all sources except those from Pell Grants in table 9. Sources of scholarship and fellowship expenditures were not collected in 1985-86.

State Tax Fund Appropriations for Operating Expenses of Higher Education, 1990-91, 1991-92, and 1992-93

Description of Survey and Methodology: Data represent total state tax effort for higher education and include state tax funds appropriated by state legislatures for operating expenses of colleges, universities, community and 2-year colleges, and state tax funds appropriated for other higher education purposes. The Grapevine

survey was sent to a higher education fiscal agency in each of the 50 states in 1990-91, 1991-92, and 1992-93; responses were received from all states each year; and data were published initially by the Center for Higher Education in its monthly research report, "Grapevine". Data include appropriations, not expenditures, and reflect revisions received by the Center for Higher Education as of September 1, 1993.

Data were collected for the total of state tax fund appropriations for 1) operating expenses of public higher education institutions; 2) state higher education agencies (expenses for coordinating or governing boards including allocations for categorical programs); 3) state aid to community colleges; 4) state support for vocational technical 2-year colleges or institutions which enroll students at the postsecondary level; 5) higher education programs and purposes but appropriated to another state agency, such as appropriations for faculty fringe benefits disbursed by the state treasurer and funds for agricultural and medical/health programs; 6) state scholarship programs and state-supported student financial aid; and 7) state aid to private institutions of higher education. Excluded were appropriations for capital outlays and debt service, and appropriations derived from local tax sources, federal sources, student tuition, auxiliary enterprises, and non-tax sources.

State Appropriations in Current Dollars (table Y)

Source: Center for Higher Education, Illinois State University. Grapevine summary tables of the 50 States for Fiscal Years 1991, 1992, and 1993. Normal, Illinois.

Number of Individuals 18 Years of Age or Older (per capita)

(tables 6, B, and Y)

Source: U.S. Bureau of the Census, 1990 Decennial Census of Population and Housing: Summary Tape File 2A.

Number of Individuals Ages 18 through 24 (state population)

(table 14)

Source: U.S. Bureau of the Census, 1990 Decennial Census of Population and Housing: Summary Tape File 2A.

The number of individuals ages 18 through 24 that were classified as "other race, not of Hispanic origin" were distributed among all racial-ethnic categories (except Hispanics) in direct proportion to the reported distributions.

Appendix D

Instructional Activity in SHEP Institutions 1990-91

1117

1118

As noted in the introduction of this edition of SHEP, the number of full-time equivalent students (FTE's) reported in table 2 and used for the calculation of financial indicators in tables 6, 8, and 9 was derived by using fall FTE counts as reported by institutions in 1985 and aging those data on the basis of 1990 fall full- and part-time enrollment. A more complete description of the procedures used is described in appendix C. Using fall data as a proxy for the number of FTE students over a 12-month academic year, while unavoidable for many years, is theoretically problematic, especially when it is used to adjust data that actually span a 12-month academic or fiscal year such as revenues and expenditures data. Additionally, as an approximation to a 12-month measure, it may not adequately reflect the number of FTE's over a full year, especially among institutions that have a sizable number of part-time students. Moreover, estimates of the number of FTE's based on fall enrollment may not be comparable among institutions, particularly among institutions that have differential numbers of part-time students or differential levels of summer enrollment. On the other hand, the number of students enrolled in the fall has been reported by SHEP institutions for several decades and is a reliable and consistent statistic.

Requesting the number of credit and/or contact hours produced by an institution (instructional activity) was initiated in the first full year of IPEDS in 1986. Schools were asked to report the total number of credit hours, contact hours, or both (if the school had both credit and contact hour programs) produced by the institution for the fall term and for a full 12-month period reflecting the institution's academic or fiscal year.* Primarily because of the newness of reporting this statistic, activity data were incomplete and of questionable quality in the first few years of IPEDS. Each year, however, both fall and 12-month instructional activity as reported to IPEDS have gotten more complete and reliable. Therefore, it is likely that future editions of SHEP will derive the number of FTE students from institutions' reported total activity over a 12-month period.

Before incorporating this new measure of FTE students into SHEP, however, it is important to examine the measure and to determine how trends in SHEP

*Credit hour activity is defined as the product of the number of credits for a course times the number of students enrolled in the course (for credit) summed over all credit courses. Contact hour activity is defined as the product of the number of contact/clock hours for a course times the number of students enrolled in the course summed over all contact/clock hour courses.

indicators would be affected by its use. Thus, the purpose here is to compare FTE's derived from fall enrollment and fall and 12-month instructional activity data and to determine how use of an FTE based on 12-month instructional activity (in terms of credit and/or contact hours) would impact selected SHEP indicators.

At the present time good quality instructional activity data are available only for the 1990-91 fiscal year. These data were collected in the 1991-92 IPEDS Institutional Characteristics Survey. Factors for converting credit and contact hour activity to number of FTE's were based on standard practice and varied by the level of credit or contact hour activity (undergraduate, graduate, or first professional), and by the academic calendar system under which the institution operated (i.e., a semester/trimester or quarter calendar system). The exact conversions used are detailed below:

Quarter Calendar System:

<u>Enrollment level</u>	<u>One FTE in fall term</u>	<u>One FTE over 12-month period</u>
Undergraduate	15 credit hours 300 contact hours	45 credit hours 900 contact hours
Graduate	12 credit hours	36 credit hours
First-professional	16 credit hours	48 credit hours

Semester/Trimester/4-1-4 Plan/Other Calendar System:

<u>Enrollment level</u>	<u>One FTE in fall term</u>	<u>One FTE over 12-month period</u>
Undergraduate	15 credit hours 450 contact hours	30 credit hours 900 contact hours
Graduate	12 credit hours	24 credit hours
First-professional	16 credit hours	32 credit hours

Instructional Activity in SHEP Institutions 1990-91

NOTES.— FTE'S in table D1 and revenues and expenditures per FTE in table D2 derived from fall enrollment are based on institutions that had both enrollment and activity data. Indexes are based on U.S. average of 100.

For example, reported total fall undergraduate credit hour activity was converted to FTE's by dividing it by 15 credit hours for schools operating under a semester/trimester calendar system. The number of FTE's based on 12-month undergraduate credit hour activity in schools on a semester/trimester calendar system was calculated by dividing the reported total semester/trimester undergraduate credit hour activity by 30. For schools operating under a quarter calendar system, total 12-month undergraduate credit hour activity was divided by 45 to determine FTE counts.

Table D1 contains the number of FTE students as derived from fall enrollment and fall and 12-month instructional activity. It also indicates how these different estimates of FTE students compare among themselves by displaying the ratio of the number of FTE students derived from fall enrollment data to the number derived from instructional activity over the fall term and also over a 12-month academic year by student level (undergraduate, graduate, and first-professional). Table D2 indicates how selected financial indicators would be affected by using an FTE count based on 12-month instructional activity rather than an FTE count based on fall enrollment as the adjustment for institutional size. It should be noted that fall enrollment FTE's and fall and 12-month instructional activity FTE's in table D1 include only those institutions that had reported or imputed nonzero values for all three (fall enrollment and fall and 12-month instructional activity). Size adjusted indicators in table D2 were calculated only on those institutions that had reported or imputed nonzero values for fall enrollment, 12-month instructional activity and the relevant finance data (e.g., tuition and fee revenues).

As may be seen in table D1 for the nation, the number of FTE students calculated from fall enrollment (fall enrollment FTE) is higher than FTE's calculated from fall instructional activity in institutional sectors and among levels of students in which the proportion of full-time students tends to be higher than the proportion of part-time students, as in the 4-year college undergraduate sector. In institutions that have a higher proportion of part-time rather than full-time students as in public 2-year institutions (SHEP: Seventh Edition, table 3), the fall enrollment FTE is much lower than the fall credit hour activity FTE (11 percent lower in public 2-year schools). Since most first-professional students attend full-time, the fall headcount FTE and the fall instructional activity FTE of first-professional students are almost equal.

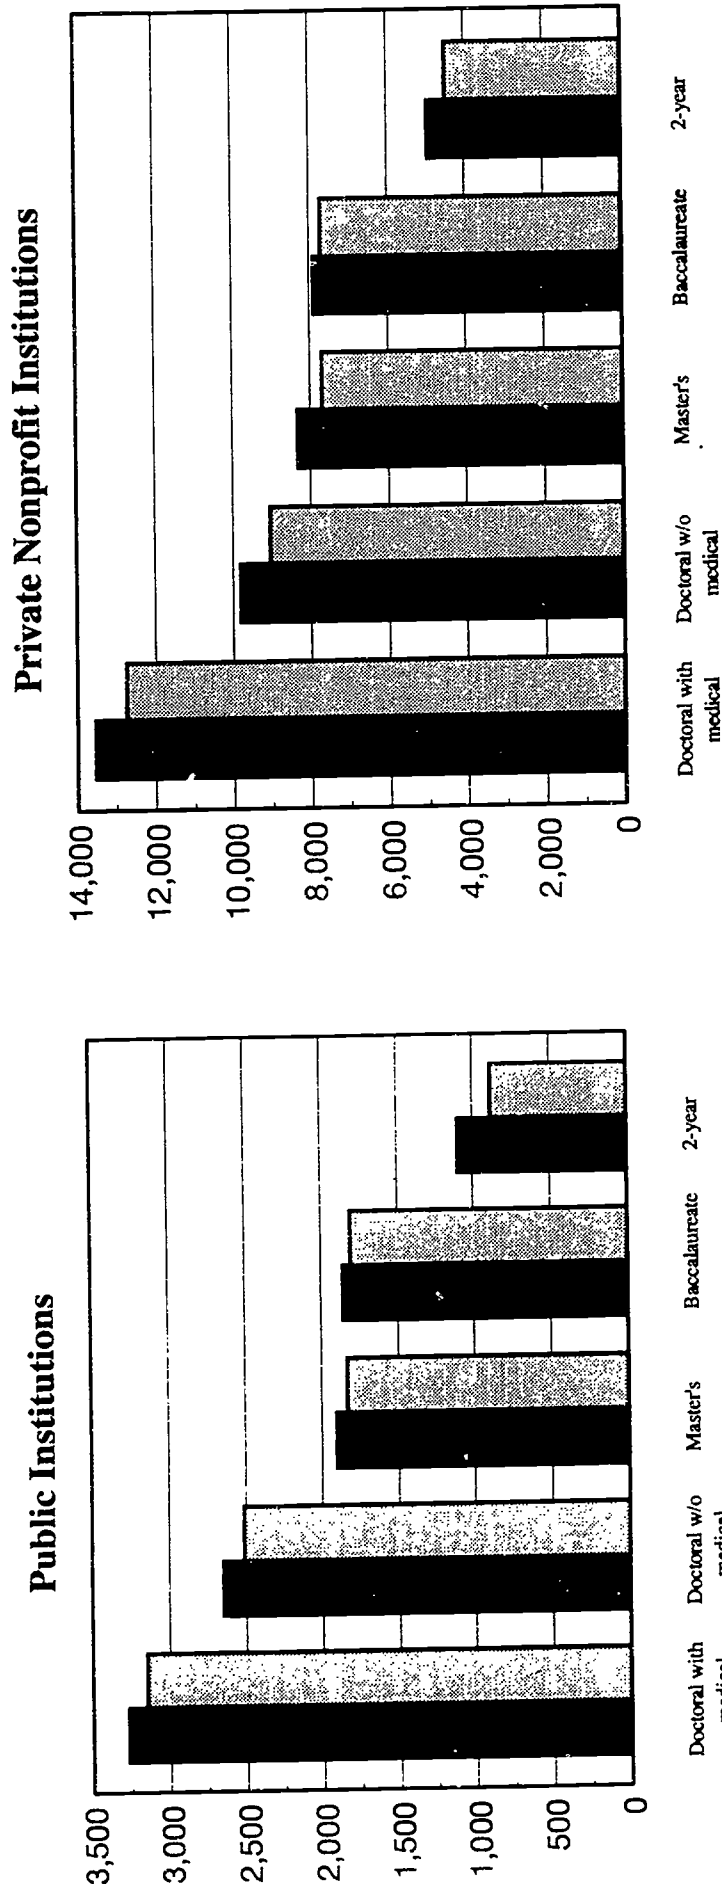

Fall enrollment FTE, on the other hand, is consistently lower than 12-month instructional activity FTE in almost all institutional sectors and among almost all levels of students. This would be expected since the standard definition of a

full-time student for an entire academic year requires full-time attendance for only two semesters/trimesters or three quarters. Under this definition, for example, an undergraduate student would be a 'full-time equivalent' if that student earned 30 semester credit hours or its equivalent by, for example, enrolling for 15 credit hours or its equivalent for two semesters or its equivalent (e.g., 3 quarters). While this definition adequately describes full-time students, institutions often times have multiple enrollment periods in which credit or contact hour activity is generated (e.g., multiple summer sessions, intersessions), and this additional activity is not considered in the standard definition. It is, however, reflected in the higher FTE count that results from dividing the 12-month undergraduate instructional activity by 30 undergraduate semester credits or its equivalent.

Since 12-month instructional activity is consistently higher than the FTE based on fall enrollment, adjusting for size based on this statistic rather than on a fall enrollment based FTE consistently decreases the size of the selected FY 1991 indicators in figure D1 and table D2. While the observed percentage decreases due to this new adjustment are relatively small (about 9.6 percent on average), they are large in relation to annual changes over time in these indicators. In particular, FY 1991 tuition and fee revenues per FTE decline by 9.6 percent when the FY 91 12-month activity FTE is used as the adjustment factor rather than the 1990 fall enrollment based FTE. This indicator, however, when calculated consistently using a fall enrollment based FTE changes only about 7 percent a year between 1987 and 1991. Furthermore, tuition and fee revenues per FTE, calculated consistently, have risen each year since 1987 resulting in a 32.8 percent increase. Were the 12-month activity FTE's used to adjust total tuition and fee revenues for the 1990-91 fiscal year, in lieu of the fall enrollment FTE, tuition and fee revenues per FTE would show a decline of 2.6 percent from FY 1990 to FY 1991 rather than a 7.7 percent increase. A similar discontinuity would occur for instructional expenditures per FTE. This indicator, when calculated consistently over time, increased about 5.2 percent per year, on average, and 22.4 percent over the period from FY 1987 to FY 1991. However, as with tuition and fee revenues per FTE, instructional expenditures per FTE is 9.6 percent lower overall using a 12-month activity FTE rather than a fall enrollment based FTE in FY 1991, and, rather than increasing 5.4 percent from FY 1990 to FY 1991, instructional expenditures per FTE would show a decrease of 4.8 percent.

In public sector institutions, using the 12-month activity FTE as the adjustment factor rather than the fall enrollment based FTE would result in a 10.5 percent

Figure D1.--Comparison of tuition and fee revenues per FTE student derived from fall enrollment data with tuition and fee revenues per FTE student derived from 12-month instructional activity data, by control and level of SHEP institution

1196

1196

decrease in enrollment adjusted indicators, slightly larger than for the nation as a whole.

In private sector institutions, where the 12-month activity FTE is not quite as large in relation to the fall enrollment based FTE, the effects of using instructional activity to adjust financial indicators for institutional size are not quite as dramatic. Tuition and fee revenues per FTE and instructional expenditures per FTE would be 6.3 percent lower in FY 1991 if the 12-month activity FTE were used instead of the fall enrollment based FTE. Additionally, over time rather than increasing by 9.2 percent from FY 1990 to FY 1991, tuition and fee revenues per FTE would increase by just 2.3 percent if 12-month activity FTE were used as the size adjustment rather than the fall enrollment based FTE. Instructional expenditures per FTE would increase 1.8 percent from FY 1990 to FY 1991 rather than 8.6 percent.

Based on these results, it is prudent to track the behavior of SHEP indicators using both fall enrollment based FTE's and 12-month activity FTE's as the size adjustment for a least two more years. This will provide additional data on the size of the discontinuity among institutional sectors and sufficient data to determine the relative trends in these indicators. With these three years of data it will be possible to determine if these indicators are changing at the same rate and in the same direction albeit at different levels, and this information, in turn, will permit a smoother transition from one statistic to the other.

The following pages contain tables D1 and D2 for the 50 states and the District of Columbia. A summary of response rates by state and institutional control and level for instructional activity data are available in table D3 at the end of this appendix.
