ABSTRACT

This report provides opening fall headcount enrollment data for Colorado public postsecondary institutions, independent (private nonprofit) institutions, proprietary institutions, and the U.S. Air Force Academy from 1985 through 1994. The report also provides full-time equivalent (FTE) enrollment data for public institutions. The bulk of the report consists of 8 figures and 12 tables that provide information on: (1) fall headcount enrollment; (2) headcount enrollment distribution by institutional type; (3) FTE enrollment estimates versus actual enrollments; (4) in-state FTE enrollment; (5) out-of-state FTE enrollment; (6) total FTE enrollment; (7) total FTE enrollment by student level; and (8) special funded in-state FTE enrollment. Data highlights include: opening fall headcount enrollment at public institutions decreased 1.0 percent from fall 1993 to 1994, while fall headcount enrollment at each of the three Colorado independent institutions increased. EXECUTIVE SUMMARY

The Commission collects enrollment data and produces a fall enrollment report annually. The report includes historical headcount and full-time equivalent (FTE) data, and provides an enrollment outlook for the current year. Some of this year's finding are:

- Opening fall headcount enrollment at Colorado public institutions is 179,140, a decrease of 1.0% compared to fall 1993. This follows a 0.7% decrease last year which was the first decrease ever the last ten years.
- o 1994-95 in-state FTE enrollment at Colorado public institutions is expected to decrease to 115,380, 0.1% below 1993-94 enrollment. This is the second year of in-state FTE declines. Although total in-state enrollment is down, enrollment at 18 of the 28 institutions is increasing.
- Out-of-state FTE enrollment at Colorado public institutions is expected to decrease this year; the first decrease over the last ten years. 15 of the 28 institutions increased out-of-state enrollment.
- Although total FTE enrollment at Colorado public institutions is projected to decline 0.1% to 136,590 in 1994-95, 17 of the 28 public postsecondary institutions increased during 1994-95.
- Fall headcount enrollment at each of the three Colorado independent institutions increased.
- 83 of the 97 Colorado proprietary institutions <u>surveyed</u> responded and reported a headcount enrollment of 20,690. Their enrollment ranged from 4 to 2,426 students.

INTRODUCTION

This report provides opening fall headcount enrollment data for Colorado public postsecondary institutions, independent (private, non-profit) institutions, proprietary institutions, and the United States Air Force Academy. Headcount enrollment is the actual number of students who enrolled, regardless of the number of classes in which they enrolled. In addition, full-time equivalent (FTE) enrollment is provided for the public institutions. FTE is a calculation of the total number of student credit hours, divided by the number of hours equivalent to a full-time student course load. Data is reported by individual institution, governing board, and institutional type. Also, FTE enrollment is reported by student residency status, in-state and out-of-state, and by undergraduate and graduate level of instruction.

Reported data is derived from annual institutional reports to the Colorado Commission on Higher Education (CCHE), and the National Center for Educational Statistics. The Commission also collects headcount data from public institutions, and two of the independent institutions, as part of its Student Unit-Record Data System (SURDS). SURDS data is collected at the end of each term and will usually show a higher total headcount than the "opening" headcount reported here.

Page 1
CCHE Fall Enrollment, November 1994

¹For most institutions, this is 30 credit hours per academic year. For institutions on a quarter system, the divisor is 45 credits.

Public Postsecondary Institutions

Fall headcount enrollment at Colorado public postsecondary institutions is 179,140, a decrease of 1.0% compared to fall 1993. This follows a 0.7% decrease last year which was the first public higher education headcount enrollment decrease over the last ten years. Figure 1 shows the enrollment since 1985.

Figure 1
Opening Fall Headcount Enrollment
Colorado Public Institutions

The largest increases in the two-year sector occurred at Otero Junior College (12.0%) and at Mesa State College (6.0%) in the four-year sector. Institutions with the largest decreases in the two-year sector were Morgan Community College (-12.3%) and Fort Lewis College (-3.9%) in the four-year sector. Table 1 and 1A provide the opening headcount data at each institution.

Page 4
CCHE Fall Enrollment, November 1994

Figure 2 displays the distribution of headcount enrollment by institutional type¹ for the public institutions. Between 1985 and 1992, the community college enrollment share increased while the other two sectors decreased. In 1989, the community college share exceeded the universities and colleges share for the first time. Over the last two years, however, the community college share decreased while the other sectors share increased slightly.

Figure 2
Headcount Enrollment
Distribution by Institutional Type

When interpreting headcount data, it is important to note that institutions report enrollment to CCHE early in the academic term. For example, community colleges offer many courses that start after the reporting date, or are open to enrollment throughout the term. These institutions will have a higher headcount at the end of the fall term. Since the data is collected at the same time each year, however, multi-year comparisons are a good indicator of enrollment trends.

Research Universities/Specialized Medical include the Colorado School of Mines, Colorado State University, Colorado State University - Professional Veterinary Medicine, the University of Colorado - Boulder, and the University of Colorado - Health Sciences Center.

Universities and Colleges include all other public four-year institutions in the state.

Community Colleges include the CCCOES institutions and the local district community colleges.

Independent (private, nonprofit) Postsecondary Institutions

Fall 1994 enrollment at each of the three Colorado independent institutions increased. Regis University had the largest increase, 9.5%. The University of Denver continues to increase, though at a slower rate than occurred in the early 1990's. Enrollment at The Colorado College has not changed significantly over the ten year period. The United States Air Force Academy enrollment decreased by -4.9%. That trend is expected to continue as the military academies adjust to the decrease in military forces.

Area Vocational Schools and Proprietary Postsecondary Institutions

Area vocational schools and proprietary institutions provide varied programs, including certificates through master's and first-professional degrees, and annually report enrollment data to CCHE and the National Center for Education Statistics through the Integrated Postsecondary Education Data System (IPEDS) survey. The six area vocational schools reported fall 1994 enrollment of 7,861. 83 of the 97 Colorado proprietary institutions surveyed responded and reported enrollment of 20,690. Their enrollment ranged from 4 to 2,426 students. While enrollment information about these institutions is limited, it is important to note the service they provide to a large number of individuals.

FULL-TIME EQUIVALENT (FTE) STUDENTS

Public institutions also report the number of student credit hours taken by students reported on the opening fall headcount report. The fall data is used to estimate full-time equivalent (FTE) student enrollment for the current fiscal year. Since FTE student enrollment is used in the budget process, an early indication of the total enrollment for the current fiscal year is useful in evaluating budgetary impact.

Table 2 compares last year's 1993-94 FTE estimates with the actual 1993-94 FTE by board. Last year's report over-estimated the final in-state FTE by 1.3% (117,010 FTE estimate versus 115,457 final, a difference of 1,553 FTE). The in-state estimates ranged from a 0.1% underestimate for the Regents of the University of Colorado, to a 4.6% over-estimate for the Local District Colleges.

The out-of-state estimates ranged from a 4.9% under-estimate for the Local District Colleges to a 2.6% over-estimate for the Board of Trustees University of Northern Colorado. Statewide, the out-of-state estimate was 0.5% above the actual levels.

In-State Full-Time Equivalent Enrollment

1994-95 in-state FTE enrollment is expected to decrease to 115,380, 0.1% below 1993-94 enrollment. This is the second year that in-state FTE has decreased. Figure 3 displays the in-state FTE enrollment change since 1985-86. According to estimates, the 1994-95 FTE enrollment level will be the third highest of the last 10 years. Tables 3 and 3A provide in-state FTE student data for all public institutions from 1985-86 to 1994-95 (Estimated). These tables provide the actual level and percent change by institution and summary group.

In the four-year sector, 9 of 13 institutions have increasing enrollment. Mesa State College is increasing at the highest rate (5.3%). In the two-year sector, 9 of the 15 two-year institutions are increasing. Otero Junior College (6.8%) and Pueblo Community College (6.4%) are increasing at the highest rates. Overall, change in the system is mixed, with two-year and four-year, and urban and rural institutions both increasing and decreasing.

Figure 3
In-State Full-Time Equivalent Enrollment
Colorado Public Institutions

Enrollment by Summary Group

Enrollment increased in 4 of the 7 summary groups (board/local district). The Trustees of the Colorado School of Mines and the State Colleges are expected to increase at the highest rates, 2.4% and 1.9%, respectively. Enrollment at the Colorado Community College and Occupational Education System (CCCOES) is expected to be flat for 1994-95. Enrollment at the Regents of the University of Colorado and Local District College institutions are expected to decrease this year.

[^]Estimate.

Enrollment by Institutional Type

Community colleges share of headcount en oll of the total number of student credit hours divided by the number of hours equivalent to a full-time student course load) the universities and colleges are projected to have the largest share of enrollment, 38.3%, compared to the community colleges, 34.1%, and the research universities/specialized medical institutions¹, 27.6%, for 1994-95. Between 1985-86 and 1992-93, the community college share of enrollment usually increased, and exceeded the research universities/specialized medical share for the first time in 1988-89. The Community College share, however, decreased in 1993-94 and is estimated to decrease this year.

¹Does not include the University of Colorado - Health Sciences Center (UCHSC). FTE data for UCHSC is not available.

Out-of-State Full-Time Equivalent Enrollment

Out-of-state FTE is expected to decrease this year; the first decrease over the last ten years. Figure 5 shows the out-of-state enrollment change since 1985-86. The 1994-95 level is expected to decrease 0.1% to 21,210. Tables 4 and 4A provide out-of-state FTE student data for all public institutions from 1985-86 to 1994-95 (Estimated). These tables provide the actual level and percent change by institution and summary group.

Out-of-state enrollment is increasing at 8 of 13 four-year, and 7 of 15 two-year institutions. The total out-of-state enrollment rate of change is expected to be about the same as the in-state change.

While the out-of-state enrollment is a small part of community colleges total enrollment, community colleges have experienced significant increases since 1989-90. The 1993-94 and 1994-95 community college out-of-state enrollment growth, however, appears to be below the changes experienced in the early 1990's.

Figure 5
Out-of-State Full-Time Equivalent Enrollment
Colorado Public Institutions

Enrollment by Summary Group

6 of the 7 summary groups (board/local district) are experiencing out-of-state enrollment growth this year. The largest increases are expected at the Colorado School of Mines and the Community College and Occupational Education System (CCCOES), up 4.6% and 3.7%, respectively. Out-of-state enrollment at the Regents of the University of Colorado are projected to decrease by 2.6%.

Enrollment by Institutional T

In 1994-95, the research universities/specialized medical institutions¹ accounted for the largest share of out-of-state enrollment, 61.3%, compared to the universities and colleges, 25.7%, and the community colleges, 13.0%. Since 1987-88, the research universities/specialized medical institutions share of out-of-state enrollment has decreased, while the community college and universities/colleges shares increased. Figure 6 shows the distribution of out-of-state FTE by institutional type for ten years.

Figure 6
Out-of-State FTE Enrollment
Distribution by Institutional Type

¹Does not include the University of Colorado - Health Sciences Center (UCHSC). FTE data for UCHSC is not available.

Total Full-Time Equivalent Enrollment

Total FTE enrollment is projected to increase at 17 of 28 public postsecondary institutions during 1994-95. Increases range from +0.4% at the University of Colorado - Colorado Springs and the University of Northern Colorado to 7.6% at Otero Junior College. Tables 5 and 5A provide total FTE student data for all public institutions from 1985-86 to 1994-95 (Estimated). These tables provide the actual level and percent change by institution and summary group.

Although total FTE enrollment increased each year from 1986-87 to 1992-93, it decreased slightly over the last two years (Figure 7). The 1994-95 rate of decrease for total enrollment is projected to be 0.1%, down from last year's 0.5% drop.

Figure 7
Total Full-Time Equivalent Enrollment
Colorado Public Institutions

Enrollment by Summary Group

Total FTE enrollment at 5 of the 7 summary groups (board/local district) is up from last year. The largest increase was 3.1% at the Colorado School of Mines, followed by the State Colleges increase of 1.9%. The Regents of the University of Colorado and the Local District Colleges are expecting slight decreases.

[^]Estimate.

Total Full-Time Equivalent Enrollment by Student Level

In 1993-94, 15.1% of the enrollment at the 10 institutions¹ offering graduate level instruction during the last ten years was at the graduate level. Overall, the graduate share has not changed significantly during that period. The graduate share has ranged from a low of 14.6% in 1984-85 to a high of 16.0% in 1986-87. Tables 6 and 6A provide 1984-85 to 1993-94 total FTE student data by graduate and undergraduate level. Figure 8 displays the 1993-94 distribution of that data.

Western State College has phased out its graduate programs, and currently does not offer graduate level instruction. The Colorado State University - Professional Veterinary Medicine only offers graduate level instruction. Excluding those institutions, the University of Colorado - Denver has the highest percentage of graduate level FTE, 32.7%, followed by the Colorado School of Mines, 21.3%. The University of Southern Colorado had the lowest graduate share at 2.7%. The graduate share of the University of Southern Colorado enrollment increased during the mid 1980's, dropped to 1.3% in 1989-90, but has increased each year since.

Special Funded Full-Time Equivalent Enrollment

In addition to standard resident instruction credit hours, a number of special programs created by the General Assembly and the Commission receive general fund support. While some of these programs have a long history, several were recently established. Data in Table 7 is included in the Tables 3 and 5. Since each of these programs has an effect on the distribution of state funds, the data is identified separately to provide an understanding of the potential impact of these programs.

While the basic skills courses have been offered and state-funded for many years, CCHE only began collecting separately identifiable basic skill data in 1989-90. In 1993-94, the programs listed in Table 7 produced total of 7,546 FTE or 7.5% of the total in-state FTE generated that year.

Page 22 CCHE Fall Enrollment, November 1994

¹Members of the armed forces or their dependents that are granted in-state tuition status.

²Basic skills courses (including Academic Skills and Preparatory Courses) that can be claimed for state FTE funding at community colleges, Adams State College, and Mesa State College.

³A vestibule lab is instruction, supervised by faculty, without tuition or attributable credit, for which fundable credit hours are imputed. It is designed to offer spot remediation to bridge the gap between high school and college, and is only funded at community colleges, Adams State College, and Mesa State College.

⁴Commission approved off-campus state-funded programs. Includes alternative access sites, off-campus urban, and off-campus rural.
