ABSTRACT

This publication provides information on the strategies used by Seattle (Washington) Public Schools' counseling service and tech prep counselor to integrate the tech prep concept into comprehensive counseling activities. It begins with a rationale for tech prep and information on enrollment. These six strategies are then detailed: (1) appoint a coordinator for the project; (2) design training sessions and workshops to help build an awareness of and support for the tech prep concept; (3) provide counselors with useful information and a common working framework for tech prep; (4) update and use existing programs; (5) support the uniqueness of each school and tailor the tech prep emphasis to the school's strength in academic and vocational programs; and (6) establish districtwide goals for tech prep and a common career development portfolio to unify schools. Other contents are as follows: the purpose of a comprehensive guidance program, a list of major guidance activities for grades 9-12, comprehensive guidance program goals, a chart of high school/post high school student options, a sample 4-year and beyond planner for students, a sample new student enrollment form, and background information and statistics on Seattle Public Schools. SEATTLE TECH PREP

INTRODUCTION

TECH PREP is an innovation in education that responds to changes in the way people work for a living, the things they need to know to be successful, and the reality that few careers will be immune to change or even obsolescence. Students must be prepared for a work environment in which learning is a lifelong process that demands significant academic, technical, and social skills.

Tech Prep joins high schools, community colleges and employers to develop an educational program that integrates academic and occupational knowledge in a way that prepares students for a meaningful role in society and the workplace. By linking four years of high school with two years at a community college, and providing work-site learning opportunities, Tech Prep can motivate students to stay in school and see value in an education.

“Tech Prep is working at overcoming the dualism which has plagued American education since our early days, at creating reforms that will prepare young people, and not so young people, for a world which will no longer reward them in boxes labeled “manual labor” and boxes labeled “management” but will prepare them for a world in which everyone will be a thinker and a doer, will need technical skills and analytic skills and will be left behind without these.

Given the demands of the global economy, we have no choice but to educate our students in what nobody knew yesterday and prepare them for what one must know tomorrow.”

*Augusta Kappner, Ph.D
Assistant Secretary
Office of Vocational and Adult Education
United States Department of Education*

GETTING STARTED – WHY TECH PREP?

Far too many students see little connection between what they are studying in high school and how it relates to their future employment. Math, science, English and specific electives are necessary components of a successful technical career preparation program. Without proper planning, a student can easily pass through high school unprepared for employment or for the kind of training required to land a good job.

The majority of high school students say they plan to go on to college, but do not. Of those who enter college, only 20 percent actually obtain a four-year degree. Tech Prep outlines a pathway to employment and academic achievement that does not rule out the possibility of entering a four-year college.

Tech Prep also provides the nation a better prepared work force at a time when international competition is growing.

Tech Prep targets the neglected majority of students – the middle 50 percent – with a focussed program of study.

Tech Prep targets the 75 percent of students that do not complete baccalaureate degree programs.

Tech Prep helps students understand and “buy into” a context for learning.

Tech Prep better utilizes educational resources and focuses on career guidance programs for high school students.

OBSERVATIONS ABOUT HIGH SCHOOLS

1. Schools are full of unmotivated students who say school work is irrelevant.
2. Elective courses are perceived as not needed or useful.
3. Students are finding it necessary to enroll in remedial courses in community college.
4. The senior year is often seen as a time to take it easy, take only what is required; a time to have fun.
5. Most students say they are going to college because it is the “respectable” and expected choice after high school.
6. Those high school students who enter college may not be prepared for career decision-making.

GUIDANCE
PROGRAMS
SEATTLE TECH PREP**

HOW DOES A STUDENT ENROLL IN TECH PREP?

Students obtain information about specific Tech Prep programs, career paths, and recommended course selections from the school Career Center or the counseling office. A student selects a career area that matches his or her interest, skills and abilities. The student then develops a High School and Beyond Plan, outlining the courses they will take to prepare for the chosen career. The plan includes such

lated experiences as internships, jobs, pre-apprenticeship programs, volunteer work and career shadowing. As they progress through high school, students may choose a different career area and revise their High School and Beyond Plan accordingly. A student who completed one or more Tech Prep courses with a grade of

"B" (3.0) or better and who meets all college admission requirements will be able to enroll directly in the appropriate advanced courses at the college without further demonstration of competency in the subject matter of the waived courses upon presentation of an official Seattle high school transcript and a Tech Prep certificate of competency.

A Tech Prep student is granted advanced standing if he or she is admitted to a Seattle community college within two years of graduation from high school. After completing nine college credits, the student may convert the appropriate Tech Prep high school course to community college credits.

A COUNSELING FRAMEWORK FOR TECH PREP

Seattle Public Schools initiated its Tech Prep program December 15, 1991 with the approval of formal articulation agreements with the Seattle Community College District. As of March, 1994, fourteen programs (shown on page 10) have been articulated between these two educational institutions. In March of 1993, as part of a state grant, Seattle Public Schools hired a Tech Prep Counselor. With articulation agreements already in place, and marketing materials broadly distributed, the job of the Tech Prep counselor was to work with guidance and counseling staff to encourage implementation of Tech Prep concepts in the schools.

STRATEGIES THAT WORK

The strategies employed by Seattle Public School's Counseling Service and Tech Prep Counselor to integrate the Tech Prep concept into comprehensive counseling activities are listed below and detailed on the following pages:

1. Appoint a coordinator for the project.
2. Design training sessions and workshops to help build an awareness of and support for the Tech Prep concept.
3. Provide counselors with useful information and a common working framework for Tech Prep.
4. Update and utilize existing programs.
5. Support the uniqueness of each school. Tailor the Tech Prep emphasis to the schools strength in academic and vocational programs.
6. Establish district-wide goals for Tech Prep and a common Career Development Portfolio to unify schools.

1. APPOINT A COORDINATOR FOR TECH PREP GUIDANCE COUNSELING. SURVEY COUNSELORS REGARDING USEFUL INFORMATION.

Recognizing the essential role its counseling staff plays in introducing a Tech Prep program to students, Seattle Public Schools hired a Tech Prep Counselor in March of 1993 to work with guidance and counseling staffs to encourage implementation of the Tech Prep concepts in the schools. The district

revitalized and updated its existing comprehensive guidance program to include Tech Prep.

Each high school was encouraged to develop programs that reflected its own mix of vocational and academic courses and programs. Rather than consider this diversity a liability, it was treated as an asset. By incorporating "new" information into existing career information, advising and counseling programs, Tech Prep became a part of what was already in place, not an "add on".

I am interested for next school year. Yes No

2. DESIGN COUNSELOR TRAINING SESSIONS AND WORKSHOPS TO HELP BUILD AN AWARENESS OF AND SUPPORT FOR THE TECH PREP CONCEPT.

Seattle Public Schools, like most urban school districts, places great demand on its guidance and counseling staff. Counselors are assigned to high schools on a 400 to one student to counselor ratio. Each high school has a Career Center staffed by a career center specialist and offers Tech Prep courses and opportunities for vocational training. Time and resources are limited, so the Tech Prep Counselor works with the counseling staff to blend the Tech Prep concept into existing career information, advising and guidance programs.

In addition to the specifics about Seattle's Tech Prep courses and programs, training sessions include information about the economy and the workplace, restructuring efforts, the philosophy behind Tech Prep, school-to-work transition programs, and the interrelationship of all these elements. To include as many participants as possible, and cover all the material, it is important to schedule training sessions efficiently. Workshop participants were paid to attend these training sessions and were given materials to use in their work. To the right is an agenda from a typical training session.

3. PROVIDE COUNSELORS WITH USEFUL INFORMATION ABOUT TECH PREP.

The Seattle Tech Prep is integrated into comprehensive guidance activities. By providing additional guidance materials that counselors can use to assist students, Tech Prep can become a part of Four-Year Planning efforts, freshman and new student orientation, parent consultation and counseling, and strengthen efforts to market strategies for good grades, good behavior, and sound decision making. Coupled with counselor training opportunities, these materials can help establish a solid framework for Tech Prep within ongoing counseling efforts.

DEPARTMENT OF VOCATIONAL TECHNICAL EDUCATION

TECH PREP THE STUDENT/PARENT GUIDE

HOW YOU CAN HELP YOUR TEENAGER DECIDE WHAT THEY WILL DO AFTER HIGH SCHOOL.

UNDERSTAND THE CHANGING WORLD OF WORK - KNOW EDUCATIONAL/TRAINING OPTIONS - USE A FOUR-YEAR/BEYOND PLAN

Today's job market demands a highly skilled work force. More than half of all new jobs are technical in nature and require at least one or more years of training after high school. A high school education is simply not enough to assure a decent job.

Time was when a college degree was a ticket to work that paid well and was relatively secure. Now about 40 percent of graduating seniors go on to four-year colleges and universities and of that number, only 20 percent actually graduate. Even a college degree may not assure work in a graduate's field of study.

Now students must begin to examine their goals closely and begin preparing for the prospect of changing jobs, if not professions, several times in their lifetime. Good learning skills and a plan can help prepare a student for a life of learning.

Young people can select from a number of options that allow them to gain skills that will prepare them for employment or continue with further education or training. Students can choose apprenticeship opportunities, on-the-job training or to attend an educational institution where they can acquire necessary job skills.

Tech Prep programs start in high school, continue at a community college and result in an associate degree. Students may transfer to a college or university after completing an associate degree in the community college.

Help your teenager explore career options and the training requirements necessary for different careers. Discuss financial aid and how much the family can provide. Explore other resources available to help them reach their goals.

WHAT SHOULD MY CHILD DO?

1. Take advantage of educational and training opportunities offered in high school.
2. Visit the Career Center and utilize the services provided.
3. Take courses that fit a well designed Four-Year and Beyond Plan.
4. Continue to assess their interests, skills and abilities and revise their Four-Year Plan as necessary.

WHAT CAN PARENTS DO?

1. Encourage students to acquire skills useful for any career. Employers want employees who can speak and write well, have good communication skills and can reason and get along with others. A strong academic background is essential.
2. Discuss a Four-Year Plan with your high school age student. Stress the importance of planning and selecting courses with a goal in mind.

4. UPDATE, AND UTILIZE EXISTING PROGRAMS — SOMETHING OLD, SOMETHING NEW.

Using the familiar and known to introduce new ideas or programs is a good strategy to reduce resistance to change. Building on what already exists can also save time and energy. By acknowledging that “we’ve been there before” or “we’re already doing that” may apply to aspects of Tech Prep, it is easier to focus on what really is new.

DEVELOPING
TECH PREP
GUIDANCE
PROGRAMS
SEATTLE TECH PREP

Something Old	Something New
Guidance	More options available, need more training, need for career focus, career paths, course requirements for non-college as well as 4-year college bound.
Apprenticeship	Closer links between education, business and labor. Pre-apprenticeship for high school students now an option
Community Involvement	Business and community provide more input and resources
Need for Skill	College degree no longer guarantees economic security and status. More options available. 2 + 2, technical and varied skills needed.
H. S. and Community College Network	More opportunities for students, seamless transitions, articulated agreements.
Importance of Education	Learning and education more readily available to all, learning is lifelong process. Integrated learning.
Desire for Security	Security in the ability to change and adapt.
Work is Important	Changing role in workplace, change as a constant.
Resumes/Job Files	Career portfolios – either paper based or computer based.
Evaluations/ Monitoring Progress	Competency checklists and certificates of mastery.

**5. SUPPORT THE UNIQUENESS OF EACH SCHOOL.
TAILOR THE TECH PREP EMPHASIS TO THE
SCHOOL'S STRENGTH IN ACADEMIC AND
VOCATIONAL PROGRAMS.**

The Seattle Public School District is rich in cultural diversity and employs an experienced core of educators. Site-based management is becoming an accepted part of the district culture and is reflected in high schools that take

pride in their uniqueness and special programs. Tech Prep courses and the way Tech Prep is implemented therefore varies from school to school. For guidance counselors, district-wide comprehensive guidance and counseling goals and a standard career development portfolio assure consistency in the way basic counseling services are provided.

6. ESTABLISH DISTRICT-WIDE GOALS FOR TECH PREP AND A COMMON CAREER DEVELOPMENT PORTFOLIO TO UNIFY SCHOOLS.

Establishing district-wide goals for Tech Prep helps bring the concept into focus and assures involvement of administrators, faculty and the counseling staff. These goals can also serve to speed integration of Tech Prep into areas of curriculum and guidance counseling.

Career Development Portfolios prompt students to take responsibility for decisions they must make to plan a career. Whether paper or computer based, the portfolios help students connect their education and learning to success in the workplace and identify an appropriate career path.

Seattle's portfolio folder is printed on both sides in sections that lead students through the process of gathering, analyzing and synthesizing information that will be vital in successful career planning and preparation. In addition to required and elective school subjects, the form provides space to record interests and experiences that can help student shape their interests into a career direction.

Although the one form is common throughout the district, each high school determines how the folders will be stored and how students access and update their folders and how folders will follow students upon transfer or graduation.

A COMPREHENSIVE GUIDANCE PROGRAM

The purpose of the Comprehensive Guidance Program is to help students take responsibility for their personal growth, development, and preparation for their future. Guidance activities will promote feelings of self-worth and power over one's destiny by concentrating on positive self-assessment, goal-setting and the steps necessary to achieve these goals. Students will explore a wide range of present and future

MAJOR GUIDANCE ACTIVITIES GRADES 9-12

- Grade 9** Orientation to High School
Develop education/career four-year plan
Know about and use Career Center
- Grade 10** Complete career interest inventory.
Use Washington Occupational Information Systems database to obtain information on careers
Update education/career four-year plan
- Grade 11** Gain information on post-high school options, financial aid and scholarships
Take KUDER Occupational Interest Survey (state mandated)
Update education/career four-year plan
- Grade 12** Individual interview with counselor to ensure high school graduation and finalize post-high school plans

career options without sex, race or handicap bias. Graduating seniors, supported by Seattle's unique team of guidance counselors and Career Center specialists, will have set realistic goals and understand the steps they will take to reach these goals. This team works with school staff to assure that the goals shown at right are achieved.

COMPREHENSIVE GUIDANCE PROGRAM GOALS

All secondary students will:

1. Participate in planned learning experiences to assess their skills, interests and priorities, and to apply this information in making useful decisions.
2. Maintain an Education and Career Planning Portfolio. The portfolio will contain a record of specific educational and career development activities which will assist students in their high school and post-high school planning.
3. Use information to develop plans which will assist them with their personal growth, development of work skills and transitions in high school and to further education and/or the world of work.
4. Participate in planned learning experiences that will provide them with skills necessary to find desired employment now and in the future.

Seattle Schools
DEPARTMENT OF VOCATIONAL/TECHNICAL EDU

CAREER CENTER SERVICES GUIDE

YOU EXPECT THE BEST for yourself: a future bright with challenge and promise. To reach your goals you will need a good plan. That's where your Career Center can help with programs and resources that put you in touch with training and education opportunities after high school. Each of the twelve high school Career Centers provides:

CAREER EXPLORATION PROGRAMS

Like many students, you may be unsure of what you want to do after high school. At the Career Center, we provide information and guidance you can use to both choose and prepare for a career:

- Career interest surveys and aptitude tests
- A computerized career information system
- Career enrichment workshops and conferences
- Internships and career shadowing
- Volunteer speakers from local businesses and business organizations
- Assistance in preparing student portfolios and resumes

POST SECONDARY EDUCATION OPTIONS

You can meet with representatives from two and four year colleges, technical colleges, apprenticeship programs, and military services to find out more about:

- Tech Prep
- Selection and admission processes
- Visits to colleges and educational institutions
- Scholarships, grants, loans, work study
- College conferences

VOCATIONAL EDUCATION OPPORTUNITIES

Your Career Specialist will help you enroll in vocational/technical education classes offered each semester:

- City Campus vocational programs
- Tech Prep programs
- Military service training programs
- Apprenticeship programs

EMPLOYMENT PROGRAMS

Career Center employment programs can provide information to help you find and keep jobs and succeed in the workplace:

- Work and volunteer experience credit
- Pre-employment information
- Job search skills
- Employment listings
- Community volunteer opportunities

CAREER CENTER FIELD TRIPS

Participate in a variety of field trips organized by the Career Center specialist that will take you to:

- Local businesses and industries
- Community career exploration programs
- Vocational and educational organizations
- Job and career fairs

Seattle Community College District 1992-93 Operating Budget: \$77,376,089

The Seattle School District provides Equal Educational Opportunity without regard to race, creed, color, national origin, sex, disability or sexual orientation. The District complies with all applicable State and Federal laws and regulations to include but not limited to Title IX, Title VI of the Civil Rights Act, Section 504 of the Rehabilitation Act, RCW 49.60 "The Law Against Discrimination", and RCW 28A.640 "Sex Equality", and covers, but not limited to, all District programs, courses, activities including extra-curricular activities, services, access to facilities, etc. The Seattle School District is an Equal Employment Opportunity, Affirmative Action employer. The District employs individuals without regard to race, creed, color, national origin, age, sex, marital status, disability or sexual orientation. The District complies with all applicable State and Federal laws, including, but not limited to Title VI, Title VII, Title IX of the Civil Rights Act, ADA, RCW 49.60 "Law Against Discrimination", Section 504 of the Rehabilitation Act, and RCW 28A.640 "Sex Equality". The Title IX Officer and 504 Coordinator with the overall responsibility for monitoring, auditing, and ensuring compliance with this policy is John Yasutake, Manager, Affirmative Action Office, 815 Fourth Ave. N., Seattle, WA 98109, Telephone: (206) 298-7175. Individuals who believe they have been discriminated against in any of the District's employment or educational activities can file an internal discrimination complaint with the District's Affirmative Action Office. If you need Help, please call 206-298-7500.
