ABSTRACT

Phoenix Elementary School District #1 began implementing its Competency Based Guidance Program (CBGP) during the 1991-92 school year after being awarded a U.S. Department of Education Drug Free Schools and Communities Programs Grant. The purpose of CBGP was to provide middle-school students with a developmental and proactive guidance program. Competencies emphasized positive coping skills in the educational, career, and personal/social domains and represented knowledge, attitudes, and skills that could be transferred from guided learning situations to productive real life situations. A needs assessment was conducted with teachers, parents, and students and provided the foundation for the CBGP curriculum. Twelve objectives and outcomes were reviewed, including: "A survey will be conducted to evaluate parental attitude of the CBGP"; "A pre-post measurement of self-concept will be administered to students in the 7th and 8th grades in September and the end of the school year"; and "The attainment of specified student outcomes, as a result of delivering the preventative guidance curriculum, will be evaluated." Results are reported for each objective. Sixteen appendices account for approximately three-quarters of the document and include evaluation materials, calendars, program flyers, forms, charts, and correspondence. (JBJ)

PHOENIX ELEMENTARY SCHOOL DISTRICT #1 COMPETENCY BASED GUIDANCE PROGRAM PROGRAM EVALUATION 1991-1993

U.S. Department of Mucation Grant
Drug Free Schools and Communities Programs - CFDA #84 233A

Phoenix Elementary School District #1 began implementing its Competency Based Guidance Program During the 1991-92 school year, and continued with full implementation of the program during the 1992-1993 school year.

The purpose of the Phoenix Elementary School District's Competency Based Guidance Program (hereafter referred to as CBGP) was to provide middle-school students with a developmental and proactive guidance program. The competencies emphasized positive coping skills in the Educational, Career, and Personal/Social Domains. The competencies represented knowledge, attitudes, and skills that could be transferred from guided learning situations to productive, real life situations. Further, this program provided the framework for the District to build its own unique guidance project that was responsive to local student needs and allowed for the delivery of direct counseling services within that framework.

The development and implementation of this program was carried out by the counseling staff: Natalie Zeitlin (chairperson), Linda Choplin, Dan Garcia, Jose Mendivil, Jacqueline Mohr, Kim Watson and Tom Weaver.

The following mission statement was adopted to guide this program:

"The mission of the Phoenix Elementary School District #1 guidance program is to ensure that all students acquire educational, career, personal and social skills necessary to relate to self and others for constructive participation in society" (see Appendix A).

In addition, criteria were developed which stated the philosophy of this program, as follows:

"Counselors in the Phoenix Elementary School District #1 believe that all students will benefit from:

--a guidance and counseling program that is based on the recognition of the dignity and worth of all students and their right to educational services.

--a developmental guidance program that focuses on all students rather than just those who seek out counseling assistance.

--services that consider special needs as well as differences of special students.

--guidance program activities that shall be consistent with developmental curriculum that reflects desired student knowledge, attitudes and skills.

--access to full time, state certified school counselors.

--counselors that shall abide by the professional ethics of guidance and counseling as advocated by the American School Counselor Association.

--training and retraining necessary for the purposes of supporting and enriching specialized areas of skill development and to contribute to professional growth of counselors.

--a school guidance program based on a team approach involving school personnel, parent/guardian, and community members.

--guidance program activities that shall attempt to utilize the many combined resources of the community.

--a school guidance program where the student, school personnel, and parent/guardian shall be involved in a cooperative effort to monitor ongoing progress of the student" (see Appendix A).

During the first year of the program a comprehensive curriculum was developed for seventh through eighth grades (see Appendix B). This curriculum was integrated with and has replaced the substance abuse prevention curriculum and was designed to utilize all existing programs and curricula already established within the district.

A Needs Assessment instrument of 84 items (see Appendix B) was devised based on items gleaned from exemplary guidance program models throughout the United States. A student version (English and Spanish), a teacher version, and a parent version (English and Spanish) were administered to all Phoenix Elementary School District #1 6th and 7th grade students, to PESD #1 6th and 7th grade teachers, and to as many parents of 6th and 7th grade PESD #1 students as the counselors could access.

The Needs Assessment results were weighted with most emphasis for item importance ranked in the following order:

- 1. Teacher results
- 2. Parent results
- 3. Student results

Thirty-plus items were identified from the needs assessment. These thirty-plus items formed the basis for the CBGP curriculum for the 1992-1993 school year. These thirty-plus activities appeared as "class activities" on the CBGP Master Calendar.

This curriculum included Educational, Career and Personal/Social goals, and related competencies defined in terms of the knowledge, attitudes and skills students would exhibit.

The following goals were defined:

Educational Goals: "Students will identify the need for life-long learning and acquire skills in decision-making so that they may constructively deal with and contribute to society".

Career Goals: "Students will explore and identify academic and vocational skills necessary for a productive and satisfying life".

Personal/Social Goals: "Students will become skilled in effective interpersonal communication and become more aware of self and others".

Special parent orientation meetings were held during the month of May, 1992, to acquaint parents with the CBGP (see Appendix C). In addition, programs were provided to help inform and educate parents. On March 24, 1993 the counseling department co-sponsored Gang Awareness for PTO night. The Urban League presented three workshops to the parents on dropout prevention during March and April, 1993. It should be noted that the dropout rate of 14% experienced in the 1991-1992 school year was reduced to 4% during the 1992-1993 school year.

Following is a review of the objectives and outcomes of the Competency Based Guidance Program as outlined in the proposal:

1. A survey will be conducted to evaluate parental attitude of the Competency-Based Guidance Program.

RESULTS: This Parent Evaluation (see Appendix D) document was sent home (in both Spanish and English) with the students in May, 1993, to determine parental perception of the CBGP. Three percent of the surveys were returned. The complete results may be found in Appendix D. Following are the major findings from that survey:

- 96% believe their child understands the importance of doing well in school
- 79% indicated the counselor had not shared information with them about their child
- 75% believe their child knows what career she or he wishes to pursue 72% have not consulted the school counselor

COMMENTS: The small number of forms returned provided a poor sample of the total parent group. Greater parent involvement is needed.

2. A survey will be conducted to evaluate student response to the Competency-Based Guidance Program.

RESULTS: The Student Evaluation document of the Phoenix Preparatory Academy CBGP was administered to 960 students (in both Spanish and English) in September, 1992 and to 527 students again in May, 1993, to determine student perceptions of the CBGP. A random sample, as defined by Ferguson¹, was used to compile this information. The complete results may be found in Appendix E.

¹Ferguson, George A. (1976) <u>Statistical Analysis in Psychology and Education</u> (Fourth Edition). New York: McGraw-Hill, Inc.

Following is a listing of those items which were perceived to be most changed and least changed:

| Most | Changed | |
|------|---------|--|

| | | | |
|----------|-------------|------|---|
| Pre-test | Post-test | | <u>Question</u> |
| 9% | 64% | +55 | 11. Has the counselor shared information about jobs and careers with you? |
| 33% | 72% | +39 | 7. Does the counselor come to your classroom and present information with your teacher? |
| 53% | 91% | +38. | 1. Do you know who your counselor is? |
| 12% | 48% | +36 | 13. Has the counselor helped you with any problem? |
| | | | |

Least changed

| Pre-test | Post-test | | Question |
|----------|-----------|----|--|
| 56% | 60% | +4 | 2. When you began in this school, did you feel |
| | | | welcomed? |
| 6% | 10% | +4 | 10. Has the counselor shared information about |
| | | | jobs and careers with you? |

COMMENTS: Exceptional improvement was noted in nearly every category of this student survey. It is obvious that most students were not aware in item #10 (Has the counselor shared information about jobs and careers with you?) that the Career Days presentations were arranged for by the counseling staff. In general, the students revealed, in the post-test, a more positive feeling about the counselors.

3. A survey will be conducted to evaluate teacher response to the Competency Based Guidance Program.

RESULTS: The Teacher Evaluation Form (see Appendix F) was given out to the teachers in September, 1992 (14 were returned), and again in May, 1993 (20 were returned), to determine teacher perceptions of the CBGP.

Following is a listing of those items most changed and least changed:

Most Changed

| ITTOUC OXICAL | <u>.500</u> | | |
|---------------|-------------|--------|---|
| Pre-test | Post-test | Qu | <u>estion</u> |
| 43% | 100% + | 57% 5. | Does the counselor ask students for input |
| | | | into the counseling program? |
| 38% | 85% +4 | 47% 10 | . Has the counselor presented guidance |
| | | | activities in class with you this year? |
| 58% | 95% + | 37% 3. | Is the counselor available to all students? |
| | | | |

| (EdConServ | CBGP PROGRAM EVALUATION | 5) |
|------------|-------------------------|----|

| Least Cha | nged | | |
|-------------|----------|-----------|---|
| Pre-test | Post-tes | <u>st</u> | Question |
| -85% | 90% | +5% | 6. Has the counselor been available to consult with when necessary? |
| 6 2% | 55% | -7% | 2. Does group counseling help students? |
| 82% | 89% | +7% | 8. Does the counselor communicate effectively with students. |

COMMENTS: The greater number of teachers returning the post-test surveys seemed indicative of greater interest in the counseling program. The "most changed" responses seemed to confirm this. The tremendous increase in positive responses to post-test questions # 5, 10 and 3 indicated an improved perception of counselors by teachers. There seems to be no definitive reason for the decrease in the number of teachers in #2 (Does group counseling help students?) who believe group counseling helps students. Further investigation into this area is recommended.

4. A pre-post measurement of self-concept will be administered to students in 7th and 8th grades in September and the end of the school year.

RESULTS: The Rosenberg Self-Esteem Scale (see Appendix G) was administered at the beginning and again at the end of the school year. A random sample based on the Ferguson¹ method was used in compiling this information. Following is a listing of those items which showed the greatest amount of change:

| Pre-test | Post-tes | <u>st</u> | <u>Question</u> |
|----------|----------|----------------|---|
| 40% | 51% | Strongly Agree | 1. I am worth as much as others are. |
| 18% | 29% | Disagree | 10. At times I think I am no good at all. |

An even clearer picture can be gotten by combining scores for the Disagree and Strongly Disagree categories, and the Agree and Strongly Agree categories. Following are those items which showed the greatest amount of change when viewed in this manner:

| Pre-test | Post-test | | <u>Question</u> |
|----------|-----------|-------|---|
| 26% | 13% | Agree | 5. I do not have much to be proud of. |
| 60% | 49% | Agree | 8. I wish I could have more respect for |
| | | _ | myself. |

COMMENTS: By weighting each response from 1-4 points, progressively, for each improved level of self-esteem, it was found that the average score was 30.1 (out of a possible 40) for the pre-test and 30.5 for the post-test. Even though the average

score improved only a small amount in the post-test, responses to some individual questions showed encouraging growth.

5. A longitudinal case study of at least one student will be used to illustrate methods of counselors and individual success rates.

RESULTS: See Appendix H.

COMMENTS: Guidance Counselor Tom Weaver has provided an ongoing account of one of his students showing how he worked with student, parent, Social Worker and community agencies to provide timely and productive intervention.

6. There will be a comparison of the number of suspensions/expulsions from the 1991-92 school year to the 1992-93 school year, and disciplinary referrals by reason for referral.

RESULTS: Unfortunately, Out-of-School Suspensions increased by 10% during the 1992-93 school year as compared to the 1991-92 school year. Most of this increase occurred in the seventh grade which had 73 students suspended during the 1991-92 school year and 87 students suspended during the 1992-93 school year. On the other hand, Long-term Suspensions/Expulsions decreased 40%, from 25 down to 15 students. See Appendix J

7. There will be a comparison of school attendance for the 1991-92 school year to the 1992-93 school year.

RESULTS: Attendance improved greatly from the 1991-92 to 1992-93 school year. The average absence rate for 1991-92 was 7.33% while for the 1992-93 it was only 3.95%. This, along with the great reduction in the drop-out rate (14% in 1991-92 to 4% in 1992-93), indicates a positive change in attitude for the students. See Appendix J

8. There will be an examination of the outcome of students who participated in a structured small group compared to a group of students with similar concerns who are waiting to be in the group.

RESULTS: The Rosenberg Self-Esteem Scale was administered to 20 students involved in structured small groups and to 8 students waiting to join a small group. By weighting each response from 1-4 points, progressively, for each improved level of self-esteem, it was found that the average score for students al-

ready involved in a structured small group was 38.3 (out of a possible 40) whereas the average score for students waiting to get into a structured small group was 23.8 (see Appendix K).

COMMENTS: The results of this data indicated a great improvement (38.3) in the Rosenberg Self-Esteem Scale for those students involved in one of the structured small groups (Teen Leaders, Peer Counselors, Prep Kids and Academy Kids) over those waiting to get into a small group (23.8). This is also far higher than the average score of all students at the Phoenix Preparatory Academy (30.5). These data would seem to indicate the need for additional small structured groups.

9. The attainment of specified student outcomes, as a result of delivering the preventative guidance curriculum, will be evaluated.

EDUCATIONAL COMPETENCIES

Knowledge
Students will:

Attitude
Students will:

Skill

Students will:

1.1 Differentiate between appropriate and inappropriate school behavior as defined by district and school rules.

Recognize the need for positive school behavior.

Use appropriate school behavior.

RESULTS: Each 7th & 8th grade student was given the Phoenix Preparatory Academy handbook and had class discussion of appropriate behavior. Parents had to sign off on the handbook, also.

1.2 Identify personal learning styles in educational setting.

Appreciate individual differences.

Utilize personal learning styles in educational setting.

RESULTS: Each 7th & 8th grade student identified their personal learning style (auditory, visual, kinesthetic) and learning modality (right brain, left brain) through two classroom activities.

1.3 Identify resources available in Guidance Center.

Identify significance of resources available for student use.

Demonstrate the use of resources available for School use in the educational setting.

RESULTS: Due to lack of space the guidance center was eliminated. Each family counselor informed students of materials available through the counseling department.

1.4 Learn studying and test-taking skills.

Recognize the importance of studying and test-taking skills.

Develop effective techniques for studying and test taking.

RESULTS: Each 7th & 8th grade student learned basic outlining techniques and studying skills through classroom guidance activities. Teachers also followed up using guidance curriculum materials.

1.5 Identify the benefits of educational achievement.

Appreciate the relationship of personal attitudes, beliefs, abilities, and skills to educational/vocational achievements.

Identify how skills taught in school subjects are related to careers.

RESULTS: Each 7th & 8th grade student received this competency through the Chicanos Por La Causa (CPLC) community based organization speakers. Following are some of the areas of concern:

An education is important because....

Student Responses: ...you can get a better job. ...I can accomplish something with my life. ...it provides the ability for success.

What do you need to get an education?

Student Responses: An open mind. Work hard. Set goals for yourself and stick to them all the way.

What are obstacles to getting an education?

Student Responses: Lack of motivation. Gangs, drugs. Goofing off in school.

1.6 Identify the process of responsible decision-making/problem solving.

Assume responsibility for making personal choices for lifelong planning.

Develop skills in problem solving-decision making.

RESULTS: Each 8th grade student had classroom discussion and activities for problem solving. Only 7th grade students involved in support groups went over the decision making model.

CAREER COMPETENCIES

Knowledge Students will: Attitude
Students will:

Skills
Students will:

2.1 Discover the relationship between educational achievement and career opportunities. Acknowledge how basic skills learned in school relate to skills required in the work place.

Apply skills for locating, understanding, and using career information.

RESULTS: All 8th grade students studied and discussed the significance of mas-

tering: - the 'core subjects'

- reading
- math concepts & computation
- English usage
- physical & biological sciences
- social & political institutions

Each 8th grade student completed an exercise in which he/she wrote down one or more occupations dependent upon mastery of the core subjects.

2.2 Understand the relationship of specific occupations to broad career clusters.

Develop an appreciation for the wide variety of career opportunities.

Explore a career cluster using career information.

RESULTS: Due to delays in receiving and installing career materials including the computerized assessment and cluster exploration program, "Choices, Jr.", students were unable to explore career clusters. The guidance activities requiring student use of "Choices, Jr." has been rescheduled for the 1993-94 school year.

2.3 Understand how personal aptitudes, interests, and abilities influence career choices. Develop an appreciation for how skills, interests, and aptitudes apply to career choices.

Complete an as assessment of their interests, aptitudes and abilities.

RESULTS: Each 8th grade student studied and developed his/her own skill - personal management skills listing. The skills emphasized were:

- transferrable skills

- job specific skills

Once students generated their own listing of skills, they categorized each skill under one of the three types.

2.4 Understand how completion of high school prepares one for the future.

Appreciate the need for continuing education.

Complete an educational plan.

RESULTS: Each 8th grade student studied and discussed the value of a high school diploma. Students then were asked to write their career goal and to include how much schooling that career required.

Finally, each student registered for high school.

2.5 Understand how personal/ social skills relate to careers.

Appreciate how personal/ social skills relate to careers. Complete a tentative career plan.

RESULTS: Each 8th grade student participated in four career seminars led by community representatives for each specific career (Career Days). As a followup, each 8th grade student studied and discussed important personal/social skills to - punctuality success on the job:

- honesty

- getting along with others

Finally, using 2.4 (career goal), each student reaffirmed and/or wrote a new career goal.

PERSONAL/SOCIAL COMPETENCIES

Knowledge Students will:

3.1 Recognize how respect for

ground can build self-confidence.

one's own culture and back-

Attitude Students will:

> Develop an understanding and respect for self and others as unique individuals.

Skills Students will:

Develop an understanding of different cultures, lifestyles. attitudes and abilities.

RESULTS: Each 7th & 8th grade student developed an understanding of different cultures, iffestyles, attitudes and abilities through classroom guidance activities.

3.2 Develop interpersonal skills necessary for harmony in relationships with others.

Respect each individual's worth and dignity.

Demonstrate social skills, self-control, and respect for others.

RESULTS: Each 7th & 8th grade student experienced an understanding of different social skills, self control and respect for others through classroom guidance activities.

3.3 Understand developmental changes and expectations associated with different life stages.

Accept developmental changes/ expectations as a part of normal growth. Identify developmental changes/ expectations associated with different life stages.

RESULTS: Each 7th & 8th grade student identified developmental changes/expectations associated with different life stages.

3.4 Understand that acts of discrimination and prejudice are barriers to effective communications.

Appreciate unique differences of self and others.

Identify actions that represent discrimination and prejudicial behavior

RESULTS: Each 7th & 8th grade student received this competency through CPLC community-based organization speakers.

3.5 Know how drugs and alcohol affect on esself and others.

Appreciate how drugs/alcohol affect oneself and others.

Identify and assess consequences of alcohol/drug use.

RESULTS: Each 7th & 8th grade student received this competency through (CPLC) community-based organization speakers. Several speakers provided sessions on drug and alcohol abuse. Following are some of the questions asked: "What is the most commonly used drug?"

"Which drug is most dangerous to the brain over long-term use?"

"Which drug has the highest potential for our dose?"

"What is chemical dependency?"

"Can low self-esteem lead to drug abuse?"

In addition, speakers emphasized the following:

-The three stages of alcohol and drug use and how to identify each.

-Things you can do to develop good self-esteem. (exercise, be creative, share your feelings, get a skill, get involved, get help)

-Things you can do when someone asks you to use drugs. (say no, suggest something else, question what your friends are doing)

COMMENTS: It seemed apparent that the students were provided opportunities to learn about each specified competency. Organized, consistent, comprehensive

data showing the attainment of specified knowledge, attitudes and skills by the students was not available. It is recommended that appropriate tools be developed for measuring these outcomes in the future.

10. A log will be developed and maintained that gives the number of:

individual students conferences (see Appendix L, Items 1, 2, 3,4,5)

parent conferences (see Appendix L, Items 1,2)

formal teacher contacts (see Appendix L, Items 1,2)

student observations requested by staff

conferences involving administration (see Appendix L, Items 1,2)

guidance lesson presentation (see Appendix L, Items 6, 7)

small groups (focus of groups) (see Appendix L, Item 8)

large group presentation to students (see Appendix L, Items 6, 7)

workshop/inservices presented to staff and/or community agency (see Appendix L, Item 9)

contacts (see Appendix L, Items 7, 8)

time devoted to system support services (see Appendix L. Item 9)

RESULTS: Counselors conducted a total of 3746 individual student conferences, 958 teacher conferences, 606 parent conferences, 497 administrative conferences, 57 psychologist conferences, 422 Social Worker and other conferences, and 292 group meetings (see Appendix L, Item 1).

COMMENTS: Available data indicate a great amount of time and energy was provided by the counseling staff in holding conferences and meetings with students, teachers, administrators and community agencies in order to provide these students opportunities not before so readily available to them. The seven counselors each conducted an average of 3 individual student conferences, .8 teacher conference, .5 parent conferences, .4 administrative conferences, .05 psychologist conferences and .2 group meetings each school day.

11. A guidance events calendar will be developed.

RESULTS: A Master Calendar was developed identifying in which quarter each competency would be addressed (see Appendix M).

COMMENTS: Each counselor was assigned to teach specific competenteies during each quarter. By the end of the school year, information about each competency had been presented.

12. Other Important Outcomes

Reference File for Parents

A manila envelope (see Appendix N) was imprinted (English on one side, Spanish on the other side) with suggestions, admonitions and information. It was suggested, for instance, that information which the parent should save in the envelope would include the school handbook/calendar, report cards, honor roll certificates, reports, standardized test reports, copy of birth certificate, and a copy of other important documents.

Educational - Career Portfolio

This portfolio (see Appendix O) is imprinted on four sides with space provided for noting the achievement of each competency, achievement test scores, education history, personal references, information for resumé, self-esteem notations and career choices. Pertinent paperwork can also be kept in the portfolio.

Competency Based Guidance Plan

A book was published (see Appendix P) which included all the details for implementing this program. It received an outstanding review from Dr. C.D. Johnson, Director of Johnson and Associates and one of the founders of Competency Based Guidance, who suggested the book be submitted to the ERIC/CAPS Clearinghouse for inclusion in their database. On October 29, 1992, the book was accepted and included in the ERIC listing.

Summary

The counseling staff at the Phoenix Perparatory Academy have planned well and implemented an outstanding guidance program for the 7th and 8th grade students attending the school. Students, teachers, administrators, some parents, and community agencies have worked together to provide help with the educational, career, and personal/social concerns of the students. Additional emphasis needs to be given to the parental component.

The counseling staff is to be congratulated on the publication of the hand-book which outlines this program, "Comprehensive Competency Based Guidance Program." This program has exhibited much success.

Evaluation by EdConServ, Del Bohlmeyer, Ed.S.

Appendix A

MISSION STATEMENT

The mission of the Phoenix Elementary School District #1 guidance program is to ensure that all students acquire educational, career, personal and social skills necessary to relate to self and others for constructive participation in society.

PHILOSOPHY

Counselors in the Phoenix Elementary School District #1 believe that all students will benefit from:

A guidance and counseling program that is based on the recognition of the dignity and worth of all students and their right to educational services.

A developmental guidance program that focuses on all students rather than just those who seek out counseling assistance.

Services that consider special needs as well as differences of special students.

Guidance program activities that shall be consistent with developmental curriculum that reflects desired student knowledge, attitudes and skills.

Access to full time, state certified school counselors.

Counselors that shall abide by the professional ethics of guidance and counseling as advocated by the American School Counselor Association.

Training and retraining necessary for the purposes of supporting and enriching specialized areas of skill development and to contribute to professional growth of counselors.

A school guidance program based on a team approach involving school personnel, parent/guardian, and community members.

Guidance program activities that shall attempt to utilize the many combined resources of the community.

A school guidance program where the student, school personnel, and parent/guardian shall be involved in a cooperative effort to monitor ongoing progress of the student.

Appendix B

COMPREHENSIVE COMPETENCY-BASED GUIDANCE PROGRAM

A Comprehensive Competency-Based Guidance Program (CCBG) has been developed for the Phoenix Preparatory Academy. A CCBG program, by definition, is both comprehensive and outcome driven.

A Needs Assessment of 84 items was devised based on items gleaned from exemplary guidance program models throughout the United States. A student version (English and Spanish), a teacher version, and a parent version (English and Spanish) were administered to all Phoenix Elementary School District #1 6th and 7th grade students, to PESD #1 6th and 7th grade teachers, and to as many parents of 6th and 7th grade PESD #1 students as the counselors could access.

The Phoenix Preparatory Academy's CCBG Master Calendar which follows has been determined based on the results of the needs assessment activities. The needs assessment results were weighted with most emphasis for item importance ranked in the following order:

- 1. Teacher results
- 2. Parent results
- 3. Student results

Thirty-plus items were identified from the needs assessment. These thirty-plus items form the basis for the CCBG curriculum for the 1992-93 school year. These thirty-plus items appear as "class activities" on the CCBG Master Calendar. The other entries on the Haster Calendar are counselor tasks which will be carried out by counselors or social workers through means other than "class activities".

Please see the following attachments:

- 1. Unorganized date from needs assessments completed by teachers.
- 2. A copy of the Phoenix Preparatory Academy's CCBG Master Calendar organized into:
 - . Domain (E = Education; C = Career; PS = Personal/ Social)
 - . Quarter of school year in which each task will be completed.

Educational goals:

Students will identify the need for lifelong learning and acquire skills in decision-making so they may constructively deal with and contribute to society.

EDUCATIONAL COMPETENCIES

| Knowledge | 2 |
|-----------|-------|
| Students | will: |

1.1 Differentiate between appropriate and inappropriate school behavior as defined by district and school rules.

1.2 Identify personal learning styles in educational setting.

1.3 Identify resources available in Guidance Center.

1.4 Learn studying and test-taking skills.

1.5 Identify the benefits of educational achievement.

1.6 Identify the process of responsible decision-making/problem-solving.

Attitudes Students will:

Recognize the need for positive school behavior.

Appreciate individual differences.

Identify significance of resources available for student use.

Recognize the importance of studying and test-taking skills.

Appreciate the relationship of personal attitudes, beliefs, abilities, and skills to educational-vocational achievements.

Assume responsibility for making personal choices for lifelong planning.

Skill Students will:

Use appropriate school behavior.

Utilize personal learning styles in educational setting.

Demonstrate the use of resources available for use in the educational setting.

Develop effective techniques for studying and test taking.

Identify how skills taught in school subjects are related to careers.

Develop skills in problem solving-decision making.

в 10 23

Item 4

Career goals:

Students will explore and identify academic and vocational skills necessary for a productive and satisfying life.

CAREER COMPETENCIES

Knowledge Students will:

- 2.1 Discover the relationship between educational achievement and career opportunities.
- 2.2 Understand the relationship of specific occupations to broad career clusters.
- 2.3 Understand how personal aptitudes, interests, and abilities influence career choices.
- 2.4 Understand how completion of high school prepares one for the future.
- 2.5 Understand how personal/social skills relate to careers.

Attitudes Students will:

Acknowledge how basic skills learned in school relate to skills required in the work place.

Develop an appreciation for the wide variety of career opportunities.

Develop an appreciation for how skills, interests, and aptitudes apply to career choices.

Appreciate the need for continuing education.

Appreciate how personal/social skills relate to careers.

Skills Students will:

Apply skills for locating, understanding, and using career information.

Explore a career cluster using career information.

Complete an assessment of their interests, aptitudes, and abilities.

Complete an educational plan.

Complete a tentative career plan.

Personal/Social Goals:

Students will become skilled in effective interpersonal communication and become more aware of self and others.

PERSONAL/SOCIAL COMPETENCIES

Knowledge Students will:

- 3.1 Recognize how respect for one's own culture and background can build self-confidence.
- 3.2 Develop interpersonal skills necessary for harmony in relationships with others.
- 3.3 Understand developmental changes and expectations associated with different life stages.
- 3.4 Understand that acts of discrimination and prejudice are barriers to effective communications.
 - 3.5 Know how drugs and alcohol affect oneself and others.

Attitudes Students will:

Develop an understanding and respect for self and others as unique individuals.

Respect each individual's worth and dignity.

Accept developmental changes/expectations as a part of normal growth.

Appreciate unique differences of self and others.

Appreciate how drugs/alcohol affect oneself and others.

Skills Students will:

Develop an understanding of different cultures, lifestyles, attitudes and abilities.

Demonstrate social skills, self-control, and respect for others.

Identify developmental changes/expectations associated with different life stages.

Identify actions that represent discrimination and prejudicial behavior.

Identify and assess consequences of alcohol/drug use.

Appendix C

Phoenix Preparatory Academy Parent Orientation Meetings May, 1992

Agenda

- I. Welcome: Introductions
- II. Slide Presentation on Phoenix Preparatory Academy Physical Plant and layout.
- III. Outcome Based Education
 - IV. Organization of students in "Families"
 - * Approximately 150 students per family.
 - * 5 core subjects.
 - * Families stay together for 2 years.
 - V. Exploratory Classes (electives)
- VI. Length of school day
- VII. Counseling Program
 - * 7 Counselors
 - * Comprehensive Competency Based Guidance
- VIII. Discipline
 - IX. Transportation
 - X. Student Safety
 - XI. Summary: Questions & Answers

The Urban League presented 3 workshops to the 7th and 8th grade parents at Phoenix Preparatory Academy on dropout prevention. These were held in March and April 1993.

Also on March 24th, 1993 the counseling department cosponsered Gang Awareness for PTO night.

Appendix H

Longitudinal Case Study

E.N. began the 1992-93 school year in the 8th grade. Her homebase teacher was Mrs. Vega. Within the first few days after the start of the school year, Mrs. Vega referred E.N. to me, her counselor. Mrs. Vega's concern was that E.N. was moody, a loner, sported a radical hair style, and dressed very differently from her peers.

Prior to meeting with E.N., I read her cumulative folder. It was readily evident from the cum that E.N. had above average ability in all academic disciplines and that she had been an excellent achiever until her 7th grade year.

My first individual counseling session with E.N. was to get acquainted. She was very verbal, insightful, and we managed to establish a comfortable rapport. I told her that I would like to see her about once a week to talk about her progress and her interests. She readily agreed to meet with me.

During our second session, E.N. told me that her interests were heavy metal music, the group Guns & Roses, and some older boys. She also said that these interests were a point of continuing conflict with her parents as she shared a room with her mother and thus had no privacy to listen to her music or to talk on the phone. As we discussed the lack of privacy, she related that she rejects the Hispanic culture of her parents. She said that she wants to be identified with the "punker", "stoner" culture. This is very difficult for her to do in this inner-city, predominantly Hispanic environment.

Shortly after our second session, I received a phone call early one morning from E.N.'s mother. She told me that E.N. had (intentionally or unintentionally) taken an overdose of a prescription medication the previous night. I asked the mother where E.N. was this morning. Mother said E.N. was home. I asked where she, mother, was calling me from at that moment. Mother said she was at work. I told mother to go home immediately and that I would try to reach E.N. by phone and talk to her until mother arrived.

I called E.N. at home. She answered the phone. I engaged her in conversation until her mother got there. I then asked that she or her mother call me in one hour.

When an hour had passed and no one called me, I again called E.N.'s home. E.N. answered. She said she and her mother were deep in conversation and that she was all right. I told her I would call back in an hour or two. Later that day, I heard from the mother. I asked her if E.N. had attempted suicide. The mother wasn't sure, but she and E.N. were now talking about some things and she felt this would help. She agreed to let me know if I could help. I agreed to continue to see E.N. at school.

E.N. missed several days of school after that. When she returned, her appearance was startling. Her hair was shaved way above the ears. Her face was made up (painted) white. Her eyes were painted black. She stayed to herself in the morning. In the afternoon, she went to the nurse's office. When seen by the nurse, the nurse saw recent slash wounds on E.N.'s wrists. The nurse summoned me and Mr. Diaz, our Social Worker.

Mr. Diaz and I met with E.N. She was very uncommunicative. We called E.N.'s mother at work and asked her to come to the school to meet with us as soon as possible.

When E.N.'s mother arrived, we asked her about E.N.'s slash wounds. The mother was surprised. E.N. was sullen. We strongly advised that the mother take E.N. to the local suicide prevention counseling facilities at a local hospital. E.N. was angrily resistive to this, but the mother agreed.

E.N. was immediately admitted as an in-patient in the hospital. For the next three months, E.N. was in counseling as an in-patient. She continued to resist the counseling. Finally, one of the therapists diagnosed bi-polar disorder. The therapist prescribed lithium. It worked immediately and the diagnosis of manic depressive was confirmed.

Since the diagnosis and resulting medication, E.N.'s life has improved. She was able to complete her 8th grade requirements while in the hospital. She has established a positive relationship with her mother. She now has her own room at home. She is planning to attend the local high school in the fall. She, and her parents, are grateful that she and they now understand what was causing E.N.'s huge mood swings and her destructive behavior. They are grateful that she now has medication to help her cope.

Tom Weaver, Counselor

Natalie Zeitlin, Counselor 1145 E. Belmont Ave. Phoeniz, AZ 85020

Dear Natalie:

I have just finished reviewing your "Comprehensive Competency-Based Guidance Plan" for Phoenix Preparatory Academy. It is a beautiful piece of work. CONGRATULATIONS! I am very interested in meeting with you next June, if not before, to hear your description of what happened during the fall implementation.

I am also encouraging you to submit your program to the ACA '93 Convention. It will be a great addition. If you have the energies and funds, please consider also submitting it to the ASCA '93 conference.

Good luck and if we can be of any help, please call.

Sincerely,

C. D. Johnson, Ph. D.

Dear Ms. Bidelman:

Enclosed please find Phoenix Elementary School District #1's Competency Based Guidance Program for middle schools.

At the Arizona Counselor Academy, Mr. C. Johnson, one of the founders of Competency Based Guidance, suggested we submit this program for publication in ERIC's database. This was also received highly by other counselors in the state of Arizona as a very thorough and professional program. Dr. Tina Ammon, State Supervisor of Guidance and Counseling, is planning to submit our program for National recognition.

If there is any other additional information that you need from us, please let us know. We re looking forward to hearing from you regarding your decision on our program.

Sincerely,

Matales felle
