ABSTRACT
                This document identifies computer-aided drafting and
design (CADD) skills that companies require of training programs and
future employees. The information was developed by two committees of
technically knowledgeable CADD users from across the United States
and validated by several hundred other CADD users. The skills are
aimed at a beginner CADD user and are written generically so as not
to bias them toward any particular CADD software. The document lists
technical skills in four categories: fundamental drafting skills,
fundamental computer skills, basic CADD skills, and advanced CADD
skills. In addition, a supplemental section lists the related
academic skills in communication, math, and science; employability
skills; recommended tools and equipment for CADD training;
recommended hours of instruction; and recommended qualifications of a
CADD instructor. (KC)

PREFACE

The information in this document was developed by NACFAM (formerly FIM) in 1994 under a grant from the U.S. Department of Education and with other significant inkind contributions from the CADD community. While the information was developed by two committees of technically knowledgable CADD users from across the U.S., it was validated by several hundred other CADD users as well. A partial list of the companies that participated on the committees is contained on the inside cover.

The skills and recommendations contained here reflect what companies need from training programs, students, and future employees. The skills are aimed at a beginner CADD user and they are purposely written in a generic fashion so as not to bias them toward any one CADD software.

To use this document effectively, a trainer should compare what he or she currently teaches students with the technical and academic skills listed in this document and make improvements. Trainers should adapt this information to fit the time limitations of their program and the level of students they are training. An employer could use this document to develop job descriptions, hiring criteria or promotional criteria.

Supplementary material is available for those concerned with assessing these skills. Committee members worked to determine evaluation criteria for each of the skills and this information is summarized in a measurability supplement which is available gratis. (This supplement is available gratis from the NACFAM Publications Department .) Work is underway to develop a national voluntary two-part CADD test based on the technical skills. The technical skills are scheduled for a review and update in 1996. A notice will be sent to all document purchasers when updates are available.

THE TECHNICAL SKILLS

A. The skills contained in the Fundamental Drafting Skills Section are recommended basic knowledge, that must be demonstrated in a CADD environment.

B. CADD skills must be performed in accordance with appropriate industry standards (e.g. ANSI, ISO, building codes, individual company standards)

C. Refer to supplement for the related academic skills. The related academic skill(s) required to perform each technical skill listed in our document are contained in braces { } after each item. Skills prefaced by an M are math skills, by a C are communication skills, and by an S are science skills, In some instances, the related academic skill number referenced may include all items in its subsection (e.g., {M4} includes M4.1-M4.4).

D. These skills are listed in an order suitable for sequential learning.

1. FUNDAMENTAL DRAFTING SKILLS

1.1. DRAFTING SKILLS

1.1.1.	Use drawing media and related drafting materials (e.g., papers, vellum, mylar; plotter pens, toner cartridges)	{C11,C16}
1.1.2.	Use basic measurement systems (e.g., fractions, decimals, and metric measurements)	{M1, M7.1, M7.4, M13}
1.1.3.	Add correct annotation to drawing	{C1, C7}
1.1.4.	Identify line styles and weights	{M8.9}
1.1.5.	Prepare title blocks and other drafting formats	{C7, M8.9}
1.1.6.	Apply metric and/or dual dimensioning drawing standards	{S8}
1.1.7.	Identify and use appropriate standard symbols	{C10, C20, C21}
1.1.8.	Reproduction of originals using different methods (e.g., photocopy, plot, blueprint)	{M1}
1.1.9.	Create freehand technical sketches	{M4.2, M6, M8.9}

1.2. ORTHOGRAPHIC PROJECTIONS

1.2.1.	Identify, create, and place appropriate orthographic views	{M4.4, M8.9}
1.2.2.	Identify, create, and place appropriate auxiliary views	{M1, M4, M4.4, M6, M8, M8.9}
1.2.3.	Identify, create, and place appropriate section views	{M6, M8.9}

1.3. PICTORIAL DRAWINGS

1.3.1.	Identify and create axonometric drawings (e.g., isometric, dimetric, trimetric)	{M1, M 6, M8.9}
1.3.2.	Identify and create oblique drawings (e.g., cabinet, cavalier)	{M1, M6, M8.9}
1.3.3.	Identify perspective drawings (e.g., 1-point, 2-point, 3-point)	{M8.9}

1.4. DIMENSIONING

1.4.1.	Apply dimensioning rules correctly (e.g., avoid redundant dimensioning or dimensioning to hidden lines)	{S11}

1.4.2.	Use correct dimensioning line terminators (e.g., arrowheads, ticks, slashes)	{S2, S3, S8, S11}
1.4.3.	Dimension objects (e.g., lines, arcs, angles, circular)	{S2, S3, S8, S11}
1.4.4.	Dimension complex shapes (e.g., spheres, cylinders, tapers, pyramids)	{S2,S8,S11}
1.4.5.	Dimension features from a center line	{S2, S3, S8, S11}
1.4.6.	Dimension a theoretical point of intersection	{S2, S3, S8, S11}
1.4.7.	Use appropriate dual dimensioning standards	{S2, S8, S11}
1.4.8.	Use size and location dimension practices	{S3,S8,S11}
1.4.9.	Use various dimensioning styles (e.g., Cartesian, polar, ordinate, datum)	{S3,S8,S11}
1.4.10.	Place tolerance dimensioning and Geometric Dimensioning and Tolerancing (GD&T) on drawings when appropriate	{M1,S2,S3,S8}

2. FUNDAMENTAL COMPUTER SKILLS

2.1. HARDWARE

2.1.1.	Demonstrate proper care of equipment	{C10, C11, C17, S11}
2.1.2.	Operate and adjust input devices (e.g., mouse, keyboard, digitizer)	{C10, C11, C17, S11}
2.1.3.	Operate and adjust output devices (e.g., printers, plotters)	{C10, C11, C17, S11}
2.1.4.	Correct handling and operation of storage media	{C10, C11, C17, S11}
2.1.5.	Start and shut down work station	{C10, C11, C17, S11}
2.1.6.	Adjust monitor controls for maximum comfort and usability	{C10, C11, C17, S11}
2.1.7.	Recognize availability of information services (e.g., electronic mail, bulletin boards)	{C1, C2, C10, C11, S11}

2.2. PHYSICAL AND SAFETY NEEDS

2.2.1.	Demonstrate an understanding of ergonomic considerations (e.g., keyboard position, screen position, lighting)	{C10, C11, C17, S11}
2.2.2.	Demonstrate personal safety (e.g., electrical and mechanical hazards)	{C10, C11, C17, S11}

2

2.3	OPERATING SYSTEMS	
2.3.1.	Start and exit a software program as required	{C10, C11, C17, S11}
2.3.2.	Demonstrate proper file management techniques (e.g., copying, deleting)	{C10, C11, C17, S11}
2.3.3.	Format floppy disk	{C10, C11, C17, S11}
2.3.4.	Identify, create, and use directory structure and change directory paths	{C10, C11, C17, S11}
2.3.5.	Demonstrate proper file maintenance and backup procedures	{C10, C11, C17, S11}
2.3.6.	Translate, import, and export data files between formats (e.g., IGES, DXF)	{C10, C11, C17, S11}
2.3.7.	Use on-line help	{C10, C11, C17, S11}
2.3.8.	Save drawings to storage devices	{S11}

3. BASIC CADD SKILLS

The following skills must be performed in 2D and/or 3D as appropriate.

3.1. CREATE

3.1.1.	Create new drawing	{M1, M2, M4, M6, M7, M8.9, S11}
3.1.2.	Perform drawing set up	{C10, C11, C17, M1, M2, M4, M6, M7, M8.9, S3, S8, S11}
3.1.3.	Construct geometric figures (e.g., lines, splines, circles, and arcs)	{M1, M4, M6, M7, M8.9, S11}
3.1.4.	Create text using appropriate style and size to annotate drawings	{M1, S8, S11}
3.1.5.	Use and control accuracy enhancement tools (e.g., entity positioning methods such as snap and XYZ)	{S3, S8, S11}
3.1.6.	Identify, create, store, and use appropriate symbols/libraries	{C10, C20, C21, M1, M4, M6, M7, M7.1, M8.9, S2, S3, S8, S11}
3.1.7.	Create wireframe/solid models	{M1, M4, M6, M7.1, M7.4, M8.9, M12, S2, S3, S8, S11}
3.1.8.	Create objects using primitives	{S2, S3, S8, S11}
3.1.9.	Create 2-D geometry from 3-D models	{M8}

3.1.10.	Revolve a profile to create a 3-D object	{M1, M8.9, S3, S8, S11}
3.1.11.	Create 3-D wireframe models from 2-D geometry	{M8 }

3.2. EDIT

3.2.1.	Utilize geometry editing commands (e.g., trimming, extending, scaling)	{M1, M8.9, S2, S3, S8, S11}
3.2.2.	Utilize non-geometric editing commands (e.g., text, drawing format)	{M1, M8.9, S2, S8, S11}

3.3. MANIPULATE

3.3.1.	Control coordinates and display scale	{M8.9, M9, M10, M11, S2, S3, S8, S11}
3.3.2.	Control entity properties (e.g., color, line type)	{S3, S8, S11}
3.3.3.	Use viewing commands (e.g., dynamic rotation, zooming, panning)	{M8,S, S11}
3.3.4.	Use display commands (e.g., hidden line removal, shading)	{M8.9, S11}
3.3.5.	Use standard parts and/or symbol libraries	{C8, C10, C11, M1, M8.9, S11}
3.3.6.	Plot drawings on media using correct layout and scale	{M1, M8.9, S2, S3, S8, S11}
3.3.7.	Use layering techniques	{S11}
3.3.8.	Use grouping techniques	{S11}
3.3.9.	Minimize file size	{S11}

3.4. ANALYZE

3.4.1.	Use query commands to interrogate database (e.g entity characteristics, distance, area, status)	{C11, M5.1, M5.2, M5.3, M5.4, M5.5, M7.1, S8, S11}

3.5. DIMENSIONING

3.5.1.	Use associative dimensioning correctly	{S11}

9

4. ADVANCED CADD SKILLS

4.1. CREATE

4.1.1.	Create wireframe and/or solid models	{S2, S3, S8, S11}
4.1.2.	Create non-analytic surfaces using appropriate modeling (e.g., non-analytic: NURBS, B-spline, Gordon, Bezier, Coons)	{S2, S3, S8, S11}
4.1.3.	Create analytic surfaces using appropriate modeling with planes and analytic curves (e.g., conic, cylinder, revolution, ruled)	{S2, S3, S8, S11}
4.1.4.	Create offset surfaces	{S2, S3, S8, S11}
4.1.5.	Find intersection of two surfaces	{S2, S3, S8, S11}
4.1.6.	Create joined surfaces	{M8.9 S2, S3, S8, S11}
4.1.7.	Create a fillet or blend between two surfaces	{S2, S3, S8, S11}
4.1.8.	Create feature based geometry (e.g., holes, slots, rounds)	{ M8.9}
4.1.9.	Create cut sections	{M1, M8.9, S2, S3, S8, S11}
4.1.10.	Construct and label exploded assembly drawings	{C1, C7, M1, M6, M8.9}
4.1.11.	Perform Boolean operations (e.g., union, subtraction, intersection)	{S2, S3, S8, S11}

4.2. EDIT

4.2.1.	Trim surface	{M1, M8.9, S3, S8. S11}
4.2.2.	Manipulate surface normals	{M1, M8.9, S3, S8. S11}
4.2.3.	Extend surface	{M1, M8.9, S3, S8, S11}
4.2.4.	Edit control points (e.g., surfaces, Bezier)	{M1, M8.7, S3, S8, S11}
4.2.5.	Modify geometry via Boolean operations	{S2, S3, S8, S11}
4.2.6.	Edit primitives (e.g., moving, copying, resizing)	{S2, S3, S8, S11}

5

4.3	MANIPULATE	
4.3.1.	Perform axis view clipping	{M8.9, S2, S3, S8, S11}
4.3.2.	Extract wireframe data from surface/solid geometry	{S11}
4.3.3.	Shade/render object (e.g., reflectivity, opacity)	{M1, M8.9, S2, S3, S5, S6, S7, S8, SD11}

4.4.	ANALYZE	
4.4.1.	Extract geometric data	{C11, S3, S8, S11}
4.4.2.	Extract attribute data	{S8, S11}
4.4.3.	Identify gaps in non-intersecting surfaces	{M4.1, M4.3, M4.4, M5, S11}
4.4.4.	Obtain surface properties (e.g., area, perimeter, bounded volume)	{M4.3, M4.4, M5, S2, S3, S8, S10, S11}
4.4.5.	Obtain mass properties data (e.g., moments of inertia, centroids)	{S2, S3, S8, S9, S11}

4.5.	CADD PRODUCTIVITY AND WORK HABITS	
4.5.1.	Perform customization to improve productivity (e.g., customize menus, function keys, script files, macros)	{C8, C10, C11, S11}
4.5.2.	Manipulate associated non-graphical data	{C8, C10, C11, S11}
4.5.3.	Use template and library files to establish drawing standard presets	{C8, C10, C11, S11}
4.5.4.	Develop geometry using parametric programs	{S2, S3, S8, S11}

THE ACADEMIC & EMPLOYABILITY SKILLS

A.   The recommended list of related academic skills contains academic knowledge necessary for a CADD user to be proficient. With the acquisition of these skills, it is assumed that the user has writing capabilities, a technical vocabulary, can use the algebraic order of operations to solve problems and generate conclusions, and can use computers to process information for mathematical applications and problem solving.

B.   The principal source of the related academic skills section is <u>The Basic Taxonomy of Skills</u> by Lester Snyder.

C.   The list of employability skills is considered desirable for a CADD user in order to become a better worker.

D.   The principal source of the employability skills section is the document   produced by the SCANS Commission (Secretary's Commission on Achieving Necessary Skills).

E.   The recommendations concerning tools and equipment, hours of instruction, and CADD instructor qualifications were made by a committee of technical experts from organizations on our coalition. These recommendations serve only as guidelines for training programs.

13

RELATED ACADEMIC SKILLS

COMMUNICATION SKILLS

Assumption of basic reading skills.
Assumption of basic keyboard skills

C1   Compose and edit using correct punctuation
        C1.1   sentences
        C1.2   paragraphs
        C1.3   written drafts
        C1.4   oral drafts

C2   Compose and edit sentences or paragraphs for completeness/irregular expressions/modifiers/cause and effect relationships/ paragraph coherence/paragraph transitions

C3   Compose and edit reports, essays, information requests, persuasive text, proofs and revisions, summaries, social communications and business letters

C4   Compose and edit general forms or documents

C5   Compose and edit audio-visual aids

C6   Compose and edit notes

C7   Spelling and vocabulary
        C7.1   compose and edit sentences using correct spelling
        C7.2   identify information and written abbreviations
        C7.3   apply and use definitions

C8   Use text resource table of contents, resource glossaries, resource indexes

C9   Collect, organize, and research oral and written information

C10   Use reference books, manufacturers' manuals, library resources, and trade publications

C11   Read and comprehend written information
        C11.1 the main idea
        C11.2 the purpose
        C11.3 the conclusion

C15   Evaluate written facts and opinions

C16   Identify written information when reading

C17   Adapt strategic listening by adhering to directions, tasks, nonverbal and verbal cues

C18   Apply informal oral communications from employee to supervisor, supervisor to employee, peer to peer, with customers and others

C19   Adapt communication techniques to cultural differences

C20   Use library resource card catalogs

C21   Use library resource guides

C22   Collect and organize information to adapt to strategy writing for oral and written presentations

C23   Comprehend information when reading

C24   Adapt listening skills and attend verbal and nonverbal cues

C25   Evaluate information when listening for clarity and appropriateness

C26   Present speech for formal and/or informal information request

14

MATH SKILLS

M1   Basic arithmetic operations - compute addition, subtraction, multiplication, division (mentally and/or calculator) for the following categories: whole numbers, decimals, fractions, and mixed numbers

M2   Basic arithmetic operations - conversions: units, square units, identify English measures length/volume/weight, convert units metric/English, convert units and time

M3   Basic arithmetic operations - probability and statistics: interpret charts/tables/graphs

M4   Geometry - reasoning and logic:
     M4.1   understand definitions, conditions
     M4.2   formulate and verifies conclusions
     M4.3   solve problems, generate conclusions, deductive resoning.
     M4.4   calculate and evaluate reasoning- invalidate arguments

M5   Geometry - calculate and evaluate geometric figures:
M5.1   perimeter
     M5.2   circumference
     M5.3   area
     M5.4   surface
     M5.5   volume
     M5.6   congruent triangles

M6   Geometry - construct geometric figures: lines, angles, congruent angles, congruent segments, angle bisectors, parallel/perpendicular, geometric figures, and three dimensional figures

M7   Geometry - measurement:
     M7.1   measure direct - distance
     M7.2   calculate and evaluate measurement precisely,
     M7.3   formulate and verify angles - acute/obtuse/right
     M7.4   measure direct angles
     M7.5   estimate and round
     M7.6   classify triangles by sides and angles

M8   Geometry - identify geometric figures and symbols:
     M8.1   interpret symbols
     M8.2   identify lines
     M8.3   identify lines - vertical/horizontal
     M8.4   identify lines-parallel/perpendicular
     M8.5   identify lines - ray/segment
     M8.6   distinguish angles/circle/arcs
     M8.7   identify geometric figures circles/angles/arcs/polygons
     M8.8   identify geometric figures
     M8.9   understand geometric figures: visual perception

M9   Algebra - graphing: calculate and evaluate Cartesian midpoints

M10   Algebra - graphing: solve problems - coordinate geometry and conic sections

M11   Algebra - graphing: solve problems - coordinate geometry and distance formula

M12   Trigonometry - use calculator to compute trigonometric functions (e.g., cosines/sines/tangents)

M13   Convert decimals/fractions/ratios/percentages

SCIENCE SKILLS

S1   Apply and use maps/charts/tables/graphs
S2   Convert measurement units
S3   Measure direct distance and/or length
S4   Measure direct angles
S5   Describe and explain color in general, related to blindness, cones, pigmentation, rainbows, rods, and spectra
S6   Describe and explain lenses including concave, convex, and focal length
S7   Describe and explain light including angle of incidence and reflection, critical angle -- fiber optics, diffraction, electromagnetic radiation, electromagnetic spectrum, fluorescent, incandescent, lasers, opaque, photoelectric, photons, polarization, refraction, speed, translucent and transparent, and ultraviolet
S8   Identify measurement units
S9   Measure mass and weight
S10   Measure volume including liquids and solids
S11   Use computers to process information, for mathematical applications and problem solving

EMPLOYABILITY SKILLS

These are defined as skills and behaviors that are known, valued, and practiced in the workplace.

RESOURCES:
Identify, organize, plan, and allocate resources
Select drawing relevant activity, allocate time, keep records and follow schedule
Use company resources responsibly (e.g., supplies, equipment)

INTERPERSONAL:
Work with others
Participate as member of team (e.g., following instructions, providing feedback, cooperating with established team goals)
Serve Clients/Customers - work to satisfy customers' expectations (internal and external customers)
Maintain professional respect for co-workers and customers without prejudice
Understand how the structure of the organization works and work effectively within it
Communicate effectively with work related personnel
Provide job-related instruction to others

INFORMATION:
Acquire and use information
Acquire and evaluate job-related documents
Organize and maintain files
Interpret and communicate job-related information
Use computers to process information in the work environment

SYSTEMS:
Understand complex terminology
Is familiar with inter-relationships used in the profession
Understand the technical aspects of everyday life on the job and the tools that relate to the profession
Suggest modifications to existing processes and develop new or alternative methodologies to improve performance

TECHNOLOGY:
Work with a variety of technologies
Apply current and appropriate technology to specific tasks

THINKING SKILLS
- Think creatively
- Make intelligent decisions
- Solve problems
- Visualize, organize and process symbols, pictures, graphs, objects, and other information
- Use efficient learning techniques to acquire and apply new knowledge and skills
- Practice deductive and inductive reasoning skills

PERSONAL QUALITIES
- Practice individual responsibility
- Have good self-esteem, believe in own self-worth, and maintain a positive view of self
- Relate well to others
- Set personal goals, monitor progress, and exhibit self-control
- Possess integrity
- Maintain a professional image
- Demonstrate dependability
- Demonstrate a good work ethic
- Demonstrate willingness to learn
- Provide constructive praise or criticism
- Demonstrate flexibility
- Work safely
- Balance work, family, and personal life

GENERAL KNOWLEDGE OF THE INDUSTRY
- Know the scope of the industry and how parts interrelate
- Understand the economics pertinent to the department (e.g., supply costs, productivity, business financial decisions)
- Read, analyze and interpret examples of industry reports and specifications and standards

18

TOOLS and EQUIPMENT for CADD TRAINING

Recommendation

CADD software is designed to run on a wide range of hardware platforms such as personal computers, engineering workstations, mini-computers or mainframes. Most CADD software can be run on a variety of hardware platforms, each of which has advantages and disadvantages in terms of price and performance. Due to the rapidly evolving computer technology and related software capabilities, specific component designations must be made on an individual basis. The key factor to success is to match needs with abilities, performance, and cost. Considering these factors, the following guidelines are provided.

CADD system hardware selection will have to consider the following components in the selection process:

- CPU (e.g. processor, RAM)
- display system (e.g. monitor, graphic cards)
- input peripherals (e.g. mouse, graphics tablet)
- output peripherals (e.g. plotter, laser printer)
- mass storage devices (e.g. floppy disk, hard disk)
- back-up devices (e.g. tape drive, WORM drive)
- accessories (e.g. CD-ROM drive, UPS, modem)
- network (e.g. data)
- training accessories (e.g. video network, projection devices)

The recommended process for selecting a CADD system is:

1. Review the Core CADD Skills document and determine the CADD skills to be learned.
2. Investigate/choose the CADD software that will best accomplish the learning of these skills selected.
3. Select appropriate computer hardware for the CADD software selected. Thus, the hardware should always be selected LAST.

THE IDEAL TRAINING ENVIRONMENT HAS ONE LEARNER PER WORK STATION.

14

HOURS of INSTRUCTION

Recommendation

The following is an estimate of the number of hours required to teach the different segments of each core CADD technical skill area, excluding the related academic skills. Portions of these areas can be taught concurrently. Hours include lab and classroom hours.

FUNDAMENTAL DRAFTING SKILLS...80 to 130 hours

FUNDAMENTAL COMPUTER SKILLS.......................................10 to 30 hours

BASIC CADD SKILLS..80 to 130 hours

ADVANCED CADD SKILLS...120 to 220 hours
