ABSTRACT

As part of a review of student support services, William Rainey Harper College in Illinois conducted a study of the characteristics of and benefits received by clients of its Career Center (CC) on the main campus and the Career Transition Center (CTC) at its Northeast Center. Both centers provided lists of clients served during the spring and summer of 1995, while class rosters were also analyzed to determine participants in CTC seminars in fall 1994, spring 1995, and summer 1995. This resulted in a study population of 355 CTC and 343 CC clients, of whom 114 CTC and 98 CC clients returned completed questionnaires. Study findings included the following: (1) 51% of the CC and 58% of the CTC were employed full-time. while 48% of the CC clients had an associate degree or higher and 59% of the CTC clients had a bachelor's degree or higher; (2) the most common method by which clients heard about services was through referrals from college faculty or staff, cited by 54.6% of respondents; (3) the most common reason given for using the services was a need to make a decision on an educational program, followed by job dissatisfaction and a change in personal or family situation; and (4) with respect to benefits received from participation, the highest levels of knowledge increases were reported for career-related values, qualifications for specific occupations, and location of resources. The CC and CTC questionnaires are appended. (BCY)

FOLLOW-UP STUDY OF THE CLIENTS OF THE CAREER TRANSITION AND THE CAREER CENTERS AT HARPER COLLEGE

Dr. John A. Lucas, Director

Office of Planning and Research

Russell Mills, Director Student Support Services

Mary Ann Jirak, Coordinator Career Transition Center

REST CODY AVAILABLE

ABSTRACT

The purpose of this study was to follow up clients who had used either the Career Center on the main campus or the Career Transition Center at the Northeast Center. The surveys focused on the profiles of the clients, what attracted them to the centers and how they benefited from the programs and services.

Survey instruments were designed and after two mailings about a 30 percent response rate was realized. Clients of the Career Center on campus had a moderate unemployment rate, were fairly well educated and were mostly single. The profile of the clients of the Career Transition Center showed they were around 40 years of age, had a high unemployment rate, were very highly educated, mostly female and almost all Caucasian.

Results of the surveys showed that the need to make a decision on an educational program, job dissatisfaction, changes in their personal/family situation and job loss were the primary life events that prompted clients to use the services of the Career Transition Center and the College Career Center. The largest changes made by the clients after using these services were knowledge of the location of resources and career related values. Also listed as large changes for some were knowledge of qualifications/requirements for specific jobs, career making process, career planning process and their personality style/type.

The most common actions taken as a result of these services were that their new job was in their chosen field, and they were satisfied with this job and they were satisfied with the resume they had created.

Purpose

The purpose of this study was to follow-up clients who used either the Career Center on the main campus or the Career Transition Center at the Northeast Center. The surveys focused on the profiles of the clients, what attracted them to the centers and how they benefited from the programs and services. These studies are part of the Program Review process and were requested by the Director of Student Support Services.

Methodology and Population Surveyed

The survey instruments used are shown in the appendix and were designed jointly by the Office of Planning and Research, the staff of the Career Transition Center and the Career Center. The survey populations were developed as follows: The Career Transition Center provided lists of clients who were individually counseled during the spring and summer of 1995 while class rosters provided lists of enrollees in their seminars in the fall 1994, spring 1995 and summer 1995 semesters. These two sources provided a total study population of 355 clients. The Career Center provided a list of students using either career counseling or job placement services during the spring and summer of 1995. This source provided a study population of 343 students.

Two mailings were made to these two study populations and afterwards the response rates were as follows:

		Number of	
Study Populatio:	Population	Mail Responses	Response Rate
Career Transition Center Clients	355	114	32.1
Career Center Student Clients	343	9 8	28.6

The profile of students using the Career Center was that 51 percent were employed full time while 7.5 percent were unemployed. This is higher than the 4 percent unemployment rate in the area but is what would be expected from a population seeking out the services of a career center. They are also well educated. Only 4 percent are just out of high school while 48 percent have been around Harper College for a while. Moreover, 48 percent have an associates degree or higher. They also are mostly single (58% single, no children; 12% single parents).

Examining the profile of the clients using the Career Transitions Center, we find 58 percent are employed full time while 11 percent are unemployed, which is no surprise since they are seeking these services. They are very well educated, with 59 percent having a bachelors degree or higher (30% in the general adult population of this area). This is consistent with the continuing education population served by Harper College. The median age is 40. Sixty-three percent are female. Both of these statistics are also consistent with the continuing education population at Harper College. Most startling is that 93 percent are Caucasian while only 80 percent of the general population in the area is Caucasian. These clients indicated that for 70 percent of them the career issue was very or extremely important for them in using the Center's services and programs. These clients had made, on the average, five job changes since they were 18 years of age and 1.5 career changes in their lifetime.

In each of the survey populations studies, clients could use one or two services or programs at each center. At the Career Center, 59 percent used student career counseling and 15 percent used the job placement service through a student appointment, while 26 percent used both services. Examining clients at the Career Transition Center we find, 40 percent used individual counseling services only, 45 percent enrolled in workshops at the center while, only 15 percent did both.

Major Conclusions

The need to make a decision on an educational program, job dissatisfaction, changes in their personal/family situation and job loss were the primary life events that prompted clients to use the services of the Career Transition Center and the College Career Center. The largest changes made by the clients after using these services were knowledge of the location of resources and career related values. Also listed as large changes

-1-

Major Conclusions (cont'd)

for some were knowledge of qualifications/requirements for specific job, career making process, career planning process and their personality style/type. The most common actions taken as a result of these services were that their new job was in their chosen field, and they were satisfied with this job and they were satisfied with the resume they had created.

Discussion of Results

When clients were asked about how they heard about the center, both groups gave the same top three means, but they were in reverse order. The Career Center students listed first, Harper faculty or staff referrals (55%), second, friends or relative referral (25%), and third, the semester schedule (18%). On the other hand, Career Transition Center clients rated the semester schedule first (33%), followed by friend or relative referrals (20%), and Harper faculty or staff referrals (12%).

Similarly, when surveyed about what most prompted them to use the service or enroll in the programs of the two centers, they again both gave the same top four factors, but in different order. Career Center students cited first the need to make a decision on an educational program (53%), second, job dissatisfaction (36%), third, changes in their personal/family situation (14%), and fourth, job loss (12%). By contrast, for Career Transition Center clients their number one choice was job dissatisfaction (47%), followed in rank order by job loss (26%), need to make a decision on an educational program (21%), and a change in personal/family situation (15%).

The next set of questions dealt with how clients benefited from the programs and services in which they participated. When asked what areas had changed most for them, half of the top four items appeared on the list for both groups. Location of resources and career related values were top items for both groups. Career Center students also listed qualification requirements for specific jobs and the career decision making process. The Career Transition Center clients also listed their personality style/type and the career planning process as top items. When queried about career self-reliance items that changed, both groups listed ability to sell yourself in your target job market and ability to assess your current skills at the top. Both groups also listed as their largest attitude change their optimism about an expanded view of career options available.

The most common actions for both groups, taken as a result of using the services or participating in the programs, was their new job was in the chosen field and consistent with their chosen career objective (81% and 89%), they were satisfied with their new job (81% and 89%) and they were satisfied with the resume they had created (79% and 92%).

Career Transition clients were also asked to evaluate the counseling services they received. For the most part they (79%) felt the time allowed was adequate and the counselor possessed the appropriate experience levels. Clients listed their job descriptions and many offered comments.

Comments on Length of Time Spent with Counselor

- Still in proces
- Cost of resume preparation at one hour each of three visits did not satisfy my needs \$85.
- Could use more time focused on other issues like skills that could transfer to other jobs.
- Maximum help able to be given in my field.
- Information was too vague.
- Not very much one-on-one time.
- Another session may have been beneficial or six months later to see if any advancement in career selection.
- Not enough time for specifics relating to career and job hunting, interviewing, cover letters, etc.
- Not nearly enough time allowed only an hour.
- Did not return for last hour we covered everything we could.
- Most of the first two sessions were spent going over test results leaving little time in the next couple of sessions to discuss careers.
- It was not individual it was group.
- The time was appropriate.
- More time needs to be given to explaining connections between career areas and the evaluations given or taken.
- We were able to accomplish all that I had wanted.
- I had six sessions with D. Kiemec. I feel any less than that would not have been sufficient to meet my needs. He was able to get to know me and, in turn, give me solid advice and guidance.

Comments on Length of Time Spent with Counselor (cont'd)

- I think, at the time, appropriate amount of information was given.
- Counselor came right to the point.
- The Career Center has too limited availability. I could not spend enough time there because of the hours.
- Always thought of things to ask after the session.
- I used the Career Transition Center and the few sessions I did have I felt were appropriate length. When my money ran out, my sessions were canceled.
- Could have used more sessions the Wings Office did not seem to have a clear group of what was available for the money.
- Amount of time was sufficient and appropriate I especially appreciated the offer of further assistance as I saw fit.
- Seemed to cover a lot of information in each session. Was not aware of all that is out there to help a person fine a job.
- I got everything I needed done.
- Could have had more time to devote to particular areas.
- I found the process so helpful that I will need more time to explore fully.
- Barbara was a delight to work with. She made me feel special. I never felt rushed or pressured to make a decision. She is a true professional and a real human being.
- I found it took time to get comfortable. We would just start getting somewhere and have to move on to another category.

Comments on Whether Counseling Experience

was Appropriate to Individual Career Issues and Goals

- She did as well as she could. I was not ready to really examine all my options. I still have time left to use.
- Excellent personal help and guidance.
- I entered counseling expecting merely confirmation of my past track on a so-so continuation course. I was surprised by the outcome/recommendations and very pleased with revelation to me. It transformed me to focus on/capitalize on a collective experience/desire/new goal.
- Could not be too specific.
- I felt there was still an opportunity in the health field but unfortunately the counselor did not assist me in finding it. It came about one year later. I attended a trainer course at Wright Jr. College and became certified.
- I felt as qualified to do the counseling as the counselor.
- Learned a lot about myself and my goals.
- I wanted to know what jobs I am best suited for so to speak and the course showed me that.
- I really did not get much information on what career I wanted. I got information on accounting, bus driver jobs I have no interest in, but my tests say that's the job I should go for personality wise!
- Maybe because my results show a need for me to take drastic career course changes. I am overwhelmed.
- Dennis is an outstanding counselor. He guided me through my interview process and also provided my base to start my career change. I plan to continue to meet with him as I pursue my career change and as a check point for the direction I am headed.
- The information that was given was general and could apply to my field of interest.
- Helped me follow the right path.
- Counselor seemed more worried about getting home than in my career problems. Did not give much help.
- I got some help but not enough to make a difference for me the program is structured to help the most people it can unfortunately, when it comes up against a really difficult case such as mine and the resources are not adequate.
- With a few more sessions a great deal of progress was really possible.
- Yes, however "reality" comes into play when considering my financial situation.
- Dennis Kmiec provided a "custom" career transition based on my needs. His knowledge, expertise and empathy made the experience extremely worthwhile. Thank you.
- Of little value.
- Got a job in areas discussed.
- Lori Gunning provided excellent guidance.
- I am attending East/West University taking a course in electroneurodiagnostic technology (EEG). I have not been in school for 30 years. It is difficult.
- The counselor seemed qualified enough to answer or coach through some of the questions I had.

- 22 -

General Comments

- Seems better suited for junior college graduates. For example, job leads are mostly for low paying jobs. Why not get subscriptions to MBT alumni job opportunities bulletins?
- Basically, I learned that any area I am interested in are out of my reach more school, salary cut, etc. I was disappointed in that I wanted objective help to evaluate my skills, but got only directions for self-evaluation and those were not really directions just "rate yourself". I wanted more to confirm I have strengths and abilities.
- It was helpful though counselors would need a more in-depth understanding of various jobs, fields, etc., to help on a detailed level, i.e., I was dissatisfied with computer field, and she suggested I take Sys Admin side of it but that is even more mundane than what I was dissatisfied with, but I can understand it is hard to have that sort of detailed view without being a part of a particular field.
- I took two classes to help me understand some of my basic skills. If I experience a need for a career change, I feel comfortable in contacting the Harper College Career Transition Center for help.
- I want to continue with career workshops for specific guidance into a different career.
- Confirmed my own ideas and job research skills little help with resume tips.
- Since I attended a group indoctrination and have not sought any additional services, I am not able to comment on your services. I still desire making a change, maybe out of accounting because it appears to me that the skills I have acquired demand better pay in other areas of business and I seem to be losing ground with respect to standard of living.
- Dennis Kmiek was very helpful and instrumental concerning my career change.
- I like the lectures/classes offered.
- Career search resources are excellent.
- My individual sessions were very focused on my own individual needs at the time. This was very helpful since I already knew a lot about career options in my own field and related ones I had considered.
- I learned this and others should be told -- you may think you have fully and objectively assessed/ evaluated yourself, by yourself. Maybe so but I did the program just on the chance I might re-focus or affirm it all. But I was surprised I did learn something about myself in terms of what I have gained in past experience, combined with latest developing new interest area, resolving in a revelation of/new awareness of where I can (and wanted to) re-focus it all, to a new career objective. This made a big difference I did not predict.
- It's an excellent way for teenagers to understand reality in the world peace.
- I have applied at Harper College to instruct the Nursing Assistant Program, speaking to Deborah Karas. I am still hoping to hear from Harper to begin the summer class 1996, filling in for the instructor who wants a break.
- If I was a high school senior I am sure your services might have helped me.
- Basically enjoyable and helpful, but the number of typographical errors I found in the handouts kept distracting me. There is no comma in the year 2000.
- It gave me an idea of what to expect in the job market today and what jobs are looking for in employees.
- Mrs. Kramer did a wonderful job trying to get me to a specific goal of career. Barbara got right to the heart of the problem was most perceptive and available.
- I could not get a refund for the portion of counseling I did not use because I found that the counseling was not helpful enough to continue.
- I think more people should take the aptitude tests you have because I found them extremely enlightening.
- I was very pleased with the service. Also I would recommend this package to anyone who was thinking of a career change. The information provided was thorough and well discussed. I felt confident in my decisions.
- I have made 10-12 job changes but all within one corporation where I have 32 years of service. With regard to question six no career changes. I have been in the printing industry for 35 years. I did not participate in enough classes to gain an understanding of this program.
- I am raising a family by myself. As a widow working full time and taking care of a household, I do not have the time available to answers questions 7-10.
- This is a poorly designed question No. 7. You ask about understanding or knowledge (big difference) then you degrade it to "knowledge" only in 1 and 4. Then, in five call it "information". This is unclear and confusing. I have answered 7A, 7B, and 7C in terms of understanding, not knowledge. After information, first comes knowledge, understanding follows. If I am available and you need a speaker to boost this program I would welcome opportunity to explore how I may help.

General Comments - (cont'd)

· My workshop dealt with options for adult learners returning to school.

- Hoping to teach as I liked helping student nurses while I was an RN in hospital.

- I am still in counseling.

- Too early in the career counseling process to assess.

- Current job title/description full-time mother thinking about returning to school to change fields.
- I am doing volunteer work in school in an area that might be of some interest to me as far as part-time work in the future. I am also a homemaker/artist/volunteer graphic artist.
- · Center is not user friendly · it is Center friendly. Hours too short and poorly staffed. No one cares! What a rip-off and waste of money! You need to make changes.

- Still in high school and 17 years old.

- Still in high school and 17 years old.

- Still in high school.

- I felt it was worth going to it helped me to understand where to start and go for. Well done, understanding great, clear and always there to answer questions.
- I really enjoyed the "Life After Teaching" workshop and learned a bit.

- I was extremely pleased that your services existed.

- Hours too short never open when really needed. No one seemed to care about making the center more available for use when I had the time.
- Good instructor learned things I had not previously known about, attributes and personality and how they relate to job suitability.

· The program was good for me. More detailed classes for the person who is over 50 but has not college.

For the person who has not changed jobs too often it is overwhelming. Thank you.

- Attended career planning workshop in September '94. Kept working at current job finally got job lead from field plus lost faith in current company, so I am in the process of transition. Was not really satisfied with Harper program. Doing this on my own, not because I attended the workshop 18 months ago.
- It is unfortunate there is only one Center available to me it is over an hour one way to get there from my residence. With my rotating schedule it is difficult to spend any length of time there.
- I was impressed with the "personal" attention and felt that my counselor really cared about my future.

- I enjoyed being a part of this program during a very difficult time in my life.

- It would be nice if the classes I went to for this would have been at the College - overly hectic to get there! More expansion on jobs vs. The person could have given me more insight on the kind of job that I would be compatible or interested in getting. I went from having an associates degree in management with no job to studying telecommunications at DeVry. Certainly a transition. I don't know if those "games" we did really made a difference from the Career Transition Class.

- Excellent program - thank you!

- A very good program you have I learned a lot.
- General areas of interest were pin pointed. No job specifics or individual counseling was available. None of the individuals I contacted re personal interviews to discuss the job/career had the time to devote to "counseling" me. Maybe this is something Harper could find a way of providing.
- It was very helpful.
- I would do it again.
- I was well pleased with my experiences.
- It was a very positive experience.

Fall 1995

Dear Career Center Client:

In our efforts to continuously improve the programs and services we offer, Harper College Career Services is conducting this evaluation survey. As a former user of the Career Center, your opinion and feedback are very valuable to us. We will use your responses to plan programs and evaluate our services.

Please take the time to answer the questions contained in the attached survey as completely as possible. Then return the survey in the postage-paid envelope that is also enclosed. Your individual responses will remain strictly confidential and will be used only by the research team to compile an aggregate report from which recommendations for improvement can be formulated.

Thank you in advance for your cooperation. Only you can help us measure the effectiveness of our current programs and insure their improvement and ongoing availability to others.

If you have any questions about the survey or any of our career services, please call (708) 925-6720.

Very truly yours,

Ruse Mills, Director
