ABSTRACT

Since 1969-70, the National Catholic Educational Association (NCEA) has published a statistical report on Catholic elementary and secondary schools in the United States. This report contains the core school enrollment and staffing data of the NCEA historical file for 1995-96. Data were collected on Title I services, extended-care programs, school boards of education, coeducational schools, and single-sex schools. The first part presents a summary of the demographic trends impacting both public and private education. Comparisons are also made with other private schools and with the public sector. Data for free-standing middle schools are also presented. The data are based on information submitted by archdiocesan and diocesan offices of education and a state Catholic Conference that compiles school data for all dioceses in that state. Appendices contain a summary report of basic school statistics, a list of states with enrollment increases, and a summary report of supplemental data by region and state. A total of 26 exhibits are included. (LMI)

PREFACE

ince 1969-1970 the National Catholic Educational Association (NCEA) has published a statistical report on Catholic elementary and secondary schools in the United States. Prior to this time extensive data did not exist for these and other private schools. This data was needed to understand this significant educational sector, to inform the discussion of other educational policy issues, including potential forms of federal and state aid, and to encourage and improve local management. With the assistance of the Carnegie Corporation of New York and the United States Office of Education, a database on Catholic schools was established and remains available in annual publications of the NCEA through 1974-1975. In 1975, the NCEA and the Curriculum Information Center Incorporated published a report and directory of Catholic schools. This publication continues the database and is now produced in cooperation with Fisher Publishing Company of Silverthorne, Colorado, and Market Data Retrieval of Shelton, Connecticut.

The report contains the core school enrollment and staffing data of the NCEA historical file. Again this year, we have collected data in our survey on Title 1 services, extended care programs, school boards of education, coeducational and single-sex schools. The first part of the report presents a summary of the demographic trends impacting both public and private education. Comparisons are also made with other private schools and with the public sector. We continue with middle school (free-standing, not middle school programs) specific data begun last year.

The report is based upon information submitted by archdiocesan and diocesan offices of education and, in one instance, a state Catholic Conference which compiles school data for all dioceses in the state. NCEA is most grateful to these administrators and their staffs for their cooperation, resulting in a 100% response rate.

Special thanks to members of the Data Bank Committee: Mr. Frank X. Savage, Executive Director, Department of Chief Administrators of Catholic Education; Mr. Michael Guerra, Executive Director, Department of Secondary Schools; Regina Haney, OSF, Executive Director, National Association of Boards of Education; Dr. Robert Kealey, Executive Director, Department of Elementary Schools; and Ms. Barbara Keebler, Director of Public Relations for their suggestions and editorial assistance for this report. Thanks also to Ms. Mary Jo Milks for her outstanding service in collecting, organizing, and auditing the data which is the substance of this report, and to Mr. Rick Gilbert for his considerable help in programming. NCEA appreciates the assistance and cooperation of Ms. Mary Mahar of Fisher Publishing Company and the staff of Market Data Retrieval.

HIGHLIGHTS

- Population trends show increasing numbers of students at preschool and elementary age levels.
- Catholic preschool enrollment increased by over 450% since 1982-83.
- In 1995-96 there were 8,250 Catholic schools; of these 6,924 were elementary, 98 were middle, and 1,228 were secondary.
- In 1995-96 the total number of Catholic schools students was 2,635,218 an increase of 16,651 students since last year.
- The percentage of minorities in Catholic schools has more than doubled since 1970-71 and continued to increase in 1995-96. It now stands at over 24%.
- In 1995-96, 3,752 Catholic schools were located in urban areas; of these, 1,020 were inner-city schools.
- In 1995-96 non-Catholic represented 17% of Catholic school enrollment.
- In 1995-96 full-time equivalent faculty numbered 166,759.
- In 1995-96, 91.4% of full-time faculty were lay men and women; the remainder consisted of 6.9% sisters, 0.9% brothers and 0.8% priests.
- In 1995-96 the pupil/teacher ratio in Catholic schools for grades PK-12 was 15.6:1; in elementary schools 17:1, in middle schools 15:1, and in secondary schools 12.9:1.
- In 1995-96 there were 3,935 Catholic schools offering extended care programs.
- In 1995-96 there were 5,591 Catholic schools with students eligible for Title 1 services, with 4,616 Catholic schools with students receiving Title 1 services.
- In 1995-96, 6,395 Catholic schools reported having a school board of education, or its equivalent.
- In 1995-96 the number of Catholic schools included 200 all-male and 272 all-female schools.

INTRODUCTION

n 1995-1996, the Catholic school community saw its fourth consecutive year of enrollment increases. Total enrollment increased 16,651 over the 1994-1995 school year. This represents a 0.6% increase over the 1994-1995 enrollment and a 2.6% since 1992-1993. To what can this increase be attributed?

The increase can be attributed to a growing confidence in the quality of Catholic school education. Catholic educators have long believed in the quality of their schools but their belief was not always shared by educational colleagues or even within the larger Catholic church community. Several factors have contributed to the increased confidence in the quality of Catholic schools: independent research documenting the quality of Catholic schools, initiatives within the Catholic community on behalf of schools and discussion of educational reform as an issue of public policy.

INDEPENDENT RESEARCH

Independent research substantiates a number of quality indicators about Catholic schools. Studies based on the National Assessment of Educational Progress (NAEP); the National Education Longitudinal Study of 1988 (NELS:88) and High School and Beyond show that, on average, Catholic elementary and secondary school students score better on academic achievement tests than public school students. Furthermore, the difference in achievement levels increases with grade level.²

Research shows that Catholic schools do a better job than public schools in educating minority students. Studies show that minority students in Catholic schools score higher on academic achievement tests, have higher educational dreams and are less likely to drop out of school than minority students in public schools. Within Catholic schools the difference in academic achievement between minority students and other students is less than in public schools.³

The late Dr. James Coleman contended that the effectiveness of Catholic schools was due in large part to the "functional community" that embraced the school and bestowed a "social capital" on the school environment. The beliefs, values and practices of the functional community create norms and expectations within the school regarding academic performance and acceptable behavior.⁴

The growing body of educational research highlighting the performance of Catholic schools creates a climate where educators have begun to look to the Catholic school as a model for educational reform.

INITIATIVES WITHIN THE CATHOLIC COMMUNITY ON BEHALF OF SCHOOLS

In 1990, just prior to the beginning of increases in Catholic school enrollments, the United States Bishops issued a statement in support of Catholic Elementary and Secondary Schools. This statement places the bishops on record as supporting Catholic schools and commits them to implementing strategies to ensure their permanence.

The following year the NCEA convened the National Congress on Catholic Schools for the 21st Century. This event held in Washington, DC, November 1991, was the culmination of regional gatherings of over 5,000 stakeholders in the future of Catholic schools. The Congress set directions for the future of Catholic schools and mobilized a national community of Catholic educators committed to:

- championing superior standards of academic excellence in which gospel values and Catholic Church teachings are integrated in the lives and work of all members of the school community
- valuing and empowering leadership that is visionary, innovative and collegial
- opening minds and hearts and doors to an increasingly diverse world, and preparing students' minds and hearts and hands to live wisely and generously in a technological, complex, and interdependent world
- seeking the support of the entire Catholic community, undertaking comprehensive development programs and providing opportunities for all who are committed to their mission to join in shaping the future
- joining forces with others to advocate and promote public policies that offer all parents the opportunity to choose the schools they believe are best for their children

10

vii

At its 1996 annual Convention in Philadelphia, Pennsylvania, the NCEA celebrated the fifth anniversary of the National Congress on Catholic Schools for the 21st Century by convening *Congress '96*. Over 300 Catholic educators assembled to reflect on achievements since the 1991 Congress and set a course for future action.

In 1992 the NCEA in collaboration with the United States Catholic Conference (USCC) Department of Education initiated the National Marketing Campaign for Catholic Schools with the *Discover Catholic Schools* campaign. The purpose of the campaign was to increase visibility of Catholic schools within the communities they serve. Many dioceses adopted *Discover Catholic Schools* for their own campaign, others adapted the materials to suit their local needs. Still others, especially those who had experience in marketing Catholic schools, created their own campaigns with generous funding from outside sources. In a few short years many dioceses experienced a transition from having schools with empty seats to schools with waiting lists. Catholic schools were successful in positioning themselves as "Your better choice" and "Schools you can believe in".

EDUCATIONAL REFORM AND PUBLIC POLICY

Educational reform is a political issue. American people in many communities believe their schools fail to adequately educate children to take a productive place in society. The business community is concerned about having an educated workforce to meet its employment needs in a competitive world economy. People concerned about these issues are engaged in an intense conversation about how to improve education.

Parents, politicians, educators and business leaders are looking for educational models that work. Catholic schools have emerged as a model that works. Site based management, parental involvement, functional communities, emphasis on a core curriculum, and putting the needs of children first are key factors for success of any school. These factors are present in a high degree in most every Catholic school. For many parents, especially those in urban areas, Catholic schools are recognized as schools of choice for their children.

A hotly debated question in discussing educational reform is whether parents should have government financial support to choose the public, private or religiously affiliated school they feel is best for their children. In September 1992, NCEA released findings of a Gallup survey which measured public opinion on the issues of parental choice of schools and the funding of school choice, as well as on the quality of education provided by U.S. schools.

A clear majority of the 1,239 adults surveyed (70%) indicated support for a government-funded voucher system which would provide a certain amount of money for each child so that the parents could send their children to the public, private or religiously affiliated school of the parents' choice. When asked if the; would be willing to see some of their tax money now going to public schools used to fund parental choice at any public, private or religiously affiliated school, three in five (61%) did favor the use of tax money for this purpose.

As part of the same survey, the NCEA commissioned the Gallup Organization, Inc. to assess attitudes toward education in the U.S. by assigning grades (A through F). Asked to rate schools nationally, 62% of adults gave an A or B to Catholic schools. It is clear from this survey that confidence in the quality of Catholic schools is high.

Independent research, initiatives of the Catholic community and the public policy debate are three reasons that help explain a growing confidence in the quality of Catholic schools. This confidence is reflected in a fourth consecutive year of enrollment increase. This report provides a statistical description of the numbers of students and teachers in U.S. Catholic elementary and secondary schools. The report describes a community of teachers and learning who staff and populate the best schools in the United States.

A SUMMARY OF DEMOGRAPHIC TRENDS IN PUBLIC AND PRIVATE EDUCATION: A CONTEXT

U.S. POPULATION TRENDS

Current population trends are important to both public and private schools. According to the United States Department of Commerce, Bureau of Census, the birth rate (births/1000 persons) rose slightly during the past decade. Since the population is greater, the number of births has been increasing. The 16.8 birth rate produced 4,179,000 births in 1990, the most since 1960. However, a decline to 3,874,892 births in 2000 is projected.

| EXHIBIT 1 Population and Birth Rate: 1955 - 2000 | | | | | | |
|--|-------------|-----------|------------|--|--|--|
| Reported | Population | Births | Birth Rate | | | |
| 1955 | 165,069,000 | 4,097,000 | 24.8 | | | |
| 1960 | 179,975,000 | 4,257,850 | 23.7 | | | |
| 1965 | 193,460,000 | 3,760,358 | 19.4 | | | |
| 1970 | 203,302,000 | 3,731,386 | 18.4 | | | |
| 1975 | 215,465,000 | 3,144,198 | 14.6 | | | |
| 1980 | 226,846,000 | 3,612,258 | 15.9 | | | |
| 1985 | 238,736,000 | 3,760,561 | 15.8 | | | |

SCHOOL-AGE POPULATION

According to the National Center for Education Statistics, these population trends are reflected in the increasing numbers of students at preschool, elementary and secondary levels. Preschool age students were increasing in 1980. Growth has been slower in elementary and secondary categories, and after 2000 the preschool age population is projected to decrease. This upward trend in elementary students began in 1986. In 1991 secondary schools began to show an increase. The steady increase of students in these three age brackets is detailed in Exhibit 2.

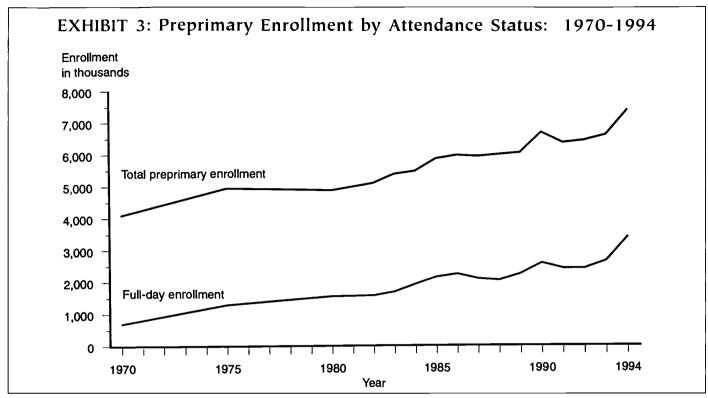

| EXHIBIT 2 Ages of Students | | | | | |

ENROLLMENT IN PUBLIC AND PRIVATE SCHOOLS

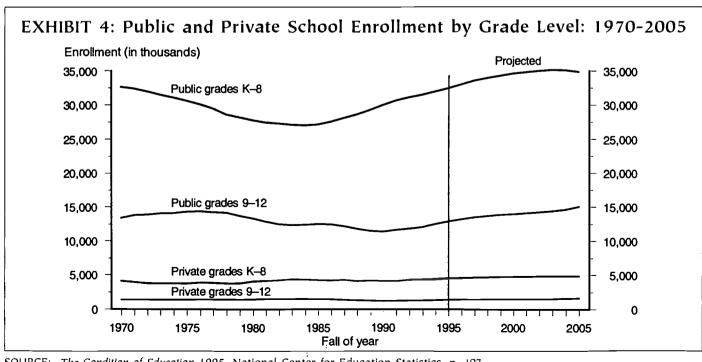

The following exhibit shows a substantial steady increase in preprimary enrollment for ages 3, 4, and 5 in both private and public schools between October 1970 and October 1994 according to the National Center for Education Statistics.

SOURCE: Digest of Educational Statistics 1995, National Center for Education Statistics, p. 46

Elementary school enrollment dropped during the 1970s in both public and private schools, but underwent little or no change in the first half of the 1980s. High school enrollment in public schools rose during the early to mid 1970s but then turned downward. Private school enrollment at the high school level changed little from 1970-1995. Exhibits 4 and 5 show these enrollment levels.

TEACHERS AND PUPIL-TEACHER RATIOS BY LEVEL

Since 1981, there has been a steady increase in the number of teachers, K through 12, in both public and private schools. At the same time, overall K-12 pupil/teacher ratios continued to decline after 1981, as is evidenced in Exhibit 6.

This is the fifth year that NCEA has compiled data on both full and part-time staff positions in addition to collecting data for students from PK-12. Therefore, the data since 1991-92 reflect these changes in the pupil/teacher ratios.

The overall pupil/teacher ratio in Catholic schools in 1995-96 was 15.6:1. By level they are: elementary schools - 17:1, middle schools - 13.3:1, secondary schools - 13.2:1. In 1994-95 the ratios were: elementary schools - 17.1:1, middle schools - 11.7:1, secondary schools - 13.2:1.

CATHOLIC EDUCATION 1995-96

NUMBER OF SCHOOLS

In 1995-96, there were 8,250 Catholic schools in this country; 6,924 elementary, 98 middle and 1,228 secondary. In the 1980s, in some instances, the number of Catholic schools mirrored the demographic movements throughout the country. Where appropriate, especially in urban and suburban areas, consolidation was a significant factor in the realignment of Catholic schools. While the number of schools continues to decrease through closing and consolidation, new schools continue to open. In 1995-96 22 schools opened, primarily at the preschool and elementary levels.

(1) REGIONAL DISTRIBUTION

The National Catholic Educational Association divides the nation statistically into the following six geographical regions:

New England: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont

Mideast: Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania

Great Lakes: Illinois, Indiana, Michigan, Ohio, Wisconsin

Great Plains: lowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota

Southeast: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina,

South Carolina, Tennessee, Virginia, West Virginia

West/Far West: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico.

Oklahoma, Oregon, Texas, Utah, Washington, Wyoming.

Exhibit 7 presents the number of schools by region and Exhibit 8 the percentages of this distribution. It is evident from the latter that the Mideast and Great Lakes regions at over 48 percent of the total number continues to have the largest percentage of schools. The West/Far West region continues to show growth. Free-standing middle schools were included for the first time last year, reflecting a relatively recent trend and focus in both public and private education.

^{*}Middle schools reported as a separate group beginning in 1994-95; prior to this date there were included in the elementary school count.

NOTE: Percentages may not total 100% due to rounding.

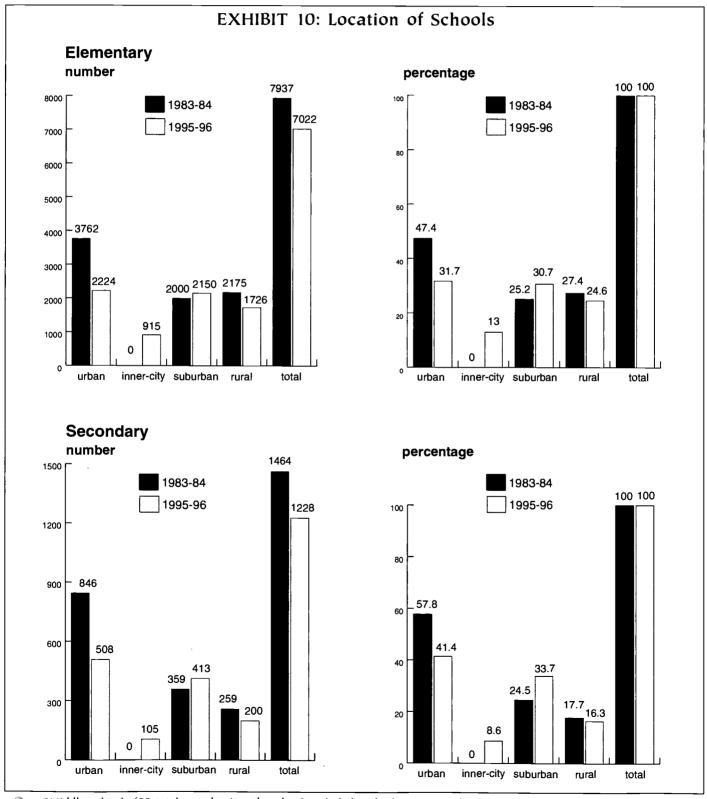

(2) TYPES OF SCHOOLS

The types of Catholic schools are determined by the authority of their administration. Under this classification there are four: parish (those administered by a single parish), inter-parish (those administered by two or more parishes), diocesan (those administered by the diocesan office of education), and private (those administered by a religious order or a private corporation). Exhibit 9 indicates that most elementary schools are parish schools; however, between 1983-84 and 1994-95, the growth in the number and percentage of elementary inter-parish schools continued. This growth underlines the reorganization of Catholic education through consolidation. Middle schools (counted for the first time last year) are primarily interparish and diocesan. Most secondary schools are either private or diocesan. Exhibit 9 shows a slight increase in the percentage of inter-parish and private schools over the past thirteen years.

(3) LOCATION OF SCHOOLS

During the 1980s and 1990s, the highest percentage of elementary and secondary schools was found in urban areas; however the increase in suburban schools nationally in the past thirteen years is significant. The number of inner city, suburban and rural elementary schools has risen since last year. Of 8,250 schools, 3,754 are in urban areas; of these, 1,020 are in inner-city settings.

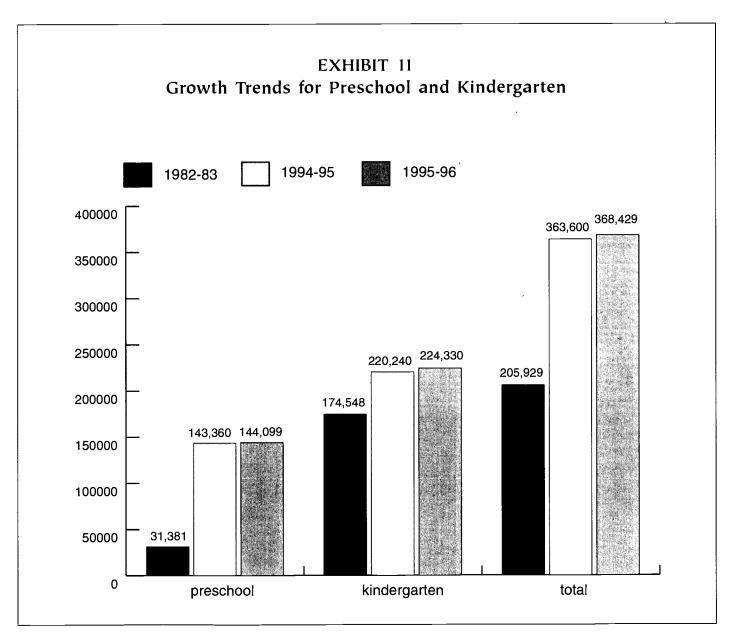

^{*}Middle schools (98 total—predominantly urban) included with elementary schools.

ENROLLMENT

(1) GROWTH TRENDS FOR PRESCHOOL AND KINDERGARTEN

Since the early 1980s preschool enrollment has increased by nearly 450%. This sharp increase in preschool enrollment reflects the response of Catholic schools to the needs of parents. The numbers of kindergarten students also continued to increase, as detailed in Exhibit 11.

.

(2) ENROLLMENT BY GRADE LEVEL

Catholic school enrollment by grade level from preschool to grade 12 was consonant with U.S. population trends, both actual and projected, as shown below in Exhibit 12. Of special interest is the increase in PK-12 enrollment in 38 states (statistics for individual dioceses and states may be found in Appendix B).

^{*} The numbers of ungraded students are not available in 1982-83.

NOTE: Percentages may not total 100% due to rounding.

^{**} Since 1991 NCEA statistics for total enrollment have included the number of Pre-K students

^{***} Beginning in 1995, NCEA has collected information by the level of school. The grade levels following the level of school signify the lowest and highest grades in these school levels (elementary and secondary may include middle school programs).

ENROLLMENT BY REGION

In enrollment by region, as shown in Exhibits 13 and 14, the Mideast and Great Lakes show nearly half of the total enrollment in Catholic schools. However, every region but New England showed an increase for 1995-96.

EXHIBIT 13 Enrollment by Region

Prior to 1991-92, statistics for total enrollment did not include Pre-Kindergarten (PK) enrollment. Therefore, figures listed below for United States enrollment before 1991-92 will correspond to the total minus PK figure in Exhibit 12; the post 1991-92 figures will correspond to the total with the PK figure included.

^{*}Middle schools reported as a separate group beginning in 1994-95; prior to this date they were included in the elementary school count.

(4) ENROLLMENT IN KEY STATES

As detailed in Exhibit 15, ten states accounted for nearly two-thirds of Catholic school enrollment. New York, California, Pennsylvania, Illinois and Ohio — the top five — had 45.7% of this enrollment.

(5) ENROLLMENT IN LARGEST DIOCESES

The twenty largest dioceses serve over 46% of the total enrollment in Catholic elementary, middle and secondary schools, as illustrated in Exhibit 16. These dioceses are larger than the metropolitan area of the same name. Most of the enrollment in these 20 largest dioceses comes from the major cities and their immediate suburbs.

| Percent | 50.6% | 47.0% | 46.7% |

^{*} Includes Buffalo enrollment of 37,900.

(6) ENROLLMENT OF ETHNIC MINORITIES

Catholic schools, especially in urban areas, continue to serve increasing numbers of ethnic minority students. In 1970-71 minority enrollment was 10.8% of enrollment; in 1995-96 it had more than doubled to 24.1%. Exhibit 17B shows percentages since 1983-84. Elementary schools have a minority enrollment of 24.4%; middle schools 28.2%; and secondary 23.9%.

27

^{**} Includes Buffalo enrollment of 30,663.

(7) ENROLLMENT OF NON-CATHOLICS

Most Catholic school students are Catholic. However, there has been a significant increase of non-Catholic students — from 10.6% in 1982-83 to 13.2% in 1995-96 — as is shown in Exhibits 18 and 19. Middle schools show the highest percentage of non-Catholic enrollment at 18.4% with secondary schools at 17.2% and elementary schools at 11.5%. The Southeast and West/Far West regions had the highest percentages at both the secondary and the elementary levels in 1995-96; the Mideast and West/Far West had the highest percentages of middle schools.

STAFFING OF CATHOLIC SCHOOLS

(1) NUMBER OF TEACHERS

In 1995-96, the total, full-time equivalent (FTE) teaching staff in Catholic elementary, middle and secondary schools was 166,759. 1991 was the first year that both full and part-time teaching staff totals were collected. Consequently, the FTE reflects the number of part-time staff positions and must be kept in mind when comparing to previous years' staffing totals. There were 117,483 elementary school teachers, 1,270 middle school teachers and 48,006 secondary school teachers. Of these, 90.5% are lay teachers. Exhibit 20 shows the number of sisters, brothers, priests and lay teachers; Exhibit 21 shows the percentages. Exhibit 20 includes middle school teachers since their number is so small; however, they are included in Exhibit 21.

- t Includes Middle School teachers (1,270) counted separately beginning in 1994-95.
- * Data concerning lay men and women is not available for the base year, 1983-84; this number reflects total lay teachers.
- ** Since 1991-92 FTE staffing totals include full and part-time figures.
- Since 1991-92 data collection includes the statistical breakdown of brothers/priests into two distinct categories.
