ABSTRACT

A study was conducted at Oregon's Mount Hood Community College (MHCC) to determine student outcomes for 1994-1996. Data were collected from state employment records for graduates from 1994-95, follow-up surveys of 1993-94 graduates and completers, surveys of former MHCC students who transferred to state system of higher education institutions, and a survey of 192 graduating students in June 1994. Key findings included the following: (1) 76% of the 1994-95 graduates were employed in Oregon during the fourth quarter of 1995; (2) overall, graduates wages increased from the time before they enrolled to the time that they left MHCC, with Allied Health graduates showing an average increase of \$202 per week and Engineering and Industrial graduates an average increase of \$236 per week; (3) 42% of the former students were attending school full- or part-time; (4) among students who transferred to the Oregon State System of Higher Education in fall 1994, 90% had a grade point average of 2.0 or higher, compared to 94% of those who transferred prior to fall 1994; (5) on evaluations, former students indicated high satisfaction with most aspects of MHCC, especially with the quality of instruction; and (6) employers of graduates rated their performance and quality of work as good to excellent, with the highest ratings being given to the former MHCC students' work attitude. Data tables are appended. (AJL)

Student Outcomes at Mt. Hood Community College (MHCC) Assessment Efforts 1994-1996

Executive Summary

In accordance with the MHCC Program/Function Review process and other accountability requirements, Research and Planning has engaged in an ongoing effort to collect information on student outcomes. Although the format for collecting this information has varied somewhat from year to year, there has been a common focus on students' employment and education status, their perceptions of preparation for work and further education, and their level of satisfaction with MHCC.

The data for this report came from four sources:

- **Wage Match.** This information source includes pre- and post-program earnings of 1994-1995 graduates provided by the Oregon Community Colleges Unified Reporting System (OCCURS).
- **Follow-up Survey.** The content of this survey covers former students' self-reported current educational and employment status and employers' ratings of the students and MHCC (with students' permission).
- **Transfer Study.** This is information on the academic success of MHCC students who transfer to the Oregon State System of Higher Education (OSSHE). It was provided through OCCURS and the Shared Information System (SIS).
- **College Outcomes Survey.** This is a commercial survey prepared by American College Testing (ACT). The content of this survey focuses on the graduating students' satisfaction with their experiences at MHCC.

Information from all these sources serve as the basis of the present report. Student outcomes were reported in four sections: Employment and wages, educational status, satisfaction with experience at MHCC, and employer satisfaction with former MHCC students. The main findings were:

- Over three fourths of graduates are employed approximately one year after graduation. Graduates of professional/technical programs showed a slightly higher employment rate than graduates of transfer programs.
- Overall, graduates' wages increased from the time before they enrolled to the time that they left MHCC. This was especially true for professional/technical graduates.
- About half of all graduates who are employed earn better than a living wage. Over three fourths of those who are employed full-time earn better than a living wage.

- A little less than half of those who were not employed were attending school, for the most part in Oregon. In fact, about half continued to take classes at MHCC and others community colleges.
- The large majority of former MHCC students earned GPAs of 2.0 or greater by the end of their first year at Oregon State System of Higher Education (OSSHE) institutions. In this respect, MHCC compares favorably with all Oregon community colleges.
- Former MHCC students indicate high satisfaction with most aspects of MHCC. In particular, quality of instruction received high marks.
- Employers were complimentary in their assessment of former MHCC students' work. Nearly all reported that former MHCC were equally or better prepared for work than other employees.

Student Outcomes at Mt. Hood Community College (MHCC) Assessment Efforts 1994-1996

Introduction

In accordance with the MHCC Program/Function Review process and other accountability requirements, Research and Planning has engaged in an ongoing effort to collect information on student outcomes. Generally these efforts are aimed at assessing how students fare approximately one year after they have earned a degree or certificate (referred to as "graduates") or have left with a significant amount of coursework completed at MHCC (referred to as "completers"¹). Although the format for collecting this information has varied somewhat from year to year, there has been a common focus on students' employment and education status, their perceptions of preparation for work and further education, and their level of satisfaction with MHCC. At present, the following data sources are available for assessing student outcomes:

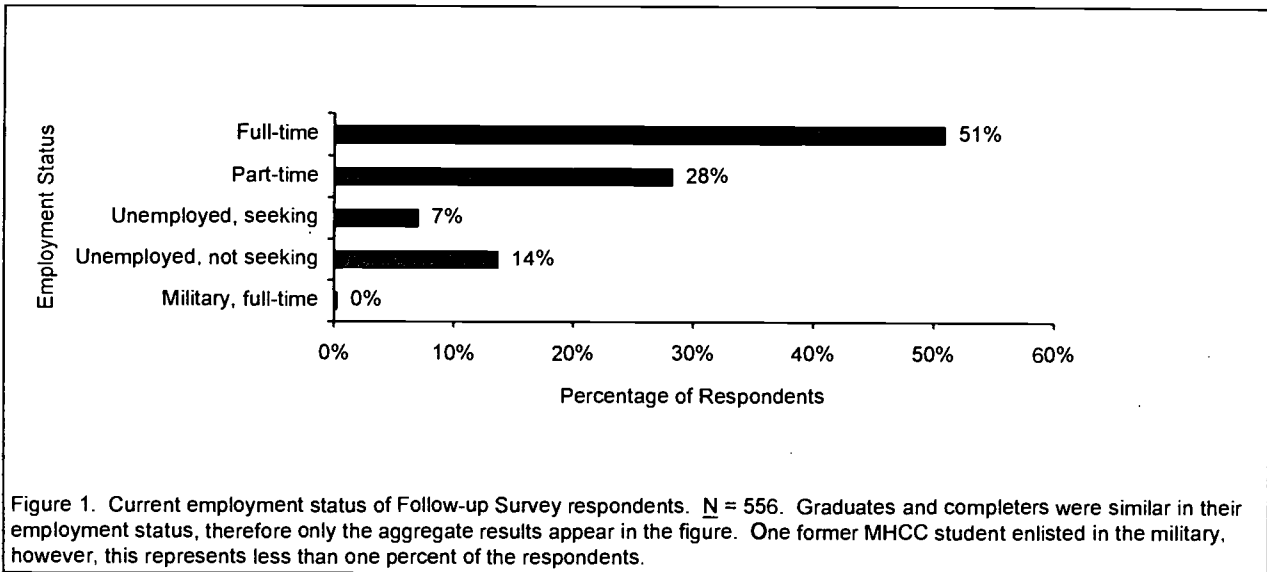

1. **Wage Match.** This information source includes pre- and post-program earnings of 1994-1995 graduates provided by the Oregon Community Colleges Unified Reporting System (OCCURS). Students identified as graduates by MHCC and sent to OCCURS (as part of the 1994-95 unduplicated Student File) were matched with Employment Division records.
2. **Follow-up Survey.** The content of this survey covers former students' self-reported current educational and employment status and employers' ratings of the students and MHCC (with students' permission). The target cohort was 1993-94 graduates and completers (39% and 41% of the sample respectively). The survey was conducted via telephone in the spring of 1995, approximately one year after most of the respondents had left MHCC. Results by major were distributed to instructional divisions earlier this year.
3. **Transfer Study.** This is information on the academic success of MHCC students who transfer to the Oregon State System of Higher Education (OSSHE). It is provided through OCCURS and the Shared Information System (SIS). The target cohorts are former MHCC students admitted to OSSHE in Fall 1994 (assumed for the most part to be 1993-94 MHCC graduates) and former MHCC students admitted prior to Fall 1994. Leadership Team received tables of these results in April 1996.
4. **College Outcomes Survey.** This is a commercial survey prepared by American College Testing (ACT). Unlike the Follow-up Survey, the sample of 192 graduates (1993-94 cohort) completed the College Outcomes Survey at the time of graduation, June 1994. The content of this survey focuses on the graduating students' satisfaction with their experiences at MHCC. The results are not separated by major because the survey did not require students to report specific areas of study.

¹ Completers are defined as students who have left MHCC after earning 60 credits for two-year programs or 25 credits for one-year programs.

Information from all these sources serve as the basis of the present report. Student outcomes are divided into the following sections: Employment and wages, educational status, satisfaction with experience at MHCC, and employer satisfaction with former MHCC students.

Employment and Wages

Based on the Wage Match, 76% of the 1994-95 graduates were employed in Oregon during the fourth quarter of 1995. (See Appendix A for employment rates by major.) The Wage Match employment rate is comparable to the rate calculated from the Follow-up Survey of 1993-94 graduates and completers approximately one year after leaving MHCC (79%). Employment rates are similar for both prof/tech and transfer programs, with prof/tech programs showing a slightly higher rate. This pattern holds true for both the Wage Match and Follow-up Survey data. The Wage Match data cannot distinguish full-time from part-time employment, but Figure 1 illustrates employment status based on the Follow-up Survey.

Of those who were not employed, 62% were attending school full- or part-time. (A comparison of employment rates by MHCC major appears in Appendix B.)

Over half of the respondents who were in professional/technical programs at MHCC reported that their jobs were directly related to their major at MHCC, whereas more than half of the respondents who were in transfer programs at MHCC reported that their jobs were not at all related (see Figure 2).

Respondents' jobs were remotely or not at all related to their MHCC program majors primarily because they took jobs to put themselves through school, and as one might expect, this was especially true for transfer students (see Figure 3).

Table 1 shows the change in 1994-95 graduates' average weekly wage before entering and after graduating from MHCC. On average, the professional/technical programs show larger increases than transfer programs. Almost all of the Allied Health majors show large increases (\$200 or more per week) in post-program wages. Graphics Technology, Mechanical Engineering Technology, Manufacturing Technology,

Ford Asset, and Funeral Services Education were other professional/technical majors showing large increases in wages pre- to post-program.

Table 1

Before and After Program Wages for 1994-95 Mt. Hood Community College Graduates²

(table continues)

² Data derived from the Oregon Community Colleges Unified Reporting System (OCCURS) Wage Match and include only students who received a degree from Mt. Hood Community College (MHCC) between September 1994 and August 1995 and earned wages both before and after entering a program of study at MHCC.

³ Wage information is reported by major only if there were data for three or more graduates in the major. Summary wage information by division or other groupings includes data not reported individually by major.

⁴ Average quarterly wage before program is based on earnings during the 4th quarter of 1992. This calculation is consistent with the Oregon Shared Information System (SIS) operational definition.

⁵ Average quarterly wage after program is based on earnings during the 4th quarter of 1995. This calculation is consistent with the SIS operational definition.

⁶ Average weekly wage before program is based on earnings during the 4th quarter of 1992 divided by 13 weeks. This calculation is consistent with the SIS operational definition.

⁷ Average weekly wage after program is based on earnings during the 4th quarter of 1995 divided by 13 weeks. This calculation is consistent with the SIS operational definition.

⁸ '+' indicates an overall increase in wages whereas '-' indicates an overall decrease in wages from pre-program to post-program.

All Students	All	308	2,613	4,052	201	312	+111

To aid in interpreting the wage information, consider that \$6.50 per hour is the standard living wage (if benefits are also provided). Roughly, this translates into \$260 per week, assuming full-time employment. In terms of the categories generated from the available data sources, wages of less than \$275 per week are considered to be below a living wage for the purpose of this report. From the Follow-up Survey, 59% (of the 248 graduates who indicated they were currently employed) reported that their weekly income was \$275 or more. In comparison, average weekly income information from the Wage Match indicates that 49% of graduates were earning \$275 per week or more. The two information sources differ in many ways (e.g., sample characteristics and cohort year) making comparison difficult, however, Figure 4 shows that the overall proportions of graduates by wage category are similar for the two sources.

BEST COPY AVAILABLE

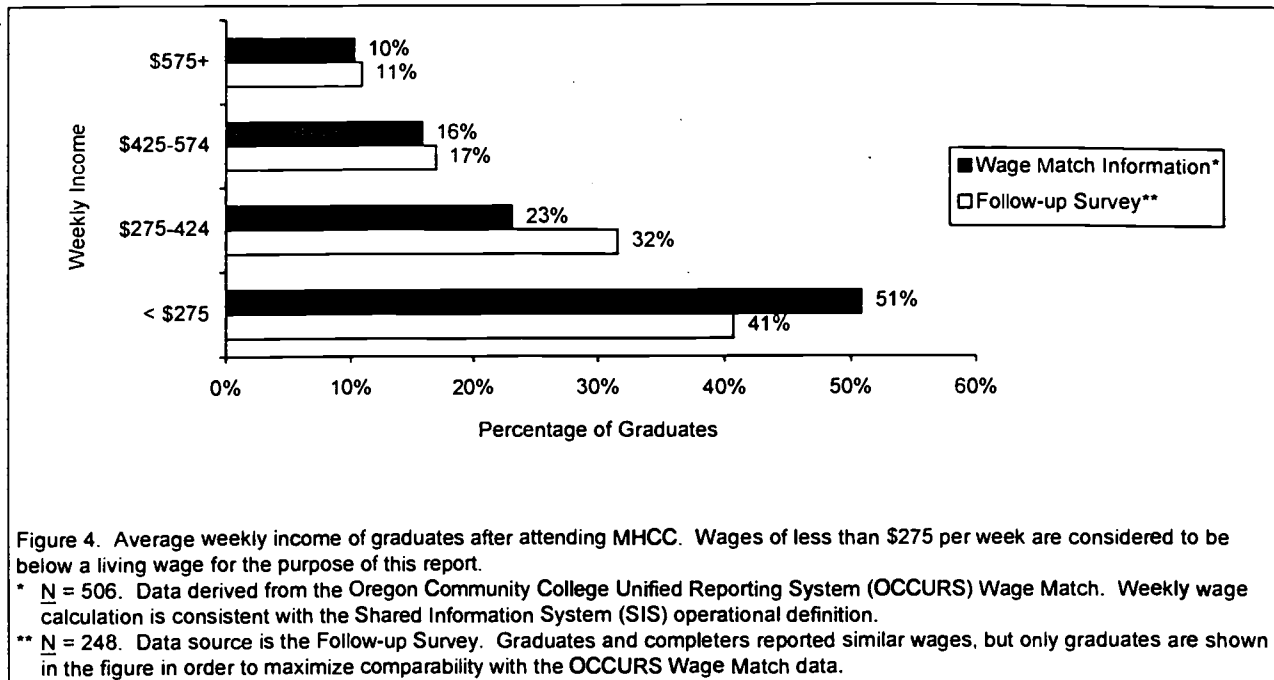

Figure 4. Average weekly income of graduates after attending MHCC. Wages of less than \$275 per week are considered to be below a living wage for the purpose of this report.
 * N = 506. Data derived from the Oregon Community College Unified Reporting System (OCCURS) Wage Match. Weekly wage calculation is consistent with the Shared Information System (SIS) operational definition.
 ** N = 248. Data source is the Follow-up Survey. Graduates and completers reported similar wages, but only graduates are shown in the figure in order to maximize comparability with the OCCURS Wage Match data.

Self-reported income (the method used in the Follow-up Survey) is more vulnerable to inflation than third-party reported income (the method used in the Wage Match) and this is consistent with the results from the two sources. (Appendix B compares wage information from the Wage Match and Follow-up Survey by major.)

The income information reported above does not take into account whether the wages are based on part-time or full-time employment. In fact, it is impossible to distinguish between full- and part-time employment with the Wage Match data. Using the Follow-up Survey data, it is apparent from Figure 5 that the pattern of graduates earning less than a living wage reverses for part-time employed graduates.

Figure 5. Average weekly income of part- and full-time employed graduates. Data source is the Follow-up Survey. N = 248. Wages of less than \$275 per week are considered to be below a living wage for the purpose of this report.

One would expect that part-time workers would earn less on average than full-time workers—the implication is that weekly wage results could be artificially attenuated by combining part-time and full-time wage information. If it were possible to control for number of hours worked per week, the results would most likely reveal higher average wages per hour than the present average wages per week indicate.

Educational Status

At the time of the Follow-up Survey, 42% of the former MHCC students were attending school full- or part-time (see Figure 6).

The large majority (93%) were attending schools in Oregon (see Figure 7), over half (53%) of whom were continuing to take classes at MHCC and other community colleges in Oregon.

Most respondents (77%) said that their current program of study was related to their program major at MHCC. Many graduates/completers (62%) had attempted to transfer MHCC credits to the schools they were currently attending. For the most part, they found it somewhat or very easy to transfer their credit hours (see Figure 8).

The data from the Transfer Study indicate that 90% of MHCC former students admitted to OSSHE in Fall 1994 had a GPA of 2.0 or greater at OSSHE institutions through Spring 1995. For those admitted prior to Fall 1994, 94% had a GPA of 2.0 or greater through Spring 1994. MHCC compares favorably with all of the Oregon community colleges. Statewide, 88% of former community college students admitted Fall 1994 had a 2.0 or greater cumulative GPA at the end of spring 1995, compared to 86% the prior year. This indicates progress on the statewide performance measure "satisfactory progress of community college students at OSSHE institutions." In addition, the performance of community college transfer students compares favorably with the performance of OSSHE "native" students. Former MHCC students do best at PSU while experiencing the most difficulty at the University of Oregon (in terms of the 2.0 or greater GPA standard). The pattern for all community college students is similar but not as pronounced.

The more credits that MHCC students transfer the better their academic performance. Again, the pattern for all community college students is not as pronounced as for MHCC students. Transferring with the AAOT is a strong predictor of successful academic performance, both for MHCC and all community college students.

Not surprisingly, analysis of cumulative credits earned at OSSHE institutions also reveals that the greater the number of hours earned the better the academic performance. These results reflect the commonly found phenomenon that the first term after transfer is the most difficult.

Satisfaction with Experience at MHCC

Graduates and completers responding to the Follow-up Survey rated the overall performance of MHCC in providing instructional and support services as good to excellent. Required courses for the major received the highest quality rating. In terms of preparation for employment or further education, respondents felt particularly well-prepared in technical knowledge (see Table 2).

Table 2

Ratings of MHCC⁹

	N	Rating ¹⁰	
		M	SD
Instructional and Support Services			
Overall Performance	552	4.11	.78
Required Courses for Major	530	4.10	.88
Instructor Advising	529	4.05	1.03
Electives	511	3.98	.79
Career Counseling	429	3.56	1.12
Job Placement	321	3.32	1.23

(table continues)

⁹ Data source is the Follow-up Survey. Graduates and completers were similar in their ratings, therefore only the aggregate results appear in the table.

¹⁰ Services and preparation rated on a scale of 1 Poor, 2 Below Average, 3 Average, 4 Good, and 5 Excellent.

Table 2 (cont'd)

Ratings of MHCC

	N	Rating	
		M	SD
Preparation for Employment or Further Education			
Technical Knowledge	482	4.15	.80
Speaking/Communication Skills	507	4.13	.78
Writing Skills	527	4.12	.80
"Hands on" Job Skills	452	4.07	1.07
Mathematical Skills	493	4.06	.81
Reading Skills	475	4.06	.79

One aspect of MHCC that many respondents liked best was the quality of instruction, however, this was also an aspect that they liked least. They suggested that better "hands-on" or internship experiences, offering more classes and more variety, and better advising and counseling would be improvements to MHCC (see Appendix D).

Similar to the Follow-up Survey findings, graduates responding to the ACT College Outcome Survey rated MHCC in general and the quality of instruction they received as satisfactory to very satisfactory. Other aspects of MHCC with which students were highly satisfied were faculty respect for students, non-traditional student services, and quality of their programs of study. Students were least satisfied with AIDS education, financial aid, and services for victims of crime and harassment, although the average ratings for these items were still in the range of neutral to satisfactory. (See Appendix E.)

Additional findings include that recent graduates felt their college experiences greatly contributed to their intellectual growth and preparation for a career and future study (see Appendix F). They indicated that the college had made the largest contribution to their general education, intellectual curiosity and academic competency (see Appendix G). They rated career knowledge, competence in major, and thinking and reasoning as the three most important outcomes of college and these were also the outcomes on which they reported making the most progress at MHCC. (See Appendixes H & I.) Graduates agreed most strongly that they were proud of their accomplishments, had met their goals, and would recommend MHCC to others (see Appendix J).

Employer Satisfaction with Former MHCC Students

Another component of the Follow-up Survey was contacting employers (N = 77) of graduates and completers (who gave permission) to assess their satisfaction with the performance and preparation of former MHCC students. Overall, employers rated the performance of MHCC graduates/completers and the quality of their work as good to excellent. In particular, employers gave the highest performance rating to former MHCC students' work attitude (see Table 3).

BEST COPY AVAILABLE

Table 3

Employer Ratings of Former MHCC Students¹¹

	Rating ¹²	
	M	SD
Overall Rating	4.52	.58
Overall Quality of Work	4.44	.66
Work Attitude	4.56	.66
Reading Skills	4.38	.55
Speaking/Communication Skills	4.31	.71
Technical Knowledge	4.26	.65
Writing Skills	4.23	.68
Mathematical Skills	4.20	.66

Employers also compared the preparation of MHCC graduates and completers to other employees. Nearly all employers reported that MHCC graduates and completers were equally or better prepared than other employees (see Figure 9).

Figure 9. Employer ratings of MHCC graduates/completers compared to other employees. Data source is the Follow-up Survey. N = 66.

Employers said that former students' knowledge in their field of study and their work ethic were two of the greatest strengths of the MHCC training. Weaknesses included a lack of clinical or "hands on" training and the employers suggested that MHCC could improve by providing more opportunities for students to receive such training (see Appendix K).

Note. Data derived from the Oregon Community Colleges Unified Reporting System (OCCURS) Wage Match and include only students who received a degree from Mt. Hood Community College (MHCC) between September 1994 and August 1995. Calculations are consistent with the Oregon Shared Information System (SIS) operational definitions. Employment information is reported by major only if there were data for three or more graduates. Summaries by division and other groupings include data not reported individually by major.

Note. The data is derived from the Oregon Community Colleges Unified Reporting System (OCCURS) Wage Match and from the Follow-up Survey. Wages of less than \$275 per week are considered to be below a living wage for the purpose of this report. Wage information is reported by major only if there were data for three or more graduates. Summaries and other groupings include data not reported individually by major.

Appendix D

Aspects of MHCC That Respondents Liked the Most and Least and Their Suggestions for Improvement

	n	%
Liked the Most (N = 491)		
Instruction	192	39
Clinical and "hands-on" experiences	42	9
Supportive and friendly environment	37	8
Specific classes (outside of program area)	33	7
Overall general education	29	6
Individual attention/small class size	20	4
Other students/friends	18	4
Good preparation for the working world	18	4
Convenient location	14	3
Specific program of study	13	3
Flexible scheduling	12	2
Inexpensive	8	2
Advisors/counselors	7	1
Variety of course offerings	7	1
Everything	6	1
Preparation for higher education	5	1
Able to get desired classes	4	1
Easy transfer of credits	4	1
Classroom equipment	4	1
Diversity on campus	3	1
Challenging	2	<1
Job placement	2	<1
Miscellaneous comments	11	2
Liked the Least (N = 330)		
Instruction	43	13
Counseling center and advisors	28	8
Specific class (outside program area)	24	7
Repetitious/boring unnecessary classes	23	7
Amount of study time required/program too stressful	21	6
Lack of classes available	21	6
Special class required	17	5
Too far to commute	13	4
Inadequate parking	13	4
Long/inflexible program requirements	12	4
Registration process	10	3
Class size too large	9	3
Not taught practical skills	7	2
Poor administration	7	2

Appendix D (cont'd)

Aspects of MHCC That Follow-up Survey Respondents Liked the Most and Least and Their Suggestions for Improvement

	n	%
(Liked the Least)		
Lack of job placement	6	2
Tests	6	2
Library	6	2
Other students	6	2
Ideological agendas/politics/program philosophy	5	2
Expensive—tuition/books	5	2
Too easy	4	1
Lack clinical/internship training	4	1
Night classes	3	<1
Credits non-transferable	3	<1
Department head/program director	3	<1
Lack of structure/disorganization	3	<1
Lack of high-quality equipment	3	<1
Curriculum is behind the times	3	<1
Miscellaneous comments	22	7
Suggestions (N = 252)		
Improve "hands-on" and internship experiences	29	12
Offer a greater number and variety of classes	26	10
Improve advising and counseling	25	10
Improve instructors/use teacher evaluations	19	8
Improve and update content of courses	18	7
Offer courses more frequently/all year round	13	5
Improve equipment/materials	13	5
Make classes more transferable	10	4
Change scheduling so that more night classes are available	10	4
Eliminate or combine unnecessary courses	6	2
Require a specific class	5	1
Increase staff	5	1
Decrease class size	4	1
Improve registration process	4	1
Better preparation for the workplace	3	1
Change schedule	3	1
More caring administration	3	1
Accommodate more students/increase space where students work	3	1
Increase office hours/opportunities for personal interaction	3	1
Miscellaneous comments	52	21

Strengths and Weaknesses of MHCC and Employers' Suggestions for Improvements

	n	%
Strengths (N = 53)		
Knowledge in the field	14	26
Work attitude/work ethic	12	23
Hands on/clinical experiences	8	15
Academic program/academic skills	8	15
Preparation for the job	4	8
Communication/interpersonal skills	2	4
Miscellaneous	5	9
Weaknesses (N = 30)		
Lack of clinical/"hands on" training	10	33
Lack of writing skills	4	13
Lack of knowledge/skills related to field	4	13
Lack of administrative skills	3	10
Lack of oral skills	2	7
Too much paperwork to transition from student to employee	2	7
Miscellaneous	5	17
Suggestions (N = 40)		
Provide more clinical/"hands on" experiences	18	45
Continue moving the college in a positive direction	6	15
Provide more training related to field of study	4	10
Teach more basic skills	3	8
Teach time management skills	2	5
Miscellaneous	7	18

REPRODUCTION RELEASE

(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title: Student Outcomes at Mt Hood Community College: Assessment Efforts 1994-1996	
Author(s): Juliette M Stoering	
Corporate Source: Research and Planning Mt Hood Community College	Publication Date: October 1996

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following two options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

The sample sticker shown below will be affixed to all Level 2 documents

Check here
For Level 1 Release:
Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical) and paper copy.

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 1

Check here
For Level 2 Release:
Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical), but *not* in paper copy.

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN OTHER THAN PAPER COPY HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)
