ABSTRACT

This set of quality standards for Colorado's early child care and education programs, developed over a 4-year period, is intended to help these programs move toward quality services for all young children. Programs using the standards and checklists will provide feedback to the Colorado Department of Education, and the standards will be updated accordingly. The standards document includes self-evaluation checklists designed to help programs document the state standards they have achieved, the standards they are seeking to meet, and the resources needed to meet the standards in the following areas: (1) interaction among staff and children; (2) curriculum; (3) family-staff partnership (4) staff qualifications and development; (5) administration; (6) staffing patterns; (7) the role and function of the teaching team; (8) physical environment; (9) health and safety; (10) nutrition and food service; and (11) evaluation. The goals and rationale are outlined for each of the 11 areas. Appendices contain Colorado's Comprehensive Training Plan for Early Childhood Care and Education, Professional Standards Development, Early Childhood Career Lattice, Resources, and Definitions. (KDFB)

Acknowledgements

This document is based on the National Association for the Education of Young Children's (NAEYC) Developmentally Appropriate Practice, Birth-8 and Accreditation Criteria and Procedures of the National Academy of Early Childhood Programs.

In an effort to incorporate their best practices, we also consulted with:

- *Guiding Principles and Best Practices: What to Look for in a Developmentally Appropriate Classroom*, Oregon Department of Education
- *Working for Student Success: A Self-study Document for Kindergarten through Third Grade*, Cherry Creek Schools, Denver, Colorado
- *Early Childhood Standards of Quality for Pre-Kindergarten through Second Grade*, Michigan Department of Education
- *A Curriculum for All Young Children: The EC--SPEED Curriculum Guide*, Ohio Department of Education
- *Head Start Performance Standards*
- Child Care Credential
- *Association Montessori Internationale*
- American Montessori Society.

The material has been edited, adapted, and expanded to address the values and priorities of Colorado's young children and families. We gratefully acknowledge NAEYC's encouragement in the development of these standards. This process resulted in enhancements in several areas, including:

- Family-centered services
- Community collaboration with children
- Diversity
- Transition
- Roles and function of teaching team
- Extension of standards through age eight.

The Colorado Department of Education would like to acknowledge Susan M. Thornton for her hard work in writing and editing the original Quality Standards for Early Childhood Care and Education Services document.

Colorado Quality Standards for Early Childhood Care and Education Services

INTRODUCTION

Colorado Quality Standards for Early Childhood Care and Education Services reflects the values of parents, educators, administrators, and policy-makers across the state who are striving for the best possible education and care for our young children. Considerable input has been obtained in writing this document, and additional input has been sought during a "field-test" period from 1992-1994.

This is a working document that will guide early childhood care and education programs in their movement toward quality services for all young children. It will be revised and improved based on feedback from families and others working with young children.

Development Process

The *Quality Standards* were developed during a process that spanned more than four years.

During 1990 representatives working with several preschool programs within the Colorado Department of Education (CDE) met together to discuss early childhood program collaboration. These programs included Title 1 (has been funding preschool services in Colorado since 1965), the Colorado Preschool Program (first established by the Colorado state legislature in 1988), Special Education (has had federal funding for preschool services since 1976), and Migrant Education. Discussions led to the development of the *Position Paper for Collaborative Preschool Services* which was adopted by the State Board of Education on August 8, 1991, and which reflects the Department's commitment to establishing consistent expectations and quality across all early childhood programs.

In January of 1991, the Colorado General Assembly mandated that school districts provide special education services for all eligible three- and four-year olds. Responding to that mandate, CDE organized a two-day, working retreat in July of that year. It brought together people from a wide range of perspectives to brainstorm and identify what "best practices" should be for preschool special education

programs. The retreat included parents, private providers, and directors of special education. Representatives were also present from the Colorado Department of Health, the Colorado Department of Social Services (CDSS), the Colorado Department of Institutions, and Head Start. There were representatives of Title 1 Programs, the Colorado Preschool Program, Special Education, and the Migrant Education Program.

The Colorado State Board of Education *Position Statement*, adopted in August of 1991, guides CDE's continuing initiative for collaborative early childhood services. This statement was one of the important foundations on which the *Quality Standards* were built. It recognizes the crucial importance of partnerships between early childhood programs and families, supports a quality learning environment for the total child, and encourages the effective and efficient use of public and private resources to meet children's needs.

The statement's emphasis on collaboration led CDE to form an Early Childhood Leadership Team made up of representatives from all of the early childhood programs within the Department. This team now includes persons from the Colorado Preschool Program, Even Start, Title 1, Special Education, Migrant Education, Head Start-State Collaboration Project and the Child Care and Development Block Grant, as well as a representative from the Office Of Child Care Services in the Department Of Human Services.

In 1992, the state legislature reauthorized the Colorado Preschool Program and removed the "pilot" status from the Program. It included provisions to require that the program adopt nationally recognized standards and to insure that funded sites meet the licensure requirements of the Colorado Department of Social Services, now the Colorado Department of Human Services (CDHS). In addition, one of the goals of the Colorado 2000 initiative states that all children in Colorado begin school ready to learn, and that children receive early services that support this goal.

In response to these policy decisions, CDE and CDHS launched a collaborative initiative to ensure that all early childhood care and education programs funded by CDE meet a consistent set of standards.

The joint CDE/CDHS initiative states that all CDE-funded early childhood programs will:

- be licensed by CDHS
- meet criteria established in the *Colorado Quality Standards for Early Childhood Care and Education Services*
- be encouraged to become accredited by the National Association for the Education of Young Children (NAEYC) or other nationally recognized accrediting organizations.

The initiative further states that training, technical assistance, and financial incentives will be provided to local education agencies to help them meet these three objectives.

The timeline for action adopted by CDE and CDHS follows:

- During the 1992-93 school year, all funded sites will apply for licensing from CDHS.
- CDHS will review all applications and grant licenses by August 1, 1993.
- Programs using the draft *Quality Standards* will provide feedback to CDE during 1993-94.
- The *Quality Standards* will be revised based on this feedback and distributed in final form through Regional Training Workshops.
- By the year 2000, all school districts and community sites receiving CDE funding for early childhood services will meet the *Quality Standards*, and all sites that SO choose will have received nationally recognized accreditation.

In March of 1992, the Statewide Advisory Council on the Care and Education of Young Children was established, which included parents, advocates, service providers and administrators working in early childhood programs across the state and state level policy makers. One of the first tasks of the Council was to review the *Quality Standards* document to ensure that the persons most directly affected by them were actively involved in their development.

A task force of this advisory council and the Leadership Team from CDE merged the "best practices" for early childhood special education programs and the highly respected standards developed by the National Association for the Education of Young Children (NAEYC). The standards committee also incorporated concepts from other recognized standards documents.

In September of 1992, a statewide teleconference was held that involved CDE and CDHS staff, the State Board of Education, the Office of the Governor and local service providers. A panel discussion about licensing requirements and the *Quality Standards* was held followed by a period of questions and answers via telephone linkages with the teleconference observation sites.

CDE and the Division of Child Care in CDHS will continue to work closely with the Governor's Early Childhood Professional Standards Committee as they work on a proposal for a system of early childhood professional development. The section of these standards that addresses staff qualifications and staff development reflects findings and recommendations of the Committee.

Use of the Quality Standards

The *Quality Standards* document is intended to be a planning tool to assist programs working toward quality services. It is a self-evaluation guide to help programs document those standards that they have achieved and those they are seeking to meet. This process will also provide information regarding training, technical assistance needs, and other resource needs. As part of CDE's review process programs will be expected to demonstrate that they are using the document for program development and staff development planning.

The Need for Community Feedback

The best thoughts and ideas of many individuals and agencies have resulted in the *Quality Standards* document. As noted previously, this is a working document which will be updated regularly. It is essential that feedback be received from parents, service providers and administrators across the state if the document is to remain relevant and useful for all programs.

A Plea for Community Collaboration

The time is past when any program or agency can operate in isolation. Mounting social problems and lack of resources make it essential that the people of Colorado restructure programs to make them as productive as possible. In addition, it is becoming increasingly clear that for an early childhood care and education program to be effective, strong family and community involvement are essential.

Restructuring programs, however, may not be easy, for there is a long history of competition among providers. Sharon Lynn Kagan, writing in *The Care and Education of America's Young Children: Obstacles and Opportunities*, described the numerous separate children's programs that have been developed with little recognition of the whole. "It is akin to strengthening an umbrella by randomly adding spokes, but lacks the fabric of coordination," she says.

Kagan notes, however, that changes in both theoretic and practical paradigms have shifted, and these offer hope that the profession can move from well-intentioned piecemeal programs to high-quality, comprehensive services. New commitments to serve the whole child in the context of the family and the community, she writes, require that services and policies be integrated.

CDE, CDHS, and many others seeking to restructure Colorado's early childhood systems share Kagan's vision for programs that offer comprehensive services for all children no matter how those services are funded. In particular, CDE and CDHS have worked with parents, administrators, providers, and other state programs to develop these *Quality Standards*. The process has modeled the kind of collaborative, interagency and interdisciplinary effort we hope communities will undertake to make the best use of their local resources and talents. It is essential that everyone involved work together to achieve the best possible care and education for the families and young children of Colorado.

Table of Contents

A. Interaction among Staff and Children	Communication; diversity; encouragement of independence in all areas of development; positive approaches; atmosphere of group; problem solving; modeling of positive interaction.
B. Curriculum	Philosophy and goals; individualization; environment, schedule and activities; materials; positive self-concept; development of social skills; encouragement of thinking, reasoning, questioning and experimenting; problem solving; language development; physical development; creative expression; cultural diversity; choice of activities; transitions between activities.
C. Family/Staff Partnership	Information to parents; family-centered process; parents as partners; advisory council; ongoing communication between families and staff.
D. Staff Qualifications and Development	Quality of staff; staff development and training; teacher assistants; volunteers; orientation of new staff.
E. Administration	Program evaluation; policies and procedures for program operation; transportation; confidentiality; transitions for children entering and leaving the program; community and interagency participation.
F. Staffing Patterns	Group size and composition; adult/child ratios; continuity of adults.
G. The Role and Function of the Teaching Team	Provision of materials; curriculum development; opportunities for social interaction with adults and other children; communication with children and families; developmental observation and assessment.
H. Physical Environment	Indoor and outdoor space; variety of appropriate materials and equipment; individual space and private areas.
I. Health and Safety	Commitment to prevention; record-keeping; policies; medications; suspected incidents of child abuse; medical emergencies; maintenance and cleaning of physical environment.
J. Nutrition and Food Service	Meal and snack planning; mealtime atmosphere; food preparation.
K. Evaluation	Program evaluation; involvement of staff; involvement of families; individual descriptions of children's development; use of evaluation information.
L. Appendices	Colorado's Comprehensive Training Plan for Early Childhood Care and Education; Professional Standards Development; Early Childhood Career Lattice; Resources; Definitions.

A. Interaction among Staff and Children

Interactions among Staff and Children

GOAL: Interactions between children and staff provide opportunities for children to develop an understanding of self and others and are characterized by warmth, personal respect, individuality, positive support, and responsiveness. Staff facilitate interactions among children to provide opportunities for development of self-esteem, social competence, and intellectual growth.

RATIONALE: All areas of young children's development -- social, emotional, cognitive, and physical -- are integrated. Optimal development in all areas derives from positive, supportive, individualized relationships with adults. Young children also develop socially, emotionally, and intellectually through peer interaction.

			Needs Improvement	Satisfactory

A-5.

Staff encourage independence in children through appropriate age and developmental choices.

- Staff encourage children to keep track of their own work and to acquire self-help skills.

For example:

- Infants: finger-feeding self.
- Toddlers: washing hands, selecting own materials.
- Threes and fours: dressing, picking up materials.
- Fives: setting table, cleaning, acquiring self-help skills.
- Primary students: performing responsible jobs, participating in community activities.

B. Curriculum

B.

GOAL: The curriculum encourages children to be actively involved in the learning process, to experience a variety of developmentally appropriate activities and materials, and to pursue their own interests in the context of life in the community and the world.

RATIONALE: The curriculum is not just the goals of the program and the planned activities but also the daily schedule, the availability and use of materials, transitions between activities, and the way in which routine tasks of living are implemented. Criteria for curriculum implementation reflect environment and concrete experiences that contribute to concept development.

B-6. The program uses media, such as television, films, and videotapes as follows:								
<input type="checkbox"/> Viewing is limited to developmentally appropriate programming that has been previewed by adults prior to use.								
<input type="checkbox"/> Another option for activity is always available.								
<input type="checkbox"/> No child is required to view the program.								
<input type="checkbox"/> Staff discuss what is viewed with children to develop critical viewing skills.								
<input type="checkbox"/> Media are used as special events, rather than as regular, daily routines.								

NOTES/COMMENTS

	EVALUATION			STATUS			NEED	
	Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource
B-7. Staff provide a variety of developmentally appropriate, hands-on activities for children to achieve the following goals: <i>(Rate each goal separately considering the examples related to the age group being observed.)</i>								
<input type="checkbox"/> Activities should extend the thinking of children beyond specific facts or closed-ended products.								
<input type="checkbox"/> Activities should be free of pre-made examples or models that inhibit the child's motivation to create products different than the displayed model.								

B-7. Continued

- Activities should be developed from a wide variety of materials/media so that children can demonstrate a unique approach.

EVALUATION		STATUS		NEED		NOTES/COMMENTS		
Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place		Tech Assist	Resource

B-7a. Staff foster positive self-concept in children.

For example:

Infants/younger toddlers

- Hold, pat, and touch babies for comfort and stimulation.
- Talk and sing to babies.
- Imitate each baby's actions and sounds.
- Play mirror games, label facial features and body parts.
- Allow infants to feed themselves when ready.
- Encourage and support each baby's developmental achievements such as pulling up self.

Older toddlers/preschoolers

- Allow time for children to talk about what they see, do, and like.
- Use children's names frequently in songs, games.
- Display children's work and photos of children.
- Encourage children to draw pictures, tell stories about self and family.

Primary students

- Provide opportunities to express growing independence/self-reliance such as the ability to make positive choices, initiate own activities.
- Allow opportunities to work or play alone.

EVALUATION		STATUS		NEED		NOTES/COMMENTS		
Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place		Tech Assist	Resource

B-7b. Staff help children develop social skills.

For example:

Infants/younger toddlers

- Hold, pat, and touch babies.
- Talk to, sing to, and play with each baby on a one-to-one basis.
- Respond to and expand on cues coming from child.
- Interpret younger toddlers' actions to other children to help them get along in the group (e.g., "Mary had it first").

Older toddlers/preschoolers

- Assist toddlers in social interaction.
- Create space and time for small groups of children to build blocks together or enjoy dramatic play.
- Provide opportunities for sharing, caring, and helping, such as making cards for a sick child or caring for pets.

Primary students

- Arrange planned and spontaneous activities in team sports, group games, interest clubs, board and card games.
- Allow time to sit and talk with peer or adult.

EVALUATION			STATUS			NEED		NOTES/COMMENTS
Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource	

B-7c. Staff encourage children to think, reason, question, and experiment.

For example:

Infants/younger toddlers

Provide a stimulating, safe environment in which infants and toddlers can explore and manipulate.

Provide pictures, mobiles, brightly colored objects for babies to look at, reach for, and grasp.

Play naming and hiding games such as peek-a-boo, pat-a-cake.

Provide rattles, squeak toys, and other noise-making objects for babies to hear.

Move or carry around non-crawling infants so they can see different things and people.

Utilize the outdoors as a learning environment, by taking daily walks and using language to comment on additions, changes, and the weather.

Older toddlers/preschoolers

Plan activities for labeling, classifying, sorting objects by shape, color, and size.

Discuss daily and weekly routines in terms of time concepts, and season of the year.

Observe natural events such as seeds growing and the life cycle of pets.

Create opportunities to use numbers and to count objects.

Take walks around building or neighborhood.

Plan trips that integrate new learning experiences for preschoolers.

Encourage water and sand play.

Primary students

Provide activities such as cooking, money-making projects, gardening, science experiments, trips within the community, interacting with visitors, multicultural experiences, and computer projects.

EVALUATION		STATUS		NEED			
Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource

B-7c. Continued

- Physical and cognitive interactions with the environment, materials, and other individuals provide children with opportunities to construct, modify, and integrate mathematical concepts.
- Through a balance of content and process, children are helped to learn ways of discovering what makes things happen, and are provided with a better understanding of the world, enhancing their sense of wonder and curiosity.
- Through concrete experiences that are meaningful to their lives, children develop a beginning awareness of themselves, others, and the world in which they live.
- Children solve problems on a daily basis in a classroom climate that encourages and supports problem-solving efforts.
- Mathematics and the scientific process are integrated into children's daily experiences (both planned and spontaneous) and into the ongoing activities of the classroom.

<input type="checkbox"/> Children's names are a focal point of daily print used in activities with older preschoolers and kindergarteners.								
<input type="checkbox"/> Oral language activities and playful language such as chants, poems, nursery rhymes, and songs are a regular part of the program.								
<input type="checkbox"/> Children share stories on a regular basis including repetition of old favorites and new material in small groups, at listening centers, with older children, and with adults.								
<input type="checkbox"/> Older children read on their own as well as being read to on a daily basis.								
<input type="checkbox"/> Skill work done in reading/writing is always related to the whole context of the children's writing or the story used.								
<input type="checkbox"/> Sample activities might include: language experience stories, taped stories, film/filmstrips, creative drama, picture stories, cooking activities, and flannel board activities.								

B-7d. Continued

- Children's names are a focal point of daily print used in activities with older preschoolers and kindergarteners.
- Oral language activities and playful language such as chants, poems, nursery rhymes, and songs are a regular part of the program.
- Children share stories on a regular basis including repetition of old favorites and new material in small groups, at listening centers, with older children, and with adults.
- Older children read on their own as well as being read to on a daily basis.
- Skill work done in reading/writing is always related to the whole context of the children's writing or the story used.
- Sample activities might include: language experience stories, taped stories, film/filmstrips, creative drama, picture stories, cooking activities, and flannel board activities.

B-7e. The program enhances children's physical development.

For example:

Infants/younger toddlers

- Provide open carpeted space for crawling.
- Provide low sturdy furniture for child to pull up self or hold on to while walking.
- Provide outdoor activities for infants.
- Provide objects for infants to reach for and grasp.
- Allow mobile infants to move about freely, play with and explore the environment.

Older toddlers/preschoolers

- Provide time and space for active play such as jumping, running, balancing, climbing, riding tricycles.
- Provide creative movement activity using obstacle course or activity songs and records.
- Provide fine-motor activities such as stacking rings, popbeads, pegboards, and puzzles for toddlers; include lacing cards and woodworking for preschoolers.

Primary students

- Provide opportunities for physical exercise and for the use of a variety of outdoor equipment.
- Encourage participation in group games, individual and team sports.
- Provide fine-motor activities such as sewing, weaving, pottery, woodworking.

	Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource
B-9a. Staff conduct smooth and unregimented transitions between activities.								
<input type="checkbox"/> A signal about impending transitions is provided for all children.								
<input type="checkbox"/> Children are kept cognitively and/or physically occupied while making transitions, e.g., singing songs, moving to music, fingerplays, role playing, classifying themselves by an observable characteristic (all children wearing purple).								
<input type="checkbox"/> Children are not always required to move as a group from one activity to another.								
<input type="checkbox"/> Staff provide materials and time for children to select their own activities during the day.								
<input type="checkbox"/> Staff acknowledge and support activities that children start or interests that children show.								
<input type="checkbox"/> Situations where all children must do the same thing at the same time are avoided.								
<input type="checkbox"/> Direct and specific statements are made to children about what occurs next.								
<input type="checkbox"/> Children are helped to learn and have fun during transitions.								
<input type="checkbox"/> To avoid waiting, the new activity is prepared before the transition from the completed activity.								
<input type="checkbox"/> Primary students help plan and participate in the change of activity.								
<input type="checkbox"/> Staff perceive transitions as organized, purposeful and motivating times to learn.								

NOTES/COMMENTS

EVALUATION			STATUS			NEED	
Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource

B-9b. Staff are flexible enough to change planned or routine activities.

For example:

Staff follow needs or interests of the children.
Staff adjust to changes in weather or other unexpected situations in a relaxed way without upsetting children.

NOTES/COMMENTS

EVALUATION			STATUS			NEED	
Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource

B-10. Routine tasks such as diapering, toileting, eating, dressing, and sleeping are handled in a relaxed and individual manner.

- Routine tasks are used as opportunities for pleasant conversation and playful interaction to bring about children's learning.
- Self-help skills are encouraged as children are ready.
- Routines are tailored to children's needs and rhythms as much as possible.
- Staff respectfully provide privacy in matters of personal hygiene and care.

For example:

Respect infants' individual sleeping schedules, provide alternatives for preschoolers who are early risers, respect primary students' increasing interest in personal grooming.

C. Family/Staff Partnership

GOAL: Families are well informed about the program and are welcomed as contributors as well as observers. Families and staff interact on an on-going basis to ensure a strong quality program.

RATIONALE: Young children are integrally connected to their families. Programs can best meet the needs of children when they also recognize the importance of the child's family and develop strategies to work effectively with families. All communication between programs and families should be based on the concept that parents are the principal influence in their children's lives.

D. Staff Qualifications and Development

Staff Qualifications and Development

GOAL: The program is staffed by adults who understand child development and who recognize and provide for children's needs.

RATIONALE: The quality of the staff is the most important determinant of quality in an early childhood program. Research has found that staff training in childhood development and/or early childhood education is related to positive outcomes for children such as increased social interaction with adults, development of pro-social behaviors, and improved language and cognitive development.

D-1.	EVALUATION			STATUS			NEED		NOTES/COMMENTS	
	Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource

	Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource	
An early childhood educator is employed to direct the educational program of children birth through eight. The qualifications of an early childhood educator are a baccalaureate degree in Early Childhood Education/Child Development and at least three years of full-time teaching experience with young children, and/or a graduate degree in ECE/CD. This individual may be the classroom teacher, early childhood coordinator, building principal, or center director.

E. Administration

GOAL: The program is efficiently and effectively administered with attention to the needs and desires of children, parents, and staff.

RATIONALE: The way in which a program is administered affects all the interactions within the program. Effective administration creates an environment that facilitates the provision of good quality care for children. Effective administration includes good communication among all involved persons, positive community relations, fiscal stability and accountability, and attention to the needs and working conditions of staff members.

E-1. At least annually, the administrator, staff, and parents identify the strengths and weaknesses of the program and set program goals for the year.

F. Staffing Patterns

165

166

GOAL: The program is sufficiently staffed to meet the needs of and promote the physical, social, emotional, and cognitive development of children.

RATIONALE: An important determinant of the quality of a program is the way in which it is staffed. Well-organized staffing patterns facilitate individualized services. Research strongly suggests that smaller group sizes and larger ratios of staff to children are related to such positive outcomes for children as increased interaction among staff and children, and less aggression and more cooperation among children.

F-1.	EVALUATION			STATUS			NEED		NOTES/COMMENTS
	Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resourced	
<p>The number of children in a group is limited to facilitate staff-child interaction and constructive activity among children. Groups of children may be age-determined or multi-age and include children with a variety of needs.</p> <p><input type="checkbox"/> For children ages birth - 2 1/2, the staff/child ratio is 1 : 3.</p> <p><input type="checkbox"/> For children ages 2 1/2 - 4, the staff/child ratio is 1 : 6.</p> <p><input type="checkbox"/> For children ages 4 - 6, there is a maximum of 15 children in a classroom with a ratio of one teacher and one other adult per class.</p> <p><input type="checkbox"/> For children ages 6 - 8, the staff/child ratio is 1 : 12.</p> <p><input type="checkbox"/> For programs serving multi-age groups of children ages 3 - 5, there is a maximum of three children with disabilities in the classroom. However, there may be fewer children with special needs depending upon the severity of the children's needs, the qualifications and experience of the staff, and the support services available.</p>

G. The Role and Function of the Teaching Team

G.

BEST COPY AVAILABLE

L75

The Role And Function Of The Teaching Team

GOAL: The teaching team facilitates the provision of learning activities for all children. The teaching team values the interactiveness of its members while working together towards a common goal. Activities are both pre-planned and responsive to the spontaneous initiatives of children. The teaching team accepts each child where she/he is; addresses individual needs in interactive, positive ways; and fosters self-esteem and social/emotional growth.

RATIONALE: Children gain knowledge when they are provided opportunities for meaningful interaction with people and materials, for engaging in active experimentation, for making "constructive errors," and for having repeated experiences and "real" problems to solve. Children learn through play and through social interaction with adults and other children. A well functioning team devotes time to its planning and development. Through active involvement as guides and facilitators, the teaching team supports the individual child's development and potential as the child moves from dependence to independence.

G-1. A dynamic teaching team includes all individuals who interact with the children on a regular basis. For example this team could include the teacher, teacher assistant, health care provider, and others.

H. Physical Environment

H.

GOAL: The indoor and outdoor physical environment fosters optimal growth and development through opportunities for exploration and learning.

RATIONALE: The physical environment affects the behavior and development of the people, both children and adults, who live and work in it. The quality of the physical space and materials provided affects the level of involvement of the children and the quality of interaction between adults and children. The amount, arrangement, and use of space, both indoors and outdoors, are to be evaluated regularly.

H-1.

The indoor and outdoor environments have appropriate amounts of space.

EVALUATION			STATUS			NOTES/COMMENTS		
Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource	

H-1a.

There is enough usable space indoors so children are not crowded.

EVALUATION			STATUS			NOTES/COMMENTS		
Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource	

H-1b.

There is enough usable space for outdoor play for each age group.

For example:

Age groups use different areas or are scheduled at different times.

I. Health and Safety

BEST COPY AVAILABLE

GOAL: The health and safety of children and adults are protected and enhanced.

RATIONALE: The provision of a safe and healthy environment is essential. No amount of good curriculum planning or positive adult-child interaction can compensate for an environment that is dangerous for children. Quality early childhood programs act to prevent illness and accidents, are prepared to deal with emergencies should they occur, and educate children concerning safe and healthy practices.

I-1. There is a written commitment to preventive, health-promoting practices in the program, and such practices are shared with or role-modeled for parents and children.	EVALUATION			STATUS			NEED		NOTES/COMMENTS
	Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource	

I-1a. The program presents valid certification that it is in compliance with all legal requirements for protection of the health and safety of children in group settings, such as sanitation, water quality, and fire protection. The program is licensed or accredited by the appropriate local/state agencies.	EVALUATION			STATUS			NEED		NOTES/COMMENTS

Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource

I-2. Each adult is free of physical and psychological conditions that might adversely affect children's health. Staff receive pre-employment physical examinations, tuberculosis tests, and evaluations for communicable diseases. Hiring practices include careful checking of personal references of all potential new employees. New staff members serve a probationary employment period during which the administrator or other qualified person makes a professional judgment as to their physical and psychological competence for working with children.

NOTES/COMMENTS

EVALUATION			STATUS			NEED	
Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource

I-3. A current, written record is maintained for each child, including the results of a complete health evaluation by an approved health care resource within six months prior to enrollment, record of immunization, a list of any current medications, emergency contact information, names of people authorized to call for the child, and pertinent health history (such as allergies or chronic conditions, and developmental issues). Children have received the necessary immunizations as recommended for their age group by the American Academy of Pediatrics or the Colorado Department Of Public Health And Environment.

I-4. The program has a written policy which limits the attendance of children and staff who are ill. Provision is made for the notification of parents, the comfort of ill children and staff, and the protection of well children.	EVALUATION			STATUS			NEED			NOTES/COMMENTS
	Needs Improvement	Satisfactory	Strength	Goal For The Year	Emerging	In Place	Tech Assist	Resource		

I-5. The program has a written policy which requires advanced parent/guardian authorization for any health and developmental evaluation of a child and for the provision of services.	EVALUATION			STATUS			NEED			NOTES/COMMENTS

GOAL: The nutritional needs of children and adults are met in a manner that promotes physical, social, emotional, and cognitive development.

RATIONALE: Children must be provided with adequate nutrition and also must be educated concerning good eating habits.

J-1. Meals and/or snacks are planned in proportion to the amount of time the child is in the program each day. They meet the child's nutritional requirements, as recommended by the Child Care and Adult Food Program of the United States Department of Agriculture. The amount and type of food served are adjusted according to the age of the children, since infants and toddlers require smaller amounts of food served more frequently, and primary students require much more food than preschoolers.

EVALUATION			STATUS			NEED		NOTES/COMMENTS

- parent choice.								
- lack of a telephone.								
- lack of adequate notice about opportunities for involvement.								
- need for extended day or wrap-around child care services.								
- lack of transportation.								

L. Appendices

Appendix I

COLORADO'S COMPREHENSIVE TRAINING PLAN FOR EARLY CHILDHOOD CARE AND EDUCATION

This training plan is based on a vision of comprehensive, accessible, quality services and supports for all young children and families. This vision relies on an assumption of the interrelatedness and commonalities of all good early childhood practices.

Basic assumptions:

1. All programs are licensed by the Department of Human Services.
2. The training needs assessment is based on *Colorado Quality Standards for Early Childhood Care and Education Services*.
3. All services will be developmentally appropriate.
4. Families will be full partners in the development of services.

This plan is designed to address the ongoing learning and information sharing needs of all families, early childhood care and education providers, and communities. It is important to utilize all our resources, human and financial, by working together and learning from each other through a collaborative training effort.

Components of the training plan include:

- interagency partnership
- blended funding
- collaborative community system/learning cluster, based on a community needs assessment
- development of a community application and training plan
- family - provider partnership
- equal access for all families and providers
- coordination with existing training systems
- statewide training events
- master training calendar
- resource menu
- individual technical assistance.

Appendix II

PROFESSIONAL STANDARDS DEVELOPMENT

Colorado's system of early care and education is described by many as a "non-system" . . . programs are delivered in a wide variety of settings. These programs are delivered by public schools, Head Start, private for-profit and nonprofit providers in child care centers, family child care homes, community centers and other facilities.

While this "non-system" has certain advantages (e.g., parental choice and a variety of service delivery models), it lacks most of the desirable components of a managed system. It has sporadic training and no formal career ladder for staff. It has no integrated strategic planning and development process and consequently cannot keep pace with changes in the field.

In November 1990, Governor Roy Romer, through First Impressions, convened a meeting with early childhood care and education professionals to discuss training standards. Included were representatives from Head Start, the Colorado Department of Education, the Colorado Department of Human Services, community colleges, four-year colleges and universities and early childhood professional associations.

A Professional Standards Conference was held in April 1991. Working groups recommended that Governor Romer establish a task force comprised of policymakers, legislators, business leaders and professionals to begin planning a career development system in early childhood care and education and to review what is happening in other states and on a national level. Governor Romer appointed members to the Early Childhood Professional Standards Task Force in December 1991.

The task force has developed recommendations and action steps to create a career development system for early childhood educators. This model addresses core knowledge, seamless articulation, standardization of training, bridging of non-credit and credited training and incentives.

Governor Romer established the task force as an advisory committee working under the First Impressions Advisory Council. The Governor has charged the Professional Standards Committee to work on implementation of its recommendations with his cabinet members from the Departments of Education, Human Services, Public Health and Environment, and Higher Education.

Present Efforts and Accomplishments

Core Knowledge

The Professional Standards Committee has identified eight areas of core knowledge. They are consistent with the National Association for the Education of Young Children (NAEYC) Professional Development Institute's model. The eight areas are:

1. Child Growth and Development
2. Healthy Safe Environment
Medical well-being
Nutrition
Creating a safe, healthy environment
Child protection
3. Developmentally Appropriate Practices
4. Guidance
5. Family Relationships
6. Cultural and Individual Diversity
7. Professionalism
8. Observation and Recording.

Articulation of Training

In July 1993 a collaborative effort of the Governor's office, the Colorado Department of Education, the Colorado Department of Human Services, the Colorado Community College and Occupational Education System and the North Central Early Childhood Tech/Prep Consortium began the development of a statewide seamless articulation system.

It is the intent of this project to build on and extend statewide the existing efforts to develop a seamless, skills enhanced, academically integrated educational program progressing from the 11th grade through associate degree and eventually to the baccalaureate and graduate level.

One outcome of this project is the establishment of competency based indicators of the different levels of core knowledge for each of the eight areas. These indicators form the basis of the articulation model.

Approval of Non-Credit Training

A training clearinghouse work group has been meeting regularly to develop guidelines for the approval of non-credit training that supports the career development model, recognizes the importance of core knowledge and meets staffing requirements. The approval process will address content, materials and trainer qualifications. The competency based indicators (mentioned above) will be used in the approval process. Criteria for non-credit training approval will be developed by December 31, 1994.

Coordination of Training

The State Efforts in Early Childhood Management Team, comprised of managers from Colorado's health, education and human services system has developed a coordinated early childhood training plan and has responsibility for the use of training funds. (see *Appendix I.*)

Optional Professional Credentialing

The Professional Standards Committee is pulling together leadership from all the early childhood professional organizations to explore the development of an optional professional credentialing system for early childhood and school-age child care personnel. It was felt that Colorado needs a credentialing system that recognizes different levels of professionalism within our field. The committee felt that the credentialing system should be optional and that it be managed outside of state government. It was suggested that a consortium of professional organizations might develop and oversee the credentialing system. The first meeting of this credentialing work group will be in the fall, 1994.

Appendix IV

DEFINITIONS

Child-initiated Activities: Experiences where children have choices of activities at learning centers and where they get answers to their questions and construct knowledge by exploring, experimenting, manipulating, and problem solving without being directed by an adult to find one correct answer.

Collaboration: Involves people from different agencies joining together to work toward a common goal. The result is a highly shared endeavor with members eventually committing themselves as much to the common goal as to the interests of participating agencies. Agency autonomy is therefore limited, and the effort involves high contact (including high conflict) and is usually quite conspicuous to the outside world. An example would be the decision to build and jointly operate a community center that houses school, recreational, and social service components.

Community Collaboration: Active participation by the larger community is critical to the maximum success of the early childhood program. An organized group of persons, usually an advisory council, which is representative of the home, school, and community should be formed. This council serves as a communication link and provides direction in planning, developing, implementing, and reviewing the early childhood education program. In addition, representatives of the community will be invited to participate in the early childhood program.

Developmentally Appropriate: Refers to offering content, materials, and methodologies, in a language that the child understands, that are commensurate with the child's level of development and for which the child is ready. This means concrete hands-on experiences in preparation for moving to symbolic levels (letters, numbers, pictures).

Early Childhood Care and Education: Provision of purposeful experiences, public or private, aimed at guiding the physical, emotional, intellectual, and social development of young children, birth through eight years of age or through third grade.

Family: People related to each other in many ways: by blood, marriage, adoption, or legal guardianship. Family members include: biological parents (custodial and noncustodial); adoptive parents; foster parents; step-parents; grandparents and other relatives of significance to the child; all siblings (half, step, full). In addition, any individual who has extensive contact with the child and/or is a significant person in the child's life could be included.

Family Partnerships: Family members should be respected as equal partners in all phases of the early childhood program. Families are integrated into the early childhood program through opportunities to plan and participate in all states of program development and implementation. Supportive opportunities should be provided for family members to expand their knowledge of child development, increase parenting skills, extend children's learning at home, and utilize community resources.

Inclusion: Children with a wide range of abilities -- and sometimes disabilities -- learn from each other in early childhood settings. Where inclusion exists, all children are viewed as equal members of the learning community though some children may need additional supports for their participation.

Learning Centers: Areas in the classroom designated for interaction areas (drama, construction, tactile and art media) or curriculum areas (manipulatives for math and fine motor development, materials for language development and science exploration).

Part H: Refers to services for infants and toddlers with disabilities and their families.

Primary: Programs for children 5-8 years of age in Kindergarten, First, Second, and Third grades.

Staff: All persons who interact directly with children.

Standards: The *Colorado Quality Standards for Early Childhood Care and Education Services* were developed collaboratively with input from practitioners and policy makers throughout Colorado. They were designed to help ensure that early childhood programs will provide quality services to help children reach their developmental potential. It is the intent of the authors to provide these standards as a resource and self-assessment guide for practitioners. We hope that the user-friendly format promotes their use to assess, evaluate, and improve existing early childhood programs. The *Colorado Quality Standards for Early Childhood Care and Education Services* should not be confused with content standards as required by Colorado HB 93-1313 or with content or performance standards required by federal initiatives.
