ABSTRACT

The Utah KIDS COUNT program provides information about child well-being to enhance discussions on securing better futures for children. Indicators of children's quality of life are chosen to reflect a range of influences on children, conditions across developmental stages, and comparisons across time. Ten indicators examined included: (1) low birth-weight babies; (2) infant mortality; (3) child death; (4) births to single teens; (5) juvenile violent crime arrests; (6) graduation from high school; (7) teens not in school and not employed; (8) teen violent deaths; (9) children in poverty; and (10) children in single-parent families. This indicator data is summarized in tables by county on a topical basis including: (1) "1993 Utah Families: Demographics and Economics" which addressed poverty, income, hunger, taxes, homelessness, and housing; (2) "1993 Child Protection" which examined abuse, neglect, foster care, adoption, and domestic violence; (3) "1992 Maternal and Child Health" which examined pregnancy, births, low birth weight, infant death, child death, WIC participation, health care access, family planning, disabilities, infectious disease, AIDS/HIV, and sexually transmitted diseases; (4) "1993 Juvenile Justice" which addressed juvenile court, gang activity, and youth corrections; and (5) "1993 Mental Health" which studied mental illness, hospital inpatient discharges, and substance abuse. UTAH KIDS COUNT

Utah KIDS COUNT is part of the national KIDS COUNT program funded by the Annie E. Casey Foundation in Baltimore, Maryland.

Providing policy-makers and citizens with information about child well-being, Utah KIDS COUNT seeks to enhance local, state and national discussions concerning ways to secure better futures for our children.

Utah KIDS COUNT joins national and state-by-state efforts to track the status of children in the United States.

Acknowledgments 28

Petroglyphs tell us much about ancient peoples. These symbols tell how they fed their families, planned ahead, and ordered their lives.

Their society was simple. Ours is increasingly complex, and frequently it is our children who bear the brunt of that complexity.

Now we use indicators or measures to tell a story about our society. They show us what we need to do to help create positive futures for children.

The following ten measures were developed by the national **KIDS COUNT** project. While they cannot capture the full range of circumstances that shape our children's lives, these indicators reflect three important attributes: 1) a range of conditions influencing children's well-being; 2) conditions across developmental stages; and 3) comparisons across time and place.

PERCENT LOW BIRTH-WEIGHT BABIES

A newborn baby weighing less than 2,500 grams (5.5 pounds), enters life with a high likelihood of problems later in childhood. Growth stages and abilities may be different - often difficult - challenging the child's physical, mental and social development. Increased numbers of low-birth weight babies may suggest a decrease in the overall health status or access to care of mothers.

Research shows that women who do not receive early prenatal care are more likely to give birth to a baby under 5.5 pounds. Mothers without health insurance are least likely to seek appropriate prenatal care. Among other serious effects, the lack of prenatal care can contribute to the number of pregnant women who jeopardize the health of their unborn child by smoking, using drugs, drinking alcohol, poor nutrition or inadequate diets.

While infant mortality due to low birth weight is declining it remains high among infants of color. Known risk factors such as lack of prenatal care account for a small number of these cases. For example, high rates persist when control variables such as the mother's educational level are studied.

INFANT MORTALITY RATE (birth to one year)

Nationally and in Utah, the infant mortality rate has been dropping. This encouraging process reflects new advances in neonatal medical care and improved public education about prenatal care and the effects of smoking and drinking.

While Utah shows excellent improvement in this indicator of child well-being, for some populations - especially poor families living in distressed neighborhoods - infant mortality rates are still quite high.

According to the 1990 Census, there are four distressed Utah neighborhoods: one in Salt Lake City and three in Ogden. Communities with high rates of poverty, unemployment, prison incarceration, and illiteracy, often endure higher infant mortality rates because it is difficult for parents to prevent illness and to access good medical care.

CHILD DEATH RATE

This indicator includes deaths from disease, homicide, suicide, and accidents of all kinds for children, birth to 19 years. The leading cause of death is motor vehicle related accidents. While it appears that these deaths are declining, motor vehicle/pedestrian deaths are on the rise. Despite improvements in hospital trauma care, auto safety, and accident prevention, too many children are still living at risk for death.

This measure signals that children need adults who speak up on their behalf for preventive approaches. Such preventions include parent education about child behavior from a developmental perspective; quality child care from mature and trained caretakers; consistently enforced seat-belt laws and speed limits; safe playgrounds and adequate supervision. Community-wide vigilance is necessary to ensure that all of our children are safe and secure at home, school and in public areas.

PERCENT OF ALL BIRTHS TO SINGLE TEENS

The increasing percentage of births to single teens worries health educators, parents, teachers, and government agencies. It not only reflects a growing number of babies who will have to overcome many odds to succeed; it also reveals that many teens believe their choices in adulthood are limited.

Increases in births to adolescent mothers - married or unmarried - are troubling for several reasons. Marital status at time of birth will not protect a teen mother or her child(ren) from poverty. Marriages between young partners tend to be less stable than those begun later in life, when the partners are more mature. Also, the earlier a young woman gives birth, the greater the likelihood she won't finish high school or go on to college.

Parents who don't complete their education have increased difficulty in today's labor market. If a teen mother with minimal education is married and later divorced, her earning power is lessened. Even among families with more education, households with only one adult employed usually have lower incomes and fewer resources for supporting the many costs of raising children.

JUVENILE VIOLENT CRIME ARREST RATE

Utah dropped from 26th in the national ranking to 31st in one year. This rate reflects the number of youths between the ages of 10 and 17 years who have been arrested for homicide, forcible rape, robbery or aggravated assault.

For a young person, being arrested for a violent crime is clearly a negative outcome. Adolescents arrested for committing a violent crime have usually been on a problematic path for some time; their chances for smooth transitions to productive adulthood are jeopardized.

It is important to remember that while the rate of change shows an increase, most of our adolescents are not in this category. It is also possible that changes in the arrest rates reflect changes in police surveillance, or in public policy, rather than a surge in violent behavior among teens.

PERCENT GRADUATING FROM HIGH SCHOOL

Utahns have been living in a relatively robust economy for more than ten years, an economy increasingly based upon educational attainment rather than physical labor. Graduation rate is an important indicator of how well youth are progressing in preparation for the future. There are striking differences in earning power between those who graduate from high school and those who do not.

Without a high school diploma most young adults do not go on to college, technical training, or to employment that will lead to sustainable incomes. Unemployment is much higher among those who do not finish high school. Unemployment can also contribute to mental and physical depression.

Economic security for young adults, and the families they will form, depends upon gaining employable skills fine-tuned for a technological society. This indicator has shown unsteadiness over the past six years in the rate of Utah's teens staying in high school through graduation, rising and falling several times. This past year Utah slipped from 10th highest in the nation to 19th.

The economic gap between those with a high school diploma and those who drop out will likely grow even wider. As Utah moves into the twenty-first century, parents, schools, and communities are challenged to provide education programs which provide advanced skills and technological knowledge required for meaningful employment.

PERCENT TEENS NOT IN SCHOOL AND NOT IN THE LABOR FORCE

This indicator requires some interpretation and adaptation. Clearly, youth who have dropped out of school and are not in the labor force are vulnerable. Work experience at this point in their life is especially critical. People who spend a large share of their young adult years unemployed have a hard time finding work and staying employed later in life.

Utah demographics reveal a 30.4% increase in the teen population during the last decade. We need more information about those who are out of school and out of work.

TEEN VIOLENT DEATH RATE

This indicator reflects injury-related deaths among youth age 15 to 19 years. Trends in this rate are difficult to track - the numbers vary widely up or down from year to year. It appears that suicides and homicides are increasing while motor vehicle deaths are decreasing. Young men are particularly vulnerable. For 1992, they constitute almost 75% of violent death victims.

PERCENT CHILDREN IN POVERTY

Poverty affects children's physical and emotional health, self-esteem, nutrition, intelligence, and likelihood of completing school. Family poverty seriously impacts child development in many ways. Despite Utah's economic boom, child poverty has been gradually increasing.

This has to do with many factors: incomes not keeping up with housing costs; rising numbers of families where both parents have to work to make ends meet; an increase in households headed by single parents, either by divorce or choice. Of particular concern are the numbers of pre-schoolers now living in poverty. Poverty will decrease their own capacities for success in school and in life as they mature. According to the United States Census Bureau, a quarter of all children under age 6 are living in poverty.

PERCENT CHILDREN IN SINGLE-PARENT FAMILIES

According to Census data, over the last ten years the percentage of children in single-parent families has risen steadily in every state in the nation. Children in these families usually do not enjoy the same economic, housing or human resources available to children in a two parent household.

Furthermore, poverty among single-parent families is not erased by public assistance programs for poor children such as Aid to Families with Dependent Children (AFDC). In addition, many Utah families do not receive full child support payments.

In 1993, Utah's combination of AFDC and Food Stamps is only 67.4% of the poverty line. This barely pays the rent for most two bedroom apartments in Salt Lake City. Many families are forced to double-up or move in with other relatives, placing children at greater risk through overcrowded housing in communities which cannot support their physical, educational, or emotional needs.

NOTES

- Indicator data is noted by county on the appropriate topic page.
- Utah KIDS COUNT is developing additional indicators for Utah's children. Those indicators will be reflected in *Key Facts 1995*.
- Watch for Utah KIDS COUNT *Issue Briefs*. These publications will highlight Utah's families and children by specific issue, geographic area, or need.

MENTAL HEALTH

Department of Human Services, Division of Mental Health; unpublished data. Department of Human Services, Division of Substance Abuse; unpublished data. Department of Health, Bureau of Health Data Analysis, unpublished and provisional data from the 1993 Utah Hospital Inpatient Discharge Database.

Utah Children knows that some of the data may raise questions rather than provide answers. Data is limited to information provided by each agency. Persons seeking more detailed data may contact Utah Children or agencies noted as sources.

ADHD. Attention Deficit Hyperactivity Disorder.

AFDC. Aid to Families with Dependent Children.

AIDS. Acquired Immune Deficiency Syndrome.

ALOS. Average length of stay.

Calendar Year. A twelve month period ending December 31.

Career Ladder. A program which offers financial and career incentives for teachers to enhance their skills.

CHEC. Child Health Evaluation and Care - see EPSDT.

Chapter 1. Federally funded education program created by Part A, Chapter 1, Title 1 of the Elementary and Secondary Education Act (ESEA). Provides financial assistance to schools to meet the educational needs of low income or neglected children.

Child Foster Care. A temporary service for children who have been removed from their parent's home due to serious neglect, abuse, abandonment, or are otherwise dependent and in need of care. The State is given legal custody either through a voluntary agreement with the parents (for 90 days) or by a court order. This term may also refer to Basic Foster Care, a level of foster care in which foster parents provide parental supervision and care. The providers must be licensed and trained.

Children Group Homes. A group setting with a home-like atmosphere. This out-of-home placement is for children requiring twenty-four hour medical and/or supervised care from trained staff.

CY. See Calendar Year

Dependency. Credible evidence that through no parental/caretaker fault a child is without food, shelter, supervision, or health care.

Dependency Ratio. The number of pre-school children (age 0-4), school age children (age 5-17) and retired people (age > =65) per 100 working age adults (age 18-64).

DRG. Diagnostic Related Group.

Dropout. An individual in grades 7-12 who was enrolled in public school at some time during the previous school year; was not enrolled within five school days of the start of the current school year; has not graduated from high school or completed a state/district approved education program. The following are exclusions: transferred to another public school district, private school or state/district approved education program; temporary absence due to suspension or school approved illness; or death.

Dropout Rate. The percentage of school dropouts under age 22 eligible to be enrolled in grades seven through twelve.

Dysthemia. Mental distress.

Emergency Foster Care. An emergency short term placement of a child/youth in custody of the State while another placement is being arranged, generally because the youth has either left the foster home and will not be returning, or must be removed from the foster home and is awaiting replacement. Providers must be licensed and trained.

EPSDT. Early and Periodic Screening, Diagnosis, and Treatment.

Expenditures per student. Charges incurred, whether paid or unpaid, which are presumed to benefit the school current fiscal year. For elementary/secondary schools, these include all expenditures for current outlays plus capital outlays and interest on school debt.

Family. A group of two or more persons related by birth, marriage, or adoption who live together.

Family Support. The division of Services for People with Disabilities defines Family Support as support to enable a family to meet the challenges of have a children with a disability. Respite care provides parents with a temporary break. Assistive technology and equipment allow children to participate in all activities. Special training addresses the unique needs of the children or the family in order for them to live as much like other families as possible.

Fiscal Year. A twelve month accounting/budget cycle usually ending June 30 or for the Federal Government, September 30. Other government entities such as a city or county may have a different budget cycle.

FY. See Fiscal Year

FFY. Federal Fiscal year, ending September 30.

Group Home. A licensed facility which provides care and treatment for more than six children or youth, generally through purchase of a service contract.

HIV. Human Immune Deficiency Virus

Household. Includes all the persons who occupy a housing unit.

Independent Living. Services provided to 16-18 year old youth in custody of the State to prepare them for eventual self-sufficiency, and to help those not returning home to transition to living on their own when custody is terminated.

Juvenile. A person less than 18 years of age.

PID. Pelvic Inflammatory Disease.

Professional Parent. Out-of-home placement with a family which has specialized training to care for a disabled child. A professional parent provides the most home-like environment. Efforts are made to encourage and enable the natural parents to be reunited with their child.

Respite Care and Family Support. Respite care provides temporary relief or rest for parents dealing with the extra demands of a child with special medical, physical, emotional, or educational needs. Care may be provided by friends, relatives or respite care providers, in the individual's home, in the provider's home or in an approved facility. This care may be provided on an hourly basis up to 6 hours a day, or on a 24 hour basis. Ideally, respite care is provided by specially trained individuals who understand the needs of disabled individuals.

SED. Serious emotional disturbance is a functional definition that describes intense problems persisting over time, one year or longer, covering many life areas, such as family, school, peers, health, etc.

SPMI. Serious and persistent mental illness is a functional definition that describes a severe emotional and behavioral disorder in children causing life distress in several domains and requiring intensive mental health treatment.

SIDS. Sudden Infant Death Syndrome.

Shelter Care. An emergency placement provided in a licensed home for children in imminent danger from abuse, neglect, or parental absence. A court hearing is required if the placement is longer than 24 hours.

SPED. Single Parent Employment Demonstration Project.

Special Education Students. Children evaluated with the following impairments and needing special education and services: deaf/hard of hearing, deaf/blind, mentally retarded, multi-handicapped, orthopedically impaired, other health impaired, seriously emotionally disturbed (SED), specific learning disabled, speech and language impaired, visually impaired, and homebound or hospitalized.

STD. Sexually transmitted disease.

Title IV-A. Amendment to the Social Security Act providing states with funding for public assistance programs.

UAF. Utah Alcoholism Foundation, Salt Lake City.

Uninsured. Adults and children not covered by health insurance. Health insurance includes private insurance, Medicare, Medicaid or other insurance. Based on Department of the Treasury definition.

USDC. Utah State Developmental Center. A state operated facility which provides active intensive treatment and training to people with mental retardation. Children are now served in the community.

WIC. Women, Infants and Children food program.

Working Family. Families, including unrelated individuals, in which either the reference person or spouse is employed. Based on Department of the Treasury definition.

Make a Difference for Children

CHILDREN'S ACTION NETWORK

Utah Children has developed a list of individuals and organizations committed to making a difference for children. The computer-based network makes possible the following activities: linking persons concerned about similar issues; sharing information; and action alerts on pending policy or legislative issues.

The following organization:

- I provide direct services to children
- I work for government
- I am an elected official

A PLEDGE TO OUR CHILDREN

Utah Children has chosen this theme to unify and mobilize Utah child advocates. The Board of Trustees considered a number of approaches. A Bill of Rights was too legalistic. A dream...a vision...a promise were all too vague. We have chosen the word *pledge* because it implies commitment and looking to the future. We have selected words and phrases to cover the breadth of children's needs. We believe the pledge, with the endorsement of many individuals and groups, will provide a reference point for specific initiatives by Utah citizens in future years.

We pledge to ensure that our children:

- are loved and nurtured
- are nourished and sheltered from harm
- grow and flourish in safe places among those who care
- live free of exploitation, abuse and neglect
- receive health care and comfort
- are educated in mind and spirit and developed in body
- are prepared to assume responsibility and accept the consequences of their actions
- are prepared to assume productive roles in society

Finally we pledge to guard our children's liberty, rights and dignity.

Utah Children was founded in 1985 by individuals concerned about children whose parents are least able to nurture and provide for them. Our goal is to encourage preventive investment in children before they get sick, get into trouble, drop out of school or suffer family breakdown. Our work complements direct services for children by providing a bridge between community programs and state policy-making.

Utah Children seeks to: 1) improve and increase the effectiveness of the public systems charged with the protection of abused, neglected and foster children; 2) assure children have adequate nutrition, health care, child care and monetary support from their absent parents; and 3) assure that safe, quality child care is available to all children.

METHODS

Research - Issue identification and policy analysis
Education - Sharing factual information
Publications - Quarterly newsletter and topical papers
Legislative Reports - Reports and presentations
Speakers Bureau - Tailored presentations
Advocacy Consultation - Strategy development
Networking - Bridges for communities
Recognition - Annual outstanding service award

OPERATIONS

Utah Children's work is guided by a board of trustees representing a wide range of backgrounds and expertise. Staff is responsible for program activities. Volunteers assist with research, advocacy, mass mailings, and other activities. University interns are placed periodically at Utah Children. Ad hoc committees are convened as needed to study, consult and advise the board and staff on pertinent issues affecting families and children and to recommend actions and strategies for improving services to children and their families.

ACCOMPLISHMENTS

- ▶ A statewide organization speaking out for the interests of children
- ▶ Coordinate advocacy efforts for children
- ▶ Nine publications and three position papers
- ▶ *Rights, Responsibilities, Relationships*, children's rights handbook for Utah
- ▶ Statewide advocacy conference annually since 1990
- ▶ Utah KIDS COUNT grantee
- ▶ Improved outcomes for at-risk children
 - treatment of handicapped infants and toddlers
 - reforms in child welfare and foster care
 - more child welfare workers
 - expanded guardian ad litem program
 - establishment of office of child care
 - lower child/provider ratios in child care
 - increased training for child care providers
 - better collaboration among state agencies

Special thanks to Amy Reitsch, Coordinator for KIDS COUNT regional and statewide meetings. She is on the staff of the Coalition for Utah's Future/Project 2000. Amy's dedication, good listening skills and high energy have increased our understanding of what it takes to count kids and make kids count in Utah.

Editor's Note

As I complete the fifth edition of *Key Facts* I wish to express appreciation to Marvin Levy, Deputy Director, Department of Health, Bureau of Vital Records & Health Statistics. Mr. Levy is headed for new adventures in New Mexico.

Over the last five years, he has been instrumental in providing and interpreting data and exploring data sources. His guidance, wry humor, and knowledge of the best Chinese restaurants in Salt Lake will be missed.

REPRODUCTION RELEASE
(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title: 1994 Key Facts Measures of Child Well-Being 1996	
Author(s):	
Corporate Source:	Publication Date: Jan. 96 Jan. 96

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following two options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

The sample sticker shown below will be affixed to all Level 2 documents

Check here
For Level 1 Release:
Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical) and paper copy.

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

_____ *Sample* _____

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN OTHER THAN PAPER COPY HAS BEEN GRANTED BY

_____ *Sample* _____

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Check here
For Level 2 Release:
Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical), but *not* in paper copy.

Level 1

Level 2

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."
