#### **ABSTRACT**

This booklet presents basic information about the Further Education Funding Council, which was established in 1992 to ensure the sufficiency and adequacy of further education facilities throughout England. Discussed first are the council's main responsibilities: ensuring sufficient further education opportunities for young people and adults throughout England; ensuring that the needs of students with learning difficulties/disabilities are met; and making arrangements to assess the quality of further education funded by the council. Examined next are the council's activities in the following areas: funding further education; meeting the need for further education; assessing the quality of further education; and providing information about further education. Other topics discussed are as follows: the council's formal status and accountability; its relationship with further education colleges; its regional structure; its operation in advisory, developmental, and regulatory capacities; and its budget. Appended are lists of the following: council aims; the council's legal duties; institutions that the council may fund; courses that the council may fund; council funding arrangements; membership of the council; chairmen of the regional committees; management group and senior staff; council regional offices; and council publications. Also included is a council regional map. (MN)

# The Further Education Funding Council for England

The Further Education Funding Council (the Council) was set up under the Further and Higher Education Act 1992 (the Act) to ensure that there are sufficient and adequate further education facilities throughout England. It does so mainly by funding further education institutions. It allocates funds mainly to the further education and sixth form colleges which make up the English further education sector. It also funds universities and other institutions outside the sector which provide further education. The range and type of institutions and courses which the Council may fund are limited to those defined in the Act. These are set out on pages 10 to 12.

#### RESPONSIBILITIES

The Council has a number of specific legal duties. In summary, these are: to ensure that there are sufficient further education opportunities for young people and adults in every part of England; to ensure that the needs of students with learning difficulties and/or disabilities are met; and to make arrangements to assess the quality of further education funded by the Council.

#### WHAT THE COUNCIL DOES

#### **Funding Further Education**

- the Council advises the secretary of state for education on the financial needs of the further education sector in England
- it decides how recurrent and capital funds will be allocated to colleges and others
- it allocates and pays funds
- it monitors the use to which funds are put
- it monitors the financial health of individual colleges.

#### Meeting the Need for Further Education

 the Council advises the secretary of state for education on proposals to merge colleges, reorganise schools or make other changes in local provision which might affect further education opportunities

- it monitors the availability of further education opportunities by analysing college strategic plans
- it liaises with colleges, local education authorities, the Department for Education and Employment, training and enterprise councils and others to ensure that local needs are met
- it pays for the further education of individual students with learning difficulties or disabilities when it is advised by the student's local authority that their needs cannot be met by a local college.

#### Assessing the Quality of Further Education

- the Council employs its own inspectors and it inspects and reports publicly on each college every four years
- it reports on a national basis on specific curriculum areas and qualifications
- it advises on good practice based on inspection evidence
- it monitors implementation of the *Charter for Further Education*.

#### **Providing Information about Further Education**

- the Council gathers and publishes information about further education funding, student enrolments, staff numbers, the financial position of the further education sector and the quality of further education in England
- it has developed performance indicators for further education sector colleges and in due course will publish performance information about each of them.

#### ACCOUNTABILITY

The formal status of the Council is that of a non-departmental public body. Its members are appointed by the secretary of state for education and it is directly responsible to Parliament for the use of the public funds allocated to it. The members of the Council are listed on pages 23 and 24.

The Council's accounts are audited by the National Audit Office (NAO). The NAO also examines the efficiency with which the Council and colleges use their resources. An initial report by the NAO in 1995 on colleges' control of public funds in their first year as independent organisations found numerous examples of good practice. It also found that colleges were making good progress towards establishing secure financial control systems.<sup>1</sup>

The Council's relationship with the Department for Education and Employment and parliament is set out in a formal management statement which includes a financial memorandum. This is a public document available on request from the Council. It covers matters such as lines of accountability; financial controls; the form and publication of the Council's accounts; and the Council's financial relationship with colleges.

The Council intends that its work should be accountable and open to public scrutiny. It therefore consults widely on all important policy issues. It monitors colleges' effectiveness and publishes information on the sector's performance. It publishes its decisions and the reasons for them, and it has developed a robust financial framework which ensures that colleges are fully accountable for the public funds which they receive from the Council.

#### **Codes of Practice**

The Council has adopted published codes of practice covering its corporate responsibilities, the conduct of its members and senior staff, access to information and a complaints procedure. The code on the conduct of members provides for a public register of each member's interests.

#### RELATIONSHIP WITH COLLEGES

The Council's relationship with colleges in the further education sector is regulated by a further financial memorandum. Its terms reflect the memorandum between the Council and the Department for Education

<sup>&</sup>lt;sup>1</sup>Managing to be Independent: Management and Financial Control at Colleges in the Further Education Sector, NAO, 1995

and Employment. It sets out the purposes for which colleges may use the funds which they are allocated and the financial and audit framework under which they operate. Under the memorandum, college accounts and their student enrolment records are audited by external auditors; their audit arrangements are monitored by the Council, and they are required to publish their annual accounts.

As part of the arrangements for monitoring both the financial health of the sector and the availability of further education opportunities, the Council analyses each college's strategic plan and financial forecast. Council funds are allocated to support the strategic plan.

#### REGIONAL STRUCTURE

The Council is required by law to establish regional advisory committees. Members of its nine regional committees are appointed by the secretary of state. Their role is to review and advise the Council on the availability of further education within the regions. Each committee is supported in its work by a regional office. The regional offices are also an important point of contact between colleges and other local bodies with an interest in further education and the Council. The Council's nine regions are shown on page 31. Details of the offices are on pages 29 and 30.

#### HOW THE COUNCIL OPERATES

The Council implements its policies in three different ways, depending on the specific issue.

#### **Advisory**

 the Council decides that a specific policy is desirable; it informs colleges of its policy and each college is free to decide whether or not to pursue the policy.

#### Developmental

 the Council supports a preferred policy through the way it allocates funds, giving preference to funding applications which are consistent with the policy preference.

#### Regulatory

 the Council declares a policy and requires institutions to comply with it by attaching conditions to the use of funds.

The Council also adheres to the following principles:

- it has regard to any advice given to it by the secretary of state
- it respects the independence and diversity of colleges within the sector
- wherever possible, it consults those within the sector and others with an interest in further education
- it adopts working methods which are open and readily understood
- it seeks to ensure that the funds it allocates are used properly and efficiently
- it upholds the aims and objectives of the *Charter for Further Education*.

#### THE COUNCIL'S BUDGET

The Council receives funds on an annual basis from the Department for Education and Employment as part of the public expenditure settlement agreed by Parliament.

For 1995-96, the Council's revenue allocation was £2.8 billion. Its capital allocation was £159 million. Its own running costs were £24.2 million.

# Annexes

### The Council's Aims

#### The Council's aims are:

- to secure throughout England sufficient and adequate facilities for further education to meet the needs of students, including those with learning difficulties and/or disabilities, and the communities in which they live
- to contribute to the development of a highly-skilled and competitive workforce, particularly as envisaged in the national targets for education and training
- to promote access to further education for people who do not participate in education and training but who could benefit from it
- to promote improvements in the quality of further education
- to ensure that the achievements, contribution and potential of the sector and its financial needs are properly represented at national level
- to secure value for money for the funds employed by the Council.

# The Council's Legal Duties

The Council's principal legal duties under the *Further and Higher Education Act 1992* are:

 to secure the provision of sufficient full-time further education facilities suitable to the requirements of 16 to 18 year olds

- to secure adequate further education facilities for all other students, including part-time facilities for 16 to 18 year olds
- to have regard to the requirements of students with learning difficulties and/or disabilities
- to make the most effective use of resources and, in particular, to avoid disproportionate costs
- to ensure that the quality of further education is assessed.

The Council's duties extend only to England.

# Institutions Which the Council May Fund

The Council may fund only the following institutions:

- the further education and sixth form colleges included in the English further education sector under the *Further and Higher Education Act 1992*
- institutions outside the further education sector whose funding applications are sponsored under section 6(5) of the Act by one of the sector colleges
- higher education institutions.

The Council may also pay for individual students with learning difficulties or disabilities to attend specialist further education institutions if local colleges cannot meet their needs.

# Courses Which the Council May Fund

The Council may fund any further education provision for full-time students aged between 16 and 18, regardless of the course type. Otherwise, the type of course which the Council may fund is restricted to those set out in schedule 2 to the *Further and Higher Education Act* 1992. These course types are listed in table 1, with the criteria which the Council applies in assessing eligibility for funding.

Table 1. Course types and eligibility criteria

Type of course/objective		Criteria for eligibility for course funding by the Council		
a.	vocational qualification	approved by the secretary of state		
b. 	GCSE or GCE A/AS level	leads to an examination by one of the GCE/GCSE examining boards		
с.	ACCESS course preparing students for entry to a course of higher education	approved by the secretary of state		
d.	course which prepares students for entry to courses listed in (a) to (c)	i. primary course objective is progression to a vocational course GCSE, GCE A/AS level listed above in or an ACCESS course as outlined in (a) to (c) above, and		
		<ul><li>ii. course includes accreditation which makes the students eligible to progress to courses (a) or (c), or</li></ul>		
	·	iii. where the course does not include accreditation, evidence of progression to be provided to the Council		

Type of course/objective		Criteria for eligibility for course funding by the Council	
e.	basic literacy in English	provides students with basic literacy skills	
f.	teaching English to students where English is not the language spoken at home	improves the knowledge of English of those for whom English is not the language spoken at home	
g.	basic principles of mathematics		urse designed to teach the basic nciples of mathematics
h.	courses under this part of schedule 2 (courses for proficiency of literacy in Welsh) are the responsibility of the Further Education Funding Council for Wales		
i.	independent living and communication skills for those with learning difficulties which prepare for entry to courses (d) to (g)	i.	primary course objective is progression to a course which prepares students for entry to courses listed in sections (d) to (g) above
		ii.	course includes college accreditation which enables the student to progress to courses to (d) or (g)
		iii.	evidence of progression to courses (d) to (g) can be provided to the Council.

# The Council's Funding Arrangements

The Council allocates two types of funds: recurrent funds, which support college running costs, the largest element of which is teaching and support staff salaries; and capital funds, which assist colleges with the costs of capital equipment and the repair and construction of buildings.

#### THE BASIS FOR RECURRENT FUNDING

Through its recurrent funding methodology, the Council allocates £2.8 billion a year (1995-96 figures) to 452 further education and sixth form colleges, 48 universities and colleges of higher education, and over 350 other institutions which are not formally part of the further education sector.

Further education is extremely diverse. There are various categories of students: 16 to 18 year olds; adult students; students who attend full time; others who attend part time, some in connection with their work and others independently. A wide range of subjects is available at various levels leading to some 14,000 different qualifications.

The task for the Council has been to find a basis for its recurrent funding which would take account of this diversity and be seen to treat equitably the different sizes of colleges and types of courses.

The Council also aims to ensure that the funds it allocates are used effectively and efficiently by colleges, and it places particular emphasis on students' performance rather than simply their presence. To achieve this, the Council has introduced a radically different funding methodology for further education.

The methodology which is now used by the Council was developed after extensive consultation and was introduced from 1994-95. It replaces previous local authority funding arrangements which were based mainly on the numbers of full- and part-time students enrolled.

#### Aims

The recurrent funding methodology is designed to:

• ensure year-on-year financial and planning stability for each institution

reflect the inherent costs of different kinds of further education provision

- gradually reduce inherited disparities in funding levels at different colleges
- support government growth targets and cost-efficient expansion
- create incentives to encourage colleges to improve student retention and completion rates
- make colleges more responsive to the needs of students and employers.

#### COLLEGE RECURRENT ALLOCATIONS

Each college forwards its strategic plan to the Council annually. The plan sets out the college's objectives and how it proposes to achieve them. Objectives include any plans for growth or changes in the balance of the curriculum. Funds are allocated to support the plan as follows:

- all institutions funded by the Council automatically receive a
  percentage of their previous year's funding; this is called the
  'core' funding. At present the core is 90 per cent of the
  previous year's allocation. The size of the core is reviewed
  annually
- institutions then apply to the Council for funding above the core
- they do so by applying for additional 'funding units'.

#### **Funding Units**

To provide a common measure for funding purposes, the Council has adopted the concept of funding units as these reflect more accurately than student enrolments the actual costs of different types of courses:

• each student enrolled attracts a number of units for the college

1-8

- the precise number of units will depend on the specific course being followed by the individual student, the student's progress, and their eventual achievement
- the number of units generated by a student on a specific course is determined by a tariff which is reviewed by the Council each year after it has consulted the sector
- each college also earns units for providing appropriate preenrolment guidance and for making a learning agreement with each student which sets out the education, training and support the college will provide
- colleges can earn units for providing additional support to students with learning difficulties or disabilities and for waiving fees for younger students and for adults on low incomes.

The provision of an average size college amounts to around 400,000 funding units. The smallest college has 20,000 units. The largest has 1.6 million units.

On average, 10 per cent of college funds is paid for pre-enrolment guidance and developing learning agreements. Around 5 per cent is linked to student success. The remainder is paid for the cost of delivering courses and for any additional student support costs and fee waivers (see page 19).

#### Main Allocation

The Council's annual recurrent funding allocation to each college has two strands: the main allocation and the demand-led element. This is illustrated in figure 1 on page 17. Each college's main allocation is a specified fixed sum which the Council pays in return for the college providing an agreed number of target funding units. The allocation consists of:

- the college's guaranteed 'core' funding allocated in return for an associated number of core units
- funding for additional units above the core for which colleges apply.

There is no limit to the number of additional units for which an institution may apply and it is for a college itself to decide how quickly it wishes to expand, if at all, and therefore the number of units to apply for. The monetary value attached to each additional funding unit is set annually by the Council. Currently, it is about three quarters of the average level of funding per unit for the sector as a whole.

Where the demand for funds exceeds the budget available, the Council selects applications against criteria agreed in advance with the sector. Currently the criteria are:

- the institution's performance against its previous targets
- the contribution the application will make to the Council's priorities
- the quality of the institution's work
- the cost-efficiency of the institution, measured by its average level of Council funding per unit.

The institution's application must also be consistent with the objectives it has set in its strategic plan.

The Council makes a funding agreement with each institution every year. The agreement sets out the funds the Council has agreed to pay to the institution as its main allocation and the minimum number of funding units the institution has agreed to deliver in exchange. If an institution falls short of its agreement, the corresponding funds are recouped by the Council in the next financial year.

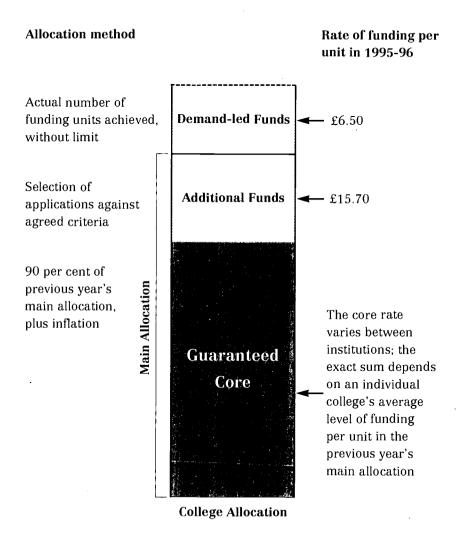

#### Demand-led Element

Part of each institution's funding from the Council is demand-led. This demand-led element is designed to encourage colleges to expand, particularly in areas where demand is strong and the college's marginal costs are low. It benefits colleges as follows:

 the Council pays the college a fixed amount for every funding unit achieved by the college over and above the agreed minimum units funded by its main allocation

Figure 1. The three elements of college recurrent funding allocations

- the rate is currently about one third of the average level of funding per unit in the sector
- all additional units generated by a college qualify, including those for initial guidance and counselling, fee remission, additional support and for students succeeding in their qualification aims
- there is no limit to the amount of extra funding an institution can earn through this mechanism.

#### **AUDIT**

Each institution funded by the Council is audited at the end of the teaching year by the institution's external auditors. Adjustments to the main allocation and the final payment of demand-led funds are based on audited figures.

#### CONVERGING AVERAGE LEVELS OF COLLEGE FUNDING

The Council is using its funding methodology to reduce gradually the widely varying levels of funding at different colleges inherited from former local authority funding arrangements.

The disparities in funding levels inherited by the Council were so wide (from £7.44 per unit to £47.48 per unit) that it decided it could not align them straight away. To have done so would have meant large funding reductions for many colleges. These colleges would have become financially unstable as a result. Instead, the Council set itself the objective of converging the range of college funding levels to an acceptable range within three years.

This objective is being met by the application of the Council's methodology. Because the price paid for additional units above the 90 per cent core allocation is below the average for the sector, the funding level per unit at colleges with relatively high levels of funding is decreasing. At colleges where the inherited average level of funding is low, it is gradually increasing.

The process gives colleges with relatively high funding levels time to adjust their operations, either by reducing costs or by growth, and to bring their unit costs in line with other colleges.

#### ADVANTAGES OF THE NEW SYSTEM

- the tariff is sensitive to the costs of different types of courses
- it can be adjusted by the Council to reflect any priority which it may wish to give to a specific curriculum area
- it can encourage colleges and others to recruit specific categories of students for instance, the tariff currently compensates colleges which waive fees for students who are receiving means-tested state benefits
- by attaching funding units to student counselling and guidance at the beginning of the college programme and to students' success at the end of the programme, the system provides a powerful incentive to colleges to help students complete their studies successfully
- it recognises the additional costs incurred by colleges enrolling students with learning difficulties or disabilities
- it encourages colleges to deliver courses in ways which best suit students because, for most courses, it does not distinguish between full- and part-time modes of attendance
- through the monetary value which it attaches each year to additional funding units, the Council can encourage increased efficiency and reduce differences in funding levels between colleges at whatever rate it considers desirable
- the system requires colleges to have a detailed understanding of their enrolments, course profile, student retention and success rates, and it places a new emphasis on effective college management information systems
- the allocation method gives each institution adequate financial and planning stability

- it promotes cost-effective expansion
- by attaching funding to each student and linking it to their success, the system encourages colleges to respond to the needs of students and employers
- it promotes improvements in the quality of courses.

#### CAPITAL FUNDING

Since 1995-96, all the funds made available to the Council by the secretary of state are treated as recurrent funds. There is no longer a separate allocation for capital expenditure. However, the secretary of state indicates each year the amount of funds which the Council should earmark for capital purposes and the minimum level of capital expenditure by colleges which the Council should seek to promote.

From 1996-97, the Council is introducing new arrangements for allocating funding to colleges for capital purposes. These arrangements are described below.

#### **General Capital Allocation**

The majority of the funds which were previously separately identified for capital purposes will be distributed through the recurrent funding methodology. This will simplify the allocation process and remove the need for colleges to make claims for capital funds.

The allocations process for 1996-97 is as follows:

- each college will receive a standard payment for general capital purposes (£40,000 in 1996-97)
- each college will also receive 90 per cent of its 1995-96 equipment allocation, less the 1995-96 standard equipment payment
- each funding unit allocated to the college in response to its funding application will include an additional capital element
- the capital element in each funding allocation, including the standard payment, will be earmarked for capital purposes<sup>2</sup>.

<sup>&</sup>lt;sup>2</sup>The arrangements described here may vary for the 14 specialist designated institutions funded by the Council.

By linking allocations for general capital purposes to the number of funding units allocated to a college, the Council can ensure that it takes account of the size of the college, the type of courses it runs and the equipment costs associated with different types of programme and with the support needs of students with learning difficulties and/or disabilities

#### Major Capital

From 1996-97, colleges undertaking a major capital project which has been approved by the Council for funding support will receive additional Council funds towards the costs of the project. The level of Council support will be between 10 and 75 per cent of total project costs. The precise amount will depend on a college's average level of funding per unit at the time when the project is agreed. The lower a college's average level of funding, the higher the level of support.

Project support from the Council will normally be in the form of an annual contribution to the costs of loan finance taken out by the college. Exceptionally, the Council will consider making a grant for direct capital expenditure.

The Council considers applications for support towards the costs of major capital projects against published criteria. These are set out in Council Circular 95/25.

The first group of major capital projects approved for Council financial support were agreed in January 1996. Before this date, the Council channelled all its capital funding into capital equipment and a large-scale minor works programme designed to improve the poor state of college buildings. Under this programme, the amount of funds colleges received for minor repairs varied according to the findings of an independent, nationwide survey of all buildings in the sector which was commissioned by the Council.

#### **Borrowing**

Colleges are free to borrow money to fund capital works. Under the terms of the *Further and Higher Education Act 1992*, all college borrowing must be approved by the Council.

#### **Private Finance Initiative**

The Council is promoting the government's private finance initiative within the further education sector. The initiative encourages public sector bodies, including colleges, to work in partnership with the private sector in the financing, project management and subsequent management of capital developments.

#### Funds Available

The capital funds available to the Council in 1998-99 are set out in table 2.

Table 2. Capital funds available to the Council, 1995-96 to 1998-99				
_	95-96	96-97	97-98	98-99
	£m	£m	£m	£m
Capital	159.3	110.3	92.3	59.3
Change (%	6) 1.4	(30.8)	(16.3)	(35.8)

# Membership of the Council

#### Sir Robert Gunn (Chairman)

Former chairman, the Boots Company plc

#### Mr Nicholas Bennett

Education and management consultant; parliamentary under-secretary of state for Wales 1990-92; MP for Pembroke 1987-92

#### Mr Tony Cann CBE

Founder chairman of ELTEC; member of the National Advisory Council for Education and Training Targets; chairman of various companies

#### Mrs Margaret Davey OBE

Principal, The City Literary Institute

#### Mr David Eade

Principal, Barnsley College

#### Mr Colin Harris

Managing director, Legal and General Financial Services

#### Mrs Margaret Hobrough

Principal, Godalming Sixth Form College

#### Mr Christopher Jonas CBE

Adviser on property strategy to the board of a number of major corporations, Past President, Royal Institution of Chartered Surveyors

#### Sir Michael Lickiss

Chairman, combined BTEC and ULEAC; non-exectutive director, United News and Media; chairman of the West of England Development Agency

The map shows the Council regions, the number of colleges in each region as at February 1996 and the location of regional offices.

Total Council sector colleges at February 1996, 452

, 31

#### Council Publications

#### Circulars

A regular series of circulars giving advice and information to colleges and other institutions which the Council funds.

#### **Quality Reports**

Reports on individual colleges, an annual report on quality and standards in further education in England, and occasional reports on specific curriculum areas or qualifications and on further education in other countries.

#### **Council News and Regional Committee News**

Reports on the decisions of Council and the main items of business considered by its regional committees.

#### **Major Publications**

- Funding Allocations
- Annual Report
- Directory of Colleges in the Further Education Sector in England (Jul 1996)
- Guide for College Governors (May 1994)
- College Governance: A Guide for Clerks (Mar 1996)
- Estate Management in Further Education Colleges A Good Practice Guide (Sep 1995)

The Council also publishes statistical information on student enrolments, college staff, students and finance in further education, as well as providing guidance on aspects of college management in a series of good practice guides.

Further information on Council publications is available from the Communications Team, The Further Education Funding Council, Cheylesmore House, Quinton Road, Coventry CV1 2WT.

# REPRODUCTION RELEASE

(Specific Document)

I. DOCUMENT IDENTIFICATION:					
Title: /NTROL	OF MOITSUI	TITE COUNCI	L		
Author(s):	HC	·			
Corporate Source:			olication Date:		
II. REPRODUCTIO			•		
In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.					
If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following two options and sign at the bottom of the page.					
-	The sample sticker shown below will be affixed to all Level 1 documents	The sample sticker shown below will be affixed to all Level 2 documents			
Check here	PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY	PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN OTHER THAN PAPER COPY HAS BEEN GRANTED BY	Check here		
For Level 1 Release: Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media	Sample ————————————————————————————————————	TO THE EDUCATIONAL RESOURCES	For Level 2 Release: Permitting reproduction in microfiche (4" x 6" film) or		
(e.g., electronic or optical)  and paper copy.	INFORMATION CENTER (ERIC)	INFORMATION CENTER (ERIC)	(e.g., electronic or optical), but <i>not</i> in paper copy.		
	Level 1	Level 2			

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

	"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."

# III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)

Publisher/Distributor:
