ABSTRACT

This report presents the results of a 1994 study of the performance and management of college and university endowments, based on data collected from 447 member institutions of the National Association of College and University Business Officers (NACUBO). Part I offers highlights of the study results. Part II presents statistical data and other information in 32 exhibits, addressing: (1) general endowment characteristics such as assets by institution type, institutions ranked by market value of assets, assets per full-time equivalent (FTE) student, and public and private institutions ranked by assets per FTE student; (2) growth, including endowment growth and market indexes, spending rates, spending rules, and gift flow rates; (3) asset allocation and asset allocation by institution; (4) general characteristics of investment pools, including assets and institutions grouped by size of investment pool; (5) investment pool performance, including nominal returns, average annual compound nominal returns and cumulative nominal returns by institution, and similar information for real returns; (6) asset allocation by investment pool; and (7) management fees. Two appendixes contain a glossary and descriptions of market indexes. A list of firms that contributed to funding the study concludes the report. A separately published executive summary and a formal acknowledgement booklet listing contributors to the study by level of gift and with brief descriptions of each donor are also provided.

Foreword

Because skillful endowment management is crucial to the financial well-being of America's colleges and universities, the annual NACUBO Endowment Study (NES) seeks to help administrators and trustees evaluate the performance of their endowments and to acquaint them with the investment policies and practices of other higher education institutions.

First published in 1971, the NES was originally based on a prior survey conducted by administrators at Dartmouth College. The earliest editions focused solely on investment performance, but subsequent years have seen the NES expand to include a broad variety of issues of concern to trustees and administrators, including asset allocation, spending rates, and manager and custodial relationships. As the most comprehensive published source of data on college and university endowments, the NES has become the authoritative guide to the investment management practices and trends of these institutions.

Acknowledgments

This study was prepared under the direction of NACUBO by Cambridge Associates, Inc. Cambridge Associates provides investment and financial research and consulting services to nonprofit endowed institutions. The firm has offices in Boston, Washington, D.C., San Francisco, and London. NACUBO would like to thank Cambridge Associates for its fine work in preparing this study and in administering the questionnaires on which it is based.

NACUBO would also like to acknowledge the financial support provided by the firms identified in this volume and in the recognition booklet. Without their generous contributions, NACUBO could not publish so comprehensive an analysis of endowment management practices.

Abstract

1. Of the 447 institutions participating in the *1994 NACUBO Endowment Study* (NES), 446 report endowment assets, which total \$88.9 billion as of fiscal 1994 year-end. These assets remain highly concentrated: 41 institutions (9%) with endowments of \$400 million or more represent 59% of the total.
2. For fiscal year 1994, the equal-weighted mean total return of the 383 college and university investment pools providing June 30 data for this year's study is 2.9%, dramatically less than 13.4% and 13.3% earned in the preceding two years. The dollar-weighted mean total return is 4.4% (versus 14.5% last year), and the median, 2.9% (versus 13.5% in 1993). Institutions that reported returns on a gross basis (i.e., before deduction of investment management expenses) earned an average return of 3.1%, while those that reported net returns averaged 2.7%.
3. Because endowment assets are invested predominantly in domestic stocks and bonds, the relative performance among endowment investment pools typically depends primarily on their asset allocation between these two major asset classes. In fiscal year 1994, domestic common stock indexes barely eked out positive returns (1.2% for the Wilshire 5000), domestic fixed income indexes produced negative total returns (-1.3% for the Lehman Brothers Aggregate), and both were beaten by cash equivalents (91-day U.S. Treasury bills returned 3.5%) and by foreign stocks (the MSCI EAFE index returned 17.0%). A higher allocation to bonds, which is characteristic of smaller endowments, was therefore a drag on performance, but was somewhat offset by their higher cash holdings. However, the key to earning relatively high returns in fiscal 1994 was to have significant investments in asset classes other than domestic stocks and bonds -- in particular, in foreign stocks and nonmarketable alternative equity investments, both of which generated superior returns. The two smallest investment pools, with their higher exposure to domestic stocks and bonds, therefore had the weakest returns (2.6% for those with assets of \$25 million and less; 2.4% for those with assets of \$25 million to \$100 million), while the two larger investment pools fared very much better (3.4% for those with assets of \$100 million to \$400 million and 4.1% for those with assets greater than \$400 million).
4. The most significant change in the average pool's allocation among various asset classes from June 30, 1993, to June 30, 1994, is the dramatic acceleration in commitments to foreign common stocks, allocations to which have been increasing steadily for the past several years. The average allocation to foreign stocks increased by almost 80%, from 4.3% of assets to 7.5%. Among smaller institutions the allocation to foreign common stocks more than doubled, while even among the largest universities, which have for many years had significantly higher exposure to foreign securities, the percentage of assets allocated to foreign stocks increased by over 30%, from 10.8% to 14.3%. The source of funds for this shift seems to have varied; many institutions obviously reallocated funds from their domestic common stock portfolios, but in the case of the largest institutions the increased allocation to foreign stocks appears to have been funded at least in part from domestic fixed income, the allocation to which has fallen below 20% for the first time on record, and is significantly less than that of any other group.
5. No valid comparisons can be made with past NES data on endowment spending rates because those sections of the questionnaire designed to elicit information on spending have been rewritten to enable

Abstract (continued)

Cambridge Associates to account more accurately for **all** expenditures from the endowment. For fiscal year 1994, the average endowment spending rate reported by responding institutions is 6.0%. On average, the smallest endowments (\$25 million and less) spent more than the largest (7.2% versus 4.5%), and public institutions spent more than private institutions (6.6% versus 5.7%). With the sole exception of the 4.5% spent by the largest institutions, these spending rates are not compatible with most institutions' stated intention to preserve the purchasing power of their endowment. Over time, it is possible (difficult, but possible) for an exceptionally well-managed institution to spend 6.0% of a three-year moving average of endowment market value, and still preserve purchasing power. However, it is courting disaster to spend at an annual rate of 6.0% or more toward the tail end of a long bull market.

6. The median figure for new gifts to endowment as a percentage of average assets is 4.4%, the same as last year and nearly tying the 4.5% record set in 1986 for the highest annual gift flow rate since this figure was first computed in 1976. Given the significant increase in endowment assets since 1986, this 4.4% rate clearly represents a large increase in dollars donated to higher education. Public institutions continue to experience sharply higher gift flow rates than private institutions (10.4% versus 5.3%), but the largest endowments (which are predominantly private) attract by far the highest average dollar volume of annual giving.
7. For the 10-year period ended June 30, 1994, the median investment pool, with an average annual return of 12.7%, underperformed the Wilshire 5000 (14.5%), but outperformed the Lehman Brothers Aggregate Bond Index (11.6%), and 91-day U.S. Treasury bills (6.1%). Thus, \$100 invested in the Wilshire 5000 on July 1, 1984 would have been worth \$386.90 on June 30, 1994, compared with \$330.50 for the same investment in the median investment pool, and \$299.70 for the same investment in the Lehman Brothers Aggregate Bond Index.
8. The **real** (inflation-adjusted) average annual rate of return for the median investment pool over this 10-year period is 8.9% if deflated by the Consumer Price Index (CPI-W), or 7.8% if deflated by the Higher Education Price Index (HEPI). In 1984 **constant** dollars, therefore, \$100 invested in the median pool on July 1, 1984, would have been worth \$233.60 on June 30, 1994, compared with \$273.50 for the same investment in the Wilshire 5000, and \$211.90 in the Lehman Brothers Aggregate Bond Index (deflated by the CPI-W).

PART I

COMMENTARY

Endowment Characteristics

Distribution of Endowment Wealth. Of the 447 institutions participating in the 1994 NACUBO *Endowment Study* (NES), 446 report endowment assets, which total \$88.9 billion as of fiscal 1994 year-end. As Exhibits 1 through 5 indicate, this wealth remains highly concentrated: only 41 (or 9%) of these 446 institutions have endowment assets in excess of \$400 million, yet they control 59% of the total.

Endowment Size. The largest endowment among all participating institutions continues to be that of Harvard University (\$6.2 billion), while the University of Texas System (\$4.5 billion) is the largest among participating **public** institutions. At **private** institutions, average¹ endowment assets per full-time equivalent (FTE) student are \$62,011, almost ten times greater than those of the participating **public** institutions with \$6,761 per FTE student. For fiscal year 1994, the participating **public** institution with the greatest endowment assets per FTE student is the Virginia Military Institute Foundation (\$93,465 per FTE student), followed by the Oregon Health Sciences University Foundation (\$59,977 per FTE student) and the University of Texas System (\$43,610 per FTE student). Among **private** institutions, the highest ranking are the Academy of the New Church (\$551,290 per FTE student), Princeton University (\$532,081 per FTE student), and Curtis Institute of Music (\$430,300 per FTE student). (See Exhibits 4 and 5.)

Slightly more than one-half the **public** institutions participating in this year's NES are research universities (according to the Carnegie classifications), and they command the lion's share (87%) of the endowment assets of the public sector colleges and universities. Among **private** institutions, the distribution of participants and assets by Carnegie classification is rather different: 49% of private institutions included in the study are baccalaureate colleges and universities (i.e., liberal arts), and these control 23% of the private institutions' aggregate endowment assets; the 38 private research universities in this year's report constitute 12% of all private institutions participating, but their portion of the private institutions' aggregate endowment assets is 61%. (See Exhibit 1B.)

Endowment Composition. Of the \$76.2 billion in aggregate assets controlled by the 412 institutions providing data on endowment composition for this year's study, approximately 64% (\$48.8 billion) represents **true endowment** (i.e., assets donated to serve as permanent capital, only the **income** from which may be spent). The remaining 36% (\$27.4 billion) represents **quasi-endowment** (funds designated as endowment by governing boards, from which both principal and income may be spent), **term endowment**, and **funds held in trust by others**, but does not include life income funds, which are accounted for outside the endowment. Of these four categories, **quasi-endowment** constitutes by far the largest segment (31% of aggregate endowment assets, or roughly \$23.7 billion), with **term endowment** constituting just 3% (approximately \$2.2 billion), and **funds held in trust by others** another 2% (or \$1.5 billion). (See Exhibit 6.)

Endowment Growth. As Exhibit 7 indicates, over the 15-year period ended June 30, 1994, the NACUBO Endowment Wealth Index² rose approximately 421%, compared with increases of

¹ Throughout this report the "average" of any given data set is the equal-weighted mean, unless otherwise indicated.

² This index is based on the median market value of participating endowments (a shifting universe), and changes reflect investment returns, spending, and new gifts.

approximately 676% and 647% for the S&P 500 and Wilshire 5000 stock indexes, and 342% for the Lehman Brothers Aggregate Bond Index. In real (i.e., inflation-adjusted) terms, the NACUBO Endowment Wealth Index has increased 161% over this 15-year period, which translates into average annual real compound growth of approximately 6.6%.

Since real endowment growth is the sum of investment returns, additions to endowment from gifts, and spending, all adjusted for inflation, it follows that such growth can only occur when investment returns plus gifts exceeds spending plus inflation. As the earnings power of the baby boom generation rose during the 1980s, the pool of potential donors increased significantly, and gift flow did in fact increase modestly. It should be remembered, however, that the gift flow **rate** is the dollar value of gifts expressed as a percentage of endowment assets, and so when investment returns are strong, an increasing dollar volume of donations is required to maintain a constant gift flow rate. This was exactly the situation throughout the past 12 years: the modest increase in gift flow rates represents a substantial increase in the dollar volume of gifts because endowment assets were growing rapidly as a result of the bull market. On June 30, 1982, the Dow Jones Industrial Average (DJIA) closed at 811.93 and long-term Treasury bonds yielded 13.8%. Twelve years later, the DJIA closed at 3,624.96 and the long bond yielded 7.6%. Not since the 1920s have both stocks and bonds provided such unusually generous returns, and during the first eight years of this period the economy experienced its longest period of expansion in 40 years. At a time when many public and private institutions are searching for ways to bridge the gap between revenues and expenditures, it is tempting to extrapolate these extraordinary returns into the future and to budget endowment spending accordingly. In this context, however, it is instructive to note that for a representative group of institutions, the average annual real return after spending for the 10-year period ended June 30, 1994, is 4.1%, but for the 20 years ended June 30, 1994, it is 0.9%.

Endowment Spending. Spending rules for fiscal year 1994 are reported as follows:

<u>Spending Rule</u>	Participating Institutions	
	<u>Number</u>	<u>Percentage</u>
Spend all current income	33	7.4%
Spend a prespecified percentage of current income	14	3.1
Spend a prespecified percentage of beginning market value	29	6.5
Spend a prespecified percentage of a moving average of market values	252	56.4
Increase prior year's spending by a prespecified percentage	26	5.8
Decide on an appropriate rate each year	35	7.8
Other rule	50	11.2
No established policy	2	0.4
No response	6	1.3
Total	447	100.0%

Because the universe of institutions surveyed is not identical to last year's (39 participants in the 1993 NES did not respond to this year's survey, while 46 new institutions have been added), only broad comparisons with last year's data can be made. However, it worth noting that the percentage of institutions electing to spend a prespecified percentage of a moving average of the endowment's market value has remained about the same as last year (56%), after several years of steady increase, and that the

decline in interest rates has driven more and more institutions to abandon the "spend current income" rule. An increasing number of institutions have clearly come to terms with the fact that a spending policy based solely on income tends to result either in unmanageable swings in the operating budget, or in distortions in asset allocation decisions as an effort is made to maintain consistent levels of cash flow in different market environments.

Of greater consequence (because it affects so many more institutions), is the question of how many institutions with a policy of spending $x\%$ of a y -year average of endowment market values recognize that a significant ebbing of the bull-market tide could result not only in a diminution in the growth in spending they have enjoyed in the past decade, but quite possibly in an actual decline in spending dollars. Historical precedent indicates that a fund invested approximately 60% in domestic and foreign stocks, 30% in fixed income, and 10% in various other asset classes inevitably experiences recurring periods of absolute decline in market values over three years. Such a decline would trigger a reduction in spending for an institution sticking to a policy of spending a fixed percentage of a three-year moving average of endowment market values. Because institutions have not had to face such a decline in the past dozen years (which makes it all the more likely they **will** be faced with such a decline sometime in the **next** dozen years), very few have any contingency plan for dealing with the possibility of a reduction in revenue from endowment. Those that have thought about the consequences of lower capital market returns have generally responded by cutting their spending rates to less than 5%.

For fiscal year 1994, the average endowment spending rate reported by responding institutions is 6.0%.³ On average, the smallest endowments (\$25 million and less) spent more (7.2%) than the largest (4.5%), and public institutions spent more (6.6%) than private institutions (5.7%) (see Exhibit 8). With the sole exception of the 4.5% spent by the largest universities, these spending rates are not compatible with most institutions' stated intention to preserve the purchasing power of their endowment. Over time, it is possible (difficult, but possible) for an exceptionally well-managed institution to spend 6.0% of a three-year moving average of endowment market values, and still preserve purchasing power. However, it is courting disaster to spend at an annual rate of 6.0% toward the tail end of a long bull market.

Endowment Gift Flow. For all responding institutions, the median fiscal year 1994 gifts as a percentage of average endowment assets during the year was 4.4%, the same as last year. As pointed out last year, this gift flow percentage nearly ties the 4.5% record set in 1986 for the highest level of annual giving (expressed as a percentage of average endowment assets) since 1975. (See Exhibit 10.)

There continues to be an **inverse** relationship between endowment size and gift flow rates (when gift flow is expressed as a percentage of average assets): if two institutions have similar pools of

³ Convinced for years that institutions have tended to understate their spending rate, Cambridge Associates has wrestled with the section of the questionnaire designed to elicit these data, reformatting questions in an effort to account for all expenditures from endowment. Last year, although still skeptical of the outcome (an average endowment spending rate of 4.5%), analysts thought they had solved this problem. Not so. Further analysis of the reported data revealed persistent omissions, and so Cambridge Associates believes that the average spending rate reported last year was also significantly understated. Finally, this year, analysts believe they have succeeded in accounting for all expenditures from endowment, and have confidence in the integrity of the data, which now correspond to the anecdotal evidence on spending rates.

potential donors from whom to solicit gifts, it is obviously easier for the smaller endowment to attain a higher gift flow rate. Thus, the equal-weighted mean for the smallest endowments (\$25 million and less) is 10.0% for fiscal year 1994, while that for the largest is 4.4%. Similarly, public institutions, whose endowments tend to be smaller than those of private colleges and universities, continue to experience a higher average gift flow rate (10.4% versus 5.3%).

An institution's gift flow **rate** (which is a relative number) should not be confused, however, with the absolute dollar value of the gifts it receives. This year, 380 institutions responded to the survey question about gifts, reporting total receipts of \$3.2 billion. Of these 380 institutions, 85 (22%) with endowments of \$25 million or less received only 3% of all donations; 159 colleges and universities (42%) with endowments in the range of \$25 million to \$100 million account for 17% of the total; 105 institutions (28%) with endowments in the range of \$100 million to \$400 million received 34% of the gifts; and 31 institutions (8%) with the largest endowments attracted 45% of total receipts. Consequently, although larger institutions experience lower gift flow rates, they also manage to attract a disproportionate share of donations. Indeed, from smaller to larger endowments the increase in dollars received is dramatic: on average, the smallest group received gifts amounting to \$1,237,000, while the average for the next largest group is \$3,405,000; for the next largest, \$10,232,000; and for those endowments over \$400 million, \$46,290,000.

Endowment Asset Allocation. For the purpose of this study, endowment holdings are classified in five broad asset categories. As of the end of the 1994 fiscal year, 89.4% of the assets of responding institutions were invested in marketable securities, 4.7% in nonmarketable securities, 3.1% in noncampus real estate, 1.0% in campus real estate, and the remaining 1.8% in other miscellaneous assets. These dollar-weighted mean percentages do not change materially when the asset allocations of endowments are categorized by institutional type or size, except that the largest endowments (over \$400 million) have a great deal more committed to nonmarketable securities (7.1%) than do endowments falling into the other three size categories. (See Exhibits 11 and 12.)

Life Income Funds

Total life income fund assets of \$3.1 billion were reported by 335 institutions. Of this total, 40% is controlled by institutions with endowment assets in excess of \$400 million, 40% by institutions with endowment assets between \$100 million and \$400 million, 17% by those with endowments in the range of \$25 million to \$100 million, and 3% by the institutions with the smallest endowments. (See Exhibit 1A.)

Investment Pool Characteristics

Of the 447 institutions responding to the 1994 NES survey, 430 provide fiscal 1994 year-end market values for their investment pools and the aggregate value is \$77.7 billion. As one might expect, these assets are concentrated as are endowment assets generally: the 39 pools with assets in excess of \$400 million control 58% (\$45.4 billion) of the total. (See Exhibit 13A.)

Fiscal Year 1994 Investment Pool Performance

Nominal Returns. As Exhibit 15 indicates, the **equal-weighted mean** nominal total return earned by respondents for the fiscal year ended June 30, 1994, is 2.9%, dramatically less than the 13.4% and 13.3% earned in the preceding two years. The **dollar-weighted mean** return is 4.4% (versus 14.5% last year), and the **median** return, 2.9% (versus 13.5% in 1993). The **highest** nominal total return earned by an individual pool is 25.3%, and the **lowest**, -5.8%. (See Exhibits 15, 16, 17, and 20.) While the range of returns is considerable, their distribution is normal. The returns of 77% of all respondents fall within one standard deviation of the 2.9% equal-weighted mean and 96% are within two standard deviations. This is similar to the distribution for the 10-year period ended June 30, 1994, for which returns of 74% of responding institutions fall within one standard deviation of the equal-weighted mean (12.5%) and 96% fall within two standard deviations.

Among investment pools, the largest have usually maintained the greatest exposure to equities broadly defined and have consequently benefitted from the superior long-term performance of equities compared to other asset classes. This is duly reflected in the higher long-term return of the **dollar-weighted mean** compared with the **equal-weighted mean**. Additionally, in recent years their equity holdings have become more diversified than those of smaller institutions, including larger commitments both to foreign stocks and to nonmarketable equity investments like venture capital and buyout funds. This diversification accounts for their superior returns in fiscal year 1994, reflected in the 150 basis points by which the dollar-weighted mean outperformed the equal-weighted mean and in the higher returns of the largest funds (see Exhibit 15). For the year ended June 30, 1994, domestic fixed income investments earned negative returns and domestic stocks eked out returns less than 2%, but many private equity investments generated excellent returns, and international stocks (as measured by the MSCI EAFE index) returned 17%.

As Exhibit 15 shows, the highest average returns in fiscal year 1994 were for investment pools in the two largest groups. The average return for those with assets in the range of \$100 million to \$400 million was 3.4% and for those with assets over \$400 million, 4.1%. The average return for investment pools with assets in the range of \$25 million to \$100 million was 2.4%, and for those with assets of \$25 million and less, it was 2.6%.

Comparisons with Capital Markets. For the year ended June 30, 1994, the S&P 500 returned 1.4%, the Wilshire 5000, 1.2%, the Lehman Brothers Aggregate Bond Index, -1.3%, and 91-day U.S. Treasury bills, 3.5%. Measured by the equal-weighted mean return or by the median return (both 2.9%), the average investment pool therefore underperformed a composite index weighted 70% in the Wilshire 5000 and 30% in the Lehman Brothers Aggregate (LBA) Bond Index (the return of which is 0.5%), and the 0.6% return a composite weighted 70% S&P 500/30% LBA.⁴ However, the average investment pool outperformed by 1.3% (130 basis points) a composite index weighted to reflect average investment pool asset allocations as of June 30, 1993. (See Exhibit 28.)

Real Returns. When **nominal** returns are adjusted to reflect the increase in consumer prices [a 2.4% increase in the Consumer Price Index (CPI-W) in fiscal 1994 compared to 2.8% in fiscal 1993],

⁴ Appendix B contains detailed descriptions of the capital market indexes referred to in this report.

the return for both the equal-weighted mean and for the median falls to 0.5%, while that of the dollar-weighted mean falls to 2.0% (see Exhibit 21).

Historical Investment Pool Performance

Investment Pool Returns and Returns for Capital Market Indexes. For the 10-year period ended June 30, 1994, domestic common stocks (as represented by the Wilshire 5000) produced an average annual compound return of 14.5%, bonds returned 11.6% (Lehman Brothers Aggregate Bond Index),⁵ and cash equivalents, 6.1%. At 12.7%, the median annualized return of participating investment pools therefore trailed that of the broad stock market, but exceeded those of bonds and cash equivalents (see Exhibit 15). In dollar terms, \$100 invested in U.S. common stocks on July 1, 1984, would have been worth \$386.90 on June 30, 1994, while \$100 invested in the median investment pool would have grown to \$330.50. A comparable investment in bonds (as represented by the Lehman Brothers Aggregate Bond Index) would have been worth \$299.70. (See Exhibit 19A.)

Investment Pool Returns and Inflation. Over the 10-year period ended June 30, 1994, the median annualized return of 12.7% earned by participating pools exceeds the annualized rate of inflation as measured by the CPI-W (3.5%) by 9.2 percentage points. The median annualized real return for these investment pools for this period is therefore 8.9%, which trails the 10.6% annualized real return of domestic common stocks, but exceeds the 7.8% real return of bonds, and is significantly greater than the 2.5% real return of cash equivalents (see Exhibit 21). In 1984 constant dollars, therefore, \$100 invested on July 1, 1984, in domestic common stocks (as measured by the Wilshire 5000) would have been worth \$273.50 on June 30, 1994, while \$100 invested in bonds (as measured by the Lehman Brothers Aggregate Bond Index) would have grown to \$211.90. Invested in the median investment pool, \$100 would have become \$233.60 (see Exhibit 25A).

If the nominal returns for the past decade are deflated by the Higher Education Price Index (HEPI) rather than by the CPI-W, the average annual compound real rate of return for the median investment pool should be restated as 7.8% rather than 8.9% because the annualized increase in the HEPI is 4.5% for this period.

Investment Pool Asset Allocation. As the following table illustrates, among various minor shifts, there is one very significant change in the average allocation of holdings across 16 asset classes from June 30, 1993, to June 30, 1994.

⁵ Because it is more representative of actively managed common stock portfolios, the Wilshire 5000 rather than the S&P 500 is the index used here as a proxy for the domestic stock market. Both indexes are capitalization weighted and the 500 stocks in the S&P 500 comprise approximately 70% of the total market capitalization of the Wilshire 5000. (Because the Wilshire includes all domestic common stocks, the exact number of issues included in the index varies, but is typically over 6,000.) Similarly, although the Lehman Brothers Government/Corporate Bond Index is perhaps a more familiar benchmark, the broader Lehman Brothers Aggregate Bond Index is a more appropriate reference for most institutions because the Lehman Brothers Government/Corporate Bond Index excludes mortgage-backed securities, which have become a significant component of the fixed income market and of most fixed income portfolios.

Investment Pool Asset Allocation Change from 1993 to 1994

*Lowest dollar amount held by an institution in this asset class is less than 0.1% of its investment pool.

For years, the percentage of assets committed to foreign currency stocks has steadily increased (especially among the larger institutions), but in fiscal year 1994, this trend accelerated dramatically as the smallest institutions more than doubled their allocations to foreign equities, and even the largest institutions increased their allocations by about 40%. Consequently, the equal-weighted mean allocation to foreign stocks has risen from 4.3% last year to 7.5%, the dollar-weighted mean from 8.6% to 12.3%, and the median from 2.0% to 5.8%. The source of funds for this increased allocation to foreign stocks seems to have varied; many institutions obviously shifted funds from their domestic common portfolios, but in the case of the largest institutions the increased allocation to foreign stocks appears to have been funded at least in part from domestic fixed income, the allocation to which has fallen below 20% for the first time on record, and is significantly less than that of any other group. Also noticeable is an increase among the two largest groups in the allocation to hedge funds, which has more than doubled in the case of investment pools with assets of \$100 million to \$400 million, and increased from 1.3% to 2.4% in the case of the largest institutions.

The major distinction among the asset allocation policies of the various investment pools continues to be the continued enthusiasm of the largest pools (over \$400 million) for alternative equity investments.

On average, the smallest pools still report negligible investments in such alternative asset classes as venture capital and distressed securities, and in alternative investment strategies like hedge funds. In contrast, the largest pools now have approximately 13% of their assets committed to these areas, which is almost three times the average allocation of the next largest group (see Exhibit 26). While their greater long-term exposure to common stocks is certainly one source of the superior long-term performance of the larger investment pools, their commitment to alternative investments is also partly responsible for their success. It should also be recognized, however, that these alternative investments are more susceptible than stocks and bonds to extended periods of extreme over- and undervaluation, and that returns are much more manager dependent than is the case for marketable securities. Consequently, superior returns from alternative investments are typically realized only by those institutions disciplined enough to invest in a given area only when it appears significantly undervalued, and skillful enough to choose only outstanding managers.

Investment Pool Expenses

Manager Fees on Externally Managed Assets. Average manager fees as a percentage of the average market value of investment pools' externally managed assets remained at 0.48% (48 basis points) in fiscal year 1994, unchanged from the previous year after several years of decline from their high of 54 basis points in 1992 (see Exhibit 29). It is perhaps disappointing that fees have not receded further, confirming a reversal of their long rise from the 20-basis-point average reported in 1976. Since late 1990, many more active common stock managers have managed to outperform relevant benchmark indexes (after accounting for fees and expenses) than was the case in the latter half of the 1980s, and so one could make the case that their fees have been well earned. The same cannot be said for bond managers, however, and their fees have been particularly sticky. Where institutions have taken the initiative to suggest to their stock and bond managers that a reduction in fees seems appropriate, they have usually been successful, and Cambridge Associates would encourage more institutions to take this step if their fees are not at least as low as industry averages. As with prices in any industry, investment manager fees are driven primarily by the supply of and demand for good products. Fees rose sharply throughout the 1980s because demand swamped supply, but by the early 1990s that situation had corrected and the imbalance has disappeared. Because they are generally based on assets under management, the dollar value of fees automatically increases when capital market returns are positive; as a result, managers are more susceptible to negotiating fees when returns have been poor (as they have been recently) and retaining assets becomes more critical to their cash flow. Where active common stock managers can be clearly (and appropriately) measured against a relevant benchmark index (e.g., the S&P 500 or the Wilshire 5000), institutions should consider negotiating performance-based fees, and in all circumstances endowed institutions should insist that the fees they pay are no greater than the lowest fees charged by the manager to any accounts of comparable size.

As pointed out in previous years, one reason why fees are significantly higher today than 20 years ago is the steady diversification of endowment portfolios across multiple managers and asset classes, for which fees are (and will remain) higher than for a single balanced account consisting entirely of domestic stocks and bonds. In general, the effect of fees on endowment returns is often underestimated and overlooked, particularly during bull markets: with an average annual return of 7.0%, a \$1 million endowment will grow to \$3,870,000 in 20 years; if successful fee containment resulted in that return increasing to 7.5%, the end value of the endowment would be \$4,248,000, an increase of \$378,000 or 9.8%.

Custodial Fees. Average custodial fees as a percentage of all investment pools' average market values was 0.08% (8 basis points) during fiscal year 1994, the same average reported in 1993. As with investment manager fees, there are clear economies of scale in custody, with most custodians charging a lower percentage of assets for larger accounts than they do for smaller ones. Comparisons of stated custodial fees can be misleading: many institutions have special relationships with their custodians and the custodial fees incurred by a given institution may also be a function of portfolio turnover, asset allocation, and other factors controlled by either fiduciaries or outside advisors. Nevertheless, institutions should note that the cutthroat competition among custodians has not abated and that stated fees remain susceptible to significant reduction through negotiation.

NOTES ON DATA

Data Collection: NACUBO encourages all its member institutions with endowment assets in excess of \$1 million to participate in the NACUBO Endowment Study. In August 1994, NES questionnaires were mailed to 600 colleges and universities with the request that they be returned by September 16, 1994.

Endowment Data: Of the 600 institutions surveyed, 447 (75 %) responded. Of these, 388 (87 %) provided endowment market values as of June 30. The next most common fiscal year-end date is May 31 (11 %).

Investment Pool Data: Of the 430 respondents providing investment pool data, 390 (91 %) provided data as of June 30, 1994; 37 (9 %) provided data as of May 31, 1994; and three reported data as of other dates. To make cross-institutional comparisons more meaningful, certain data presented in Part II (e.g., individual investment pool asset allocation and return) are grouped according to year ending dates.

Because some institutions were unable to complete certain sections of the 1994 NES questionnaire, not all institutions are included in every exhibit. Where an exhibit is based on data derived from significantly fewer than all survey participants, that fact is footnoted.

Three Definitions of "Average" Used in the 1994 NES: Except where otherwise noted in the text or exhibits, the "average" for any set of data (whether returns, asset allocation, or other characteristics) is the **equal-weighted mean**. The **dollar-weighted mean** and the **median** are also cited for some data sets.

The **median** is the value that divides into two equal parts any given distribution of data (e.g., fiscal year 1994 returns for investment pools). Because the **dollar-weighted mean** provides as precise a measure as possible of the actual return produced by the **aggregate** investment assets of participating institutions, it is in many respects a more useful average than the equal-weighted mean. The deficiency of **equal-weighted means** is that they are in some respects misleading because they ignore the effects of the extreme concentration of endowment wealth among a relatively small percentage of participants in the NES.

Real Rate of Return: The real, or inflation-adjusted, rate of return for a given investment is calculated by dividing the nominal total return by the appropriate deflator for the same time period. Throughout the 1994 NES, the deflation measure used for this purpose is the Consumer Price Index (CPI-W). Note that simply subtracting the deflator from the nominal total return does not result in an accurate computation of real total return. The formula is as follows:

$$\frac{1 + \text{Nominal Total Return}}{1 + \text{Deflator}} - 1 = \text{Real Total Return}$$

Foundations: For those institutions (typically public) for which an independent foundation is the repository of endowment assets, no distinction has been drawn between the foundation and the institution itself.

Cumulative 15-Year Percentage Change	420.69	160.74	676.46	646.51	337.57	342.30	99.71
Average Annual 15-Year Percentage Change	11.63	6.60	14.64	14.34	10.34	10.42	4.72

Note: The nominal NACUBO Endowment Wealth Index is based on the median annual change in the aggregate endowment market value of participating institutions. The real NACUBO index is adjusted for inflation as measured by the Consumer Price Index.

EXHIBIT 8

ENDOWMENT SPENDING RATES (%)
FISCAL YEAR 1994

<u>Responding Institutions</u>	<u>Endowment Spending Rate</u>
In Aggregate	
Equal-Weighted Mean	6.0
Dollar-Weighted Mean	5.0
Median	5.1
By Endowment Size (Equal-Weighted Mean)	
\$25 million and under	7.2
Over \$25 million to \$100 million	6.1
Over \$100 million to \$400 million	5.2
Over \$400 million	4.5
By Type (Equal-Weighted Mean)	
Public	6.6
Private	5.7

Note: The endowment spending rate represents endowment payout, investment management and custody expenses, and other distributions and transfers from the endowment expressed as a percentage of the average of fiscal year beginning and ending endowment market values.

For this analysis, 83% of respondents provided data.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

- Abilene Christian University
Spend 5% of the last 36-month moving average not to exceed total return.
- Academy of the New Church
Increase spending by 5% annually.
- Agnes Scott College
Spend board-approved cap for the year.
- Akron, University of
Spend 6% of a three-year moving average of market values.
- Alabama System, University of
Spend 5.5% of a three-year moving average of market (unit) values.
- Alaska and Foundation, University of
General pooled endowments: Spend 5.5% of beginning market value.
Land-grant endowment: Spend all current income in excess of inflation.
All other endowments: Spend all current income.
- Albany Foundation, University of
Spend 5% of a three-year moving average of adjusted endowment market values.
- Albertson College of Idaho
Spend 5% of a two-year moving average of market values as of December 31.
- Albion College
Base of \$600,000 in 1968 plus 5% of all new gifts received between 1968 and present plus 3% of the 5% gift calculation compounded annually provides income to be expended for current fund operations.
- Alfred University
Spend 6% of a three-year moving average, plus an additional fixed amount determined by the board of trustees.
- Allegheny College
Spend 5% of the 12-quarter moving average of the market value per unit.
- Allentown College of St. Francis de Sales
Decide on an appropriate rate each year (spending not to exceed 5.6% of endowment).
- Alma College
Spend 105% of prior year's spending, plus 5% of previous year's endowment gifts and earnings from quasi-endowment.
- Alverno College
Spend all income from scholarship and other restricted funds and reinvest all unrestricted income, except where donor specified otherwise.
- The American University
For each fiscal year ended after April 30, 1986, the spending policy provides for a 5% income yield to participating shares based on the average of beginning and ending fiscal year share values.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Amherst College

Increase spending each year by a factor equal to inflation plus the real growth percentage due to capital gifts. Spending cannot exceed real, long-term total return.

Appalachian State University Foundation, Inc.

Scholarships: Spend 5.5% of a three-year moving average of market values.
Other endowments: Spend 5% of a three-year moving average of market values.

Arizona, University of

Spend all unrestricted current income.

Arizona Foundation, University of

The board of directors establishes a payout rate at the beginning of each fiscal year stated as a fixed percentage of the beginning market value (e.g., 5%). There may be a distribution of income and capital gains to meet the payout rate.

Arizona State University

An earnings distribution rate of 4.65% was established based on the unit market value at July 1, 1993, and distributed on June 30, 1994. Investment income accrued for each endowment is based on the beginning monthly fund balance.

Arizona State University Foundation

Spend 4.65% of earnings, after reducing for investment management expenses, based on starting fiscal year market value. If the distribution rate per unit is lower than the previous year, use the previous year's distribution rate per unit, unless designated by the ASU Foundation finance committee to lower the distribution rate per unit.

Arkansas and Foundation, University of

Spend 5% of a 12-quarter moving average of market values.

Auburn University and Foundation

Spend 4.5% of a three-year moving average of market values.

Augustana College (Illinois)

Spend 5.4% of a three-year moving average of market values.

Austin College

Spend up to 6.5% of a three-year moving average of quarterly market values.

Averett College

Spend up to 90% of current income.

Baldwin-Wallace College

Spend all current income.

Ball State University Foundation

Decide on an appropriate rate each year. Fiscal year 1994 spending rate was set by the board at 5%.

Barnard College

Spend all current income plus a portion of appreciation as required.

Barry University, Inc.

Board of trustees has elected not to spend any earnings of the endowment fund for seven years.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Bates College

The fixed dollar amount of endowment earnings (spendable income) flowing to the operating budget in the next fiscal year shall be expressed as a percentage of the current market value of the total endowment. ("Current" market value is defined as the total market value of the endowment reported at the prior year's end.) The spendable income committed to the operating budget is not to exceed 5% of current market value.

Baylor University

Spend subject to the rules for each endowment account.

Bellarmino College

Spend 5% of a three-year moving average of market values.

Beloit College

Spend a specified percentage of the November 30 market value plus a fixed amount of realized gains.

Bentley College

Spending should not exceed 5% of the average market value per unit for the last 12 quarters.

Berea College

Spending per unit is increased annually by the preceding fiscal year's inflation rate (Consumer Price Index) plus 0.5%. However, the spending per unit shall not be less than 4.5% nor more than 5.5% of the unit market value at the beginning of the year.

Berklee College of Music

Spend up to 3% of a three-year moving average of endowment market values. Spending can be increased up to 5% with the approval of the finance committee.

Berry College

Spend all current income.

Bethany College (West Virginia)

Spend a percentage (established by the board of trustees) of the average market value of the "managed investments" determined by using 12 quarterly evaluations ending one year before the year in which income is to be used, divided by the year-to-date rise in the Consumer Price Index (Pittsburgh).

Binghamton University

Spend 5% of a five-year moving average of market values (True Endowment only).

Boston College

Spend the yield and a portion of the appreciation. This policy aims to preserve the purchasing power of the endowment.

Boston University

Spend 5% of a 20-quarter moving average of market values.

Bowdoin College

A spending cap of \$10.125 million is in effect until the eight-quarter moving average of market values exceeds \$200 million. When this occurs, the administration will consider establishing a policy that limits spending to 5%.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Bowling Green State University

Spend according to one of the following rules for each endowment fund: (a) spend all income; (b) spend 80% of earnings; or (c) specific allocation: less than 50% of earnings.

Bradley University

Spend 5% of a two-year moving average of market values as of December 31.

Brandeis University

Spend a specific percentage of a three-year moving average of market values.

Brown University

Spend 4.5% to 5.5% of a three-year moving average of market values.

Bryant College

Spend 5% of a three-year moving average of market values.

Bryn Mawr College

Spend 5% of a three-year moving average of market values.

Bucknell University

Spend a specified percentage (currently 4.5%) of a 12-quarter moving average of market values, subject to a "safety net" requiring a 5% increase from the prior year.

Buena Vista College

Spend 6% of the preceding year's market value as of December 31.

Buffalo Foundation, University of

Spend between 4.5% and 6% of a three-year moving average of market values.

Butler University

Spend 6.8% of a three-year moving average of market values. If necessary, the university can spend 2% of a three-year moving average of market values for physical plant and capital equipment expenditures.

California, University of

Spend all current income.

UCLA Foundation

Spending rate of 5%, based on the market value of endowment investment pool. (Realized capital gain may be appropriated when income is insufficient.)

California Institute of the Arts

Decide on an appropriate rate each year.

California Institute of Technology

Spend 5% of a three-year moving average of market values.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

California State University, Long Beach Foundation

CSULBF, in compliance with the Uniform Management of Institutional Funds Act, uses a "total return" spending formula which provides for expending a prudent portion of both the ordinary income from investments and appreciation of the principal. The ordinary income earned is generally distributed to projects monthly in accordance with the terms of the funding source and the prudent return concept. Distribution (if any) of the realized and unrealized appreciation is determined annually or more often if necessary, in arrears, by foundation staff in concert with the Treasurer and Assistant Treasurer.

Canisius College

Spend 5% of a 12-quarter average of unit values as of the prior December quarter.

Carleton College

Increase preceding year's spending by 4.5%, plus a percentage needed to fund a projected five-year capital campaign.

Case Western Reserve University

Spend 5.5% of a four-year moving average of market values.

Central Florida Foundation, University of

Spend 5.75% of beginning market value.

Central Michigan University

Spend 5.25% of the endowment book value.

Central Missouri State University Foundation, Inc.

60% of interest earnings is available for expenditure;
30% of interest earnings is returned to endowment; and
10% of interest earnings is distributed to foundation for management fees.

Central University of Iowa

Spend a fixed percentage of the book value as of the first day of the fiscal year.

Centre College of Kentucky

Spend 5.50% of a five-year moving average of market values for equity and balanced fund income. Spend all current income for fixed income funds.

Chapman University

Spend 5.5% of a three-year moving average of market values.

Chatham College

Spend 5.5% of the beginning market value.

Chicago, University of

Spend 5% of a 12-quarter moving average of unit market values, on a two-year lag, with declines limited to 4% below the prior year's payout. The limit on declines is being phased in over a three-year period, beginning with a 1% limit for fiscal year 1994, 2% for fiscal year 1995, and a 4% limit on declines thereafter.

Cincinnati, University of

The spending policy is determined each year for the forthcoming fiscal year by taking 5% of the average market value per unit for the 12 preceding quarters less estimated pool expenses.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Claremont McKenna College

Spend 5.5% of a 3.5-year adjusted average unit market value.

Claremont University Center

Spend \$10.34 per unit of pooled investments.

Clark College Foundation

50% of total return is to remain in the endowment fund. 50% is withdrawn from the endowment fund annually and transferred to a restricted endowment allocation reserve account. Appropriations (not to exceed the maximum available in the reserve account) are made for program support based upon current needs and reserves. Amounts not appropriated will serve as a cushion and be available for future appropriations.

Clark University

Spend 5% of a 20-quarter moving average of market values.

Clarkson University

Spend 5% (net of all fees and commissions) of a three-year moving average of market values as of December 31 of the previous calendar year.

Clemson University and Foundation

Spend up to 5.5% of a three-year average market value of the designated endowment fund. Spending may include realized gains and losses, as well as earned income. All returns (i.e., gains, losses, and income) above 5.5% will be reinvested in the designated endowment fund.

Coe College

Spend an appropriate percentage of an eight-quarter moving average of endowment market values as of December 31.

Colby College

Spend 4.8% of a five-year moving average of market values with adjustments for new gifts.

Colgate Rochester Divinity School

Spend 7.7% of a five-year moving average of market values.

Colgate University

Increase spending by 6% each year unless:

- (a) spending is less than 4.5% of the eight-quarter average market value, then increase spending to 4.5% of the eight-quarter average market value; or
- (b) spending is greater than 4.5% of the four-quarter average market value, then increase the previous year's spending amount by 3%.

Income earned in excess of spending is reinvested in principal. Conversely, if spending exceeds earned income, it is supplemented by drawing against the endowment income stabilization reserve.

Colorado Foundation, Inc., University of

Spend 5.4% of a three-year moving average of market values (4.5% is allocated to the university, 0.4% to investment manager and custodian fees, and the remaining 0.5% to the foundation for administrative expenses).

Colorado College

Spend 6% of a 12-quarter moving average of unit market values (revalued as of December 31 each year).

EXHIBIT 9
ENDOWMENT SPENDING RULES
FISCAL YEAR 1994

- Colorado State University Foundation**
3.5% of average balance in accounts is available for spending.
- Columbia University**
Spend the lesser of (a) 4.5% of the average market value of the merged pool funds for the previous three-year period; or (b) a 5% to 7% increase over the previous year's spending.
- Connecticut Foundation, University of**
Increase spending each year by the Consumer Price Index for the prior fiscal year. Spending must range between 4% and 6% of a three-year moving average of market values.
- Connecticut College**
Spend 5.85% of a three-year moving average of market values.
- Cooper Union**
Spend 5% of the previous three-year moving average of market values.
- Cornell College**
Spend 6% of a two-year moving average of market values.
- Cornell University**
Spending is limited to the difference between the total return on investments and the Higher Education Price Index averaged over a five-year period.
- Cranbrook Educational Community**
Spend 6% of a three-year moving average of year-end market values.
- Creighton University**
Spend 4% of fixed income holdings and 4.5% of equity holdings. In the future, increase fixed income spending by 4% a year and equity spending by 5% a year.
- Culver-Stockton College**
The income distribution, before expenses, for endowment spending in a fiscal year is 5% of the previous 12-quarter moving average of the market values. (the 12 quarters ending on December 31 immediately preceding the start of the fiscal year.)
- The Curtis Institute of Music**
Spend no more than 6.2% of a two-year moving average of market values.
- Dallas, University of**
Spendable earnings are equal to 5.5% of a three-year average balance, adjusted for additions and withdrawals.
- Dartmouth College**
Increase per unit spending by an inflation increment approved by the trustees, providing that the resulting distribution is between 4.25% and 6.5% of a 12-quarter moving average of market values.
- Davidson College**
Spend 5% of the three-year moving average of December 31 market values, plus the cost of investment manager fees.

EXHIBIT 9**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

- Dayton, University of
Increase spending each year by 4.5%. Spending must range between 4% and 6% of the beginning market value.
- Delaware, University of
Decide on an appropriate rate each year.
- Denison University
Spend 4% to 7% of a three-year moving average of market values.
- Denver, University of
Spend approximately 1.25% of a 12-quarter moving average of the consolidated endowment fund market values on a quarterly basis.
- De Paul University
Spend 5% of the beginning market value.
- DePauw University
Spend 6% of a 12-quarter moving average of market values.
- Dickinson College
Spend 5% of a 12-quarter moving average of market values.
- Dillard University
Spend interest only; reinvest appreciation/gains.
- Doane College
Spend 5% of the three-year moving average of unitized market values as of December 31.
- Drake University
Spend a fixed dollar amount that is predetermined each year by the board of trustees.
- Drew University
Spend 5.85% of a three-year moving average of market values.
- Drury College
Spend 6% of a three-year moving average of market values.
- Duke University
A decreasing rate is applied to a three-year moving average of market values, converging to a 5.5% net spending rate.
- Earlham College
Spend 5% of a 12-quarter moving average of market values.
- East Carolina University
Spend 6% of the average market value of the nonparticipating endowment accounts. Participating accounts are allocated the annual net income.
- East Tennessee State University Foundation
Each endowment operating account received 3% of the four-quarter average balance of the endowment account. Each endowment received 3% of the June 30, 1993, balance. Any additional amounts were reserved for future use.

EXHIBIT 9
ENDOWMENT SPENDING RULES
FISCAL YEAR 1994

- Eastern Michigan University Foundation**
 Spend a prespecified percentage of a 12-quarter moving average of market values.
- Elizabethtown College**
 Determine an appropriate rate each year.
- Elmhurst College**
 Spend 3% of a three-year moving average of market values. Reinvest earnings in excess of 3% in principal.
- Emory University**
 Spend a percentage of a three-year moving average of market values, with a floor of 4% and a ceiling of 6%; the increase over the previous year's spending is not to exceed the university's expected long-term inflation rate of 4.5%.
- Emporia State University Foundation**
 Spend \$5.50 per merged fund share.
- Evansville, University of**
 Spend the greater of (a) 5% of the beginning market value of the fund; or (b) the amount spent the previous year.
- Fairfield University**
 The spending rate is determined annually based on the average market value of endowment fund assets for the preceding three fiscal years.
- Ferris State University**
 Spend 80% of earned interest with the remainder returned to principal.
- Florida Foundation, Inc., University of**
 Spend a prespecified percentage of the inflation-adjusted endowment, subject to approval by the board of directors.
- Florida State University Foundation, Inc.**
 Spend the same amount as in the previous distribution period (quarterly) adjusted for 3.5% historical annual inflation rate within a minimum/maximum range of 5% to 7.5% of market value.
- Fordham University**
 Spend 4.5% of a three-year moving average of market values as of December 31.
- Fort Hays State University Endowment Association**
 Spend all current income.
- Franklin College of Indiana**
 The spending policy for fiscal year 1994 endowment pool was 5.5% of the 12-quarter rolling average unit value as of March 30, 1993 - applied to the endowment pool units held June 30, 1993. All nonpooled endowment assets had a spending policy of 100% of income distributed net of management and custodial fees.
- Franklin and Marshall College**
 Spend an annually determined percentage of a three-year moving average of market values.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Furman University

Spend 5.625% of the May 31, 1992, book value.

The George Washington University

Investment pool: Spend 4% to 6.5% of a 12-quarter moving average of market values.
Separately invested funds: Spend all net income.

Georgetown College

Spend 5% of a 12-quarter moving average of market values.

Georgetown University

Increase the projected income per unit annually by a budgeted rate of inflation. However, the spending rate shall not exceed 6% of the endowment market value.

Georgia and Foundation, University of

Spend up to 4.75% of a 12-month average principal balance.

Georgia Institute of Technology and Foundation

Spend 5% of a 12-quarter moving average of market values.

Gettysburg College

Spend 6.5% of a 12-quarter moving average of market values.

GMI Engineering & Management Institute

Spend 5% of a 12-quarter moving average of market values.

Goucher College

Spending is to be guided primarily by the financial objective enunciated in the statement of investment policies and objectives of the fund. These are (a) to support the operations of the college; and (b) to preserve the purchasing power of the fund's principal. It is recognized that the second of the objectives will not be met if, over the long term, the amount spent exceeds the real rate of return of the fund (historically less than 5%). Spending in excess of the fund's real rate of return (calculated on the basis of five-year moving averages) should be temporary and by exception, and must be approved explicitly by the board of trustees.

Grand Valley State University

Spend 5% of the market value.

Grinnell College

Spend 4.5% of a three-year moving average of quarterly market values.

Guilford College

Spend 5.8% of the market value as of December 31.

Gustavus Adolphus College

Spend 4.4% of the ending market value. Gains will be utilized if income is below the established spending level.

Hamilton College

Spend 5.0% of an eight-quarter moving average of market values.

Hampden-Sydney College

Spend 5.4% of a three-year moving average of market values.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

- Hampton University
Spend all current income.
- Hartford, University of
Spend all current income.
- Hartwick College
Spend 6.5% of a three-year moving average of endowment market values.
- Harvard University
Determine annually an appropriate rate that will provide current income and long-term protection against inflation.
- Harvey Mudd College
The spending amount is based on a model which takes into consideration the endowment market value at December 31, 1992, projected Consumer Price Index, prior year dollar utilization, and an enhancement factor.
- Haverford College
Increase spending by 5% annually plus 5% of new endowment gifts. Spending must range between 4.75% and 5.75% of a four-quarter moving average of market values as of September 30 for the prior year.
- Hawaii, University of
Spending is not to exceed 6% of the preceding year's ending market value.
- Hendrix College
Spend 6% of a three-year moving average of market values.
- High Point University
Spend all current income unless donor restricted.
- Hiram College
Spend 7.63% of a three-year moving average of market values.
- Hollins College
Spend 5% of a three-year moving average of the pooled endowment market values and all earnings of the nonpooled endowment.
- Holy Cross, College of the
Spend up to 5% of the three-year trailing average market value.
- Hood College
Spend 5% of the average of fiscal year beginning and ending book values.
- Hope College
Spend no more than 5.5% of a four-quarter moving average of endowment market values.
- Houston System, University of
Spend 4.2% of the endowment market value at the end of the preceding fiscal year. This percentage will decrease by 0.2% annually until 4.0% is reached.
- Howard University
Spend all current income.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

- Idaho, University of
Realized gains are to be reinvested as principal and only the income from dividends and interest is expendable.
- Illinois, University of
Spend 5.9% of a three-year moving average of market values (0.9% assessed as an administrative fee, 5% distributed for spending).
- Illinois Foundation, University of
Spend 5.9% of a three-year moving average of market values (0.9% assessed as an administrative fee, 5% distributed to the university).
- Illinois College
Spend all unrestricted income for general operating purposes and reinvest realized gains in the endowment fund.
- Illinois Institute of Technology
Spend a specified dollar amount determined by the investment committee of the board of trustees.
- Indiana University and Foundation
Spend 5% of an eight-quarter moving average of market values.
- Indiana University of Pennsylvania and Foundation
Determine spending on the basis of projected income. Income in excess of spending is converted to corpus.
- Indianapolis, University of
Spend all current income.
- Iowa, The State University of
Spend 1.25% of each quarter's beginning market value.
- Iowa Foundation, University of
Spend 5.5% of a three-year moving average of market values.
- Iowa State University and Foundation
Spend 5% of a three-year moving average of market values.
- Ithaca College
Annually establish spending rate between 4% and 6% of a three-year moving average of quarterly pooled unit market values.
- John Brown University
Spend 7% of a five-year moving average of market values.
- John Carroll University
Spend 5% of a three-year moving average of market values as of November 30 of the previous year.
- Johns Hopkins University
Spend up to 7% of market value, using the one-, three-, and five-year moving averages as a guide. This method strives to increase payout each year.

EXHIBIT 9**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994****Johnson & Wales University**

There is zero spending from the endowment.

Judson College

The college will spend 5% of the 12-month average of the fair market value of the corpus. This dollar amount will be taken first from interest and dividends, and if necessary, from a certain portion of appreciated assets.

Juniata College

Spend 5% of a five-year moving average of market values as of the end of the previous fiscal year.

Kalamazoo College

Spend all income to a maximum of 6% of the beginning market value.

Kansas State University Foundation

For funds not in the investment pool, spend all current income. For funds in the investment pool, distribute (a) 5% of beginning market value for expenditure by participating funds; (b) 1% of beginning market value for university projects; and (c) 2% of beginning market value to KSU Foundation as management fees.

Kansas University Endowment Association

Spend 5% of a three-year moving average of market values as of January 31. Spending is distributed on a proportional monthly basis to fund accounts participating in merged investments pool.

Kent State University

Spend 5% of a moving average of market values.

Kentucky, University of

Spend 5% of the average market value for the preceding 36 months.

Kenyon College

Spend 4.75% of a three-year moving average of market values. (This payout percentage is being reduced 0.25% each year until it reaches 4% in 1996-97.)

King's College (Pennsylvania)

Spend the lesser of (a) 4.5% of a moving average of market values; or (b) the actual amount received during the previous calendar year.

Knox College

The college appropriates income to unrestricted current funds under the total return method. Under that method, the excess (deficiency) of 7.3% of an average of the market values of certain defined investments over (under) the actual income earned is transferred at June 30 from (to) net adjusted gains and losses of the endowment fund.

La Salle University

Determine an appropriate rate each year.

Lafayette College

Spend 5% of unrestricted endowment funds.

Lake Forest College

Spend 7% of the average market value for fiscal year 1994.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Lawrence University (Wisconsin)
Spend the board-authorized percentage of a moving average of the market value of the invested assets.

Le Moyne College
Spend 5% of a three-year moving average of market values.

Lehigh University
Spend an amount based on a three-year moving average of market values with a minimum increase of 3%, and a maximum of 6%, over the preceding year's spending.

Long Island University
Spend 5% (net of management fees) of the May 31 market value.

Louisiana State University System
Spend all dividends, interest payments, and all recognized capital gains and losses.

Louisville Foundation, University of
Spend 5.5% of a three-year moving average of market values as of December 31.

Loyola College (Maryland)
Spend 5% of a three-year moving average of market values.

Loyola Marymount University
Distribute 5% of current income as of March 31 each year.

Loyola University of New Orleans
Increase spending by 4.5% each year. Spending must range between 4% and 6% of a three-year moving average of market values.

Luther College
Spend 5% of the March 31 endowment market value.

Lutheran University Assoc., Inc./Valparaiso Univ.
Spend 5% of a three-year moving average of market values as of the end of the previous calendar year increased by additions made to the fund during the three-year period.

Lycoming College
Spend 4.5% to 6.5% of a 12-quarter moving average of market values as of December 31.

Lynchburg College
Spend all current income.

Lyon College (formerly Arkansas College)
Spend 8.75% of all endowment funds received prior to July 1, 1991, decreasing by 0.5% each year until 5% is reached based on a 12-quarter moving average of market values. Spend 5% of all endowment funds received after July 1, 1991, based on a 12-quarter moving average of market values.

Macalester College
Spend 5.58% of a 16-quarter moving average of market values.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Madonna University

Spend 4.5% of the 12-quarter moving average of the endowment market value with March 31 as the base quarter.

Maine System, University of

Spend a prespecified percentage of a moving average of market values for pooled investments and spend all current income from separately invested endowments.

Marietta College

Spend the greater of \$1,100,000 or 5% of a 12-quarter moving market average.

Marquette University

True Endowment (General): Spend 5% of a three-year moving average of market values as of June 30.

True Endowment (Scholarship): Spending will reflect prevailing market rates.

Quasi-Endowment: Spend 5% of a three-year moving average of market values.

Mary Baldwin College

A stated amount of support is budgeted annually. If income is not sufficient to meet budget, then any amount remaining is drawn from realized gains from the endowment.

Maryland System and Foundation, University of

Increase spending by 4.5% each year. Spending must range between 4.5% and 6.5% of a six-quarter moving average of unit market values.

Maryville University (Missouri)

Endowed scholarships and other restricted endowment funds are spent directly from the endowment fund as well as external management and administrative fees. The current operating budget is supported by a transfer in from the endowment fund of 3% to 4% of the three-year moving average of the market values of the quasi-endowment fund.

Massachusetts, University of

The amount of endowment return available for expenditure was calculated at a rate of 5.5% at the endowment's average market value for the preceding 12 months. Each account is credited on a pro-rated basis, based on its applicable number of units.

Massachusetts Institute of Technology

Spend an amount equal to real investment returns over time relative to inflation. This amount should be determined in a manner that will meet the need for minimum fluctuations in distribution growth relative to both the rate of inflation and past distributions.

Medical College of Georgia

Spend all income above a prespecified level, unless prohibited by agreement.

Medical College of Hampton Roads Foundation

Spend all current realized interest income.

Medical College of Pennsylvania

Current income is available for spending.

Medical College of Wisconsin

Distribute 5.5% of the beginning market value plus 5.5% of one-half of current year's additions/gifts.

EXHIBIT 9
ENDOWMENT SPENDING RULES
FISCAL YEAR 1994

- Memphis, University of
Spend 4% to 6% of the foundation's balance of income-producing assets at the beginning of each year.
- Mercer University
Spend 6% of a three-year moving average of market values.
- Miami, University of
Spend 5% of a three-year moving average of market values.
- Miami University (Ohio)
Spend 5% of a 12-quarter moving average of pooled growth market values.
- Michigan, University of
Spend 5.5% of the one-quarter-lagged 12-quarter average share value.
- Michigan State University
Increase spending by 5% each year. Under specific market conditions, the spending rate could be frozen at the previous year's level or could be increased by 8%.
- Middlebury College
Distribute \$21.50 per income share to funds in the investment pool.
- Midway College, Inc.
Annual spending from the endowment shall be no more than 7.5% of the prior five-year moving average of market values with the rate gradually reduced to 5% percent.
- Millikin University
Spend 5% of a 12-quarter moving average of market values.
- Mills College
Spend 6% of a 12-quarter average of unit market values for the period ended December 31, 1992.
- Millsaps College
Spend 90% of net current income.
- Minnesota, University of
Spend 5.5% of a three-year moving average of market values.
- Minnesota Foundation, University of
Spend 5.5% of a 12-quarter moving average of market values.
- Mississippi, University of
Spend all current income.
- Mississippi State University and Foundation
Spend 5% of a three-year moving average.
- Missouri System, University of
Spend 5% of a 12-quarter moving average of endowment market values.
- Monmouth College (Illinois)
Spend 6% of a 12-quarter moving average of market values, set back one quarter.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Moravian College

Spend 6.25% of a three-year moving average of market values.

Mount Holyoke College

Spend up to 6% of a three-year moving average of market values.

Mount Mercy College

Spend up to 5% of an eight-quarter moving average of market values.

Mount Union College

Spend up to 4.5% of average endowment market values, plus the rate of inflation. All income will be spent; in certain years, accumulated capital gains will be used to supplement income received.

Muhlenberg College

Spend all earned income, up to 6% of the beginning market value.

National University

75% of annual interest earnings are deposited into expendable account.

Nazareth College of Rochester

Spend 5.75% of a 12-quarter moving average of market values.

Nebraska, University of

Spend the greater of (a) 5% of the 12-quarter moving average of the endowment market value, adjusted for new gifts; or (b) the previous year's spending.

Neumann College

Total return policy allows spending of all income, including realized and unrealized gains. However, the college has only been spending interest income.

Nevada and Community College System, University of

Spend 4.5% of a 12-quarter moving average of market values.

New Hampshire System, University of

Spend 5% of a three-year moving average of market values.

New Jersey, University of Medicine & Dentistry of

Spend an amount less than or equal to anticipated income. Expenditure of endowment principal and income is governed by the gift letter of each individual contributor.

New Jersey Institute of Technology

It is the university's policy to accumulate endowment earnings during the year of the initial gift and an entire year thereafter. Current use of earnings is generally limited to 5% of principal, with excess earnings being retained and available for subsequent awards.

New Mexico and Foundation, University of

Spend 5% of a 12-quarter moving average of unit market values unless total return is less than the 5% spending rate. In that case, spend only net current yield.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

New Mexico State University and Foundation

Total distributions for spending by colleges/departments shall not exceed 4% to 6% of the average market value of a unit of the principal of the funds for the last 12 quarters unless two-thirds of the investment committee vote otherwise. The target distribution for colleges/departments shall be 5%. Total distribution as administrative (management) fee to each endowment in the pool is 1.5% of the average market value of a unit of principal of the funds for the last 12 quarters.

SUNY, All Other Campuses

See SUNY, University at Buffalo and Foundation.

SUNY, University at Buffalo and Foundation

University at Buffalo: Spend 4% of a five-year moving average of endowment market values as of June 30, lagged one year.

University at Buffalo Foundation: Spend between 4.5% and 6.0% of a three-year moving average of quarterly calendar market values.

SUNY, HSC at Brooklyn, College of Medicine

See SUNY, University at Buffalo and Foundation.

SUNY, Health Science Center at Syracuse

See SUNY, University at Buffalo and Foundation.

SUNY, Potsdam College Foundation

Distribute 6% of current principal amount (book value) of endowment funds. Balance of total return after transfer is credited to the principal amount of each endowment fund.

SUNY, Stony Brook Foundation

Spend a percentage of a three-year moving average of market values.

New York Medical College

Spend 5.5% of book value of pooled investments.

New York University

Spend a portion of yield; the difference is added back to principal.

North Carolina at Asheville, University of

Spend 5.5% of a three-year moving average of market values.

North Carolina at Chapel Hill, University of

Increase spending each year by the rate of inflation. Spending must range between 4% and 7% of market value.

North Carolina at Greensboro, University of

Spend up to 5.5% of a three-year moving average of endowment market values as of December 31.

North Carolina State University

Spend 4% of a 12-quarter moving average of market values.

North Central College

Spend 6% of beginning market value at a rate of 1.5% per quarter.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

- North Texas, University of
Spend 5% of market value. This amount is subject to change annually by the foundation's board of trustees.
- Northeastern University
Spend 5.5% of a three-year moving average of market values.
- Northern Kentucky University Foundation, Inc.
The foundation's long-term target spending rate is 5% of the average endowment market value, based on a 12-quarter moving average of the endowment market value as of June 30 of the previous year.
- Northwestern University
Spend last year's total spending, increased by the Consumer Price Index, unless that total is more than 6% or less than 3.5% of a three-year moving average of the portfolio's market values.
- Norwich University
Spend 5% of a 12-quarter moving average of market values.
- Notre Dame, University of
Increase spending by 4% annually.
- Oakland University and Foundation
Spend 5% of a 12-quarter moving average of market values.
- Oberlin College
Spending is determined by a formula that gives 60% weight to the previous year's spending increased by the rate of growth of nonendowment unrestricted revenue, and 40% weight to a percentage of a 36-month moving average of market values.
- Occidental College
Spend 5% of a 12-quarter moving average of market values as of December 31.
- Ohio State University and Foundation
Spend 5.5% of a three-year moving average of market values per share.
- Ohio University
Spend 6% of a three-year moving average of market values as of December 31. If total return is greater than 6% plus the rate of increase in the Higher Education Price Index, spend up to 9%.
- Ohio Wesleyan University
Spend a fixed percentage (varies by year) of the prior year's beginning market value.
- Oklahoma and Foundation, University of
Spend 5.25% of a 20-quarter weighted moving average of market values.
- Oklahoma State University Foundation
Spend 5% of the balance of endowments established prior to March 1, 1993, with any excess being added to principal. Spend 4% of the balance of endowments established after March 1, 1993, with any excess being added to principal. Beginning in July 1994, all endowments will spend 4% of the balance of the endowment with any excess being added to the principal.

EXHIBIT 9
ENDOWMENT SPENDING RULES
FISCAL YEAR 1994

- Oregon Health Sciences University Foundation
Spend 5% of a three-year moving average of market values.
- Oregon State Board of Higher Education
Spend 5.5% of a five-year moving average of market values.
- Oregon State University Foundation
Spend 5.5% of a 12-quarter moving average of market values.
- Ouachita Baptist University
Spend all current income.
- Ozarks, University of the
Spend 6% of the 12-quarter moving average of market values.
- College of the Ozarks
Spend interest and dividends; reinvest capital gains in the endowment.
- Pennsylvania, University of
Spend 5.5% of a three-year moving average of market values.
- Pennsylvania State University
Spend approximately 5% of the beginning market value.
- Philadelphia College of Pharmacy and Science
Spend up to \$3 million of the nonscholarship unrestricted endowment. Spend up to \$260,000 of the scholarship unrestricted endowment and \$190,000 of the scholarship restricted endowment.
- Philadelphia College of Textiles and Science
Spend 5% of a three-year moving average of market values.
- Pittsburg State University
Spend 5% of a three-year moving average of market values.
- Pittsburgh, University of
Increase spending by 4% each fiscal year.
- Pitzer College
Spend 6.1% of a three-year moving average of market values.
- Plattsburgh College Foundation
Out of income earned expressed as a percentage of the market value, reinvest 1% to endowment principal, transfer 1% to unrestricted endowment, and spend the remainder.
- Pomona College
Spend between 4.5% and 5.5% of a 12-quarter moving average of market values.
- Presbyterian College
Spend 5.5% of the beginning market value.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Princeton University

Spend a portion of investment income earned by the primary pool in the previous fiscal year. Net income available per unit is increased by 6% over the previous year. Income earned in excess of spending is reinvested quarterly in principal.

Puget Sound, University of

Adjust spending for inflation and additions to the pool.

Purdue University

Distribute interest and dividends net of expenses semiannually, plus an annual bonus from realized gains if equity growth exceeds inflation for the calendar year. Annual distribution of earnings and equity is intended to be 4% of the endowment portfolio's market value at year end. Distributions to individual participants are adjusted for participation during the respective period.

Radcliffe College

Increase spending by 5% annually.

Randolph-Macon College

Spend 5% of a 12-quarter moving average of market values as of December 31.

Randolph-Macon Woman's College

Spend 7.35% of a 12-quarter moving average of market values for restricted income. Spend all unrestricted income.

Redlands, University of

Spend 5.5% of a three-year moving average of market values.

Reed College

Spend 6.0% of the average market value as determined by a 13-quarter moving average evaluated as of December 30 of each year.

Regent University

Spend all current income, taking into consideration donor restrictions.

Regis College (Massachusetts)

Spend 5% to 6% of a three-year moving average of endowment market values.

Regis University (Colorado)

The investment subcommittee of the finance committee annually establishes a rate which is applied to the beginning book value.

Rensselaer Polytechnic Institute

Spend 6% of a four-year moving average of endowment market values. The goal is to reduce spending to 5% by fiscal year 1999.

Rhode Island Foundation, University of

Spend 5% of the average of the past two years' March 31 market values for fiscal year 1995.

Rhode Island School of Design

Endowment income distributed to current funds is based upon a rate of 5% of the endowment fund's three-year average of market values. If the actual endowment income received is greater or less than this formula amount, funds functioning as endowment are added to or availed of, respectively.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Rhodes College

Spend 5% of a two-year moving average of market values as of June 30.

Rice University

For planning purposes, increase endowment distribution by 6% for fiscal years 1993 and 1994, and by 5.9% for fiscal year 1995. Projected endowment distribution should fall within a band defined by a minimum of 4% and a maximum of 7% of a three-year moving average of market values.

Richmond, University of

Increase spending by 6% each year. Spending rate must range between 4% and 6% of a three-year moving average of market values.

Rider University

Spend a percentage of a three-year moving average of market values as of December 31.

Ripon College

Spend 5% of a 20-quarter moving average of endowment market values.

Roanoke College

Spend 5% of a three-year moving average of market values.

Rochester, University of

Spend 5.5% of a five-year moving average of market values.

Rochester Institute of Technology

Spend 5% of the average of beginning unit values for the previous 20 quarters ending March 31 of the preceding fiscal year.

Rockefeller University

Spend an amount equal to 5% of a three-year moving average of market values of the endowment and similar funds.

Rockhurst University

Spend 5% to 6% of a three-year moving average of market values.

Rollins College

Spend 6% of a three-year moving average of market values.

Rose-Hulman Institute of Technology

Generally, 50% of the commingled endowment fund income is spent annually, and 50% is reinvested in the fund.

Rowan College Foundation

The amount of funds available for spending is the total return on investments less an amount set aside for inflation.

Rush University

Spend 6% of a 16-quarter moving average of market values of the endowment pool as well as all earned income on other investments. (1% is assessed as an administrative fee, 5% is distributed for spending).

Rutgers, The State University

Spend 4.5% of a three-year moving average of market values.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

- The Sage Colleges
Spend 6.3% of a three-year moving average of market values.
- St. Bonaventure University
Spend 5% of a three-year moving average of market values.
- St. John's College (Maryland)
Spend a prespecified percentage of the market value as of December 31 of the previous calendar year.
- St. John's University (Minnesota)
Spend 6% of the previous fiscal year's ending market value.
- St. Lawrence University
Spend 6% of a 12-quarter moving average of market values ended March 31.
- Saint Louis University
Spend a fixed percentage of a moving average of the market value of the previous 12 quarters ended June 30, 1993.
- St. Mary's University (Texas)
The university adapted the endowment spending rule at 5.25% of a three-year moving average of market values.
- Saint Michael's College
Spending rate of 4.5% of the market value of pool based on previous year's June 30 value. Generally, averages are about 4% for endowment and quasi-endowment. Plant spending rate will depend on what major projects are planned.
- Saint Norbert College
Spend 6% of a 12-quarter moving average of market values for the period preceding the development of the budget, plus a small amount for income expected to be generated from new gifts. Spending must be no less than the previous year's budgeted amount.
- St. Olaf College
Spend 6% of a 12-quarter moving average of market values.
- St. Thomas, University of
Decide on an appropriate rate each year. The guideline is based on an expected total return over the long term, less expected inflation.
- Salem Academy and College
Spend a prespecified percentage of a three-year moving average of market values.
- San Diego State University Foundation
Spend all current income.
- San Francisco, University of
Spend 4.75% of a three-year moving average of market values.
- Santa Clara University
Spend 5% of a three-year moving average of ending market values.

EXHIBIT 9
ENDOWMENT SPENDING RULES
FISCAL YEAR 1994

Sarah Lawrence College

Spend 6% of an eight-quarter moving average of market values.

Scranton, University of

Spend 5% of a two-year average of market values.

Scripps College

Spend 5.9% of the average market value. If the ordinary income of pooled investments is insufficient to promote the full amount, the balance can be appropriated from realized gains of the pooled investments.

Seattle Pacific University

Spend 5% of a three-year moving average of market values as of December 31.

Seattle University

True Endowment: Spend 5% of an eight-quarter moving average of market values as of December 31.

Quasi-Endowment: Spend 5.5% of an eight-quarter moving average of market values as of December 31.

Seneca, Inc., The Colleges of the

Spend 5% of a three-year moving average calculated quarterly of market values as of May 31.

Seton Hall University

Spend all current income.

Shenandoah University

Spend 5% of the endowment market value as of December 31 of the previous year.

Simmons College

Spend 5% of a three-year moving average of market values, set back one year.

Simpson College (Iowa)

Spend 5% of a three-year moving average of market values as of December 31.

Skidmore College

Spend 5% of a three-year weighted average of market values as of December 31. The college commenced a major capital campaign in fiscal year 1994, which is predominantly focused on raising endowment funds. During the life of the campaign (estimated to be four to five years), incremental costs associated with the campaign will be added to the endowment spending formula in order to reimburse the current fund for these costs.

Smith College

Spend 5.65% of a 12-month moving average of market values as of March 31 of the previous year, adjusted for net additions.

South, University of the

Spend 6% of the average market value of managed funds for the 12 quarters ended one year before the beginning of the current fiscal year.

South Alabama, The University of

Spend a prespecified percentage of current income. The current spending rate is 5%.

EXHIBIT 9
ENDOWMENT SPENDING RULES
FISCAL YEAR 1994

- South Carolina System, University of
Spend all available income under endowment restrictions.
- South Dakota and Foundation, University of
Spend 6% of the 12-quarter moving average of market values.
- South Florida Foundation, University of
Eminent scholars endowment: Spend 6.4% of a five-year moving average of market values.
All other endowments: Spend 5.75% of a five-year moving average of market values.
- Southeast Missouri University Foundation
A distribution of 5% of the average quarterly balance for the previous year is provided annually as long as the net return equals or exceeds 5.5%.
- Southern California, University of
Increase spending by 5% each year. Spending must range between 4% and 6% of a 12-quarter moving average of market values as of December 31 of the previous year.
- Southern California College of Optometry
Spend up to 5% of a three-year moving average of market values, excluding land held for investment purposes.
- Southern Illinois University Foundation
Spend all current income; reinvest capital gains in the fund.
- Southern Methodist University
Spend a percentage of a 12-quarter moving average of market values.
- Southwest Missouri State University Foundation
Spend 5% of a three-year moving average of endowment market values.
- Southwest Texas State University
Decide on an appropriate rate each year.
- Southwestern University
Spend 6.0% of a three-year moving average of market values.
- Spelman College
Spend 4.75% of a four-year moving average of market values with specific weight given to each year.
- Stanford University
A model determining payment is based on (a) a target of 4.75% of expected market value; or (b) budget needs. The smoothing rule is applied to this combination. Fiscal year 1993 was the first of a two-year exception to the 4.75% target payment model. The current target is 6.75%.
- Stetson University, John B.
Spend 5.25% of the previous year's market value.
- Stevens Institute of Technology
Spend 6.5% of a three-year moving average of market values.
- Stonehill College, Inc.
Spend 5% of a three-year moving average of market values.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Suffolk University

Spend only the necessary income.

Susquehanna University

Spend the lesser of (a) the actual yield from the previous calendar year; or (b) 5% of a three-year moving average of market values.

Swarthmore College

Increase spending each year by a weighted average of the change in the Consumer Price Index plus 1% (weighted 80%) and the growth in the unit market value of the endowment (weighted 20%), all calculated on a per unit distribution and applied to units outstanding. Spending should range between 3.75% and 4.75% of market value.

Sweet Briar College

Increase spending by no more than 4% above the previous year's amount.

Syracuse University

Spend a predetermined rate per unit consisting of all income and a portion of realized gains, with a ceiling of 6.5% of the average market value.

Teachers College, Columbia University

Spend 6% of a 16-quarter moving average of market values.

Temple University

Spend all current income.

Tennessee System, University of

Separately invested funds: Spend all current income.

Pooled funds: Spend 5% of a three-year average market value calculated at December 31.

Texas System, University of

The endowment of the University of Texas System is made up primarily by the permanent university fund and the common trust fund. All income from the permanent university fund is paid out as mandated by the state constitution. The spending policy for the common trust fund is set by the board of regents.

Texas Christian University

Major Investment Portfolios: Spend up to 6% of a nine-quarter, time-weighted moving average of market values as of June 30.

Mineral Income: Transfer to endowment no less than 40% of all net oil and gas revenues.

Texas Tech University

Spend all income except for certain endowment funds which add a percentage of their revenue to principal.

Thomas Jefferson University

Spend within a band of 4% to 6% of the three-year moving average of market values.

Spending will increase by the Consumer Price Index over the previous year's spending as long as it is within the band.

Toledo and Foundation, University of

Spend 5% of a three-year moving average of endowment market values.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Toronto, University of

The payout amount is determined each year in advance by the university administration, as per policy based on: (a) the payout for the previous year; (b) an estimate of inflation for the upcoming year; and (c) an adjustment for the estimated and actual Consumer Price Index of the previous year. Over time, the target rate is the real rate of return (currently considered 5%).

Transylvania University

Decide on an appropriate rate each year.

Trinity College (Connecticut)

Spend 5% of a one-year, lagged, 12-quarter moving average of market values.

Trinity University (Texas)

Spend 6.5% to 7% of a three-year moving average of market values.

Tufts University

Increase spending by 5% each year, adjusted for additions.

Tulane University

Base spending is 6% of fiscal year 1989 market value. Increase spending 4% each year, adjusting for additions.

Tulsa, University of

Spend 5.5% of a two-year moving average of market values. Rate must be approved by the board of trustees.

Union College (New York)

Spend 5.45% of a moving average of 1990, 1991, and 1992 June market values.

Ursinus College

Spend 6.5% of a 12-quarter moving average of market values.

Utah, University of

For the unit value pool: Spend 5% of a 12-quarter moving average of endowment unit market values as of the previous December 31.

For other pools: Spend all current income except when donor restricted.

Vassar College

Increase the per unit spending each year by the percentage increase in the Higher Education Price Index provided that the resulting distribution is between 4.5% and 6% of the three-year moving average of unit market values.

Vermont, University of

Spend 4.5% of a weighted average of market values.

Villanova University

Spend 5% of a three-year moving average of endowment market values and quasi-endowment investments as of December 31 of the previous year.

Virginia, University of

Distributable income per share should represent approximately 4% of the previous June 30 market value and grow at a rate of 4%. If in October of any given year the projected distributable income is greater than 5.5% or less than 3.5% of the previous June 30 market value, the set distribution may be adjusted.

EXHIBIT 9**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994****Virginia Commonwealth University**

For majority of the endowment, spend 5% of a three-year moving average of market values.

Virginia Tech Foundation

Spending is adjusted annually by the preceding year's inflation rate. Total endowment spending must fall within a 150-basis-point range determined by historical real returns. Current range is 5.35% to 6.85%.

VMI Foundation, Inc.

Spend 5.5% of a 12-quarter moving average of market values.

Wabash College

Spend 6% more than previous year as long as spending is at least 4% and no more than 6.9% of a 12-quarter moving average of market values.

Wake Forest University

Spend 5.7% of a three-year moving average of unit market values.

Warren Wilson College, Inc.

Spend 6.5% of a 12-quarter moving average of market values as of March 31.

Washburn Endowment Association

Spend all current income.

Washington, University of

Spend 5% of a three-year moving average of market values, not to exceed prior year's spending by more than 5%.

Washington and Jefferson College

Spend all current income.

Washington & Lee University

Spend the lesser of (a) the prior year's spending increased by inflation plus 1%; or (b) 6% of a three-year moving average of market values.

Washington State University

Spend 6% of market value per year from the consolidated endowment funds. The distribution is made quarterly based on the market value at the beginning of the current quarter. In the land-grant endowment, all current income is spent.

Washington University

Spending must fall within 3% to 6% of the unit value of the pooled endowment based on a five-year moving average of market values. Within this parameter, the spending rate will increase at the rate of the Consumer Price Index plus 0.5%, calculated on a three-year moving average.

Wayne State University

Distribute semiannually from income and realized capital gains using 2.5% of a five-semiannual-period moving average of market values.

Webb Institute of Naval Architecture

Spend all income. Capital additions are supported by income and appreciation of the endowment.

EXHIBIT 9

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1994**

Wellesley College

Endowment spending shall be between 4.5% and 6% of a moving average of the endowment market value.

Wells College

Spend income equal to 5% of a 12-quarter moving average of endowment market values.

Wentworth Institute of Technology

Spend 5% of a trailing three-year average of market values.

Wesleyan University

Spend 5% of a seven-quarter moving average of market values as of December 31.

West Virginia University Foundation, Inc.

The spending policy makes a percentage of the 12-quarter average portfolio balance available to the university, provided that the original endowment principal is never spent. The rate presently established for purposes of the spending formula is 5%.

Western Illinois University Foundation

Spend 5% of the previous year's ending book value.

Western Maryland College

A five-year moving average of the (weighted) real total net rate of return on externally managed assets is applied to the market value of the managed assets as of the close of the calendar year. The maximum draw is 6.5%.

Western Michigan University Foundation

Most of the endowment participants have access to all income and a percentage of the appreciation. The amount tapped is based on donor contract -- some administrators choose to leave income in the endowment and allow the total value of the endowment to increase. Last year, approximately 5% of the market value was distributed.

Western New England College

Spend 5% of the average market value of the true endowment for the 13 preceding quarters as calculated annually on December 31.

Westminster College (Pennsylvania)

Spend all current income.

Westminster College of Salt Lake City

Spend 5% of a 12-quarter moving average of market values.

Wheaton College (Illinois)

The targeted spending amount for each fund not otherwise restricted will be calculated at 5% of the three-year moving average market value of the fund. Each year, the budget for this spending amount will be increased by the average projected percentage increase of the college's overall budget. However, the spending budget shall not exceed 5.5% nor fall below 3.5% of the three-year moving average market value of the fund's assets without the approval of the finance committee.

Wheaton College (Massachusetts)

Spend 5% of a 12-quarter moving average of market values as of June 30. (Actual fiscal year 1994 spending was 6%.)

EXHIBIT 9
ENDOWMENT SPENDING RULES
FISCAL YEAR 1994

Whitman College

Maintain spending based on a three-year moving average of market values.

Whitworth College

Spend 4.77% of a five-year moving average of endowment market values.

Wichita State University

Spend 5% of a three-year moving average of endowment market values.

Widener University

Allocate (a) 50% of investment income to the current restricted fund; (b) 42% of investment income to the current unrestricted fund; and (c) 8% of investment income to the endowment fund.

William & Mary, Endowment Assoc. of the College of

Spend 5.5% of a three-year moving average of market values as of December 31.

Willamette University

Spend 6% of an eight-quarter moving average of market values for the investment pool. Spend 4% of an eight-quarter moving average of market values for other major funds.

Williams College

Spend a prespecified percentage of prior year's spending, currently 104.5%. Income earned in the first year of a new endowment is returned to principal.

Wilson College

Spend up to a fixed amount which is at a reducing percentage each year.

Wisconsin Foundation, University of

Spend actual earnings.

Woods Hole Oceanographic Institution

Increase spending by 5% annually. Spending must range between 4% and 5.5% of current year's market value.

Wooster, College of

Spend 6.8% of a 12-quarter moving average of market values.

Worcester Polytechnic Institute

Spend 5.5% of a two-year moving average of market values as of June 30.

Wyoming, University of

Decide on an appropriate rate each year.

Xavier University (Ohio)

Spend 5% of a three-year moving average of market values.

Yale University

A long-term spending rate of 4.75% is used with a smoothing rule which reduces the volatility of spending levels. Spending for a given year is equal to 30% of the long-term spending rate of 4.75% applied to the endowment's current market value, plus 70% of spending in the previous year, adjusted for inflation.

EXHIBIT 9
ENDOWMENT SPENDING RULES
FISCAL YEAR 1994

Yeshiva University
Spend 5.5% of July 1, 1993, unit market value.

Youngstown State University and Foundation
Spend all current income.

EXHIBIT 10

ENDOWMENT GIFT FLOW RATES (%)
FISCAL YEAR 1994

<u>Responding Institutions</u>	<u>Endowment Gift Flow Rate</u>
In Aggregate	
Equal-Weighted Mean	6.9
Dollar-Weighted Mean	5.1
Median	4.4
By Endowment Size (Equal-Weighted Mean)	
\$25 million and under	10.0
Over \$25 million to \$100 million	6.6
Over \$100 million to \$400 million	5.6
Over \$400 million	4.4
By Type (Equal-Weighted Mean)	
Public	10.4
Private	5.3

Note: Endowment gift flow rate is gifts, bequests, and other similar additions to endowment as a percentage of the average of fiscal year beginning and ending endowment market values.

EXHIBIT 11

PART III

APPENDIXES

APPENDIX A

GLOSSARY

Annuity Funds -- Assets donated by individuals or organizations with the stipulation that the institution bind itself to pay stipulated amounts to the donor or designated beneficiaries. Payments terminate at a specified time.

Asset Allocation -- The distribution of endowment or investment pool assets among various asset classes, including but not limited to domestic common stock, foreign currency common stock, domestic fixed income, foreign currency fixed income, cash and cash equivalents, real estate, venture capital, buyouts, oil and gas, and distressed obligations.

Buyout -- The acquisition of an existing company by a new corporation formed for the sole purpose of the acquisition.

Campus Real Estate -- Real estate owned in or around the campus and held primarily for noninvestment purposes.

Cash and Cash Equivalents -- Short-term liquid assets (e.g., Treasury bills, commercial paper, certificates of deposit, and nonconvertible bonds with remaining maturities of under one year).

Common Stocks -- Ownership positions in companies that can be traded. Often produce current income, which is paid in the form of quarterly dividends. The common stockholders' claims are subordinate to the claims of preferred stockholders and bondholders.

Custodial Fees -- Charges incurred for the guaranteed safekeeping of assets by an individual, bank, or other external firm.

Dollar-Weighted Mean -- The sum of a set of figures where each figure is weighted by its proportional representation in a specific universe. For example, if there are ten institutions in a universe, nine of which have investment pools of \$9 million and the tenth of which has an investment pool of \$19 million, the dollar-weighted mean return on all ten pools will be the sum of .09 times the individual returns on each of the nine \$9 million pools (.81 weighting in total) plus .19 times the return on the \$19 million pool (.19 weighting).

Endowment -- Assets donated by individuals or organizations to provide permanent capital and an ongoing stream of current income for an institution. Includes one or more of the following components-- true endowment, term endowment, quasi-endowment, and funds held in trust by others-- and generally excludes life income and annuity funds.

Endowment Current Income -- The sum of stock dividends, bond interest, cash equivalent interest, rents, royalties, and other net cash flows earned by assets held in the endowment over a specified period of time. Does not include principal appreciation.

Equal-Weighted Mean -- The sum of a set of figures divided by the number of figures in the set.

Equity Real Estate -- Ownership positions in land and buildings. Includes mortgages or land leases that include participation in revenues and capital appreciation. Does not include publicly traded real estate investment trusts, which are classified as common stock.

Externally Managed Assets -- Assets, including pooled assets, managed by individuals or firms outside an institution.

Faculty Mortgages -- Homeownership loans issued by an institution to faculty or staff.

Financial Futures -- Contracts for the delivery of fixed income securities or currencies at a prespecified transaction price on a predetermined future date.

Full-Time Equivalent (FTE) Students -- The number of all students expressed as full-time credit-hour loads (e.g., two half-time students equal one full-time equivalent student).

Funds Held in Trust by Others -- Assets donated by individuals or organizations to an institution that are held and managed by individuals or firms outside the institution.

Gift Flow Rates -- Gifts as a percentage of the average of beginning and ending endowment market values.

Internally Managed Assets -- Assets managed by individuals or committees within an institution.

Investment Manager -- An individual, firm, or committee, inside or outside the institution, responsible for making decisions to buy, hold, or sell assets. Also known as a money manager or an investment advisor.

Investment Management Fees -- Charges incurred for the external or internal management of assets.

Investment Pool -- The group of assets that an institution deems best represents its investment policies and endowment asset allocation and returns. May include current operating funds.

Life Income Funds -- Assets donated by individuals or organizations on the condition that the institution bind itself to pay a specified level of income, expressed as a percentage of donated assets or as a dollar amount, to the donor or designated beneficiary for the lifetime of such beneficiaries. After the death of the beneficiaries, the institution gains complete ownership of the donated assets. Generally not considered part of an endowment while income is paid to beneficiaries.

Marketable Securities -- Stocks, bonds, or notes that are traded in the marketplace.

Median -- The value that divides any given data distribution into two equal parts.

Mortgage Real Estate -- A fixed income debt security collateralized by real property.

Noncampus Real Estate -- Real estate purchased or retained strictly for investment purposes.

Nonconvertible Bonds -- Long-term promissory notes that cannot be exchanged for other assets. Generally earn interest (coupon rate) paid semiannually and are repaid at the principal (par) value.

Nonmarketable Securities -- Investments that are not traded in the marketplace, including but not limited to venture capital, buyouts, and oil and gas.

Quasi-Endowment -- Assets donated by individuals or organizations to an institution that the institution's governing board has decided to treat as permanent capital. Because this decision is optional, principal as well as income may be expended if the board so chooses.

Spending -- The amount withdrawn from an investment pool or total endowment and not returned to it.

Spending Rate -- The dollar amount of spending for a fiscal year as a percentage of the beginning market value of assets.

Spending Rule -- The guideline that an institution uses to determine annual distributions from its endowment (e.g., spend all income, spend 5% of three-year moving average market value, increase spending by 5% each year).

Term Endowment -- Assets donated by individuals or organizations to an institution with the understanding that all or part of the principal may be expended after a stated period of time or the occurrence of a particular event. The income earned is available for expenditure by the institution.

Total Return -- The sum of income earned and appreciation, both realized and unrealized, for a specified period of time. If unit accounting is used, the return for a period is calculated by taking the difference between the ending and beginning unit values, plus unit income earned, then dividing this amount by the beginning unit value.

True Endowment -- Assets donated by individuals or organizations to an institution as permanent capital. Usually only income is spent, although in many cases applicable law provides for the expenditure each year of a defined portion of principal, if a governing board so authorizes.

Unit Income -- Income earned by each unit of an investment pool for a specified period of time.

Unit Spending -- Amount spent per unit of an investment pool for a specified period of time.

Unit Value -- The market value of each unit of an investment pool on a specified date. The unit value is adjusted when principal is added to or withdrawn from an investment pool.

Venture Capital -- Investments in nonmarketable securities of new companies with high risk and the potential for high return.

APPENDIX B

DESCRIPTIONS OF MARKET INDEXES

Altman-Merrill Defaulted Debt Index

The Altman-Merrill Defaulted Debt Index includes all public, nonconvertible corporate debt issues that have either filed for bankruptcy or defaulted on a scheduled interest or principal payment. The index can therefore be used as a benchmark for publicly traded distressed securities, but it should be noted that it does not include private issues.

Lehman Brothers Aggregate Bond Index

The Lehman Brothers Aggregate Bond Index is made up of the Lehman Brothers Government/Corporate Bond Index, the Lehman Brothers Mortgage-Backed Securities Index, and the Lehman Brothers Asset-Backed Securities Index. The Lehman Brothers Government/Corporate Bond Index includes all bonds in Lehman Brothers Government and Corporate Bond indexes. The mortgage index includes various 15- and 30-year government-backed mortgage pools while the asset-backed index is comprised of credit card, auto, and home equity loans.

Lehman Brothers Mortgage-Backed Securities Index

The Lehman Brothers Mortgage-Backed Securities Index includes 15- and 30-year fixed-rate securities that are backed by various government mortgage pools. Graduated-payment mortgages and balloons are included in the index; buydowns, manufactured homes, and graduated equity mortgages are not.

Morgan Stanley Capital International Europe, Australia, and Far East (EAFE) Index

The EAFE index includes approximately 1,000 companies representing the stock markets of Europe, Australia, New Zealand, and the Far East. The objective of the index is to measure, in U.S. dollars, the total return of the stock markets of the component countries. Because the representation of each country in the index is weighted by market capitalization, Japan accounts for approximately 48% of the total. Morgan Stanley also publishes subindexes composed of parts of EAFE (e.g., EASEA, which is EAFE excluding Japan).

Russell-NCREIF Property Index

The Russell-NCREIF Property Index measures the historical performance of income-producing properties owned by commingled funds on behalf of qualified pension and profit-sharing trusts, or owned directly by these trusts and managed on a separate-account basis. Only unleveraged properties (properties owned free of any debt) are included.

S&P 500 Index

Although it includes stocks traded on the American Stock Exchange and the NASDAQ National Market System, the S&P 500 Index is designed to replicate the broad industry groupings of all issues listed on the New York Stock Exchange and to reflect the price movement of common stocks in general. Prior to 1988, the index included 400 industrials, 40 utilities, 40 financials, and 20 transportation stocks. In

S&P 500 Index (continued)

1988, Standard & Poor's Corporation abandoned these rigorous groupings in favor of more flexible selection criteria. This decision did not result in material changes in the composition of the S&P 500, but it should be noted that the high incidence of mergers and acquisitions in recent years has resulted in more companies of smaller capitalization being included in the index. Nevertheless, because the index is capitalization weighted, the largest 100 issues constitute 64% of its total market value. Additions to and deletions from the index are selected by the S&P Index Committee on the basis of size, industry classification, capitalization, trading volume, turnover, and stock price. The index may be broken down into more than 80 subindexes categorized by industry group.

Salomon Brothers High-Yield Market Index

The Salomon Brothers High-Yield Market Index is composed of public, nonconvertible, nonfloating-rate, cash-pay, and deferred-interest securities. The maximum quality rating of a security is Ba1 by Moody's or BB+ by Standard & Poor's. Bankrupt and defaulted company securities are not included.

Salomon Brothers Non-U.S. Dollar Bond Index

The Salomon Brothers Non-U.S. Dollar Bond Index attempts to measure the total return of high-quality (AA-rated or better) bonds in 43 sectors of the fixed income markets in eight countries, including Eurodollar- and ECU-denominated issues. The index includes all outstanding securities with maturities of five years or more issued by the governments of Canada, Germany, Japan, the United Kingdom, Switzerland, the Netherlands, France, and Australia, plus representative Eurodollar and foreign corporate issues. Currency changes are not included. Returns are published monthly and the index is reweighted annually. Subindexes exist for each component country, broken down both by market sector and by maturity.

Wilshire 5000 Index

The Wilshire 5000 Index seeks to measure the total return of all U.S. common stocks with readily available price data. Almost 6,000 security returns are used in its construction, but since it is capitalization weighted, approximately 71% of its total market value is composed of S&P 500 stocks.

Foreword

Because skillful endowment management is crucial to the financial well-being of America's colleges and universities, the annual NACUBO Endowment Study (NES) seeks to help administrators and trustees evaluate the performance of their endowments and to acquaint them with the investment policies and practices of other higher education institutions.

First published in 1971, the NES was originally based on a prior survey conducted by administrators at Dartmouth College. The earliest editions focused solely on investment performance, but subsequent years have seen the NES expand to include a broad variety of issues of concern to trustees and administrators, including asset allocation, spending rates, and manager and custodial relationships. As the most comprehensive published source of data on college and university endowments, the NES has become the authoritative guide to the investment management practices and trends of these institutions.

Acknowledgments

This study was prepared under the direction of NACUBO by Cambridge Associates, Inc. Cambridge Associates provides investment and financial research and consulting services to nonprofit endowed institutions. The firm has offices in Boston, Washington, D.C., San Francisco, and London. NACUBO would like to thank Cambridge Associates for its fine work in preparing this study and in administering the questionnaires on which it is based.

NACUBO would also like to acknowledge the financial support provided by the firms identified in this volume and in the recognition booklet. Without their generous contributions, NACUBO could not publish so comprehensive an analysis of endowment management practices.

Notes on Data

Data Collection: NACUBO encourages all its member institutions with endowment assets in excess of \$1 million to participate in the NACUBO Endowment Study. In August 1994, NES questionnaires were mailed to 600 colleges and universities with the request that they be returned by September 16, 1994.

Endowment Data: Of the 600 institutions surveyed, 447 (75%) responded. Of these, 388 (87%) provided endowment market values as of June 30. The next most common fiscal year-end date is May 31 (11%).

Investment Pool Data: Of the 430 respondents providing investment pool data, 390 (91%) provided data as of June 30, 1994; 37 (9%) provided data as of May 31, 1994; and three reported data as of other dates. To make cross-institutional comparisons more meaningful, certain data presented in Part II (e.g., individual investment pool asset allocation and return) are grouped according to year ending dates.

Because some institutions were unable to complete certain sections of the 1994 NES questionnaire, not all institutions are included in every exhibit. Where an exhibit is based on data derived from significantly fewer than all survey participants, that fact is footnoted.

Three Definitions of "Average" Used in the 1994 NES: Except where otherwise noted in the text or exhibits, the "average" for any set of data (whether returns, asset allocation, or other characteristics) is the **equal-weighted mean**. The **dollar-weighted mean** and the **median** are also cited for some data sets.

The **median** is the value that divides into two equal parts any given distribution of data (e.g., fiscal year 1994 returns for investment pools). Because the **dollar-weighted mean** provides as precise a measure as possible of the actual return produced by the **aggregate** investment assets of participating institutions, it is in many respects a more useful average than the equal-weighted mean. The deficiency of **equal-weighted means** is that they are in some respects misleading because they ignore the effects of the extreme concentration of endowment wealth among a relatively small percentage of participants in the NES.

Real Rate of Return: The real, or inflation-adjusted, rate of return for a given investment is calculated by dividing the nominal total return by the appropriate deflator for the same time period. Throughout the 1994 NES, the deflation measure used for this purpose is the Consumer Price Index (CPI-W). Note that simply subtracting the deflator from the nominal total return does not result in an accurate computation of real total return. The formula is as follows:

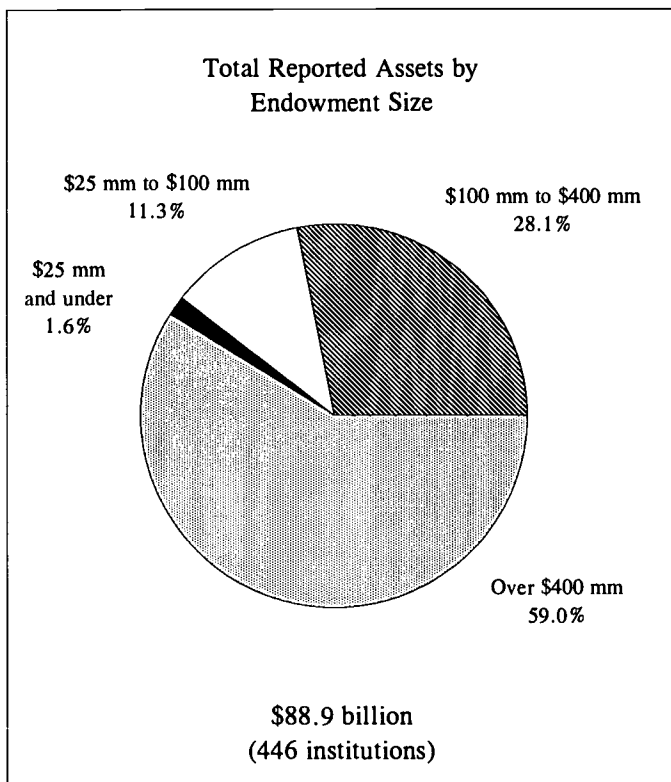

$$\frac{1 + \text{Nominal Total Return}}{1 + \text{Deflator}} - 1 = \text{Real Total Return}$$

Foundations: For those institutions (typically public) for which an independent foundation is the repository of endowment assets, no distinction has been drawn between the foundation and the institution itself.

ENDOWMENT CHARACTERISTICS

ENDOWMENT CHARACTERISTICS

FISCAL YEAR 1994

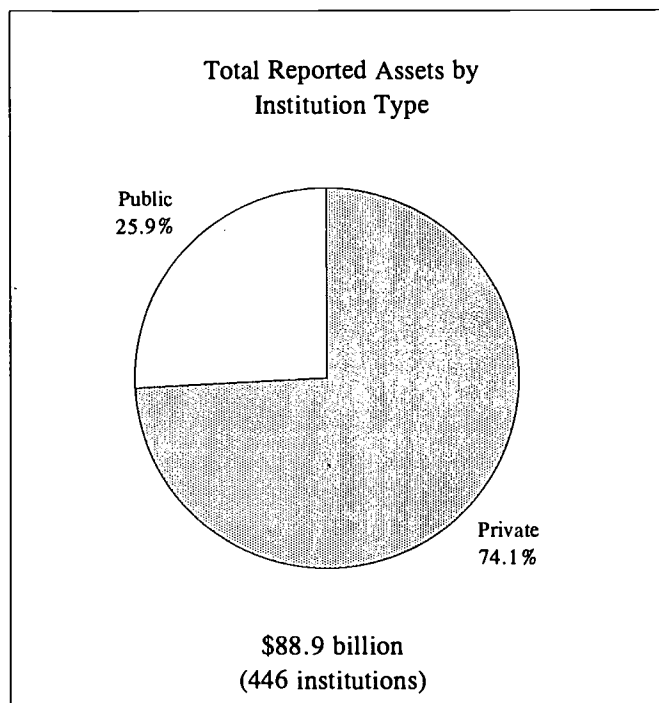

ENDOWMENT ASSETS

- ◆ 447 institutions participated in the 1994 NACUBO Endowment Study (NES) and 446 reported endowment assets totaling \$88.9 billion.
- ◆ This wealth remains highly concentrated; only 41 of these 446 schools have assets in excess of \$400 million yet they control 59% of the total.
- ◆ The largest endowment among all participating institutions continues to be that of Harvard University (\$6.2 billion), while the University of Texas System (\$4.5 billion) is the largest among participating public institutions.
- ◆ The participating public institution with the greatest endowment assets per FTE student is the Virginia Military Institute Foundation (\$93,465 per FTE student). Among private institutions, the highest ranking is the Academy of the New Church (\$551,290 per FTE student).

PUBLIC AND PRIVATE INSTITUTIONS

- ◆ The study includes 308 private and 138 public institutions.
- ◆ Slightly more than one-half of the public institutions in this year's NES are research universities, and they hold 87% of the public sector endowment assets.
- ◆ Among the private institutions participating, only 38 (or 12%) are research universities, but their portion of the private institutions' aggregate endowment assets is 61%.
- ◆ 49% of the private institutions included in the study are baccalaureate schools (i.e., liberal arts), and these control 23% of the private institutions' aggregate endowment assets.

ENDOWMENT CHARACTERISTICS

FISCAL YEAR 1994

HISTORICAL ENDOWMENT GROWTH AND MARKET INDEXES

- ◆ The nominal NACUBO Endowment Wealth Index (NEWI) is based on the median annual change in the aggregate endowment market value of participating institutions, and changes reflect investment returns, spending, and new gifts. The Higher Education Price Index (HEPI) measures yearly price changes in over 100 items purchased by colleges and universities for their current operations and serves as a measure of price inflation.
- ◆ Over the 15-year period ended June 30, 1994, the NEWI rose approximately 421%, compared with increases of 676% for the S&P 500, 647% for the Wilshire 5000, 342% for the Lehman Brothers Aggregate Bond Index, and 131% for the HEPI. In real terms (i.e., deflated by the CPI-W), the NEWI has increased 161% in this 15-year period, which translates into average annual real growth of approximately 6.6%.

ENDOWMENT CHARACTERISTICS

FISCAL YEAR 1994

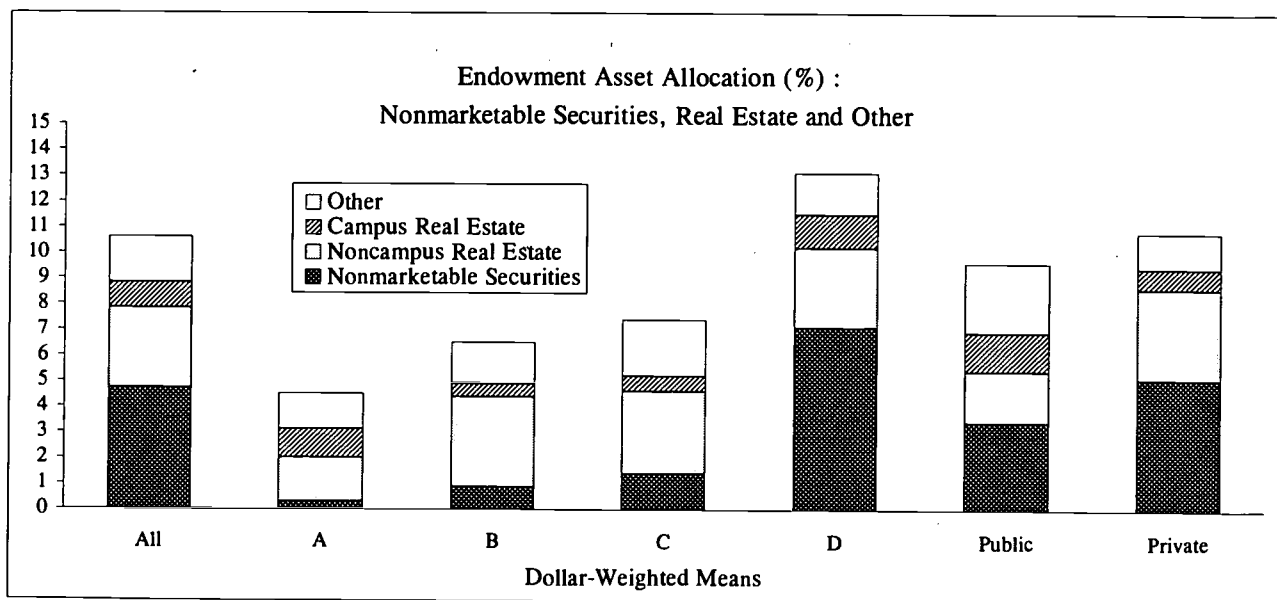

ENDOWMENT ASSET ALLOCATION

- ◆ Endowment holdings are classified into five broad as categories: marketable securities, nonmarketable securities, noncampus real estate, campus real estate, and other.
- ◆ As of the fiscal 1994 year-end, 89.4% of the assets of responding institutions were invested in marketable securities, 4.7% in nonmarketable securities, 3.1% in noncampus real estate, 1.0% in campus real estate, and the remaining 1.8% in other miscellaneous assets.
- ◆ On average, the largest endowments (greater than \$400 million) have a significantly larger percentage of their portfolios committed to nonmarketable securities than do the smaller institutions.

Code Endowment Size

- A \$25 million and under
- B Over \$25 million to \$100 million
- C Over \$100 million to \$400 million
- D Over \$400 million

ENDOWMENT CHARACTERISTICS

FISCAL YEAR 1994

ENDOWMENT SPENDING RATES

- ◆ For fiscal year 1994, the average endowment spending rate reported by responding institutions (371 institutions) is 6.0%. This figure is up sharply from those reported in previous years because of modifications to the survey question that allowed for more complete accounting of all expenditures.
- ◆ On average, the smallest endowments report a higher spending rate (7.2%) than the largest (4.5%), while public institutions report higher spending (6.6%) than those in the private sector (5.7%).

Code	Endowment Size
A	\$25 million and under
B	Over \$25 million to \$100 million
C	Over \$100 million to \$400 million
D	Over \$400 million

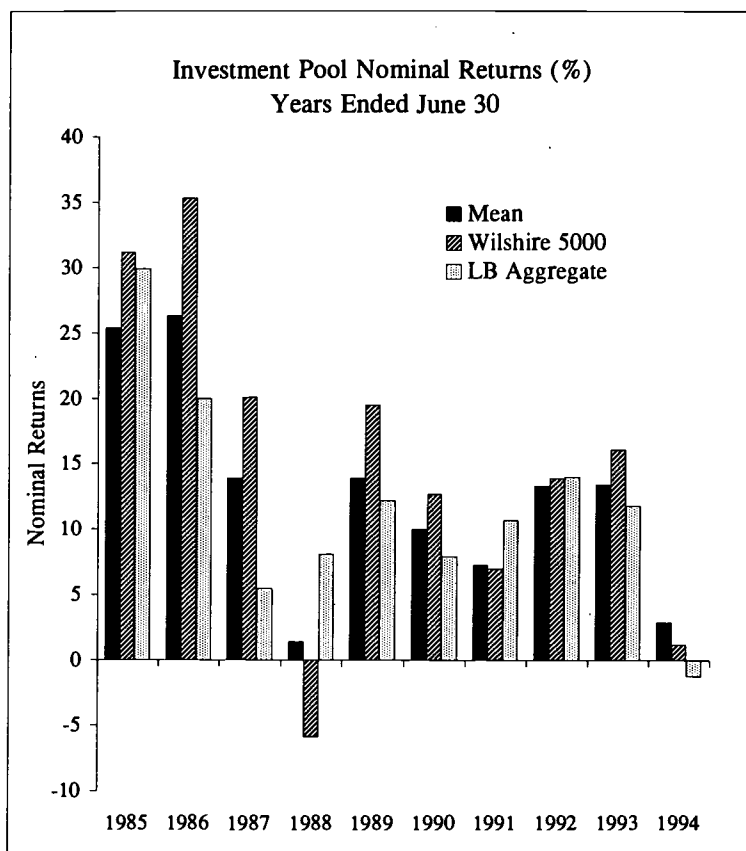

ENDOWMENT SPENDING RULES

Spending Rule	Participating Institutions

Spend a prespecified percentage of current income	14	3.1
Spend a prespecified percentage of beginning market value	29	6.5
Spend a prespecified percentage of a moving average of market values	252	56.4
Increase prior year's spending by a prespecified percentage	26	5.8
Decide on an appropriate rate each year	35	7.8
Other rule	50	11.2
No established policy	2	0.4
No response	6	1.3
Total	447	100.0 %

INVESTMENT POOL CHARACTERISTICS

INVESTMENT POOL CHARACTERISTICS

FISCAL YEAR 1994

INVESTMENT POOL NOMINAL AND REAL RETURNS

- ◆ For the 10-year period ended June 30, 1994, the median annualized investment pool nominal return of 12.7% has lagged the Wilshire 5000 return of 14.5%, but has exceeded that of the Lehman Brothers Aggregate Bond Index return of 11.6%.
- ◆ The equal-weighted mean nominal total return earned by respondents for the fiscal year ended June 30, 1994, is 2.9%, dramatically less than the preceding year's 13.4%.
- ◆ The fiscal 1994 dollar-weighted mean return is 4.4% (versus 14.5% last year), and the median return, 2.9% (versus 13.5% in 1993).
- ◆ Adjusted to reflect the 2.4% increase in the Consumer Price Index, the 1994 return for the equal-weighted mean is 0.5%.

RANGE OF NOMINAL RETURNS

- ◆ The highest nominal total return earned by an individual investment pool is 25.3%, and the lowest is -5.8%.
- ◆ The investment pools over \$400 million reported the highest average nominal return for the year (4.1%), while the smallest pools returned sharply less (2.6%). The pools over \$100 million to \$400 million reported 3.4% on average while the pools over \$25 million to \$100 million returned 2.4%.

Code Endowment Size

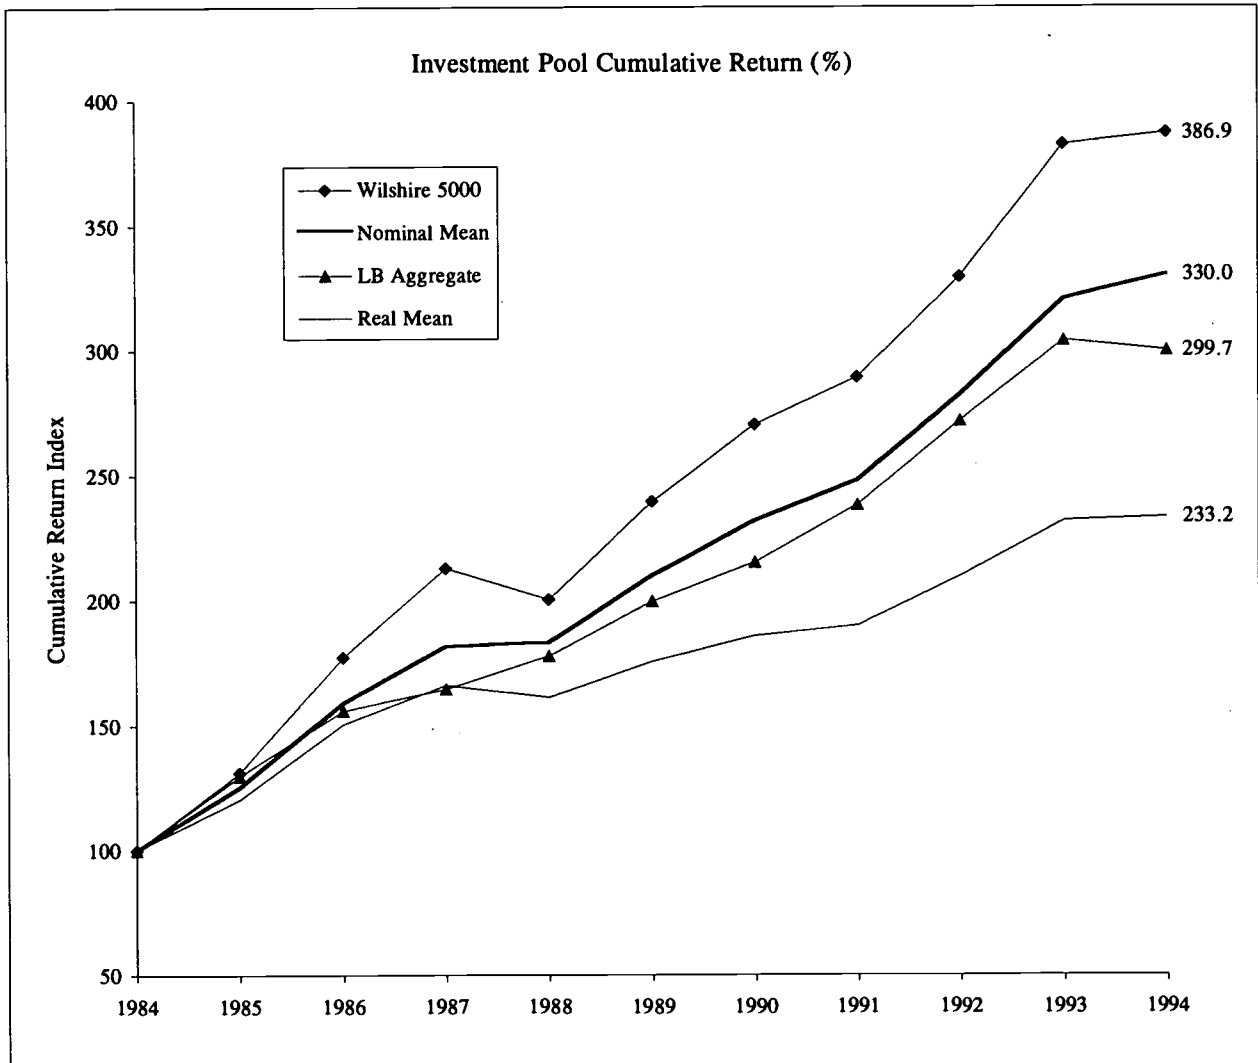

- A \$25 million and under
- B Over \$25 million to \$100 million
- C Over \$100 million to \$400 million
- D Over \$400 million

INVESTMENT POOL CHARACTERISTICS

FISCAL YEAR 1994

HISTORICAL INVESTMENT POOL RETURN

- ◆ For the 10-year period ended June 30, 1994, domestic common stocks (as represented by the Wilshire 5000) produced an average annual compound return of 14.5%, bonds produced a return of 11.6%, and cash equivalents, 6.1%. The median annualized return of participating pools (12.7%) trailed the return of the broad stock market, but exceeded those of bonds and cash.
- ◆ \$100 invested in U.S. common stocks on July 1, 1984, would have been worth \$386.90 on June 30, 1994, while \$100 invested in the mean investment pool would have grown to \$330.00. A comparable investment in bonds would have been worth \$299.70.
- ◆ In constant (inflation-adjusted) dollars, this \$100 invested in domestic common stocks on July 1, 1984, would have been worth \$273.50, while \$100 invested in bonds would have grown to \$211.90. Invested in the mean investment pool, \$100 would have become \$233.20.

Totals	100.0 %		100.0 %							

*Lowest dollar amount held by an institution in this asset class is less than 0.1% of its investment pool.

- ◆ As the above table illustrates, among various minor shifts, there is one very significant change in the average allocation of holdings across 16 asset classes from June 30, 1993, to June 30, 1994. For years, the percentage of assets committed to foreign currency stocks has steadily increased (especially among the larger institutions), but in fiscal year 1994, this trend accelerated dramatically as the smallest institutions more than doubled their allocations to foreign equities, and even the largest institutions increased their allocations by about 40%. These investors were once again rewarded in fiscal year 1994, when the Morgan Stanley Capital International EAFE index returned 17.0%.
- ◆ The **dollar-weighted mean** exposure to equity real estate (3.0%) and to venture capital (3.0%) remains considerably higher than the corresponding equal-weighted means (1.6% and 0.7%, respectively), illustrating the willingness of the largest investment pools to commit a significant portion of their assets to investments other than stocks, bonds, and cash equivalents.

INVESTMENT POOL CHARACTERISTICS

FISCAL YEAR 1994

INVESTMENT MANAGEMENT AND CUSTODIAL FEES

<u>Responding Institutions</u>	<u>External Investment Management Fees (%)</u>	<u>Custodial Fees (%)</u>
In Aggregate		
Equal-Weighted Mean	0.48	0.08
Dollar-Weighted Mean	0.47	0.06
Median	0.46	0.06
By Investment Pool Size (Equal-Weighted Mean)		
\$25 million and under	0.54	0.11
Over \$25 million to \$100 million	0.48	0.09
Over \$100 million to \$400 million	0.44	0.08
Over \$400 million	0.43	0.04
By Type (Equal-Weighted Mean)		
Public	0.49	0.09
Private	0.47	0.08

- ◆ Average investment management fees as a percentage of the average market value of investment pools' externally managed assets remained at 0.48% in fiscal year 1994. The largest investment pools achieve significant economies of scale in fees and expenses.
- ◆ Average custodial fees as a percentage of investment pools' average market values were 0.08% in fiscal year 1994, the same average reported in 1993.
