#### **ABSTRACT**

A study was conducted at Florida's Saint Petersburg Junior College (SPJC) to determine employers' perceptions of SPJC graduates' technical and performance skills and to identify employers who might be available to participate in college programs or provide opportunities for student training or placement. Surveys were mailed to 146 businesses employing graduates from 1994-95 who were working in jobs related to their field of study and who had given consent. Study findings, based on completed surveys received from 92 employers, included the following: (1) the most highly rated skill area was graduates' possession of basic reading, writing, and mathematical skills, rated as excellent or very good by 89.1% of employers; (2) 85.7% rated graduates' ability to choose ethical courses of action as excellent or very good; (3) 82.6% rated the graduates' ability work with individuals from diverse backgrounds as excellent or very good; (4) 97.8% of employers indicated they would hire another SPJC graduate; (5) 94.4% of the graduates were reported by employers as earning \$7.50 per hour or more, thus qualifying SPJC for state Performance Based Incentive Funding; and (6) 69.2% indicated a willingness to participate with the college on varying levels of activity, while the activity most often cited was placing students. The survey instrument and a table of employer ratings are appended. (HAA)

#### **EMPLOYER SURVEY**

#### **EXECUTIVE SUMMARY**

Employer satisfaction with St. Petersburg Junior College (SPJC) graduates is a critical component of the strategic planning process at the institution. Accordingly, the Institutional Assessment Group developed an "Employer Survey" designed to measure employer satisfaction with their preparation for work. Specifically, the purposes of the survey were:

• to attain insight into employer perceptions regarding technical and performance skill of SPJC graduates,

• to gain information to supplement college data for Performance Based Incentive Funding, and

• to identify employers who might be available to participate with the college program activities or to provide opportunities for student training or placement.

Working students who graduated in the 1994-95 reporting year and who completed the "Recent Alumni Survey" identified the employers who would receive the survey. Employers were mailed an "Employer Survey" form if the students: indicated that their work was related to their studies, agreed that their employer could be contacted, and gave the name and address of the employer. One hundred forty-six businesses were contacted. There were 92 surveys returned for a response rate of 63.0%.

The highlights of the findings of the study are summarized below:

•Employers indicated high levels of satisfaction with graduate technical and performance skills. The skill areas with the highest levels of satisfaction, that is, those rated as either excellent or very good were (1) the graduate's possession of basic skills of reading, writing and mathematics (89.1%), (2) chooses ethical courses of action (85.7%), and (3) works well with individuals from diverse backgrounds (82.6%). More than two-thirds of the employers rated even the lowest skill areas as excellent or very good. These areas were (1) uses technology effectively (67.8%), and (2) identifies, organizes, plans and allocates resources (70.6%).

- •Almost all employers (97.8%) indicated they would hire another SPJC graduate.
- •In order for the College to qualify for Performance Based Incentive Funding, its graduates must either be working in a field related to their SPIC degree program or earning \$7.50 per hour. The majority (94.4%) of SPIC graduates were reported by employers as earning \$7.50 per hour or more.
- •Over one-half of the employers indicated a willingness to participate with the College on varying levels of activity, with placement of students in co-op/internship rating highest at 69.2%.
- •Employer-identified additional skills (or areas of knowledge the graduate should have to help them meet employer needs) were similar with the student perceptions in the "Recent Alumni Survey". This information was given to the program directors for their review.

In conclusion, both graduates (in the "Recent Alumni Survey") and employers indicated high levels of satisfaction with SPJC programs and training. Results from this survey confirmed the conclusions reached in the "Recent Alumni Survey" Report: A.S. degree and Postsecondary Certificate programs are achieving their intended objective of preparing students for work.

#### INTRODUCTION

Employer satisfaction with St. Petersburg Junior College (SPJC) graduates is a critical component of the strategic planning process at the institution. Accordingly, the Institutional Assessment Group developed an Employer Survey designed to measure employer satisfaction with the graduates preparation for work. Specifically, the purposes of the survey were:

- to attain insight into employer perceptions regarding technical and performance skill of SPJC graduates.
- to gain information to supplement college data for Performance Based Incentive Funding, and
- to identify employers who might be available to participate with the college program activities or to provide opportunities for student training or placement.

Working students who graduated in the 1994-95 reporting year and who completed the "Recent Alumni Survey" identified the employers who would receive the survey. Employers were mailed an "Employer Survey" form if the students: indicated that their work was related to their studies, agreed that their employer could be contacted, and gave the name and address of the employer. One hundred forty-six businesses were contacted. There were 92 surveys returned for a response rate of 63.0%.

#### **FINDINGS**

#### SPJC Graduate Technical and Performance

Employers were asked to rate nine (9) items related to employee competencies and foundation skills on a 10-point scale from Excellent (scale = 10-9) to Poor (scale = 2-1) or N/A meaning skills not required for this occupation. Appendix A contains the Employer Survey.

Table 1 shows the number responding to each item, the mean for each major employer choice, and the percentage for each major choice. Employers indicated high levels of satisfaction with SPJC graduate technical and performance skills. The skill areas with the highest levels of satisfaction, that is, those rated as either excellent or very good were (1) the graduate's possession of basic skills of reading, writing and mathematics (89.1%), (2) chooses ethical courses of action (85.7%), and (3) works well with individuals from diverse backgrounds (82.6%). More than two-thirds of the employers rated even the lowest skill areas as excellent or very good. These areas were (1) uses technology effectively (67.8%), and (2) identifies, organizes, plans and allocates resources (70.6%). Means based on employer ratings were calculated for each item. The highest mean, 8.5, was calculated for the item "Possesses basic skills of reading, writing and mathematics;" the lowest mean, 6.8, for "Uses technology, e.g., computers effectively." Appendix B, Employers Survey Overall Ratings of Technical and Performance Skills, shows the number and percentage for each value of choices.

Finally, employers were asked if they would hire another graduate from SPJC. Eighty-eight (88) of 90 employers (97.8%) who responded indicated they would hire another SPJC graduate. Only 2 employers (2.2%) indicated they would not hire another graduate of SPJC.

#### **Performance Based Incentive Funding**

In order to qualify for Performance Based Incentive Funding, the College must show that the graduate is either working in a field related to their SPJC degree program or earning \$7.50 per hour. Job titles were obtained from respondents to the Recent Alumni Survey. Information about wages was obtained in both the Recent Alumni and Employer Surveys. On the Employer Survey, 90 employers answered the question, "Is the graduate's current hourly wage \$7.50 or more?". The majority (94.4%) indicated that this was true; only 5.6% indicated that the graduate's current hourly wage was not \$7.50 or more. This was consistent with the information provided by the graduates in the Recent Alumni Survey.

	32.2%	35.6%	14.4%	2.6%		12.2%	100.0%	8.9

The last section of the survey inquired about employer participation with the college. **Table 2** lists the items asked and summarizes employer responses. Over one-half of the employers indicated a willingness to participate on some level with the college. Sixty-nine percent (69.0%) employers would be willing to help in the placement of students in co-op/internship area, 64.1% would participate in job placement of graduates, and 64.5% express their willingness to provide education/training for their workforce.

Table 2. Employers Participation

Employers willingness to participate in one of the following:	YES	NO	Total Respondents
Serve on an advisory committee	42	32	74
Placement of student in co-op/internship	<b>56.8%</b> 54	<b>43.2</b> % 24	100.0 % 78
Job placement of graduates	<b>69.2</b> % 50	30.8% 28	100.0 % 78
Participation in job fairs/other community events	<b>64.1%</b> 39	35.9 % 38	100.0 % · · · · · · · · · · · · · · · · · ·
To provide education/training for your workforce	<b>51.3%</b> 49 <b>64.5%</b>	48.7% 27 35.5%	100.0 % 76 100.0 %

Descriptions of the graduate's major job duties, responsibilities, skills and/or areas of knowledge the SPJC graduate should have to meet the employers need were provided by the employer and given to the appropriate directors for their review.

In conclusion, both graduates (in the Recent Alumni Survey) and employers indicated high levels of satisfaction with SPJC programs and training. Results from this survey confirmed the conclusions reached in the Recent Alumni Survey Report: A.S. degree and Postsecondary Certificate programs are achieving their intended objective of preparing students for work.
