ABSTRACT

This study examined graduate satisfaction among a sample of graduates of all programs in the Abraham S. Fischler Center for the Advancement of Education at Nova Southeastern University (NSU) in Florida. A total of 255 students who graduated between 1992 and 1995, the majority of whom received doctoral or masters degrees, responded to a survey that focused on demographic and background information, educational outcomes, quality indicators, computing skills, and employment and career outcomes. The study found that over 95 percent of respondents indicated that they would recommend their program to a friend or acquaintance. Over 85 percent of respondents indicated that their current job was either highly related or moderately related to their major at NSU. Nearly 15 percent of respondents indicated that they would not have attended a college or university if they had not attended NSU. In regard to educational quality, the highest ratings were offered for clarity of written graduate admission policies and program length. Statements related to basic competence in the use of computers received among the lowest ratings. A copy of the survey questionnaire is appended. (Contains 11 references.) (MDM)

EXECUTIVE SUMMARY

This study provides a common assessment of graduates from all programs in the Abraham S. Fischler Center for the Advancement of Education. Summary statistics representing respondents from all programs are provided in collapsed format in the main body of this report. Breakout statistics, differentiating between Masters/Specialist and Doctoral respondents are available on request.

This study focused on all 3853 July 1, 1992 to June 30, 1995 graduates from the Center for the Advancement of Education. To accommodate the management of survey distribution and data preparation for such a large population, it was decided to invite a random sample of members of the population for survey completion. The invited sample was based on a 25 percent *last name* alphabetical sort of the population. After adjusting for invalid mailing labels, mailing labels with an international address, and surveys returned by the United States Postal Service as undeliverable, the adjusted sample consisted of 845 potential respondents. Surveys were returned by 255 graduates, resulting in a survey response rate of 30.2 percent. Sample statistics are in general parity with known demographic population parameters and there is sufficient evidence to suggest that the responding sample is representative of the population.

There was ample evidence to conclude that graduates are, overall, very pleased with their experience with the University. Over 95 percent of all respondents indicated that they would recommend their program to a friend or acquaintance. The strong practitioner orientation of the Center (mean years of professional work experience prior to enrollment = 13.4 years) and interest in career and professional development were found throughout this study. Statements related to basic competence in the use of computers received lower ratings. Graduates offered the highest rating for skills in word processing and the lowest rating for use of the Internet.

Following an analysis of survey results, a series of recommendations was generated: (1) incorporation of accurate demographic characteristics and attention to comparative advantage into marketing literature; (2) continued emphasis of the practitioner-orientation of academic programs; and (3) the need for attention to pertinent quality indicators that received mean ratings of less than 4.0. Attention was also given to the need for further concern to the level of computing and technology infusion into the curriculum.

In addition to the tables presented in this report, an extensive series of tables, highlighting each academic program in the Center, has also been developed. Although these tables are not included this report, they are also available upon request.

HIGHLIGHTS

Demographics

Doctoral graduates

- Age at time of graduation Median Age 45 Years
- Gender 60 Percent Female
- Ethnicity 80 Percent White
- South Florida residence 9 Percent

Masters/Specialist graduates

- Age at time of graduation Median Age 37 Years
- Gender 85 Percent Female
- Ethnicity 74 Percent White
- South Florida residence 39 Percent

Reasons for Selecting the University

Doctoral graduates

- Convenience 89 Percent
- Type of Programs Available 74 Percent
- Location 50 Percent

Masters/Specialist graduates

- Convenience 89 Percent
- Type of Programs Available 60 Percent
- Location 59 Percent

Satisfaction With the University

- Statements related to satisfaction with the University's involvement in professional development and career preparation received high overall ratings.

- Over 85 percent of all survey respondents indicated that their current job was either highly related or moderately related to their major at the University.
- Over 95 percent of all survey respondents indicated that they would recommend their program to a friend or acquaintance.

Basic Skills in the Use of Computers

- Overall, graduates indicated that they have moderate skills in the basic use of computers.
- Graduates offered the highest rating for skills in word processing; the lowest self-rating for use of the Internet.

Career Patterns

Doctoral graduates

- Approximately 60 percent of all doctoral graduates earned \$50,000 in annual salary from their primary employer.
- Doctoral graduates had 18 years of professional work experience before enrolling at NSU.

Masters/Specialist graduates

- Approximately 85 percent of all masters/specialist graduates earned less than \$50,000 in annual salary from their primary employer.
- Masters/Specialist graduates had 10 years of professional work experience before enrolling at NSU.

INTRODUCTION

Background

When originally chartered in 1964, Nova Southeastern University followed a mission that was focused on advanced technology. Although courses related to education were found in Behavioral Science, specific programs in education were not offered at the University until 1972.

In 1972, in reaction to a changing mission, the University offered two external degree programs for educational practitioners throughout Florida and other states:

- The Ed.D. Program in Educational Leadership was offered to practitioners in K-12 administration.
- The Ed.D. Program for Community College Faculty and Administrators was offered to community college practitioners.

These distance education programs were organized as clusters, with instruction offered throughout Florida and other states to groups of approximately 30 students attending class at monthly sessions.

These two distance education programs were immediately well received by their respective markets, and they both provided a major contribution to the University's rapid growth in the 1970s. The continued growth of program offerings resulted, in 1980, in the organization of all graduate education programs at the University into the Center for the Advancement of Education (*Nova Southeastern University Fact Book*, 1996). Now known as the Abraham S. Fischler Center for the Advancement of Education, the Center offers field-based degree programs at the master's, specialist, and doctoral levels in the following areas:

- National Ed.D. Program for Educational Leaders
- Ed.D. Programs for Higher Education
- Ed.D. Programs in Child and Youth Studies
- M.S. and Ed.D. Programs in Instructional Technology and Distance Education
- M.S. and Ed.S. Graduate Teacher Education Program

- Master's Program in Speech-Language Pathology
- Master's Program in Life Span Care and Administration

The Center for the Advancement of Education offers field-based programs throughout Florida, 18 other states, and Canada (*Nova Southeastern University Office of Licensure and State Relations Off-Campus Program Directory*, 1995). The Center served over 6,600 students (unduplicated cumulative headcount enrollment) during Calendar Year 1994 (*Enrollment Trends and Characteristics of Nova Southeastern University Students: Calendar Year 1990 to 1994*).

Purpose of this Study

This study was conducted to provide a common assessment of graduates from all programs associated with the University's Center for the Advancement of Education. Statistics are presented in this report in collapsed format, representing all respondents. Breakout statistics with focus on master's/specialist respondents and doctoral respondents have also been prepared in a series of tables. Tables which focus on the programs identified in the survey have additionally been prepared.

This study was also conducted to provide an assessment of distance learning, since the Center offers instruction nearly exclusively through the use of various distance education modalities. Accordingly, an additional purpose of this study was to examine the satisfaction of graduates with their experience at the University, recognizing that for nearly all graduates in the Center for the Advancement of Education, this experience was based on distance education.

METHODOLOGY

Survey Development

To provide a common assessment of graduates in the major academic centers at the University, the survey instrument associated with this report was developed, in part, from the survey instrument used in a recent assessment of undergraduate programs at the University (*Graduates of Nova Southeastern University's Undergraduate Programs Tell Us What They Think About Their University Experience, 1996*). One key area of difference between the surveys, however, was the inclusion of **QUALITY INDICATORS** in the survey administered to graduates from the Center for the Advancement of Education. Statements associated with quality indicators are directly linked to accreditation criteria established by the Southern Association of Colleges and Schools. It was decided to include these quality indicators so

that the University would be able to provide precise information about specific statements found in *Criteria for Accreditation* (1996).

Sampling

The population consisted of all 3853 July 1, 1992 to June 30, 1995 graduates from the Center for the Advancement of Education. As planned, the invited sample was to consist of 25 percent of all graduates:

25 % *	1319	7/1/92 to 6/30/93	Graduates N =	330
25 % *	1229	7/1/93 to 6/30/94	Graduates N =	307
25 % *	1305	7/1/94 to 6/30/95	Graduates N =	<u>326</u>
					963

Selection into the invited sample was based on the generation of mailing labels, using *last name* for the sorting process. However, incomplete mailing labels were evident for 14 graduates in the invited sample. Due to potential problems with survey return from international graduates, it was decided to decline survey distribution to the seven graduates in the invited sample with a mailing label indicating an international address. Accordingly, the adjusted invited sample consisted of 942 July 1, 1992 to June 30, 1995 graduates.

During the data collection period (April 15, 1996 to May 15, 1996), the United States Postal Service returned 97 surveys as undeliverable. Accordingly, the potential responding sample consisted of 845 July 1, 1992 to June 30, 1995 graduates. Surveys were returned by 255 graduates, resulting in a survey response rate of 30.2 percent.

Sample statistics are in parity with population parameters on known demographic criteria, such as Florida residence, gender, or ethnicity (*Nova Southeastern University's Graduates: July 1, 1990 to June 30, 1994, 1995; Enrollment Trends and Characteristics of Nova Southeastern University's Students: Calendar Years 1990 to 1994, 1995.*) Accordingly, there is sufficient evidence to suggest that the responding sample is representative of the population.

RESULTS

Section I: Background Information

Survey response by academic program is presented in Table 1. Statistics related to the demographic composition of the responding sample are presented in Tables 2 to 10. Key findings include the following:

- The M.S./Ed.S. Graduate Teacher Education Program is the largest program in the Center, and this program represented nearly 40 percent of the responding sample (Table 1).
- Nearly 75 percent of all respondents were female (Table 2).
- Minorities represented approximately 25 percent of all survey respondents (Table 3).
- Respondents tend to be quite stable in terms of permanent residence. Approximately 25 percent of all respondents resided in South Florida at time of graduation, 25 percent in other parts of Florida, and 50 percent in other states and nations (Table 4). Equally, approximately 25 percent of all respondents currently reside in South Florida, 25 percent in other parts of Florida, and 50 percent in other states and nations (Table 5).
- Survey response ranged from 29.4 percent for 1992/1993 graduates to 34.1 percent for 1993/1994 graduates (Table 6).
- Respondents indicated wide geographic dispersment in place of class attendance, with approximately 30 percent of all class attendance in South Florida, 30 percent in other parts of Florida, and 40 percent in other states and nations (Table 7).

Survey participants were also provided with a series of statements that related to satisfaction and reasons for attending the University. Table 11 demonstrates that less than 8 percent of all respondents indicated that they would be unwilling to attend the University if they were to pursue another degree.

Table 12 repeats the question **Why did you decide to attend NSU?**, which was previously presented to graduates of the University's undergraduate programs (*Graduates of Nova Southeastern University's Undergraduate Programs Tell Us What They Think about Their University Experience*, (1996). In general parity to the results of the graduates from the University's undergraduate programs, respondents from the Center for the Advancement of Education indicated that the three most frequently stated reasons for attending the University were:

- Convenience 88.6 percent indicated Yes
- Type of programs available 65.9 percent indicated Yes
- Location 54.5 percent indicated Yes

Table 13 presents reaction to the question **What would you have done if you had not attended Nova Southeastern University?** Nearly 50 percent of all respondents indicated that they would attend a state university in either South Florida or some other area in the

United States. Nearly 15 percent of all respondents indicated that they would not have attended a college or university if they had not attended Nova Southeastern University.

Respondents were also asked to react to the question **Would you recommend your program to a friend or acquaintance who asked your opinion?** As presented in Table 14, less than 2 percent of all respondents marked “No” for this question.

Section II: Outcomes

Section II of the survey provided a series of statements related to selected outcomes. Over 72 percent of these statements (Tables 15A and 15B) received a mean rating of 4.0 or greater. Reflecting the practitioner orientation of the Center for the Advancement of Education, it is interesting to note that the statement **Acquiring knowledge and skills needed for a career** received the highest mean rating of all statements in this section, with survey respondents offering a mean of 4.5 for this statement.

Section III: Quality Indicators

Table 16 provides a summary of statements related to quality indicators. It should be recalled that these statements were obtained by careful review of accreditation criteria established by the Southern Association of Colleges and Schools (*Criteria for Accreditation*, 1996).

The highest mean ratings (Mean = 4.3) were offered for **Clarity of written graduate admission policies**, **Program length**, and **Correctness of student records (including transcripts)**. When reviewing Table 16, it is cautioned that the responding N should be given careful attention. Nearly all respondents offered a numerical response to statements such as **Program length** (N = 246) and **Instructional methods** (N = 247). However, respondents did not perceive the same level of need to respond to other statements, such as **Student government opportunities** (N = 108) and **Health services** (N = 92).

Section IV: Computing

Again, in similarity to results obtained from *Graduates of Nova Southeastern University's Undergraduate Programs Tell Us What They Think about Their University Experience* (1996), respondents from the Center for the Advancement of Education indicated that their greatest strength in computing was in **Ability to use word processing software**, which received a mean rating of 4.0 (Table 17). The lowest ratings for the 12 statements related to computing

included **Ability to use spreadsheet software** (Mean = 2.9) and **Ability to use the Internet** (Mean = 2.9).

Section V: Employment and Career

Tables 18 to 23 present a summary of responses to statements relating to employment and career. **Acquiring new information** (Mean = 4.3) received the highest responses for all statements in Table 18. Respondents offered a mean rating of 4.1 to the statement **Increased professional status**. The statement **Preparation for future study** received a mean rating of 4.0. Respondents indicated a mean of 13.4 years of professional work experience before enrolling at the University.

Respondents were also given the opportunity to compare the relationship of their current job to their academic program at the University (Table 19). Over 66 percent of all respondents indicated that their current job was **Highly related** to their academic program at the University. As further validation of the practitioner orientation of the Center's programs, over 80 percent of all respondents indicated that their university experiences prepared them for their current job either **Exceptionally well**, **More than adequately**, or **Adequately** (Table 20).

The range of respondent salaries is presented in Table 21. Over 25 percent of all respondents indicated that their annual salary from their primary employer was between \$30,000 to \$39,999. Approximately 20 percent of all respondents indicated that their salary was between \$40,000 to \$49,999.

Respondents were also asked to react to questions about enrollment in graduate or professional programs since graduation from the University. Approximately 10 percent of these recent graduates have applied (Table 22) and enrolled (Table 23) in additional graduate or professional studies.

SUMMARY

As evidenced in *Status Report on Institutional Effectiveness: 1994 - 1995* (1995, p.3), distance education and a practitioner orientation are central to the structure and format of the Center for the Advancement of Education. Attention to this focused mission has contributed to the Center's growth during the last quarter-century. Based on unduplicated, cumulative headcount enrollment, the Center for the Advancement of Education was the University's largest academic center in Fiscal Year 1995, serving 6,597 students between July 1, 1994 and June 30, 1995. To place this statistic in context, enrollment in the Center represented 32 percent of all University headcount enrollment during this time period (*Research and Planning Weekly Enrollment Report*, July 3, 1995).

The tables presented in this report provided evidence that graduates were overall very pleased with their experience at the University:

- Over 70 percent of all respondents indicated that, without reservation, they would recommend their program to a friend or acquaintance.
- Over two-thirds of all respondents indicated that their academic program was highly related to their current job.
- The outcome statement receiving the highest mean rating (Mean = 4.5) focused on the impact the Center had on **Acquiring knowledge and skills needed for a career.**

Recommendations

This study was initiated to offer a center-wide assessment of recent graduates of the Center for the Advancement of Education. In that regard, this report should help meet the decision-making needs of the Center's faculty and administrative staff.

However, it should also be recalled that distance education is a pervasive activity in the Center. Clusters and sites in the Fort Lauderdale area are structured along the same distance education format as peer clusters and sites in other areas. Accordingly, this study also serves as an assessment of distance education in the University's largest academic center. In that regard, this report should offer guidance on distance education and how this practice can be used to meet the University's goals and mission.

Demographics

Over 70 percent of all graduates are female; nearly 25 percent of all graduates are members of a minority group; and graduates are approximately 40 years old at time of graduation. It is critical that marketing literature, program catalogs, and similar materials offer an accurate image of the Center's unique student body.

Permanent Residence and Place of Class Attendance

This study confirmed statistics previously reported in *Permanent Residence of Nova Southeastern University Students: End of Fall Term 1994* (1995) and *Place of Class Attendance at Nova Southeastern University: Calendar Years 1990 to 1994* (1995) regarding the dominance of distance education activities in the Center. Marketing literature and all other documents used to educate external constituencies about the Center should clearly emphasize the wide geographic dispersment of the Center.

Comparative Advantage

The survey associated with this study was purposely designed to elicit information that would support the Center's marketing and recruitment activities. Responses such as **Convenience** (88.6 percent response Yes), **Type of programs available** (65.9 percent response Yes), and **Location** (54.5 percent response Yes) should be incorporated into the appropriate publications.

Although this report offered a collapsed analysis of recent graduates from the Center for the Advancement of Education, it would benefit the Center to consider responses to the question **What would you have done if you had not attended Nova Southeastern University?** at the

program level. Tables providing breakouts by academic program for all six programs in the Center have been prepared. These tables have been provided to the appropriate administrative staff, and they are also available on request.

Academic Outcomes

Respondents offered very favorable ratings to survey statements relating to professional development and career preparation. To offer context to this area, it must be recalled that respondents are adults with considerable professional experience (Mean = 13.4 years) prior to enrollment at the University.

It was surprising, however, to see a neutral rating to the statement **I was promoted due to receiving my degree from NSU** (Mean = 3.0). Although the population for this study consisted of recent graduates, it was anticipated that this statement would show more immediate career advancement after completion of a graduate degree. Accordingly, an assessment of career mobility from a representative sample of graduates would greatly enhance a better understanding of the social, economic, and professional benefits of matriculation through the graduate programs offered by the Center for the Advancement of Education.

Quality Indicators

As previously mentioned, statements related to quality indicators were purposely linked to accreditation criteria established in *Criteria for Accreditation* (1996). Respondents generally offered favorable ratings to statements that focused on academic issues. However, to aim for continuous improvement, faculty and administrative staff may find it useful to focus attention on quality indicators that had summative mean ratings of 4.0 or less, including the following in rank order:

- Mean = 3.2 Counseling and career development
- Mean = 3.2 Student government opportunities
- Mean = 3.3 Instructional support services
- Mean = 3.4 Provisions for training in the use of technology
- Mean = 3.4 Student development services
- Mean = 3.4 Health services
- Mean = 3.5 Process for assigning students to advisors
- Mean = 3.6 Adequacy of library and learning resource materials

- Mean = 3.6 Orientation program relative to library services
- Mean = 3.6 Infusion of information technology into the curricula
- Mean = 3.6 Student behavior policies and procedures
- Mean = 3.6 Adequacy of physical resources in classrooms
- Mean = 3.7 Quality of advising
- Mean = 3.7 Availability of library and learning resource materials
- Mean = 3.7 Access to information through technology
- Mean = 3.7 Financial aid services
- Mean = 3.7 Alumni affairs
- Mean = 3.7 Refund policies when withdrawing from courses
- Mean = 3.9 Safety and security of classroom buildings and the learning environment

However, it must be cautioned that attention to these quality indicators should be balanced by equally giving attention to the unique composition of students in the Center. Counseling, career guidance, student government, and health services may not be too critically important for adult students in a practitioner's program. Some type of assessment of the perceived importance of these quality indicators may be helpful to offer balance to the efficacy of these criteria.

Computing

Although the University has developed an extensive computing infrastructure, respondents indicated that they have only moderate levels of skills in the basic use of computers. Since technology will become an ever increasing tool for all professionals, more complete infusion of technology into the curriculum is a rather obvious need and has been addressed with some intensity, including large expenditures of funds over the past five years. Moreover, this issue was a major component of the recently completed *Master Plan* (1995).

Career Patterns

This study offered evidence that respondents are very successful in career advancement and that the Center's academic programs are highly related to the professional employment and advancement of graduates. These success indicators should be reviewed by the faculty to offer guidance on curricular development in the Center's practitioner-oriented programs. These success indicators should also be reviewed by administrators and marketing personnel in order to evaluate their potential utility in marketing and recruitment efforts.

SURVEY OF GRADUATES OF THE

ABRAHAM S. FISCHLER CENTER FOR THE ADVANCEMENT OF EDUCATION

SECTION I: BACKGROUND INFORMATION

Academic Program at NSU (mark one):

DOCTORAL:

- National Ed.D. Program for Educational Leaders
- Ed.D. Programs for Higher Education
- Ed.D. Programs in Child and Youth Studies

MASTER'S/EDUCATIONAL SPECIALIST:

- Graduate Teacher Education Program
- Speech-Language Pathology
- Life Span Care and Administration

Gender

- Female
- Male

Age at time of graduation: _____ Years

Ethnic Group

- African-American
- American Indian or Alaskan Native
- Asian or Pacific Islander
- Hispanic
- White
- Other or Unknown

Place of permanent residence at time of graduation

- Broward, Dade, Monroe, or Palm Beach County
- Another Florida County
- Another State
- Another Country

Place of permanent residence now

- Broward, Dade, Monroe, or Palm Beach County
- Another Florida County
- Another State
- Another Country

Year of graduation from NSU

- July 1, 1992, to June 30, 1993
- July 1, 1993, to June 30, 1994
- July 1, 1994, to June 30, 1995

Where did you attend the majority of your classes?

- Davie Campus or East Campus
- Cluster Location in Broward, Dade, or Palm Beach County
- Cluster Location in Another Florida County
- Cluster Location in Another State
- Cluster Location in Another Country

What is the highest degree you now hold?

- Master's
- Master's plus 15 or more graduate credits
- Specialist
- Professional Degree
- Doctoral

What was your primary enrollment status at NSU?

- Full-Time Student
- Part-Time Student

How many years did you attend NSU?

- | | |
|----------------------------------|--|
| <input type="checkbox"/> 1 Year | <input type="checkbox"/> 5 Years |
| <input type="checkbox"/> 2 Years | <input type="checkbox"/> 6 Years |
| <input type="checkbox"/> 3 Years | <input type="checkbox"/> 7 or More Years |
| <input type="checkbox"/> 4 Years | |

If you were to pursue another degree, would you attend NSU in the future?

- Yes
- No
- Undecided
- Not Applicable

Why did you decide to attend NSU? Check all selections that apply.

- Academic reputation
- Admissions standards
- Advice of counselors and teachers
- Availability of scholarships or financial aid
- Convenience
- Cost

- _____ Location
- _____ Small class size
- _____ Social atmosphere
- _____ Type of programs available
- _____ Other _____

What would you have done if you had not attended NSU? Would you have attended:

- _____ Another private college or university in South Florida
- _____ Another private college or university in Florida, but not in South Florida
- _____ A private college or university in another state
- _____ A state college or university in South Florida
- _____ A state college or university in Florida, but not in South Florida
- _____ A state college or university in another state
- _____ Not attended a college or university
- _____ Other _____

Would you recommend your program to a friend or acquaintance who asked your opinion?

- _____ Yes, without reservation
- _____ Yes, with some reservations (explain)

_____ No (explain)

SECTION II: OUTCOMES

Please review the following rating key and then mark or circle to the left of each item your level of agreement with each statement:

RATING KEY			
1	Strongly Disagree	4	Agree
2	Disagree	5	Strongly Agree
3	Neutral, Neither Agree nor Disagree	NA	Not Applicable
		U	Unknown or Unable to Answer

- 1 2 3 4 5 NA U NSU has helped me meet my educational goals.
- 1 2 3 4 5 NA U If choosing a college again, I would choose NSU.
- 1 2 3 4 5 NA U My experiences at NSU have prepared me to deal with possible career changes.
- 1 2 3 4 5 NA U I would recommend NSU to others.
- 1 2 3 4 5 NA U My experiences at NSU have helped motivate me grow in my professional life.
- 1 2 3 4 5 NA U NSU welcomes and uses feedback from students to improve the University.
- 1 2 3 4 5 NA U I was promoted due to receiving my degree from NSU.
- 1 2 3 4 5 NA U I received a salary increase after completing this degree program.

Please review the following rating key and then mark or circle to the left of each item how FCAE has made an impact on you, relative to each statement:

RATING KEY			
1	Very Negative Impact	5	Very Positive Impact
2	Moderately Negative Impact	NA	Not Applicable
3	No Impact	U	Unknown or Unable to Answer
4	Moderately Positive Impact		

- 1 2 3 4 5 NA U Acquiring knowledge and skills needed for a career
- 1 2 3 4 5 NA U Becoming competent in my field
- 1 2 3 4 5 NA U Developing problem-solving skills
- 1 2 3 4 5 NA U Improving my quantitative ability
- 1 2 3 4 5 NA U Improving my leadership skills
- 1 2 3 4 5 NA U Increasing my professional productivity
- 1 2 3 4 5 NA U Learning to formulate and reshape my lifetime goals
- 1 2 3 4 5 NA U Improving my interpersonal skills
- 1 2 3 4 5 NA U Improving my oral communication skills
- 1 2 3 4 5 NA U Improving my written communication skills

SECTION III: QUALITY INDICATORS

Please review the following rating key and then mark or circle to the left of each item your level of satisfaction relative to each statement:

RATING KEY			
1	Very Dissatisfied	4	Satisfied
2	Dissatisfied	5	Very Satisfied
3	Neutral, Neither Satisfied nor Dissatisfied	NA	Not Applicable
		U	Unknown or Unable to Answer

- 1 2 3 4 5 NA U Clarity of written graduate admission policies
- 1 2 3 4 5 NA U Clarity of written graduate completion requirements
- 1 2 3 4 5 NA U Clarity of written curricular offerings, as identified in program catalog
- 1 2 3 4 5 NA U Program length
- 1 2 3 4 5 NA U Instructional methods
- 1 2 3 4 5 NA U Delivery system
- 1 2 3 4 5 NA U Published grading policy
- 1 2 3 4 5 NA U Process for assigning students to advisors
- 1 2 3 4 5 NA U Quality of advising
- 1 2 3 4 5 NA U Clarity of program catalog
- 1 2 3 4 5 NA U Correctness of student records (including transcripts)
- 1 2 3 4 5 NA U Availability of library and learning resource materials
- 1 2 3 4 5 NA U Adequacy of library and learning resource materials
- 1 2 3 4 5 NA U Orientation program relative to library services

- 1 2 3 4 5 NA U Access to information through technology
- 1 2 3 4 5 NA U Instructional support services (e.g., educational equipment and specialized facilities such as laboratories, audio visual and duplicating services)
- 1 2 3 4 5 NA U Infusion of information technology into the curricula
- 1 2 3 4 5 NA U Provisions for training in the use of technology
- 1 2 3 4 5 NA U Student development services
- 1 2 3 4 5 NA U Counseling and career development
- 1 2 3 4 5 NA U Student government opportunities
- 1 2 3 4 5 NA U Student behavior policies and procedures
- 1 2 3 4 5 NA U Financial aid services
- 1 2 3 4 5 NA U Health services
- 1 2 3 4 5 NA U Alumni affairs
- 1 2 3 4 5 NA U Refund policies when withdrawing from courses
- 1 2 3 4 5 NA U Adequacy of physical resources in classrooms
- 1 2 3 4 5 NA U Safety and security of classroom buildings and the learning environment

SECTION IV: COMPUTING

Please review the following rating key and then mark or circle to the left of each item your level of skill relative to each statement:

RATING KEY	
1 No Skills	4 Very Skilled
2 Few Skills	5 Exceptionally Skilled
3 Moderate Skills	NA Not Applicable
	U Unknown or Unable to Answer

- 1 2 3 4 5 NA U Ability to use an operating system
- 1 2 3 4 5 NA U Ability to use computing equipment for problem solving
- 1 2 3 4 5 NA U Ability to use database software
- 1 2 3 4 5 NA U Ability to use electronic mail
- 1 2 3 4 5 NA U Ability to use graphics software
- 1 2 3 4 5 NA U Ability to use hardware
- 1 2 3 4 5 NA U Ability to use multimedia hardware and software
- 1 2 3 4 5 NA U Ability to use spreadsheet software
- 1 2 3 4 5 NA U Ability to use the Internet
- 1 2 3 4 5 NA U Ability to use word processing software
- 1 2 3 4 5 NA U Awareness of legal and ethical use of computing equipment
- 1 2 3 4 5 NA U Knowledge of computing technology in an information society

SECTION V: EMPLOYMENT AND CAREER

Please evaluate how the following components of your professional development have changed as a result of your experience with the Fischler Center for the Advancement of Education:

RATING KEY				
1	2	3	4	5
Not at all				Substantially

- 1 2 3 4 5 NA U Increased opportunity for promotion
- 1 2 3 4 5 NA U Increased opportunity for consulting
- 1 2 3 4 5 NA U Acquired new information
- 1 2 3 4 5 NA U Financial gain
- 1 2 3 4 5 NA U Increased professional status
- 1 2 3 4 5 NA U Social growth and contribution (working as a team member)
- 1 2 3 4 5 NA U Preparation for future study

How many years of professional work experience did you have before you enrolled at NSU: _____ Years

How closely related is your current job to your academic program at NSU?

- _____ Highly related
- _____ Moderately related
- _____ Slightly related
- _____ Not at all related
- _____ I am currently unemployed
- _____ Unknown or unable to answer

How well did your experiences at NSU prepare you for your current job?

- _____ Exceptionally well
- _____ More than adequately
- _____ Adequately
- _____ Less than adequately
- _____ Very poorly
- _____ Not at all
- _____ I am currently unemployed
- _____ Unknown or unable to answer

What is your annual salary from your primary employer?

- _____ \$29,999 or less
- _____ \$30,000 to \$39,999
- _____ \$40,000 to \$49,999
- _____ \$50,000 to \$59,999
- _____ \$60,000 to \$69,999
- _____ \$70,000 to \$79,999
- _____ \$80,000 to \$89,999
- _____ \$90,000 or more
- _____ Unemployed, looking for work
- _____ Unemployed, student
- _____ Unemployed, other

Name of Current Employer

Have you applied to a graduate or professional program since graduating from NSU?
