ABSTRACT

In 1995, the three colleges in California's Los Rios Community College District (LRCCD) surveyed 6,151 former students from 1993-94 to gather information on student outcomes and characteristics. This report presents districtwide findings related to the frequencies and percents of responses by academic program. Following an executive summary and the survey instruments used by the District's three colleges (American River College, Cosumnes River College, Sacramento City College), a general discussion is provided of survey methodology, indicating that surveys were sent to all graduates and certificate earners and a random sample of non-returning students who had not graduated. Tables are then provided of the survey response rate, indicating that responses were received from 2,389 former students, and overall responses for all academic programs. The next section provides data tables showing responses for occupational education programs, including: accounting, administration of justice, automotive mechanics technology, automotive technology, aviation maintenance technology, business, communications media, computer information science, dental hygiene, drafting technology, early childhood education, electronics technology, engineering, environmental control technology, fire technology, health information technology, horticulture, human services, interior design, legal assisting, management, medical assisting, nursing, occupational therapy assisting, office administration, real estate, and social services assisting. Responses are then presented for general programs, including art, general education or transfer/liberal arts, humanities, interdisciplinary studies, mathematics, physical education, science, and social sciences. The final section presents tables of responses for undeclared students. (HAA)

ACKNOWLEDGMENTS

We gratefully acknowledge input, feedback and assistance provided by several people throughout the Los Rios Community College District in completing this project. Our sincere thanks go to: Deborah Travis, Director of Occupational Education and Economic Development for establishing the priority and support for this project; to the occupational education deans at the three colleges – Patricia O'Brien, American River College (ARC), Gert Tipton, Cosumnes River College (CRC), and Norval Wellsfry, Sacramento City College (SCC) for their feedback and suggestions related to the proposed survey design and data analysis for this project; to Joseph Howard (ARC), Gert Tipton and Norval Wellsfry for managing the three sets of survey mailings from the colleges and members of their staff who actually coordinated the process – Margaret Cowan (ARC), Joan Penning (CRC) and Karen Arden (SCC); to researchers and their supervisors at the three colleges for providing feedback and suggestions related to the proposed college level data analysis – James Barr, Richard Rasor and Sharon McCuen (ARC), Brad Brazil and Janis Jones (CRC) and Julia Brootkowski and Norval Wellsfry (SCC); to Verna Puglisi for her efforts in coordinating the production of the survey questionnaire, the return mail process, the data entry process and production of the final reports; and Michelle Bianco for data entry.

Program-specific occupational questionnaires used by Cosumnes River College were developed by college staff members in the respective departments under the direction of Gert Tipton. Our thanks go to them in extending the breadth of this project; it is hoped that the extra information gathered by these questionnaires made their effort worthwhile.

We extend a special thanks to Beth Lee, former Coordinator of Research with the Los Rios Community College District. Beth coordinated this project in past years and graciously answered *many* questions along the way.

We also thank Carol McKenzie, Director of Planning and Research, for her support related to this project and the 2,389 former students of the Los Rios colleges who took the time to complete the questionnaire.

MEASURES OF PROGRESS: 1995 PROJECT FOLLOW-UP
RESULTS OF A SURVEY OF 1993-94 GRADUATES AND NON-RETURNING STUDENTS

EXECUTIVE SUMMARY: VOLUME I of II

November 1995

From the Spring through the early Summer of 1995 the Los Rios Community College District conducted its biennial student follow-up survey, the eighth in a series that now covers a span of twelve years. During this twelve year period, data were generated from the responses of over 17,000 former students. After adjusting for undeliverable mail, the 1995 survey population included 6,151 former students who had attended one of the district's three colleges -- American River College (ARC), Cosumnes River College (CRC), and Sacramento City College (SCC) during the 1993-94 academic year. Questionnaires were sent to all degree and certificate earners (including those from summer session) and to a stratified random sample of non-returning students who had not graduated. Non-returning students were stratified by college; within each college they were stratified by gender, age and ethnicity. Responses from 2,389 individuals (for a rate of return of 38.8%) have been analyzed in an effort to answer the following questions of interest in educational planning:

- ◆ What happens to our students after they leave their Los Rios college? Were their educational goals completed? If not, why did they leave? Did the program and services offered by the colleges meet their individual educational needs? Do they plan to return to Los Rios in the future?
- ◆ Are they employed? Where are they working and how much do they earn? Are they working in fields related to their college programs? Do they feel well prepared for employment?
- ◆ What is their current educational status? Are they continuing their education elsewhere? Do they feel well prepared to do so?

Volume I of this study looks at respondent frequency counts and percents on each survey question. Data were generated at the district, college and academic program levels. Volume II of this study will analyze significant relationships among variables and will be available in early 1996. The following summary for Volume I provides a brief profile of the former students from the 1993-94 Academic Year.

DEMOGRAPHIC PROFILE

Of the 2,389 former students from 1993-94 who responded to the survey, 45% were non-returning students, 8.5% were certificate earners and 46.5% were degree earners. During the last semester of attendance that year, 82.5% were part-time and 17.5% were full-time students. Interestingly, 64% were female and only 36% were male; this varies from the general student population where only 57% of the students are women.

The ethnic breakdown of respondents varies as follows: 66% of respondents are white; 14.5% are of Asian descent; 8% are Latino; 6% are African American; 2% are Native American; and 3.5% are from various other ethnic groups.

Exactly 52% of the respondents were former Occupational Education students, while 48% matriculated through General Programs. Students matriculating in General Programs usually do so with a specific intent to transfer.

RESPONDENTS EXPERIENCE IN LRCCD

Transfer was the *primary* goal of 46% of the respondents, while 44% enrolled for occupation-related reasons. An additional 10% enrolled for personal interest or other reasons. Primary goals were completed by 55% of the respondents, while 34% indicated that they had been partially completed at their Los Rios college of attendance. Of those who plan to pursue their goal further, 23%

intend to do so at their Los Rios college, while 42% plan to pursue it at a four-year college or university.

When asked their *primary* reason for not re-enrolling, 43% of all respondents indicated they had completed their desired program or courses; an additional 17% indicated they had transferred to another college. The proportion of students who suggested that availability of courses was the primary reason for not re-enrolling was less than that which was reported in 1993 (3% versus 5%). But the proportion of students suggesting job hours conflicted with school as the primary reason for not re-enrolling was higher this year than in 1993 (8% versus 5%). The three Los Rios colleges may wish to consider expanding course offerings at non-traditional times to meet the needs of these students and other working adults interested in becoming Los Rios students.

General satisfaction with the overall experience at Los Rios colleges was high. On a scale of one to five, where 5 equals "very satisfied" and one equals "very disappointed," the average student rating was 4.08. Instructor interest and quality of instruction were rated even higher: 4.16 and 4.14, respectively. All college services received an average rating of 3.23 (this rating was for job placement services) or greater, although none were rated above 3.91 (this rating was for learning center/lab services).

Almost 62% of the respondents said they are interested in taking courses in the future at their former Los Rios college.

EMPLOYMENT OF FORMER STUDENTS

Seventy-five percent of the respondents are employed, up from 73% in 1993. Of those employed, 93% are employed in the four-county Sacramento Metropolitan Statistical Area.

Slightly more than half (52%) were employed in their occupational fields *prior* to enrolling at a Los Rios college; 52% are currently employed in fields related to their programs of study.

Those employed *full-time* in fields related to their programs of study command higher annual salaries than those employed in fields that are not related (\$31,506. vs. \$28,201). Interestingly, there were far more former students working *part-time* in fields unrelated to their programs of study than those employed part-time in fields that are (41% versus 28%). They also made a slightly higher average hourly wage (\$12.51 versus \$12.10). These differences may reflect the needs of transfer students who choose part-time work at higher levels of pay (on a temporary basis) to support them as they complete their academic programs.

As might be expected, former students who are employed in fields related to their Los Rios college program of study rate their education and training higher than those employed in un-related fields. Average ratings are 4.03 and 3.27, respectively. These averages are based on a five-point scale where 5 equals "very good" and one equals "very poor."

ENROLLMENT STATUS AT TIME OF SURVEY

Almost half (44%) of the former Los Rios college students surveyed are enrolled in a college or university. Of those who are enrolled, 12% are attending another Los Rios college, while 6% transferred to another California community college. Almost 47% are enrolled at California State University (CSU) in Sacramento, while 10% are enrolled at other CSU campuses. The University of California (UC) at Davis is the transfer institution of 7%, and 4% transferred to other UC campuses. Almost 9% transferred to private institutions of higher education in California, while 6% transferred to out-of-state colleges and universities.

Among respondents who reported academic majors at their transfer institutions, there are four majors with the largest proportions of students: business, management and economics (21%); social and behavioral sciences (17%); health, health-related professions and life sciences (14%) and English, humanities and fine arts (9%).

Most respondents reported that they had no problems in transferring; only 11% of those who transferred said they had problems. Problems mentioned were transferring units (52 respondents) and transcripts (21 respondents).

A large majority of those who transferred are enrolled as full-time students. Only 28% are enrolled part-time.

As was the case in evaluating their Los Rios experience in relationship to preparation for employment, transfer students rate their Los Rios preparation to continue their education fairly high. On a five-point scale, where one equals "preparation was excellent" and five equals "preparation was inadequate," the average rating was 2.0.

This summary is based on research conducted by the 1995 Project Follow-up staff: research design, analysis and report writing - Judith Beecher, Research Analyst; research design, computer programming, database development and management - Jose Pagtalunan, Programmer Analyst; coordination of return mail process, data entry process and production of final reports - Verna Puglisi, Secretary. Questions regarding this project should be directed to the LRCCD Office of Planning and Research, Carol R. McKenzie, Ph.D. Director, 916-568-3091.

SUMMARY OF RESPONSES: ALL PROGRAMS

Survey Results

1995 Student Follow-up A Survey of 1993-94 Graduates and Non-Returning Students

In Spring 1995, Follow-up survey questionnaires were sent to former students who had attended a Los Rios college during the 1993-94 academic year. The survey's purpose was to assess: what happened to our students after they left their Los Rios college; whether their educational goals were met; how well programs and services offered met their individual needs; whether they were currently employed and where; whether they were working in fields related to their programs of study; whether they feel they were well prepared for employment; whether they have continued their education elsewhere; and whether they feel they were well prepared to do so. The survey population included all graduates and certificate earners for that year (including summer session) and a stratified random sample of non-returning students who had not graduated. Non-returning students were stratified by college; within each college they were stratified by gender, age and ethnicity. The following summary provides information regarding the survey population.

Summary of Responses:

LOS RIOS COMMUNITY COLLEGE DISTRICT

	<u>Degree Recipients</u>	<u>Certificate Earners</u>	<u>Non-Returners</u>	<u>Total</u>
Former Student Population 1993-94	2,098	396	39,308	41,802

<u>1146</u>	<u>48.0</u>	All Others (General Programs)

I. End Notes

CLASSIFICATION STATUS – Classification status of non-returning students was determined by courses completed during the 1993-94 Academic Year; those students who completed courses classified with a Sam Code of A, B, or C were counted as Occupational Education students, while all other students were classified as General Program students. The classification status of degree and certificate earners was based upon the actual classification of the award granted.

I. End Notes

CLASSIFICATION STATUS -- Classification status of non-returning students was determined by courses completed during the 1993-94 Academic Year; those students who completed courses classified with a Sam Code of A, B, or C were counted as Occupational Education students, while all other students were classified as General Program students. The classification status of degree and certificate earners was based upon the actual classification of the award granted.

I. End Notes

CLASSIFICATION STATUS -- Classification status of non-returning students was determined by courses completed during the 1993-94 Academic Year; those students who completed courses classified with a Sam Code of A, B, or C were counted as Occupational Education students, while all other students were classified as General Program students. The classification status of degree and certificate earners was based upon the actual classification of the award granted.

I. End Notes

CLASSIFICATION STATUS -- Classification status of non-returning students was determined by courses completed during the 1993-94 Academic Year; those students who completed courses classified with a Sam Code of A, B, or C were counted as Occupational Education students, while all other students were classified as General Program students. The classification status of degree and certificate earners was based upon the actual classification of the award granted.

<u>38</u>	<u>92.7</u>	Occupational Education
<u>3</u>	<u>7.3</u>	All Others (General Programs)

I. End Notes

CLASSIFICATION STATUS -- Classification status of non-returning students was determined by courses completed during the 1993-94 Academic Year; those students who completed courses classified with a Sam Code of A, B, or C were counted as Occupational Education students, while all other students were classified as General Program students. The classification status of degree and certificate earners was based upon the actual classification of the award granted.

<u>1</u>	<u>7.1</u>	All Others (General Programs)

I. End Notes

CLASSIFICATION STATUS – Classification status of non-returning students was determined by courses completed during the 1993-94 Academic Year; those students who completed courses classified with a Sam Code of A, B, or C were counted as Occupational Education students, while all other students were classified as General Program students. The classification status of degree and certificate earners was based upon the actual classification of the award granted.

I. End Notes

CLASSIFICATION STATUS -- Classification status of non-returning students was determined by courses completed during the 1993-94 Academic Year; those students who completed courses classified with a Sam Code of A, B, or C were counted as Occupational Education students, while all other students were classified as General Program students. The classification status of degree and certificate earners was based upon the actual classification of the award granted.

I. End Notes

CLASSIFICATION STATUS -- Classification status of non-returning students was determined by courses completed during the 1993-94 Academic Year; those students who completed courses classified with a Sam Code of A, B, or C were counted as Occupational Education students, while all other students were classified as General Program students. The classification status of degree and certificate earners was based upon the actual classification of the award granted.

CLASSIFICATION STATUS

Occupational Education

All Others (General Programs)

I. End Notes

CLASSIFICATION STATUS – Classification status of non-returning students was determined by courses completed during the 1993-94 Academic Year; those students who completed courses classified with a Sam Code of A, B, or C were counted as Occupational Education students, while all other students were classified as General Program students. The classification status of degree and certificate earners was based upon the actual classification of the award granted.

I. End Notes

CLASSIFICATION STATUS -- Classification status of non-returning students was determined by courses completed during the 1993-94 Academic Year; those students who completed courses classified with a Sam Code of A, B, or C were counted as Occupational Education students, while all other students were classified as General Program students. The classification status of degree and certificate earners was based upon the actual classification of the award granted.

I. DOCUMENT IDENTIFICATION:

Title: Measures of Progress: 1995 Project Follow-up, Executive Summary: Vol. I of II Results of a Survey of 1993-94 Graduates and Non-Returning Students	
Author(s): Judith A. Beachler, Ph.D.	
Corporate Source: Office of Planning and Research Los Rios Community College District 1919 Spanos Court, Sacramento, CA 95825	Publication Date: November 1995

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education (RIE)*, are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following two options and sign at the bottom of the page.

X
