ABSTRACT

In summer 1996, a long-term follow-up study was conducted of 1991-92 graduates of career programs at Johnson County Community College (JCCC), in Kansas. Questionnaires were mailed to 646 graduates, certificate holders, and students who left JCCC with marketable skills to assess their satisfaction with their educational experiences and their current employment status. Major findings, based on responses from 326 former students and including comparisons with findings from previous long-term follow-up studies, include the following: (1) 82.8% were employed in a job related to their community college career program, up from 79% in 1992, and 93% of these were working full-time; (2) only 1.3% of the respondents were unemployed and looking for work; (3) 9.4% were employed in unrelated jobs, down from 15% in 1992; (4) an average hourly wage of \$14.84 was reported by respondents employed full-time in a job related to their education; (5) the difference in average hourly wage earned by males and females increased significantly from \$.36 in 1992 to \$1 in 1996; (6) for those in full-time jobs related to their field of study, 86.5% expressed satisfaction, up from 81% in 1992; and (7) 92% indicated that their experiences at JCCC had definitely or probably improved their quality of life, while 96.9% said that they would recommend the college to friends. The survey instrument is appended. (HAA)

INTRODUCTION

History of career program completer follow-up studies

For over 20 years the Office of Institutional Research at Johnson County Community College has conducted short-term follow-up studies of students who completed a JCCC career program during the previous academic year, and of the employers of completers who were working in a job related to their course of study, as a major component of the college's assessment of institutional effectiveness. Results of these studies have provided valuable insights into the effectiveness of the career programs and have assisted the college in planning to meet the individual needs of future students and the employment needs of business and industry.

The first long-term study of career program completers was initiated in 1989, at which time the 1985-86 completers were surveyed to provide insights into the career and educational experiences of former students over an extended period of time. Results of this and subsequent long-term follow-up studies also provided a broader perspective on the level of job satisfaction of former students currently employed in various career fields, their opportunities for advancement, salaries, and other variables which influence the career decision-making process of future JCCC students.

A second long-term follow-up study was conducted in 1990 of the 1986-87 completers, after which career program administrators were surveyed to elicit their opinions on whether these data would be more valuable if collected after a longer period of time had elapsed since program completion. The results were evenly divided between preference for a 3-year or a 5-year follow-up study. Thus, the decision was made to utilize a 4-year interval, resulting in a follow-up study of 1987-88 completers in 1992, of 1988-89 completers in 1993, of 1989-90 completers in 1994, of 1990-91 completers in 1995, and of 1991-92 completers in 1996.

Methodology

The list of 646 graduates, certificate recipients, and students identified by career program administrators as leaving with marketable skills in 1991-92 was reviewed by career program administrators to insure the most recent addresses and telephone numbers possible. Surveys were mailed on July 8 and July 22, 1996, and remaining nonrespondents were telephoned during the week of August 19, 1996. Additional information secured through telephone contact with acquaintances of completers was utilized for a third mailing conducted in September.

A total of 214 former students had no opportunity to respond due to obsolete addresses and/or telephone numbers and six indicated they had *not* completed a career program during 1991-92, reducing the list of potential respondents to 426. Of those, 111 returned mail surveys and 215 completed telephone interviews for an adjusted response rate of 77%.

.

Caution should be exercised when generalizing these data due to the relatively small number of respondents in some programs. Findings are not necessarily representative of either the number of students enrolled in each program or the salaries of all career program completers.

A summary of the major findings of the study follows. Findings are presented by career program as often as possible to enhance the usefulness of results. Comparisons between 1996 results and findings from previous studies are presented where appropriate to enhance the usefulness of the data. Tables detailing results of the 1996 survey are located in Appendix A, and a list of tables is provided at the front of the appendix to facilitate location of specific data. Full reports detailing results of all of the follow-up studies of career program completers are available in the Office of Institutional Research.

Cover letters and the mail survey are contained in Appendix B. Copies of program-specific verbatim comments have been provided to career program administrators and are available to other interested parties in the Office of Institutional Research.

Comments or questions regarding this report or previous follow-up studies of career program completers may be directed to:

MAJOR FINDINGS

Utilization of community college preparation

- * Nearly 83% of 1996 respondents were employed in a job related to their community college career program, up from 79% in 1992 (the first time a 4-year follow-up study was conducted). Of those, 93% were working full-time, up from 86% in 1992.
- * Unemployment remained essentially the same in both 1992 and 1996, with less than 2% of respondents looking for work at the time the study was conducted.
- * Approximately 9% of 1996 respondents were employed in unrelated jobs, down from 15% in 1992.

Experiences with full-time related job

- * Approximately 44% of 1996 respondents indicated their current full-time related job was their first in that career field, compared to 42% in 1992.
- * Approximately nine out of ten respondents in each of the past 5 years felt they had progressed in their career field since completion of their community college course of study. The majority of 1996 respondents had earned promotions, received some form of professional recognition, and earned salary increases.

Hourly wage and satisfaction with full-time related job

- * An average hourly wage of \$14.84 was reported by 1996 respondents employed full-time in a related job, up from \$14.00 in 1992. However, the difference in the average hourly earnings of males vs. females increased substantially, from \$.36 in 1992 to \$1.00 in 1996. A higher average hourly wage was reported by males in 11 different career fields in 1996, and was particularly noteworthy in the following career fields for which 10 or more respondents provided data: business administration (\$30.00 vs. \$13.64), emergency medical technology (\$15.92 vs. \$10.94), and hospitality management (\$14.94 vs. \$9.41). By comparison, a higher average hourly wage was reported by females in only 5 career fields, two of which had 10 or more respondents: MICT/paramedic (\$14.09 vs. \$10.66) and nursing (\$17.00 vs. \$16.82).
- * Nearly 87% of 1996 respondents expressed satisfaction with their full-time related job, up from 81% in 1992. Eight out of ten rated their working conditions, level of responsibility, and job in general as excellent or good in each of the past 5 years. Advancement potential was rated highly by 49% of 1996 respondents, about the same as in 1992, and salary was rated highly by 66% of 1995 respondents, up from 63% in 1992.

Community college experiences

- * Over 88% of 1996 respondents indicated JCCC was their first choice college to attend, up from 85% in 1992. Of those who preferred a different college or university, approximately 45% had selected another Kansas institution as their first choice, 22% selected one in Missouri, and 22% selected a college or university outside of this area.
- * Approximately seven out of ten 1996 respondents had earned an associate's degree (about the same as in previous years), 22% had earned a vocational certificate (compared to 16% to 18% in previous years), and 7% had left with marketable skills (compared to 10% to 14% in previous years).
- * Approximately 45% of 1996 respondents indicated they had used the JCCC Career Center, up from 40% in 1992.

Satisfaction with community college experiences

- * Eight out of ten respondents in each of the past 5 years indicated their community college experiences had helped to enhance their self-confidence. The majority also indicated the community college had helped them to improve their oral and written communication, time management, decision-making, and interpersonal skills, broadened their knowledge of the arts and sciences, expanded their tolerance for people and ideas, and assisted them in clarifying their personal values and goals.
- * Nine out of ten respondents in each of the past 5 years had achieved their community college educational objective. Of those, approximately 95% indicated the community college had helped them to achieve that objective.
- * Nine out of ten respondents in each of the past 5 years indicated their community college experiences had improved their quality of life (apart from any financial benefit) and, if starting now, nine out of ten also would attend JCCC again.
- * Nearly 97% of respondents in each of the past 5 years indicated they would recommend JCCC to friends, and nine out of ten would encourage their own children to attend JCCC.

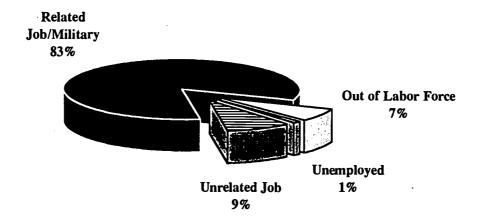

CURRENT STATUS

What percentage of respondents are employed in a related job several years after completing their community college course of study, and what are the other completers doing?

One of the primary purposes of conducting long-term follow-up studies of career program completers is to determine, over time, how they utilize the skills developed through their course of study. Figure 1 depicts the current status of respondents to this year's long-term follow-up study. Note that nearly 83% were working in a job related to their course of study, and only 1% were unemployed and looking for work.

Table 2 in Appendix A details results and comparisons of findings for each of the seven long-term follow-up studies of career program completers conducted by the college.

Figure 1 1996 Status of 1991-92 Career Program Completers

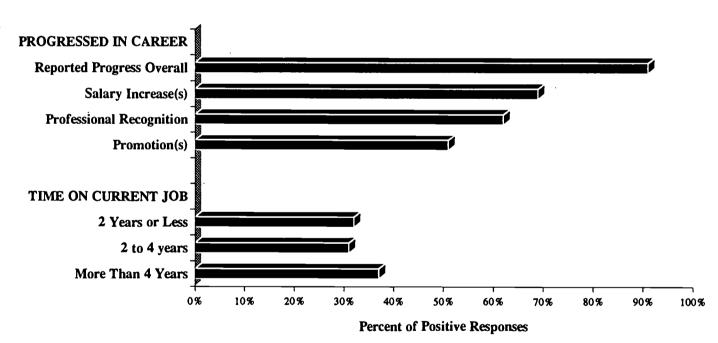

How long have respondents working full-time in a related job had their current job, was it their first job in that career field, have they progressed in their careers, and if so, how?

As Figure 2 depicts, nine out of ten responents who were working full-time in a related job had progressed in their career field since completing their course of study at the community college. These findings are particularly meaningful in view of the fact that nearly a third had been employed in their current full-time related job 2 years or less.

The majority of respondents indicated this was not their first job in their career field. See Tables 5, 6 and 7 in Appendix A for detailed results of findings.

Figure 2
Experiences With Full-Time Related Job

EVALUATION OF FULL-TIME RELATED JOB

How would respondents rate various aspects of their full-time related job, and how satisfied are they with their employment situation?

An important objective of the long-term follow-up study of career program completers is to ascertain respondent perceptions of their current full-time related job. Thus, respondents were asked to rate their job relative to working conditions, level of responsibility, advancement potential, salary, and the job in general.

As Figure 3 depicts, both 1992 and 1996 respondents viewed all aspects of their job in a positive manner. Although for 1996 there was a notable decrease in the percent rating their working conditions as excellent or good, the percent expressing satisfaction with their current full-time related job increased substantially. See Tables 8 to 13 in Appendix A for results of 1996 findings by career program.

Satisfaction With Job Job in General Job Responsibility **Working Conditions** Salary Advancement Potential 0% 10% 20% 30% 40% 50% 60% 70% 80% 90% Percent of Positive Responses (excellent or good) **1992 1996**

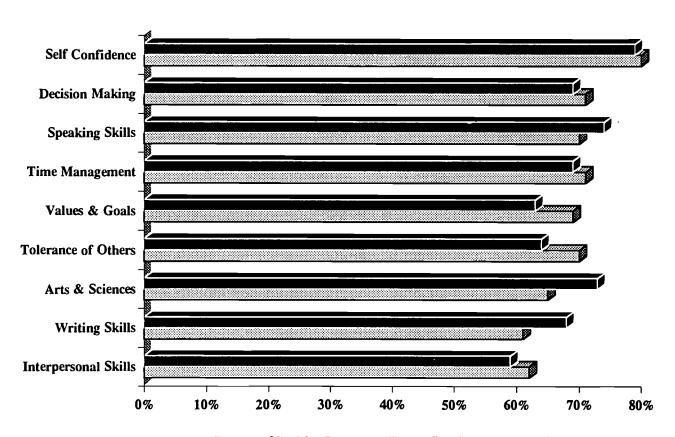

Figure 3
Evaluation of Full-Time Related Job

In what specific areas do career program completers perceive themselves as having benefited from their community college experiences?

Respondents were asked to indicate how much they agreed that the community college had helped them to accomplish a variety of "typical" goals students have for their college experiences. As Figure 4 depicts, the majority of respondents reported improvements in a variety of cognitive and noncognitive behaviors in both 1992 and 1996. Note that a greater percent of respondents indicated improvement in the cognitive areas in 1996 than in 1992 (oral communication, the arts and sciences, and written communication), while the percent indicating improvement in the noncognitive areas decreased slightly. See Table 15 in Appendix A for detailed results of 1996 findings.

IC.

SATISFACTION WITH THE COMMUNITY COLLEGE

How satisfied are the career program completers with their community college experiences?

An important component of the ongoing assessment of institutional effectiveness that the JCCC Office of Institutional Research conducts is contained in former students' responses to this series of questions. As Figure 5 depicts, JCCC was the first choice of colleges to attend for nine out of ten respondents in both 1992 and 1996 and, if starting now, nine out of ten would attend JCCC again.

Nearly all respondents in both 1992 and 1996 would recommend JCCC to friends, and nine out of ten would encourage their own children to attend JCCC. See Tables 14, 16 and 17 in Appendix A for detailed results of findings.

JCCC First Choice Would Attend Again Achieved Ed. Objective **Improved Quality of Life** Recommend to Friends **Encourage Own Kids** 0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100% Percent of Positive Responses

Note. Data were collected utilizing a 5-point scale ranging from very satisfied to very dissatisfied. Thus, the "satisfied" column includes "very satisfied" and "somewhat satisfied" responses combined, and the "dissatisfied" column includes "somewhat dissatisfied" and "very dissatisfied" responses combined. Results detail responses to this question only, excluding unknowns.

APPENDIX B MAIL SURVEY INSTRUMENT AND COVER LETTERS

JOHNSON COUNTY COMMUNITY COLLEGE LONG-TERM FOLLOW-UP STUDY OF 1991-92 CAREER PROGRAM COMPLETERS

Dear Former Student: Please take a few minutes to carefully respond to each of the following questions as honestly and completely as possible, then return the completed survey to us in the envelope provided. Naturally all responses will be kept strictly confidential and reported as group data only.

____NOTE: If you did not complete a career program by either graduating, earning a certificate, or leaving with marketable skills during the summer of 1991, fall of 1991 or spring of 1992, please check here and return the uncompleted survey to us so we can correct our records. Thank you for your help.

1.	Which career program did you complete?					
2.	What was your status when you left that career program? (Check only one)					
	1. Earned an associate's degree 2. Earned a vocational certificate 3. Left with enough training to work in this career field					
3. Was JCCC your first choice when you decided to attend college to pursue this major?						
	1. Yes 2. No (If no, which college was your first choice?					
4.	How many semesters were you enrolled in that program at the community college?					
5.	How many total credit hours have you completed at the community college?					
6.	Which of the following best describes your primary educational objective when you first enrolled at the community college? (Check only one)					
	1. Transfer to another college or university 2. Prepare to enter the job market improvement 3. Improve skills for your present job 4. Explore courses to decide on a new career 5. Remedy or review basic skills 6. Study topics of interest or for self-improvement 7. Prepare to change careers 8. Other (Please specify)					
7.	Did you achieve your community college educational objective? 8. If yes, did the community college help you to achieve this objective?					
9.	Regardless of the financial benefits, do you feel your community college experiences have improved the quality of your life? 10. If you could go back, knowing what you know now, would you still attend the community college?					
	1. Definitely not 2. Probably not 3. Uncertain 4. Probably yes 5. Definitely yes 1. Definitely not 2. Probably not 3. Uncertain 4. Probably yes 5. Definitely yes 5. Definitely yes

Any comments or suggestions you would like to make about the community college or the career program you completed which would help us in meeting the needs of future students would be appreciated.

July 8, 1996

Dear JCCC Career Program Completer:

As part of Johnson County Community College's continuing commitment to improving its programs and services, we are surveying former students who completed a career program at JCCC (or through Maple Woods or Penn Valley Community College) during the summer of 1991, fall of 1991, or spring of 1992. This includes graduates, students earning certificates, and students who have completed sufficient coursework to acquire new skills or upgrade their current ones.

The information you provide will assist us in enhancing our career programs, and in helping future students make realistic career choices by furnishing them with data on the success of our career program completers over time. Please take a few minutes to answer each of the questions on the enclosed survey as completely and accurately as possible, then return the completed survey to us in the postage-paid envelope provided by Friday, July 19. Naturally your responses will be kept strictly confidential and reported as group data only.

Thank you for your help, and for any comments or suggestions you may have which will assist us in meeting the needs of future JCCC students.

Sincerely,

Dan Radakovich Vice President for Academic Affairs

Enclosures

July 22, 1996

Dear Career Program Completer:

A few weeks ago we sent you a survey requesting information about your perceptions and opinions of the education you received at JCCC (or at Penn Valley or Maple Woods Community College if you participated in a co-op program) and how you are using the skills you developed in your career program. If you have already completed the survey, thank you very much. Your responses will help us in planning to meet the needs of future community college students like yourself.

In the event you have not as yet completed the survey and returned it to us, we are enclosing a second copy. Please take a few minutes to answer each of the questions as completely and accurately as possible. A postage-paid business reply envelope has been provided for your convenience in returning the completed survey to us by Friday, August 3. Naturally all responses will be kept strictly confidential and reported as group data only.

Thank you for your help in evaluating the career program in which you participated, and for any comments or suggestions you may have.

Sincerely,

Dan Radakovich Vice President for Academic Affairs
