IDENTIFIERS Aid to Families with Dependent Children; Arrests; Food Stamp Program; \*Indicators; \*Oregon; Project Head Start; Women Infants Children Supplemental Food Program

ABSTRACT

This Children First for Oregon report, funded by a Kids Count grant from the Annie Casey Foundation, investigates state and countywide trends in the well-being of Oregon's children. The statistical report is based on 14 indicators of child well-being: (1) child abuse and neglect rates; (2) crimes against persons; (3) child death rate; (4) prenatal care; (5) infant mortality rate; (6) child care supply; (7) teen pregnancy rate; (8) juvenile arrests; (9) suicide attempts; (10) eleventh grade reading proficiency; (11) eleventh grade math proficiency; (12) high school students involved in professional-technical education; (13) high school dropout rate; and (14) child poverty. Indicators are defined and data sources explained. For each county and statewide, the report lists the number of child receiving aid in 1996 from Aid to Families with Dependent Children, Food Stamps, Head Start or prekindergarten programs, Medicaid, or the Women, Infant, Children Nutrition Program; the 1995 population, 1990 and 1994-95 indicator data, the county rank for each indicator, the 1995 benchmark, and current indicator data compared to the 1995 benchmark. Overall, the findings presented indicate that Oregon is on target for benchmarks set for infant mortality and child care supply. The report notes that strategic planning is needed to reach milestones and to compensate for diminishing federal funds and block grants. (KDFB)

# MEASURING Child Well-Being

## THE OREGON BENCHMARKS

Oregon is a national leader in developing over 200 statewide targets or "benchmarks" that together provide measurable policy goals aimed at improving the quality of life for Oregonians in the 21st century and beyond. Progress on these benchmarks is reported by the **Oregon Progress Board** in a biennial publication to the State Legislature. The use of benchmarks in government provides an effective tool to focus on results in an era of limited resources. These benchmarks allow for more informed decisions in program planning, evaluation, service delivery and budgeting. Many of the benchmarks are focused on child and family well-being, and these are the indicators to which **Children First** pays closest attention.

As Oregonians, it is our responsibility to respond to the progress (or lack of progress) on these indicators by addressing issues on neighborhood and county levels and by communicating information and concerns to public officials. Only through active citizen participation will Oregon reach the benchmarks. You can look to **Children First** for annual updates on Oregon's progress toward meeting the statewide benchmarks. While there is much good work happening on behalf of Oregon's children and families, of the 20 or so indices we monitor, Oregon is on target for only 2 indicators in 1995: infant mortality and child care supply. There is much work to be done.

Through **The Oregon Option**, an intergovernmental partnership focused on achieving the Oregon Benchmarks, work is being done to streamline funding for programs and services to better serve the needs of children and families. In addition, on the local level, The Oregon Option is providing regional data support and training to help counties work toward the benchmarks. This is an important beginning, but we need more people involved to see dramatic results.

While the benchmarks provide information about our destination, the roadmap to get there is still missing. We need a strategic plan to help us reach those milestones and tackle the issue of diminishing federal funds and block grants.

We hope that the county fact sheets in this report will help legislators, community leaders, advocates, parents and others to make more informed decisions regarding our children's needs and future. If you are interested in learning more about the benchmarks or want to get involved to help Oregon reach its goals for children please contact:

### **OREGON PROGRESS BOARD**

(503) 986-0039

You can request a copy of *Oregon Benchmarks* that defines the benchmarks and describes the state's progress toward meeting them.

### **The Oregon Option**

(503) 986-0244

Call to learn about current activities and committees working to achieve benchmarks.

### **OREGON COMMISSION ON CHILDREN & FAMILIES**

The Oregon Commission on Children & Families supports local commissions in each county working to meet benchmarks for child and family wellness. To get involved call your County Commission on Children & Families.

### **COUNTY HEALTH DEPARTMENTS**

Call your County Health Department to get involved in local health issues for children and families and to achieve child health benchmarks.

### **CHILDREN FIRST FOR OREGON**

(503) 294-1456 OR (800) 544-0376

Children First is a statewide advocacy organization focusing on the needs of children and families. Call to request our publications, to get involved in one of our programs, and to become a member.

### **KIDS COUNT**

This report is a product of the *Kids Count* project funded by the *Annie E. Casey Foundation*, the largest philanthropic organization for disadvantaged children. Kids Count was created to monitor and report on child well-being across the country and to act as a voice for greater accountability in assessing programs and policies affecting children. Children First for Oregon, in partnership with the Oregon Progress Board, produces Kids Count reports on the conditions of children in Oregon. The Annie E. Casey Foundation produces the *National Kids Count Data Book* which compares states on indicators of child well-being. Copies of Kids Count reports are available by contacting Children First for Oregon.

# COUNTY DATA FOR COMMUNITY ACTION

The information in your county fact sheet can be used in powerful ways to improve the quality of life for children and families in your county. The first step is to carefully assess the data. Here are some ways to interpret the findings and use them for action.

## **INTERPRETING THE DATA: BEWARE OF SMALL NUMBERS**

The indicators were selected to focus on the whole child and, where possible, to correspond with statewide benchmarks. Using available data in the years 1990 and 1994/95, we ranked counties on the different indicators to allow some comparison among all counties in Oregon.

Counties do vary significantly in population, size and geography and this should be considered to interpret the rankings meaningfully. Be aware of the fact that small counties may have a small number of events (i.e., child deaths, suicide attempts) which can cause indicators to vary considerably from year to year, perhaps not reflecting significant changes in the indicators. For this reason, percent changes in the rates are not reported for counties with less than 40,000 people. The most important task is to assess progress toward meeting the benchmarks and to determine if you are moving in the right direction.

## **UNDERSTAND THE INDICATOR**

Understand what is being measured and how. For example, the Child Abuse & Neglect indicator measures the number of victims per 1000 children under 18 years. The indicators are all presented in rates (i.e., how many per 1,000 or 100) **not** absolute numbers, to take into account county population differences. See *Definitions & Sources* sheet.

## **REMEMBER THE LIMITS AND USES OF DATA**

While these data provide important baseline information, they must be understood in a broader context. If the child abuse and neglect rate has increased significantly in your county, you may want to use this information to seek out the possible causes. Talk with experts in

the field and local government and agency staff to find out what could explain the increase. Once you have pieced together a more complete picture, you can determine the appropriate next steps.

## **DATA AS A POWERFUL TOOL**

The data will give you a good snapshot of how children and families are doing on some important indices of community health and well-being. As the federal government shifts more responsibility to the states and counties, the benchmarks will be even more critical in influencing decisions about program planning, budgeting and evaluation. If you arm yourself with sound data you can use them to draw attention to issues of concern. Too often decisions impacting our children are made without the benefit of up-to-date and accurate information.

## **YOUR COUNTY FACT SHEET**

How is your county doing overall? How do the 1990 numbers compare with 1994/95? What things appear to be moving in the right/wrong direction? Find out why. How does your county compare to Oregon? What kinds of research, planning and action steps are necessary to reach the 1995 Benchmark goals that have not been attained? Compare your county rankings to counties similar in size and geography. Are the trends or problem areas in your county similar to those in adjacent counties? To what can you attribute the positive trends?

## **PRIORITIZE THE FINDINGS**

Identify one or more areas you would like to explore and contact relevant government, non-profit and community agencies. Contact your County Commission on Children and Families to find out what is happening in each area, and what strategies appear to be working. Find out how you can be involved.

## **STRATEGY MEETINGS**

Organize a meeting of friends, colleagues, and experts to focus on an issue of concern or a particular benchmark. Determine the best way your group can make an impact on the lives of children in your county. Use the information in the fact sheet to educate others including parents, community and business leaders. You might focus on a service project (like organizing volunteers for a particular agency that is understaffed) or work to improve a child care facility in your city.

**MEET with LOCAL BUSINESS LEADERS**

Take key information from your county fact sheet to inform business leaders and get them involved in improving outcomes for children. Propose avenues of involvement such as allowing their employees to volunteer in the schools or making their workplaces more family friendly.

**COLLECT MORE LOCALIZED DATA**

Use the county fact sheet as a template to gather more localized data on the city and neighborhood level. If these data are unavailable or inaccessible, this may be an important advocacy issue in itself.

**ADVOCATE for Kids AT THE LOCAL, STATE AND NATIONAL LEVELS**

- ◆ Contact your elected representatives and request information about their plans for improving the quality of life for children and families in your county. Use the fact sheet to identify areas of concern. Send a letter and include a copy of your county's fact sheet.
- ◆ Use the findings in your county fact sheet to support effective programs serving children and families during county budget hearings.
- ◆ Contact your candidates for public office to find out if they have a children's platform. Use the county fact sheet to find out where they stand on key issues of concern before casting your vote.
- ◆ Use data to prepare for federal block granting. Focus on the section of your county fact sheet that looks at services for low-income children. Find out how upcoming plans will affect those children and put in place a means to collect information and stories about the real impact of these changes on children's lives.
- ◆ Contact *Children First for Oregon* to get involved in state legislative activities and other advocacy projects on behalf of Oregon's children and families.

**COUNTY INDICATORS KEY**

- RANK 94/95** Counties are ranked from 1 to 36 based on 1994/1995 rates.
- RATE 1990** County rate for 1990.
- RATE 94/95** County rate for 1994, 1994-95, or 1995 depending upon indicator.
- CHANGE** Percent change between rate in 1990 and 1994/95. Percent changes are not reported for counties with less than 40,000 people due to small number of events.
- COMPARED TO '94 OREGON** Comparison of county rate for 1994/1995 with Oregon rate for same year.
- COMPARED TO '95 OREGON BENCHMARK** Comparison of county 1994/95 rate to Oregon's 1995 Statewide Benchmark.
- NA** Data not available

# DEFINITIONS & SOURCES

- ◆ **AID TO FAMILIES WITH DEPENDENT CHILDREN (AFDC)**  
The number of children who received AFDC assistance in January 1996. Children from Morrow, Wheeler and Sherman are served in surrounding counties.  
**Source:** Adult and Family Services Division
- ◆ **CHILD ABUSE & NEGLECT VICTIMS**  
Number of children abused and neglected per 1,000 children under 18 years olds (1990/1994). Data for Wasco and Sherman are combined.  
**Source:** Office for Services to Children and Families
- ◆ **CHILD CARE SUPPLY**  
Number of identified child care slots available for every 100 children under 13 years old (1990/1995). Since 1995, data are no longer available in counties where there is no state funded child care resource and referral agency.  
**Source:** Child Care Division of the Oregon Employment Department
- ◆ **CHILD DEATHS**  
Number of child deaths (ages 1-14) per 100,000 children (1990/1994).  
**Source:** Center for Health Statistics, Oregon Health Division
- ◆ **CHILD POVERTY**  
Percentage of children ages 0-17 years living below the federal poverty level. Unfortunately, we are not able to provide an accurate update since the 1990 Census. The 1995 Benchmark is compared to the 1990 rate.  
**Source:** U.S. Census Bureau
- ◆ **CRIMES AGAINST PERSONS**  
The number of crimes against persons (e.g., negligent homicide, forcible rape, other sex crimes, kidnapping, robbery, aggravated assault, simple assault) reported per 1,000 Oregonians (1990/1994).  
**Source:** Uniform Crime Reporting Program of the Department of State Police
- ◆ **FOOD STAMPS**  
The number of children receiving Food Stamps in January 1996. Children from Morrow, Wheeler and Sherman are served in surrounding counties.  
**Source:** Adult and Family Services Division
- ◆ **HEAD START/OREGON PREKINDERGARTEN**  
The number of children served in Head Start and Oregon Prekindergarten programs in January 1996.  
**Source:** Oregon Department of Education
- ◆ **HIGH SCHOOL DROPOUT**  
Percentage of students who dropped out of high school during the school year (1990-91/1994-95).  
**Source:** Oregon Department of Education

- ◆ **INFANT MORTALITY**  
Number of deaths to infants under one year of age per 1,000 live births (1990/1994).  
**Source:** Center for Health Statistics, Oregon Health Division
- ◆ **JUVENILE ARRESTS**  
Juvenile arrests per 1,000 juvenile Oregonians. This indicator does not measure offenses by juveniles, only crimes for which juveniles are arrested. It includes all types of crimes, including those against persons, property, and behavioral crimes (1990/1994).  
**Source:** Uniform Crime Reporting Program of the Department of State Police
- ◆ **MEDICAID**  
Number of children who had Medicaid health assistance in February 1996.  
**Source:** Office of Medical Assistance Programs
- ◆ **POPULATION ESTIMATES**  
Center for Population Research and Census at Portland State University.
- ◆ **PRE-NATAL CARE**  
Percentage of babies whose mothers received adequate pre-natal care as defined by beginning in the first trimester of pregnancy (1990/1994).  
**Source:** Center for Health Statistics, Oregon Health Division
- ◆ **PROFESSIONAL-TECHNICAL EDUCATION**  
Percentage of high school students with significant involvement in professional technical education and entrepreneurial programs (1990-91/1994-95).  
**Source:** Office of Professional-Technical Education, Department of Education
- ◆ **SUICIDE ATTEMPTS**  
Number of suicide attempts per 100,000 children ages 10-17 (1990/1994).  
**Source:** Center for Health Statistics, Oregon Health Division
- ◆ **TEEN PREGNANCY**  
The sum of resident live births and induced abortions among females ages 10-17 per 1,000 females ages 10-17 (1990/1994).  
**Source:** Center for Health Statistics, Oregon Health Division
- ◆ **WOMEN, INFANTS, CHILDREN (WIC)**  
Number of children who participated in the WIC nutrition program in March 1996. Data for Wasco and Sherman are combined.  
**Source:** Oregon Health Division
- ◆ **11TH GRADE READING PROFICIENCY**  
Percentage of 11th grade students who achieved proficiency in reading (1990-91/1994-95).  
**Source:** Oregon Department of Education
- ◆ **11TH GRADE MATH PROFICIENCY**  
Percentage of 11th grade students who achieved proficiency in math (1990-91/1994-95).  
**Source:** Oregon Department of Education

# 1996 STATUS of CHILDREN

## State of Oregon

### 1995 Population

Total: 3,132,000  
Under 18: 808,363

### Federal & State Assistance Programs 1996

Program	Number of Children
Aid to Families with Dependent Children (AFDC)	63,462
Food Stamps	138,734
Head Start / Oregon Prekindergarten	6,560
Medicaid	164,926
Women, Infant, Children (WIC)	64,174

## State Indicators

	Indicator	Rate 1990	Rate 94/95	Change	1995 Bench mark	Compared to '95 Oregon Benchmark
SAFETY	Child Abuse & Neglect Victims (per 1000)	11.3	10	12% Better	9	11% Behind
	Crimes Against Persons (per 1000)	17	17.7	4% Worse	15	18% Behind
	Child Deaths (per 100,000 ages 1-14)	29.3	24.8	15% Better	NA	NA
EARLY Childhood	Pre-natal Care (%)	75.6	78.9	4% Better	95	17% Behind
	Infant Mortality (per 1000 live births)	8.3	7.1	14% Better	7.5	5% Ahead
	Child Care Supply (slots/100 under 13)	14	16	14% Better	16	On Target
TEENS	Teen Pregnancy (per 1000 girls 10-17)	19.7	18.9	4% Better	9.8	93% Behind
	Juvenile Arrests (per 1000 juveniles)	46.4	57.2	23% Worse	35	63% Behind
	Suicide Attempts (per 100,000 age 10-17)	169.2	221.3	31% Worse	NA	NA
SCHOOL	11th Grade Reading Proficiency	79	85	8% Better	88	3% Behind
	11th Grade Math Proficiency	67	62	7% Worse	78	21% Behind
	Professional Technical Education (%)	9.1	9.5	4% Better	18	47% Behind
	High School Drop-out (%)	6.5	7.4	14% Worse	NA	NA
POVERTY	Child Poverty (% ages 0-17)	15.8	NA	NA	12	32% Behind

### Notes:

Number of Child Deaths in 1990 was 166 and in 1994 was 156.

While there was a 4% improvement in the teen pregnancy rate when 1990 is compared to 1994, there was no consistent trend during the five year period.

Number of Suicide Attempts in 1990 was 526 and in 1994 was 773.

See Definitions & Sources for more information on interpreting the data.

#### Notes:

County indicators are ranked from 1 to 36 based on 1994/1995 data .  
 Percent change between rate in 1990 and 1994/95 not reported in counties with less than 40,000 people due to small number of events.  
 Number of Child Deaths in 1990 was 0 and in 1994 was 2.  
 Number of Infant Deaths in 1990 was 0 and in 1994 was 1.  
 Child Care Supply data is no longer reported where there is no state funded child care resource and referral agency.  
 Number of Suicide Attempts in 1990 was 2 and in 1994 was 1.  
 See Definitions & Sources for more information on interpreting the data.

Kara Stebbins, Oregon Health Division

REPRODUCTION RELEASE

(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title: County Data for Community Action, 1996 Status of Oregon's Children
Author(s):
Corporate Source: Children First for Oregon
Publication Date: 6/96

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following two options and sign at the bottom of the page.

Check here For Level 1 Release: Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical) and paper copy.

The sample sticker shown below will be affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY Sample TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 1

The sample sticker shown below will be affixed to all Level 2 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN OTHER THAN PAPER COPY HAS BEEN GRANTED BY Sample TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2

Check here For Level 2 Release: Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical), but not in paper copy.

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."
