IDENTIFIERS *Maryland

ABSTRACT

This report presents the December 1, 1996 special education data collected annually by the State of Maryland as part of the its Special Services Information System. Information is compiled on special education students ages 3-21 in all 24 local education agencies and state operated programs. Definitions of key terms used to classify student placements precede the data tables. The total number of students with disabilities served in Maryland is reported to be 104,630. Tables include information by agency on the number of children with disabilities served, broken down by the following factors: disability, age, grade, intensity (the amount of time a student is receiving specially designed instruction), ethnicity, gender, and placement in the least restrictive environment. Pie charts illustrate the percentage of special education students by disability and the placement of special education students. A graph indicates the percentage of special education students by grade. (CR)

Introduction

Annually, on December 1, the Maryland State Department of Education (MSDE) collects information on special education students (ages 3-21) who reside in the State of Maryland. In order to be included in this count, the child must be identified as having a disability and have active special education services on December 1.

The Special Services Information System (SSIS) consists of two separate data collections. The first is the December 1 Census, a count of all students receiving special education services on December 1 of every year. The second data collection is done June 30 of every year and reports students who have exited special education. Additional special education data publications are available from the Division of Planning, Results and Information Management (PRIM) upon request (contact Sally Slade at 767-0063).

The SSIS database is used to compile information on Maryland students with disabilities. MSDE uses the SSIS database as:

- a source of information to meet its planning, monitoring, and accounting responsibilities for special education;
- a recording and reporting tool for decisions made by the Admission, Review and Dismissal Committee; and
- an instrument for federal reporting requirements.*

The data which follow were collected from all 24 local education agencies and state operated programs. This census serves as a point in time snapshot of special education students on December 1, 1996.

*Required by the Individuals with Disabilities Education Act (IDEA), which amended P.L. 94-142, as well as reporting requirements for Title VI and Title IX of the Civil Rights Act, as the Titles apply to Special Education, and Section 504 of the Rehabilitation Act of 1973.

Definitions

Least Restrictive Environments

General Education Classroom - students with disabilities enrolled in a comprehensive school who receive special education and related services *outside the general education classroom* for less than 21% of the school day. Preschool includes any combination of regular early childhood setting with no pull-out, e.g., EEEP, Headstart, or other early childhood settings

Resource Room/Combined Program - students with disabilities enrolled in a comprehensive school who receive special education and related services *outside the general education classroom* for at least 21%, but no more than 60% of the school day. Preschool includes pull-out programs

Separate Class - students with disabilities enrolled in a comprehensive school who receive special education and related services *outside the general education classroom* for more than 60% of the school day. Preschool includes separate class in school or private child care facility

Homebound Placement - students with disabilities who receive greater than 50% of instruction at home or other non-school environment other than in a hospital or therapeutic treatment facility

Hospital Placement - students with disabilities who receive greater than 50% of instruction in a hospital setting

Public Separate Day School - students with disabilities who spend greater than 50% of the school day in separate public facilities as day students

Private Separate Day School - students with disabilities who spend greater than 50% of the school day in separate private facilities as day students

Public Residential Facility - public residential placement for students with disabilities

Private Residential Facility or Center - private residential placement for students with disabilities

Additional Preschool Least Restrictive Environments

Home - preschoolers with disabilities for whom it is appropriate to receive services at home, not single service

Itinerant Setting - preschoolers with disabilities who receive only speech and/or language at a school or another location

Reverse Mainstreaming - preschoolers with disabilities who receive special education in a class designed for students with disabilities where over 50% of the students are not disabled

Intensities

Intensity - describes the amount of time (a cumulative count of hours) a student is receiving specially designed instruction pursuant to an individualized education program. This includes related services except transportation services.

Intensity I - student receives indirect services, consultation only

Intensity II - student receives up to and including 5 hours of special education and related services per week

Intensity III - student receives more than 5 and up to and including 15 hours of special education and related services per week

Intensity IV - student receives more than 15 hours of special education and related services per week

Intensity V - student receives more than 15 hours of special education and related services per week who requires a more intensive special education program than Intensities I through IV

Intensity VI - student receives special education and related services in a residential program; or in a combination of school, community-based residential and/or in-home support services; i.e., a "wrap-around services plan"
