 IDENTIFIERS *Community College of Rhode Island

ABSTRACT

This 1996 annual report describes major initiatives and outcomes for students, programs, faculty and staff, and finances at Community College of Rhode Island (CCRI). Following a message from the President reviewing priorities for 1996, CCRI initiatives are described related to workforce development, including customized programs, a telecommunications partnership, curriculum development, and entrepreneurial training; technological development; transfer programs, including a list of articulation agreements with other institutions; grants and contracts; facility use; special events; and athletics. Data are then presented for the following areas: (1) CCRI programs of study; (2) student characteristics, including gender, age, ethnicity, and residency status, 1992-93 to 1996-97; (3) fall enrollment, 1976 to 1996; (4) responses to a survey of incoming students conducted in summer and fall 1995; (5) full-time and part-time student enrollment data, 1992-93 to 1996-97; (6) enrollment in off-campus credit and Center for Business and Industrial Training courses, fall 1994 to fall 1996; (7) a survey of the employment and educational status of 1995 graduates; (8) CCRI transfers enrolling in other Rhode Island educational institutions, 1991-95; (9) enrollment in non-credit courses, 1991-92 to 1995-96; (10) total headcount enrollments by program, 1992-93 to 1996-97; (11) degrees and certificates awarded by program, 1991-92 to 1995-96; (12) 1996 faculty characteristics, including degrees held, rank, and years of service; (13) 1996 staff characteristics; (14) tuition and fees, 1970-71 through 1996-97; (15) general education revenues and expenditures, 1979-80 to 1995-96; and (16) student financial aid awards by funding source, 1993-94 to 1995-96. PRESIDENT'S MESSAGE

Community colleges across the country have been in the spotlight during the last year, thanks largely to the efforts of President Clinton, who clearly recognizes the unique contribution that these institutions make in strengthening our nation as we move toward the 21st century. The President visited community college campuses on several occasions during the last election campaign and frequently mentioned community colleges in prepared speeches and remarks. In fact, when he visited Rhode Island last September, one of our students, Dawn Fayerweather, was asked to share the

stage with the President and speak briefly about her experience in pursuing her educational goals.

"If you look at how our economy is structured, the critical thing is to make two years at a community college as universal an experience as graduation from high school is now. We need to put a 13th and 14th grade into the American psyche."

Taken from remarks made by President Clinton last summer at Central Piedmont Community College

Last November a front page article in the *Wall Street Journal* focused on how two-year colleges can impact the economy, highlighting North Carolina's determination to include community college job training as an integral part of the state's highly successful economic development initiative. North Carolina took this step because officials recognize that approximately 80

percent of the new jobs which will be created in the next decade will require education beyond high school, but only one-third will require a bachelor's degree. This is as true in Rhode Island as it is in other parts of the country, and the Community College of Rhode Island is taking the steps needed to meet the changing demands of the workplace.

During the past year, the CCRI administrative team has channeled its efforts into workforce development and three other priority areas highlighted in the College's 1996 Management Letter, a planning document submitted to the Rhode Island Board of Governors for Higher Education on an annual basis.

CCRI's 1996 priorities are:

- To expand the usage of available technology in order to improve services to students and prospective students and to manage the organization in the most productive manner.
- To assume an expanded and appropriate role in responding to the needs of the business community and strengthening the economy of the state.
- To move toward becoming a more student-centered organization.
- To position the college as an increasingly attractive first stop option for high school graduates pursuing a baccalaureate education.

We believe that we must become more flexible and consumer-oriented in order to meet the increasing demand for education and training in the state. We know that businesses must upgrade employee skill levels to remain competitive and that welfare reform will force individuals to train for the job market. These are community needs that the Community College is prepared to fulfill.

At the same time, we must retain the characteristics that make community colleges unique postsecondary institutions -- affordability, accessibility and an array of first class academic offerings that will enable students to transfer to baccalaureate institutions or to enter the workforce with marketable skills.

This publication, in addition to providing statistics on enrollment, student characteristics, degrees and certificates awarded, transfer and placement, faculty/staff data and financial information, will highlight some of what has taken place at the college during the last year as we have begun to address our identified priorities.

The challenge we face as we move toward the 21st century is to balance sometimes competing needs, meet diverse student demands and find the resources required to invest in the appropriate technology at a time when budget resources are limited. We are ready to meet that challenge and look forward to remaining a strong, vibrant institution serving Rhode Island residents in the year 2000 and beyond.

Edward J. Liston
President

WORKFORCE DEVELOPMENT

"Through partnerships - with business, industry and government - community colleges have assumed an increasingly central role in creating a high quality, cost-effective and responsive workforce development delivery system. If provided with the resources, this system can keep America's workforce among the most efficient, skilled and adaptable in the world."

From the Executive Summary of "Developing the World's Best Workforce," a report published recently by the American Association of Community Colleges

Early last year a cross section of educators and state policy makers attended a day-long conference on higher education and the Rhode Island economy. The message was clear: linkages between higher education and the business community must be strengthened if Rhode Island is to build a stronger economy; government grants will be smaller and the way in which money is funneled from the federal government to the states will change; and colleges will need to be more responsive in the delivery of education and job training services.

As a follow up to that conference, CCRI hired a consultant, Dr. Philip R. Day, President of Daytona Beach Community College, to examine how the college delivers services to business and industry and to make recommendations on how the college can play an expanded and appropriate role in strengthening the economy of our state. Dr. P. Anthony Zeiss, President of Central Piedmont Community College, continued an exami-

nation of workforce development issues at the College's annual faculty meeting held last fall at the Providence Campus.

Efforts to improve outreach services to business and industry are ongoing, and include such activities as aggressively seeking business contracts for customized training as well as federal and state job training grants; maintaining a high profile in the community through representation on chambers of commerce and other important public, private and nonprofit organizations; establishing partnerships with businesses or groups of businesses; and initiating new academic programs in response to community need.

Customized Programs

To help businesses in Rhode Island keep pace with rapidly changing technology, CCRI offers customized training to upgrade employee skill levels. Programs specifically designed to meet the needs of individual companies are offered at the work site or in college facilities across the state. The CCRI Center for Business and Industrial Training, located at the Flanagan Campus in Lincoln, was established in 1990 to coordinate business outreach activities. In addition to providing training, the Center is also available to conduct needs assessments for companies to assist in determining appropriate programs for their employees. This service assesses both technical skills and literacy.

With the emergence of Windows 95 and the Microsoft Office as increasingly popular computer environments, CCRI has contracted with a number of companies and organizations, including Citizens Bank, the Cranston Public Schools, Hasbro, Kent County Memorial Hospital and TACO, to provide training for their employees.

In recent months CCRI has also provided contract training for individual companies in TQM, team building and Spanish for the workplace.

Telecommunications Regional Partnership

CCRI is one of the New England partners working with NYNEX and its two unions, the International Brotherhood of Electrical Workers and the Communications Workers of America, to develop an associate degree program with a concentration in telecommunications. The project targets non-management employees of NYNEX in an endeavor to move the company into a new era of broadband, video and global communications. Other colleges participating in the NYNEX project are Springfield Technical Community College, Central Maine Technical College, Massasoit Community College, Middlesex Community College, New Hampshire Technical College and Vermont Technical College. Eleven community colleges in New York are also participating in NYNEX partnerships.

New Curriculum Initiatives

Last spring the Rhode Island Board of Governors for Higher Education approved four new technical certificate programs, three housed in the Engineering Department and one in the Industrial Technology Department. The programs are designed to give students the skills needed to obtain employment in growing technical fields. All courses can be applied toward existing CCRI Associate Degree programs.

The Telecommunications Engineering Technology Certificate is designed for individuals who already have a basic knowledge of mathematics and circuit theory and provides the skills needed for jobs in planning, installing and maintaining state of the art telephone systems, cable TV and computer networks.

The Mechanical Engineering Technology Certificate is for students who wish to seek employment in areas such as computer-aided design and analysis for product development, material and system testing, and technical sales.

The Manufacturing Engineering Technology Certificate is a comprehensive program that gives students the skills needed to determine the most competitive way to manufacture a product -- production, planning and control, quality control, process control production methods, technical sales, product development and safety.

The Computer and Network Maintenance Certificate offers instruction in computer hardware, software and networking to prepare the students for current and near future opportunities with corporations and small businesses.

Last December, the Board approved the establishment of an Occupational Therapy Assistant program slated to begin next year. This new associate degree program, designed as a companion to the existing Physical Therapist Assistant program, will be housed at the College's Newport Hospital facility.

Other curriculum advances in the health care field include the addition of new continuing education courses for health care professionals seeking to upgrade skills in patient-focused care. Many of these courses are offered at the Providence Campus for the convenience of employees in area hospitals and medical facilities.

Entrepreneurial Training

Recognizing that the development of a strong entrepreneurial base can contribute significantly to the Rhode Island economy, CCRI has initiated a program to help students develop the skills, values and attitudes that will enable them to succeed in business. The college has received two grants to provide entrepreneurial training and education for two distinct Rhode Island populations, establish a resource center and create an entrepreneurial mentoring network.

The Kauffman Foundation's Center for Entrepreneurial Leadership awarded a grant of \$45,000 for two years to develop and deliver an entrepreneurial skills training curriculum customized for welfare recipients. The program is currently being offered in cooperation with the RI Department of Human Services. A second grant of \$24,000 from the Rhode Island Human Resource Investment Council/State School-to-Work Office is being used to promote entrepreneurship as a career pathway in the state's school-to-work system.

Grant Initiatives

The College's workforce development efforts, including school-to-work partnership initiatives, have been enhanced through numerous grant awards throughout the year.

CCRI successfully applied for local school-to-work partnership funds for Warwick, RI and received a five-year grant totaling \$650,000. The grant is a collaborative effort among the Warwick School System, the Warwick Teachers Union, the RI Federation of Teachers, the Chamber Education Foundation, Junior Achievement of RI, the Rhode Island Occupational Information Coordinating Council, the Greater RI Regional Employment and Training and CCRI's Tech Prep and Cooperative Education programs.

The College received an award of \$113,425 to retrain Hasbro assembly line workers in medical and general office skills.

CCRI received \$840,458 in federal funding under the Carl D. Perkins Vocational and Applied Technology Education Act to provide connecting linkages between school-based learning and work-based learning through the Cooperative Education program; to provide support services and job placement assistance to women enrolled in technical career programs; to support activities of the RI Tech Prep Associate Degree Program; to offer vocational services to adult bilingual and limited English proficient populations; to provide vocational training in occupations that offer potential for entry level employment as well as prevocational academics; and to provide support services for single parents and homemakers entering or reentering education and training programs.

The College also received \$829,464 in Job Training Partnership Act (JTPA), Economic Dislocation of Workers Adjustment Act (EDWAA), Defense Diversification, and Human Resource Investment Council funds to assist in training and retraining the State's workforce and to produce workplace literacy training. Most of this funding was used to provide academic assessment and remediation services to economically disadvantaged adults and youths as well as retraining to dislocated workers.

TECHNOLOGY INITIATIVES

When voters passed a \$40.6 million bond issue last November, they provided the necessary resources for the three public colleges in the state to take a giant step toward bringing students and faculty the tools they need to compete in the age of technology. In 1995, business leaders and public officials conducted a study of the Community College of Rhode Island, Rhode Island College and the University of Rhode Island and concluded that "The Rhode Island System of Public Higher Education is woefully ill-equipped and under-funded to meet the telecommunications and computer networking needs of its students, faculty and staff and the public."

Funding from the bond issue will begin to change all that through the creation of a telecommunications network that will link CCRI, URI and Rhode Island College to each other and the global marketplace. CCRI will receive about \$4 million, with URI getting \$29 million and RIC receiving \$7.6 million, to install fiber optic cable and digital systems that will improve the performance of high speed modem calling and integrate voice mail answering systems. Video equipment will include satellite receivers and distribution equipment for full-motion interactive video and high speed routers will allow users at the three institutions to connect with administrative mainframes, Internet systems and networks which will link the three schools. The bond issue also calls for purchase of an additional 3,122 computer work stations.

During the past year the college has upgraded computers in all labs to Windows 95, expanded voice mail and e-mail capabilities on all campuses and developed a CCRI homepage (<http://www.ccri.cc.ri.us>). In addition, an automated bulk room scheduling software program, Universal Algorithms Inc.'s Schedule 25, was purchased to maximize the number of classes placed and the percentage of seats filled while considering room characteristics and class size. The automated system was successfully implemented last semester.

Plans for the future call for continuous upgrading and replacement of computers available to students, faculty and administration, increased accessibility to the Internet and further development of the home page. As resources become available to purchase appropriate equipment and software, classrooms will be upgraded to take advantage of the latest in instructional technology.

TRANSFER INITIATIVES

"It's getting harder to earn a living without a college degree. But it's also getting harder to afford the college degree in the first place. Which is why the community college transfer route is a well-traveled on-ramp on the road to a middle-class life."

Providence Journal
June 16, 1996

Comprehensive community colleges have always embraced a dual mission of offering technical programs leading directly to skilled career paths and transfer programs designed to provide the first two years of a four-year college degree.

As tuition costs continue to increase at public and private colleges across the country, completing the first two years of a baccalaureate degree program at a community college has become an increasingly attractive option for many families. To appeal to this population, CCRI has worked to position itself as an attractive option for transfer students and to send a message to those students and the individuals who play a role in influencing them (parents, teachers, guidance counselors, etc.) that a community college offers quality education at an affordable cost.

To put some muscle behind the message, CCRI has been aggressive in its efforts to secure transfer/articulation agreements which guarantee graduates admission to more than 40 four-year public and private colleges and universities throughout the New England area and beyond.

Transfer of credit among the three public institutions of higher education in the state (CCRI, URI and Rhode Island College) has been governed for a number of years by a highly detailed articulation/transfer agreement which spells out on a course by course basis how and when credit transfers from one institution to another. This is updated annually.

Several years ago CCRI began to seek out additional colleges interested in accepting community college graduates as transfer students. These agreements, which continue to grow in number, are hammered out individually between admissions and academic principals from each school and guarantee transfer of credit with junior year standing after a graduating student has met certain established criteria. Some colleges offer simultaneous admission and others provide special scholarships to CCRI graduates.

CCRI also has several smaller programs designed to appeal to a select subset of the transfer student population. Baccalaureate Bound is a competitive program which offers special enrichment programs and individual assistance in transferring to a four-year college to motivated students with solid academic credentials. Running Start allows high school seniors who have demonstrated academic ability and maturity to enroll at CCRI on a full time basis and earn high school graduation and college credit simultaneously.

A STUDENT-CENTERED COLLEGE

At its most basic level, being student-centered means designing programs, procedures, policies and even physical space to meet the needs of students. It means being responsive to student concerns and creating a positive educational environment on a day to day basis. It can mean paying attention to the little details or making big changes.

During the past year the college has made some major changes in its move toward becoming more student-centered. Some mentioned previously in this report include the technology and transfer initiatives. Others involve physical renovations and expansion of service learning as noted below.

Providence Campus Renovations

Interior renovations at the CCRI Providence Campus, completed last summer, maximize the use of available space while creating a comfortable environment for students.

A larger Learning Resources Center overlooking a concrete-stepped amphitheater is the new focal point of the facility. The new LRC totals 2,440 square feet, a 15 percent increase in floor space. A 1,500 square foot bookstore replaces the old bookstore which was located in a closet. Faculty offices and a conference room were included in the design and the student services area was improved with the addition of separate office areas for financial aid and counseling. Improvements to the math and computer labs were also completed as part of the package.

The newly renovated interior, designed by The Robinson, Green and Beretta Corporation, was featured as an outstanding building in the November 1996 issue of *American School & University*. The magazine annually publishes an architectural portfolio of award-winning and outstanding buildings as selected by a jury of school administrators, architects and facilities planners.

Knight Campus Expansion

Preliminary plans are underway for the long overdue expansion of the Knight Campus in Warwick. The \$14.5 million project, approved by voters last November as part of a \$33.8 million bond issue for higher education facilities, calls for an 85,000 square foot addition to the 385,000 square foot megastructure.

The addition is needed for an improved, accessible and expanded student services area, a child care center, classrooms, lecture halls and laboratories. The improved facilities for student services will enable the college to move toward fulfilling its goal of becoming a more student-centered institution and the additional classrooms and laboratories will provide the required space for meeting anticipated increases in workforce development activity.

Service Learning

CCRI's involvement in service learning dates back to 1990 when President Liston was appointed to the Governor's Commission on Youth. The work of that committee led to Rhode Island being the tenth state in the country to form a Campus Compact, a coalition of colleges and universities committed to cultivating the values and skills of responsible leadership. Since that time, CCRI has encouraged students to get involved in community service, sponsored volunteer fairs, and encouraged faculty to incorporate service learning into the classroom curriculum.

Last year 2,643 CCRI students performed 23,091 hours of community service. For the coming year, the statewide office of the Rhode Island Campus Compact will be located at the CCRI Flanagan Campus.

"Rhode Island Campus Compact (RICC) presidents believe that through innovative student, faculty and institutional participation in public and community service, higher education fulfills its historic mission of shaping an active, informed and committed citizenry."

Taken from the Vision Statement of the Rhode Island Campus Compact

FACILITY USE

The Community College of Rhode Island encourages community organizations to use campus facilities for conferences, seminars, athletic and cultural events and public hearings. Last year more than 150,000 people visited the campus. Some organizations which held activities at CCRI during the last year include:

Rhode Island Science Fair	Cranston Adult Learning
D.A.R.E.	RI Academic Decathlon
RI Dental Hygienists Association	RI Department of Children, Youth and Families
RI Department of Corrections	RI Department of Environmental Management
Johnston Police Department	National Education Association
Lincoln Police Department	Northern RI Private Industry Council
Warwick Police Department	North-South Trail Council
Amnesty International	RI State Fire Marshall
Attorney General's Office	Operation Clean Government
Central Rhode Island Chamber of Commerce	CHADD
Warwick Fire Department	Rhode Island Coastal Resource Management
WLKW Senior Citizens Fair	RI Department of Labor, License and Regulations.
AARP	The League of Women Voters
RI Board of Accountancy	RI Ethics Commission
RI Skills Commission	RI Funeral Directors Association
RI Department of Employment and Training	RI Federation of Nurses & Health Professionals
RI School-to-Work Program	RI Department of Health
Rhode Island Admissions Officers Association (College Fair)	RI Committee to Prevent Child Abuse
RI Interscholastic League	Campaign to Eliminate Childhood Poverty
George Wiley Center	RI Childrens Crusade for Higher Education
Olneyville Boys & Girls Clubs	Cake Decorators of RI
Junior Achievement	Southeastern New England Antique Show

American Heart Association	
American Chemical Society	
Blackstone Valley Community Action Program	
Providence Boys & Girls Club	
Warwick Boys & Girls Club	
Bureau of Audits	

SPECIAL EVENTS

Observatory Dedication

The CCRI Observatory was dedicated to retiring professor Margaret M. Jacoby last winter in recognition of her many years of service and dedication in establishing and operating the observatory located on the Knight Campus in Warwick.

Professor Jacoby founded the College's Physics Department in 1965 and taught at the college for 30 years until her retirement. She was responsible for obtaining grant funding to build the observatory, overseeing design and construction and operating the facility once it was opened to the public in 1978. Over the years Professor Jacoby has served as a source of astronomical information for individuals, schools and the media. She has held solar and lunar eclipse observations at the college, participated in the Internal Halley's Watch in 1985-86 and has traveled world wide to view eclipses, comets and other events. Two years ago Professor Jacoby was selected as one of 30 community college professors in the United States to receive a Faculty Recognition Honors Award from the Community College Consortium.

CCRI Fall Golf Classic

The CCRI Fall Golf Classic held last September at the Alpine Country Club in Cranston raised \$12,500 for the college's Book Loan Fund, bringing the total available in the fund to nearly \$30,000. The Book Loan Fund, established two years ago, is an interest free, revolving loan fund made available to all degree-seeking CCRI students taking six or more credits for use in purchasing textbooks and required course material.

Citizens Bank was the prime sponsor for this year's tournament. Tee sponsors (\$1,000 donation) include American Airlines, Banner Oldsmobile Buick, Fleet National Bank, Honeywell, Hospital Trust National Bank, Memorial Hospital of Rhode Island, William F. Garrahan MD/Michael J. Infantolino MD/Philip Reilly MD, Pepsi-Cola, Philip Morris Companies, Inc., the CCRI Bookstore and CCRI Student Government.

CCRI Hall of Fame

Eight individuals were inducted into the CCRI Hall of Fame at a celebration dinner held at Alpine Country Club last fall. The Hall of Fame was created two years ago by the CCRI Foundation to recognize individuals who have made substantial contributions to the creation and evolution of the Community College of Rhode Island.

The 1996 inductees were Jane Allaire, former librarian responsible for establishing the CCRI Learning Resources Center; Gerard Duhamel (deceased), CCRI's first Vice President for Business Affairs and Treasurer; Daniel J. Garvey, former chair of the Business Department; John I. Howell, Jr., President of the CCRI Foundation and friend of the college; Catherine McGoldrick (deceased), CCRI's first Dean of Nursing; Eleanor McMahon, former Commissioner of Higher Education; Mary O'Neil (deceased), former nurse and athletic trainer; and Michael A. Romano, who founded CCRI's Theater Department.

business Department; John I. Howell, Jr., President of the CCRI Foundation and friend of the college; Catherine McGoldrick (deceased), CCRI's first Dean of Nursing; Eleanor McMahon, former Commissioner of Higher Education; Mary O'Neil (deceased), former nurse and athletic trainer; and Michael A. Romano, who founded CCRI's Theater Department.

The CCRI Athletic Department tradition of excellence and achievement continues.

The early-year spotlight fell upon Jay Grenier's baseball Knights, who smashed the all-time CCRI record for wins in a season on their way to a berth in the NJCAA Division II World Series in Millington, TN. CCRI won 35 of its 42 games and finished with a remarkable winning percentage of .833 -- another club record.

The CCRI golf team went a step beyond. Harry Keenan's team finished with a 25-1 record, yet another school record. The golfers also advanced to the NJCAA

Championships, where they finished their season as one of the nation's elite teams.

There was more to come as fall unfurled. In one of the state's most compelling stories of any kind during the entire sports year, the CCRI women's soccer team -- only 26 months old -- won a New England championship, and finished sixth in the country at the NJCAA National Championships in Essex, MD.

How quickly the Lady Knights went from cradle to title is testimony to the hard work of coaches Conrad Fecteau and Dennis Grassini. After winning only one game in their first year (1994), CCRI made it to the New England playoffs in 1995. With most of their players returning, the Lady Knights roared through the regular season, earned the top seed in the regionals, beat Springfield Tech in the finals and went to their first national event.

There were other great stories. CCRI Athletic Director and head Basketball Coach Vin Cullen achieved his 600th career win --

something that no other collegiate basketball coach in New England history has ever done. The 1995-96 Knights reached the NJCAA Region XXI playoffs for the 17th consecutive time.

The return of former CCRI player and coach Artie Johnston to the bench highlights the start of the new hockey season as a rejuvenated CCRI team builds for the future. A new start for several young teams marked the 1996 season for veteran coach Vic Gaspar and his soccer team, and Steve Alves' softball team.

Individual achievements were plentiful too. Several members of

the CCRI baseball team received All-New England honors. Dawn Frizzle of Coventry was named a women's soccer All-American, and Fecteau

named New England women's soccer Coach of the Year.

Community Activity

The Warwick and Lincoln field houses are hosts to hundreds of activities throughout the year, and thousands of participants and spectators make their way to CCRI from throughout the Northeast.

The Rhode Island Interscholastic League has made CCRI an integral part of its massive program, and the Community College is proud to be a home for high school championships each year.

The prestigious Max Read Swim Meet is another highlight of the Rhode Island high school year and is hosted at the natatorium in Lincoln.

The Community College was once again recognized for its participation in the National Youth Sports Program (NYSP) in 1996. Serving over

500 economically disadvantaged youngsters at the Flanagan Campus each year, the NYSP program is a result of the partnership between the National Collegiate Athletic Association, the U.S. Department of Health and Human Services, and the Community College of Rhode Island.

CCRI has always been a valuable resource for Rhode Island's handicapped and seniors, who use the Flanagan Campus pool for their recreational and therapeutic needs. The field houses at both campuses are homes to other youth leagues, the Rhode Island State Police, and dozens of others who participate in a variety of leagues and programs. CCRI also offers an off-hour recreational program, where, for a nominal fee, the general public can participate in a number of fitness and recreational offerings. Over twenty thousand Rhode Islanders participate annually in this program.

STUDENT CHARACTERISTICS

The student body at the Community College of Rhode Island enjoys considerable diversity in ages, cultures and experiences. Sixty-two percent are women, 68 percent are part-time students (see Table 4) and 55 percent are 25 years of age or older. Of those reporting their ethnicity, 15 percent are from a minority group.

For the fall of 1996, students in the under 20 age group accounted for 18 percent of the headcount enrollment. Of this group, 70 percent were full-time students. Also, seventeen of the students classified as out-of-state were actually foreign students from 11 different countries.

FALL ENROLLMENT FROM 1976 TO 1996

1976 has been selected as a base year for fall enrollment comparisons because that was the year in which the second campus was opened in Lincoln. During the next seven years, enrollment on both campuses rose from 8,993 to 12,602 for a total increase of 40 percent. The full-time equivalent enrollment (FTE) leveled off one year earlier and then decreased by 11 percent from 1982 to 1984. Enrollments began to increase again in 1985 and then rose dramatically in 1988. A new enrollment record was set for eight consecutive years beginning in 1985. The Providence Campus which opened in 1990 contributed to this growth. By the fall of 1992, both the headcount and the FTE enrollment reached the highest level in the Community College's history.

For the five years preceding 1993-94, the headcount enrollment grew by 37 percent and the FTE enrollment increased by 40 percent (2,803 FTE's). In part due to the addition of a means test for unemployed individuals to qualify for a tuition waiver, enrollment decreased in the fall of 1993 through 1996.

TABLE 2

FALL ENROLLMENT

<u>FALL</u>	<u>NUMBER</u>	<u>FTE</u>
1976	8,993	5,972
1977	10,317	6,900

% Change from 1995 to 1996 (1 year)	-4.1%	-1.4%

INCOMING STUDENTS

All incoming students who attended an orientation session offered during the summer or fall of 1995 completed a "student information sheet." Data collected from these students provides us with descriptive, historical information useful in a variety of planning processes within the Community College. One thousand two hundred and forty-six students completed the information sheet. This particular enrollment cluster of students reported a median age of 19 years (mean of 22.7) with 684 students or 55 percent under 20 years of age. Compared to past years, a greater percentage of students indicated that they plan to transfer. Also, for the second consecutive year, a greater percentage of students expect to complete a degree or certificate in two years or less.

TABLE 3

INCOMING STUDENT SURVEY

	<u>NUMBER</u>	<u>PERCENT</u>
What is your age in years?		
Under 20	684	54.9%
20-29	324	26.0%

3 years or less	254	20.4%
More than 3 years	123	9.9%
No response	270	21.7%

FULL-TIME AND PART-TIME ENROLLMENT

Overall, the total number of students enrolled in credit courses decreased by 653 students from the fall of 1995 to the fall of 1996. Part-time students accounted for 68 percent of the 1996-97 headcount enrollment. Approximately 32 percent of all students were enrolled as full-time students (about two percent more than 1995-96). Seventy-one percent of the under 20 years of age group were full-time students (three percent more than last year).

The age distribution of the part-time group has begun to move up again after leveling off for a few years. Currently, 70 percent of the part-time students are 25 years of age or older while 78 percent (76 percent in 1995-96) of the full-time students are under 25 years of age.

Finally, the degree status mix of full-time students (93 percent degree seekers) remains relatively stable while the percentage of degree candidates in the part-time group has grown from 58 percent in 1992-93 to 69 percent in 1996-1997.

OFF-CAMPUS CREDIT ENROLLMENTS

In addition to the classes offered at the Lincoln, Warwick and Providence campuses, the Community College offers credit courses at several satellite facilities and other locations. Each year some sites may change according to the demands of programs. From the fall of 1994 to the fall of 1995, off-campus credit seatcount enrollments declined by 4.6 percent.

TABLE 5

CENTER FOR BUSINESS AND INDUSTRIAL TRAINING ENROLLMENTS

The Community College of Rhode Island also conducts custom courses designed to meet the needs of business and industry. Courses are offered at the Community College, business and industrial sites, community centers and other locations. Each year the sites change according to the needs of businesses and students. Enrollments were dramatically higher in 1994-95 due to two summer series of business and industry courses designed for the AT & T Alliance and Hasbro, Inc.

SURVEY OF GRADUATES

A systematic study of the graduates of 1995 was conducted to determine their status eight months after graduation. Using both the mail and the telephone as data collection vehicles, the Cooperative Education and Career Placement staff achieved a stellar response rate of 85 percent.

The information collected from the graduates has been summarized by each program of study. Only an overall summary is reported here. Looking at the seven choices, 79 percent of the 1995 graduates are employed in some capacity (80 percent for 1994). Also, 38 percent of the graduates are continuing their education (39 percent for 1994). Eighty-seven graduates or 5.9 percent reported that they were unemployed and looking for a position (4.7 percent for the 1994 graduates).

TABLE 7

CCRI TRANSFERS ENROLLING IN OTHER RI INSTITUTIONS

Rhode Island College continues to attract the greatest number of Community College transfers (54 percent of those reported in Table 8) followed by the University of Rhode Island (21 percent, up from 17 percent in 1994). From 1991 to 1992, the number of reported transfers to in-state colleges and universities jumped 23 percent. There were 117 fewer transfers reported in 1994 compared to the peak year of 1992. Information on transfers who actually enrolled in schools in other states before graduating from the Community College is not readily available.

ENROLLMENT IN NON-CREDIT COURSES

The Office of Community Services is the division of the College responsible for the operation of non-credit service courses and activities. Non-credit courses are offered in a wide range of subjects.

Continuing education is also provided for specific groups, such as nurses, dental assistants, secretaries, bankers and others.

Activities include:

- DRIVER RETRAINING for traffic violators
- MOTORCYCLE SAFETY for first-time licenses and rider improvement
- GED TESTING PROGRAM for those seeking high school equivalency diploma
- BUSINESS, INDUSTRY AND GOVERNMENT AGENCY customized courses for upgrading employee skills
- VOCATIONAL TRAINING FOR ADULTS providing entry-level skills to the unemployed, underemployed, and limited English proficient
- SUPPORT SERVICES FOR SINGLE PARENTS AND HOMEMAKERS including counseling, advising, parenting, child care and placement
- SCHOOL BUS DRIVER TRAINING for new drivers and continuing education for present drivers
- ASBESTOS AND ENVIRONMENTAL PROTECTION EDUCATION

ENROLLMENT BY PROGRAM OF STUDY

The highest enrollment in CCRI's history occurred in 1992. For each of the next four years enrollment headcounts decreased. By 1996, enrollment had decreased 15 percent to pre 1990 levels. For eight consecutive years prior to the fall of 1993, record enrollments were recorded.

The computer studies and information processing programs have grown by more than 33 percent from 1992 to 1996 while enrollment in the non-degree program (UNCL) has fallen by more than 37 percent.

DEGREES AND CERTIFICATES AWARDED

The number of degrees and certificates awarded by CCRI increased over this reporting period to a level of 6.7 percent above that of 1991-92. This year there were 1,669 completions (unofficial count) or 51 less than last year's peak. Two of six groupings—Health and Paramedical, and General Programs—revealed increases of 3.7 percent and 5.8 percent respectively over the past year. In 1995-96, Law Enforcement/Corrections awarded 183 degrees or certificates for a 289 percent growth rate from 1991-92.

FACULTY CHARACTERISTICS

In the spring of 1996, there were 290 continuing full-time faculty members at the Community College. For this group, the most frequent set of characteristics was holding a master's degree, being a full professor, and having been with the Community College for 15 or more years. Sixty-three percent of the continuing full-time faculty have been with CCRI for 15 or more years. Also, more than half (53 percent) of all full-time faculty hold the rank of full professor.

STAFF CHARACTERISTICS

The staff at the Community College is categorized into three groups: a. Classified: Includes maintenance personnel, security officers, technicians, clerical staff, counselors, and nurses; b. Non-Classified: Professional staff which includes managers, coordinators, counselors, programmers, accountants, as well as some clerical staff, technicians, and paraprofessionals; c. Administration: Includes the president, vice presidents, directors, deans, and associate and assistant deans and directors.

Compared with 1994-95, the average descriptions of the three types of staff have changed only slightly. Approximately 59 percent of the non-classified staff have 15 or more years of service. The number of staff decreased from the 1983 peak of 339 when enrollment was about 12,000 students. Although a third campus has been added and enrollment has grown by more than 27 percent, the number of staff has actually decreased by more than 4 percent.

TUITION AND FEES

Part of the mission of the Community College is to provide the citizens of the state with an open access college. In order to fulfill this mission, the Community College has attempted to maintain tuition and fees at a modest level. This concern for keeping the tuition and fees at an affordable level has historically resulted in increased tuitions each year that were similar to the Consumer Price Index changes. However, these increases have exceeded the CPI for most years since 1987.

Combined tuition and fees increased 5.7 percent in 1989-90, 9.6 percent in 1990-91, 19 percent in 1991-92 (after adjusting for a \$25 surcharge in the spring of 1991), 9.4 percent in 1992-93, and 3.3 percent in 1993-94. For 1994-95, tuition and fees increased 9 percent. Excluding mandatory fees, tuition increased 4.1 percent for 1994-95. In 1995-96, the increase was only 2.4 percent. For the current year, tuition and fees were held at last year's rate.

GENERAL EDUCATION REVENUES

The general education revenues for the Community College are unrestricted revenues which means these funds are not designated for any specific purpose except the general support of the institution. These revenues represent the major portion of the funds available to the College and come primarily from two sources: State appropriations and tuition and fees.

From 1979-80 to 1981-82 the student paid tuition and fees provided an increasing share of the revenues while the share from State appropriations declined. From 1982-83 to 1987-88 these percentages remained constant. In 1988-89 through 1992-93, the State appropriation to general education revenues decreased and the tuition income increased proportionately. In fiscal years 1993-94 through 1995-96, State appropriated support leveled out at 58 percent.

GENERAL EDUCATION EXPENDITURES

The expenditures of the general education funds are classified according to the following five categories: personnel services, operating expenditures, student aid, capital and other. In 1993-94 the asset protection and capital were primarily funded through RIHEBC bond revenue which is off budget. This not only results in an apparent decrease in capital funding, but also artificially increases the percentage share of the budget that is supporting personnel services. In 1994-95, academic and administrative capital funding improved significantly. An additional \$900,000 was available to CCRI in asset protection funding in 1994-95 but was budgeted in OHE and \$450,000 was made available in 1995-96, also in OHE.

SOURCE: Audit Statements for 1979-80 to 1994-95 and the Budget, Mid-Year Review for 1995-96, January 1996

STUDENT FINANCIAL AID

Following a significant decrease in 1993-94, the TOTAL student financial aid dollars from both state and federal sources remained relatively stable over this reporting period.

The amount awarded by RIHEAA increased by 18 percent in 1994-95 and by nine percent in 1995-96. However, this was still well below award levels in the years prior to 1993-94. Decreases in remission of tuition (primarily unemployment waivers) in part offset RIHEAA changes in the totals. Pell grants rose three percent in 1994-95 making up some of the percent decrease in dollars awarded from the prior year (1992-93 total was \$5.6 million). Also, the Community College continued to maintain or increase its support of needy students through Community College Grants.

Stafford loans, formerly called guaranteed student loans, increased more than 100 percent from 1993-94 to 1995-96. More students seeking financial aid have turned to the Stafford loan program to help finance their education.

RIHEAA - Rhode Island Higher Education Assistance Authority

^HSTUDENT HELP includes CCRI's share of College Work Study

*Includes unemployment waivers

COMMUNITY COLLEGE OF RHODE ISLAND FOUNDATION

The Community College of Rhode Island Foundation was established in 1979 by an Act of the General Assembly to promote and generate community support for the College.

The Foundation, in collaboration with the College, plans and hosts special events and fund-raisers to uphold the traditions of the Community College to generate funds for designated needs. Such events have included the 30th Anniversary Celebration, Golf Tournaments, Cycling Tours of RI, the Annual Holiday Gathering at the President's Home, the Biennial Hall of Fame Celebration and Colloquiums.

The Foundation primarily raises funds from the private sector to provide student scholarships, but also supports college activities which are not, or can not be, funded by state appropriations such as faculty/staff recognition, professional development and honoraria to speakers for Commencement, Convocations and other special programs. All Foundation investments are managed by Fidelity Charitable Advisory Services to maximize interest earnings on its accounts.

Trustees of the CCRI Foundation lend their time, energy and expertise to publicly advocate for the Community College of Rhode Island as an accessible and affordable institution of higher education for all Rhode Islanders and as a key player in the training and retraining of the state's workforce.

Board of Directors and Officers

John I. Howell, Jr.	<i>President</i>
Gerald P. Conroy	<i>Vice President</i>
Arthur Jenkins	<i>Treasurer</i>
Betty J. Capaldo	<i>Secretary</i>

REPRODUCTION RELEASE

(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title: ANNUAL REPORT 1996 COMMUNITY COLLEGE OF RHODE ISLAND	
Author(s): Nancy V. Abood, William LeBlanc, Susanne M. Cabral	
Corporate Source:	Publication Date: February 1997

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following two options and sign at the bottom of the page.

Check here
For Level 1 Release:
Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical) and paper copy.

The sample sticker shown below will be affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 1

The sample sticker shown below will be affixed to all Level 2 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN OTHER THAN PAPER COPY HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2

Check here
For Level 2 Release:
Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical), but not in paper copy.

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."
