ABSTRACT

This Alberta curriculum guide, focusing on tourism studies, defines competencies that: help students build daily living skills, investigate career options in the design and repair of motor vehicles, use technology in these fields effectively and efficiently, and prepare for entry into the workplace or related postsecondary programs. Section A provides information on Career and Technology Studies (CTS), such as program rationale and philosophy, general learner expectations, curriculum structure and levels of achievement, curriculum and assessment standards, and basic competencies reference guide. Section B presents strand rationale and philosophy and strand organization, including themes, concepts/levels, scope and sequence, and module descriptions. Section C addresses planning for instruction for CTS and tourism studies. Sections D-F contain 24 module curriculum and assessment standards for introductory, intermediate, and advanced levels. Each module within a level contains these components: level, theme, prerequisite, module description, module parameters, and curriculum and assessment standards. The latter are found in two charts: one correlating module learner expectations, assessment criteria and conditions, and suggested emphasis and the other concepts, specific learner expectations, and teacher notes. Sections G-J provide background information and strategies for assessing student achievement and assessment tools; an overview of linkages and transitions of CTS modules with organizations; lists of learning resources; and background information, strategies, a template for developing student learning guides, and several sample student learning guides. CAREER AND TECHNOLOGY STUDIES

A. PROGRAM RATIONALE AND PHILOSOPHY

Through Career and Technology Studies (CTS), secondary education in Alberta is responding to the many challenges of modern society, helping young people develop daily living skills and nurturing a flexible, well-qualified work force.

In Canada's information society, characterized by rapid change in the social and economic environment, students must be confident in their ability to respond to change and successfully meet the challenges they face in their own personal and work lives. In particular, they make decisions about what they will do when they finish high school. Many students will enter the work force, others will continue their education. All students face the challenges of growing independence and responsibility, and of entering post-secondary programs and/or the highly competitive workplace.

Secondary schools also face challenges. They must deliver, on a consistent basis, high quality, cost-effective programs that students, parents and the community find credible and relevant.

CTS helps schools and students meet these challenges. Schools can respond more efficiently and effectively to student and community needs and expectations by taking advantage of the opportunities in the CTS curriculum to design courses and access school, community and distance learning resources. Students can develop the confidence they need as they move into adult roles by assuming increased responsibility for their

learning, cultivating their individual talents, interests and abilities; and by defining and acting on their goals.

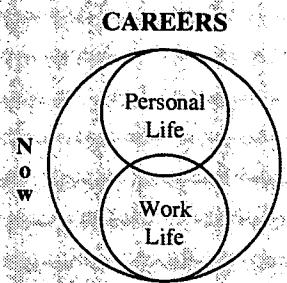

As an important component of education in Alberta secondary schools, CTS promotes student achievement by setting clear expectations and recognizing student success. Students in CTS develop competencies—the knowledge, skills and attitudes they are expected to demonstrate, that is, what they know and what they are able to do.

Acquired competencies can be applied now and in the future as students make a smooth transition into adult roles in the family, community, workplace and/or further education. To facilitate this transition, clearly stated expectations and standards have been defined in cooperation with teachers, business and industry representatives and post-secondary educators.

CTS offers all students important learning opportunities. Regardless of the particular area of study chosen, *students in CTS will:*

- develop skills that can be applied in their daily lives, now and in the future
- refine career-planning skills
- develop technology-related skills
- enhance employability skills
- apply and reinforce learnings developed in other subject areas

In CTS, students build skills they can apply in their everyday lives. For example, in the CTS program, particularly at the introductory levels, students have the opportunity to improve their ability to make sound consumer decisions and to appreciate environmental and safety precautions.

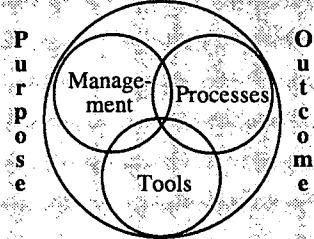

A career encompasses more than activities just related to a person's job or occupation; it involves one's personal life in both local and global contexts; e.g., as a family member, a friend, a community volunteer, a citizen of the world.

The integration of careers throughout the CTS program helps students to make effective career decisions and to target their efforts. CTS students will have the opportunity to expand their knowledge about careers, occupations and job opportunities, as well as the education and/or training requirements involved. Also, students come to recognize the need for lifelong learning.

Students in CTS have the opportunity to use and apply technology and systems effectively and efficiently. This involves:

- a decision regarding which processes and procedures best suit the task at hand
- the appropriate selection and skilled use of the tools and/or resources available
- an assessment of and management of the impact the use of the technology may have on themselves, on others and on the environment.

TECHNOLOGY

Integrated throughout CTS are employability skills, those basic competencies that help students develop their personal management and social skills. Personal management skills are improved as students take increased responsibility for their learning, design innovative solutions to problems and challenges, and manage resources effectively and efficiently. Social skills improve through learning experiences that require students to work effectively with others, demonstrate teamwork and leadership, and maintain high standards in safety and accountability.

As well as honing employability skills, CTS reinforces and enhances learnings developed in core and other complementary courses. The curriculum emphasizes, as appropriate, the effective application of communication and numeracy skills.

In addition to the common outcomes described above, students focusing on a particular area of study will develop career-specific competencies that support entry into the workplace and/or related post-secondary programs. Career-specific competencies can involve understanding and applying appropriate terminology, processes and technologies related to a specific career, occupation or job.

GENERAL LEARNER EXPECTATIONS

General learner expectations describe the basic competencies integrated throughout the CTS program.

Within an applied context relevant to personal goals, aptitudes and abilities; *the student* in CTS will:

- demonstrate the basic knowledge, skills and attitudes necessary for achievement and fulfillment in personal life
- develop an action plan that relates personal interests, abilities and aptitudes to career opportunities and requirements
- use technology effectively to link and apply appropriate tools, management and processes to produce a desired outcome
- develop basic competencies (employability skills), by:
 - selecting relevant, goal-related activities, ranking them in order of importance, allocating necessary time, and preparing and following schedules (managing learning)
 - linking theory and practice, using resources, tools, technology and processes responsibly and efficiently (managing resources)
 - applying effective and innovative decision-making and problem-solving strategies in the design, production, marketing and consumption of goods and services (problem solving and innovation)
 - demonstrating appropriate written and verbal skills, such as composition, summarization and presentation (communicating effectively)
 - participating as a team member by working cooperatively with others and contributing to the group with ideas, suggestions and effort (working with others)

- maintaining high standards of ethics, diligence, attendance and punctuality, following safe procedures consistently, and recognizing and eliminating potential hazards (demonstrating responsibility).

PROGRAM ORGANIZATION

CURRICULUM STRUCTURE

Career and Technology Studies is organized into strands and modules.

Strands in CTS define competencies that help students:

- build daily living skills
- investigate career options
- use technology (managing, processes, tools) effectively and efficiently
- prepare for entry into the workplace and/or related post-secondary programs.

In general, strands relate to selected industry sectors offering positive occupational opportunities for students. Some occupational opportunities require further education after high school, and some allow direct entry into the workplace. Industry sectors encompass goods-producing industries, such as agriculture, manufacturing and construction, and service-producing industries, such as business, health, finance and insurance.

Modules are the building blocks for each strand. They define what a student is expected to know and be able to do (exit-level *competencies*). Modules also specify prerequisites. Recommendations for module parameters, such as instructional qualifications, facilities and equipment can be found in the guides to implementation.

The competencies a student must demonstrate to achieve success in a module are defined through the *module learner expectations*. Senior high school students who can demonstrate the module learner expectations; i.e., who have the designated competencies, will qualify for one credit toward their high school diploma.

Specific learner expectations provide a more detailed framework for instruction. Within the context of module learner expectations, the specific learner expectations further define the knowledge, skills and attitudes the student should acquire.

The following chart shows the 22 strands that comprise the CTS program and the number of modules available in each strand.

LEVELS OF ACHIEVEMENT

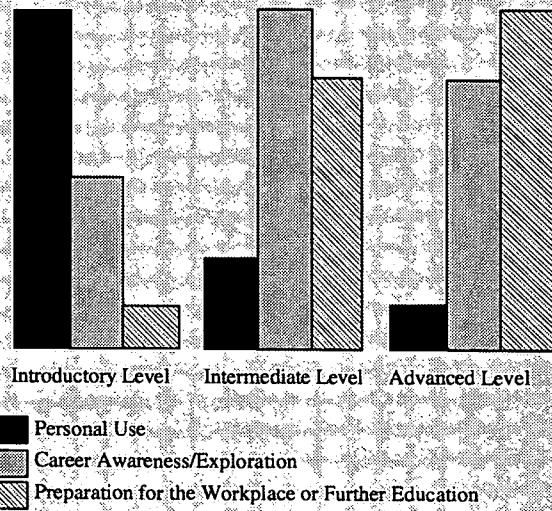

Modules are organized into three levels of achievement: **introductory**, **intermediate** and **advanced**. As students progress through the levels, they will be expected to meet higher standards and demonstrate an increased degree of competence, in both the general learner expectations and the module learner expectations.

Introductory level modules help students build daily living skills and form the basis for further learning. Introductory modules are for students who have no previous experience in the strand.

Intermediate level modules build on the competencies developed at the introductory level. They provide a broader perspective, helping students recognize the wide range of related career opportunities available within the strand.

Advanced level modules refine expertise and help prepare students for entry into the workplace or a related post-secondary program.

The graph below illustrates the relative emphasis on the aspects of career planning at each of the levels.

CURRICULUM AND ASSESSMENT STANDARDS

Curriculum standards in CTS define what students must know and be able to do. Curriculum standards are expressed through general learner expectations for CTS, and through module and specific learner expectations for each strand.

Assessment standards define how student performance is to be judged. In CTS, each assessment standard defines the conditions and criteria to be used for assessing the competencies of each module learner expectation. To receive credit for a module, students must demonstrate competency at the level specified by the conditions and criteria defined for each module learner expectation.

Students throughout the province receive a fair and reliable assessment as they use the standards to guide their efforts, thus ensuring they participate more effectively and successfully in the learning and assessment process. Standards at advanced levels are, as much as possible, linked to workplace and post-secondary entry-level requirements.

TYPES OF COMPETENCIES

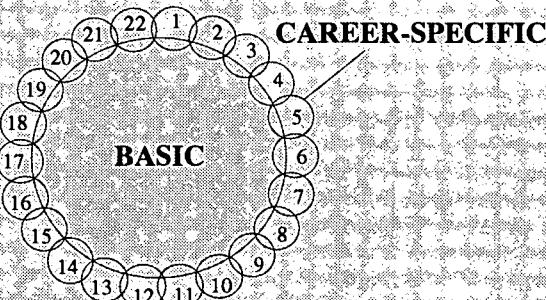

Two types of competencies are defined within the CTS program: basic and career-specific.

Basic competencies are generic to any career area and are developed within each module. Basic competencies include:

- personal management; e.g., managing learning, being innovative, ethics, managing resources
- social; e.g., communication, teamwork, leadership and service, demonstrating responsibility (safety and accountability).

Career-specific competencies relate to a particular strand. These competencies build daily living skills at the introductory levels and support the smooth transition to the workplace and/or post-secondary programs at the intermediate and advanced levels.

The model below shows the relationship of the two types of competencies within the 22 strands of the CTS program.

BASIC COMPETENCIES REFERENCE GUIDE

The chart below outlines basic competencies that students endeavour to develop and enhance in each of the CTS strands and modules. Students' basic competencies should be assessed through observations involving the student, teacher(s), peers and others as they complete the requirements for each module. In general, there is a progression of task complexity and student initiative as outlined in the Developmental Framework*. As students progress through Stages 1, 2, 3 and 4 of this reference guide, they build on the competencies gained in earlier stages. Students leaving high school should set themselves a goal of being able to demonstrate Stage 3 performance.

Suggested strategies for classroom use include:

- having students rate themselves and each other
- using in reflective conversation between teacher and student
- highlighting areas of strength

- tracking growth in various CTS strands
- highlighting areas upon which to focus
- maintaining a student portfolio

TOURISM STUDIES

B. STRAND RATIONALE AND PHILOSOPHY

Tourism is a series of human interactions. It is sometimes referred to as a system, sometimes as an activity and often as an industry. A worldwide phenomenon of global economic importance, tourism is the result of people's decisions to travel. Travellers who become tourists may have different purposes for moving between locations, including visiting family and friends, attending a business meeting and enjoying leisure activities. Learning and participating in tourism activities helps people to develop an appreciation for the world and its people. Travelling brings one culture in contact with another and allows individuals to appreciate the beauty in cultural diversity. It has been said that tourism is the industry of peace; tourism promotes understanding, acceptance and appreciation of others.

Tourism is one of Alberta's fastest growing industries. As the third largest industry in Alberta, tourism employs 100 000 people and generates \$2.5 billion in revenues. By the year 2000, tourism is expected to rise to one of the top revenue generators in the province. Almost 70 per cent of the province's tourism business comes from Albertans travelling within their own province. *

Tourism is a sustainable industry. It encompasses business, organizations, labour and government agencies that provide, totally or partly, the means of transportation, goods, services, accommodation and other facilities, programs and resources. Providing quality guest service and hospitality can mean the difference between success and failure in the tourism industry. Effective communication skills, anticipating and satisfying guest needs, and having a professional appearance and behaviour are basic skills students will need in whatever career path they choose. Tourism Studies, a strand in Career and Technology Studies, can provide relevant, practical situations for students to develop and demonstrate these important skills.

Tourism Studies helps students develop a broad awareness of the economic, social and environmental impact of tourism in the province of Alberta. Students will develop an understanding of the present and potential economic contributions of tourism in the context of their community, Alberta, Canada and the world. However, the impact of tourism can destroy the physical and cultural resources that are the heart of the industry. Community planning and development of tourism is a cooperative effort between private and public sectors and between individuals and organizations. Creative and responsible decisions made at the local level can

*Arlene McGinn and Deanna Binder, *Meeting the Needs: Tourism in Secondary Schools: A Predevelopment Curriculum Research Report*, Edmonton, AB: Alberta Education, 1990.

translate into social, cultural and economic benefits for the entire community. As citizens, future employees and future business owners, students will benefit from a better understanding of the importance and implications of tourism development and activities.

Tourism Studies provides the opportunity for students to link concrete and psychomotor learning with abstract, cognitive levels of learning. By developing basic and career-specific knowledge, skills and attitudes, students will have the flexibility to adapt to a variety of situations. They will meet the challenges of their personal and work lives and will further educational goals with increased ability and confidence. Students will develop tourism knowledge, skills and attitudes in the context of self, family, society and the workplace.

Within the philosophy of Career and Technology Studies, *students in Tourism Studies will:*

- use organizational and resource management skills, applicable to personal and career roles, by planning and facilitating real or simulated tourism events in the school and community
- demonstrate individual responsibility, self-management and self-esteem through a variety of practical, relevant learning activities
- use creative thinking skills, including problem solving, decision making, idea generation, synthesis and ability to predict outcomes
- access, interpret and evaluate tourism information, and communicate this information using a variety of methods
- use interpersonal skills, including teamwork and leadership, through a wide range of group and class activities that have practical tourism industry application and more general social and citizenship value
- demonstrate knowledge and understanding of the scope of occupations and career paths in the tourism industry, including small business and entrepreneurship, and demonstrate knowledge and understanding of industry standards.

STRAND ORGANIZATION

THEMES

Modules in Tourism Studies have been grouped into five themes, which represent sectors of the tourism industry:

- nature of the industry
- food
- accommodation
- travel
- attractions.

The Nature of the Industry theme provides students with essential background information about tourism. One module, Quality Guest Service, offers certification opportunities.

The Food theme contains modules related to the food and beverage sector of the tourism industry, essentially dealing with "front of the house" or service activities in food establishments.

The Accommodation theme contains modules related to the accommodation sector of the tourism industry, which ranges from five-star hotels to bed-and-breakfast and campground operations.

The Travel theme includes the retail travel sector, travel information services and tourism geography.

The Attractions theme encompasses natural attractions (e.g., mountains, lakes and parks), man-made attractions (festivals, museums and theme parks) and recreation areas.

CONCEPTS/LEVELS

As with other CTS curricula, the Tourism Studies curriculum is organized into three levels of learning: introductory, intermediate and advanced.

Each level of Tourism Studies has major concepts on which modules have been developed. The concepts developed at the introductory level are:

- the organizational structure of the tourism industry
- local and regional tourism attractions and ventures
- appreciation and preservation of the environment
- appreciation of cultural diversity
- quality guest service
- ensuring safety and security of the guest
- career opportunities.

The concepts developed at the intermediate level are:

- planning, organizing and facilitating tourism events
- managing resources
- developing research skills
- participating as a team member
- presentation and communication skills.

The concepts developed at the advanced level are:

- basic business and promotion in tourism
- designing service standards and strategies
- creating marketing and venture plans
- employment and business opportunities and entrepreneurship
- tourism development plans.

MODULE DESCRIPTIONS

Module TOU1010: The Tourism Industry

Students analyze the organizational structure of the tourism industry at local and provincial levels, and investigate employment opportunities in tourism.

Module TOU1020: People & Places

Students design strategies for maintaining and enhancing the well-being of tourists, including individuals and groups, such as families. Students also design strategies for preserving the cultural and environmental heritage of a tourism area.

Module TOU1030: Quality Guest Service

Students demonstrate the knowledge, skills and attitudes of quality guest service, including hospitality, effective communication and workplace safety.

Module TOU1040: The Food Sector

Students evaluate food service establishments, explain basic food-handling principles, demonstrate satisfactory food service skills and adapt service standards to meet the needs of guests.

Module TOU1050: The Accommodation Sector

Students research accommodation options available, discuss basic principles of the accommodations industry, and develop service strategies for handling individual guest requirements.

Module TOU1060: The Travel Sector

Students research a variety of travel services, demonstrate basic travel information and promotion skills, and investigate career opportunities in providing travel information.

Module TOU1070: The Attractions Sector

Students analyze and compare the natural, cultural and recreational attractions available in Alberta, develop strategies to maintain the well-being of guests, and investigate employment opportunities in the attractions sector.

Module TOU2010: Tourism Events

Students plan, organize, facilitate and evaluate a tourism event in the school or community.

Module TOU2040: Food Functions

Students demonstrate the knowledge and skills of serving food for a food function that they have planned in order to meet the needs of a client.

Module TOU2050: Meetings & Conferences

Students develop a meeting plan, facilitate and evaluate the success of the meeting plan, and investigate career opportunities in meeting and conference planning.

Module TOU2060: Tourism Destinations 1

Students demonstrate knowledge of world tourism geography, by presenting travel information about North America and at least one other world region.

Module TOU2070: Tourism Destinations 2

Students demonstrate knowledge of world tourism geography, by presenting travel information about at least four major tourism regions of the world.

Module TOU2080: Travel Planning

Students create and evaluate an Alberta tour package and an international travel package, including itinerary, tour and attractions information, and traveller information.

Module TOU2090: Tourism Interpretation 1

Students evaluate the different types of interpretive media and demonstrate the basic skills of an information attendant, by conducting an interpretation program for a tourism activity.

Module TOU2100: Tourism Interpretation 2

Students create, implement and evaluate interpretation programs for conducted and nonconducted activities. Students also demonstrate the skills of an effective leader in a conducted activity.

Module TOU3030: Food Service Operations

Students relate trends and issues in food service to industry activity, design food service strategies, and present a marketing or venture plan for a food service business.

Module TOU3040: Hotel/Motel Operations

Students demonstrate correct check-in and check-out procedures, research the organization of a large hotel, analyze hotel marketing strategies, and present a marketing plan for a hotel department.

Module TOU3050: Alternative Accommodations

Students research and discuss issues related to alternative accommodations, develop a service strategy and standards, and present a marketing or venture plan for an alternative accommodation business.

Module TOU3060: Travel Agency Operations

Students research the operation of a travel agency and the role and work activities of a travel agent. Students also present a marketing plan for a travel agency.

Module TOU3070: Reservations & Ticketing

Students process travel reservations, using a computer reservation system, develop an itinerary, and provide the traveller with information related to the itinerary/destination.

Module TOU3080: Air Transportation

Students research and report on the organization and operation of a major airline. Students also present a marketing plan for an airline.

Module TOU3090: Surface Transportation

Students research the business operations and career opportunities of the rail, motor coach, auto and cruise travel industries. Students also present a variety of marketing strategies for a transportation industry.

Module TOU3100: Attractions Operations

Students analyze the economic, social, cultural and environmental impact of attractions operations. Students also present a marketing plan for an attractions development.

Module TOU3110: Adventure & Ecotourism

Students analyze the economic, social and environmental factors that influence the development plan for an adventure or ecotourism venture. Students also compare management issues for different types of recreation areas.

SECTION C: PLANNING FOR INSTRUCTION

CTS provides increased opportunity for junior and senior high schools to design courses based on the needs and interests of their students and the circumstances within the school and community. Some strands may be appropriately introduced at the junior high school level. Other strands are more appropriately introduced at the senior high school level or to Grade 9 students. Refer to this section for recommendations regarding the Tourism Studies strand, or the *Career & Technology Studies Manual for Administrators, Counsellors and Teachers* for a summary of the recommended grade levels for each strand.

PLANNING FOR CTS

Defining Courses

Schools determine which strands and modules will be offered in a particular school, and will combine modules into courses.

Each module was designed for approximately 25 hours of instruction. However, this time frame is only a guideline to facilitate planning. The CTS curricula are competency based, and the student may take more or less time to gain the designated competencies within each module.

A course will usually consist of modules primarily from the same strand but, where appropriate, may include modules from other CTS strands. Refer to the *Career & Technology Studies Manual for Administrators, Counsellors and Teachers* (Appendix 4) for more information on course names and course codes.

Module selection and sequencing should consider:

- prerequisite(s)
- supporting module(s) (other CTS modules that may enhance the learning opportunity if offered with the module)
- module parameters
 - instructional qualifications, if specialized
 - equipment and facility requirements, if specialized.

The module parameters are defined for each module in Sections D, E and F of this Guide.

Degree of Flexibility

The CTS program, while designed using the modular structure to facilitate flexible timetabling and instructional delivery, does not mandate the degree of flexibility a school or teacher will offer. The teacher and school will determine the degree of flexibility available to the student. Within the instructional plan established by the school, the student may:

- be given the opportunity to progress at a rate that is personally challenging
- have increased opportunity to select modules that develop competencies he or she finds most relevant.

Integrating Basic Competencies

The basic competencies relate to managing learning and resources, problem solving and innovation, communicating effectively, working with others and demonstrating responsibility are developed throughout the CTS program, and are within each module.

Assessment of student achievement on the basic competencies is integrated throughout the other module learner expectations. Refer to Section G (Assessment Tools) of this Guide for the description of student behaviours expected at each of the four developmental stages defined for the basic competencies.

Assessment of basic competencies could include input and reflection involving the student, teacher(s), peers and others. Description of the observed behaviour could be provided through a competency profile for the module. Positive, ongoing interaction between the student and teacher will support motivation for student growth and improvement.

Assessing Student Achievement

Assessing student achievement is a process of gathering information by way of observations of process, product and student interaction.

Where appropriate, assessment tools have been defined to assist the teacher and student in the assessment. Refer to Section G (Assessment Tools) of this Guide for copies of the various tools (worksheets, checklists, sample questions, etc.).

A suggested emphasis for each module learner expectation has also been established. The suggested emphasis provides a guideline to help teachers determine time allocation and/or the appropriate emphasis for each MLE and student grade.

Recognizing Student Achievement

At the high school level, successful demonstration of the exit-level competencies in a module qualifies the student for one credit. Refer to Section A of this Guide for more detailed information about how curriculum and assessment standards are defined in CTS. Refer to the *Career & Technology Studies Manual for Administrators, Counsellors and Teachers* (Appendix 12) for more information on how student achievement can be recognized and reported at the school and provincial levels.

Portfolios

When planning for instruction and assessment, consider a portfolio as an excellent tool to provide evidence of a student's effort, progress and achievement. Portfolios will aid students in identifying skills and interest. They also provide the receiving teacher, employer and/or post-secondary institution proof of a student's accomplishments. The make-up and evaluation of the portfolio should be a collaborative agreement between the student and teacher.

Resources

A comprehensive resource base, including print, software and audio-visual, has been identified to support CTS strands. It is intended that these resources form the basis of a resource centre, encouraging teachers and students to access a wide selection of resources and other information sources throughout the learning process. Unless otherwise noted, these resources are considered to be suitable for both junior and senior high school students.

Authorized resources may be obtained from the Learning Resources Distributing Centre or directly from the publisher or distributor. Refer to Section I (Learning Resource Guide) of this Guide for the complete resource list including curriculum correlations and resource annotations. Additional sources refer to noncommercial or government agencies that offer resources that may be of assistance in this strand.

Sample Student Learning Guides

In addition to the resources, Sample Student Learning Guides are available (refer to Section J of this Guide). These samples, designed for individual student or small group use, provide an instructional plan for selected modules and include the following components:

- Why take this module?
- What are the entry-level competencies?
- What are the exit-level competencies?
- What resources may be accessed?
- What assignments/activities must be completed?
- What are the timelines?
- How will the final mark be calculated?

Sample Student Learning Guides have been developed for the following modules in Tourism Studies:

- The Food Sector
- The Travel Sector.

PLANNING FOR TOURISM STUDIES

The following suggestions are provided to assist teachers and school and school system administrators as they plan to deliver modules from the Tourism Studies strand.

Selecting Modules

The scope and sequence chart in Section B provides an overview of the Tourism Studies modules, indicating prerequisites and theme areas. Brief descriptions of the modules follow the scope and sequence chart in Section B.

Tourism Studies is intended for senior high school students, although it is possible for junior high students to access the introductory level module.

At each level, students should take the modules in the content focus area, Nature of the Industry, and one, two or three modules from the four specialized areas depending on the number of credits to be earned. Students may choose modules from one specialization or may widen their experience by choosing modules from related specializations.

It is very likely that the course sequence will be modified often to capitalize on linkage opportunities (e.g., local tourism events) and to meet the differing interests of students.

There are no specific facility requirements for any of the Tourism Studies modules except for TOU2040 Food Functions, which requires access to food preparation facilities.

No specific equipment is required for any other modules. A computer would enhance the delivery of several modules.

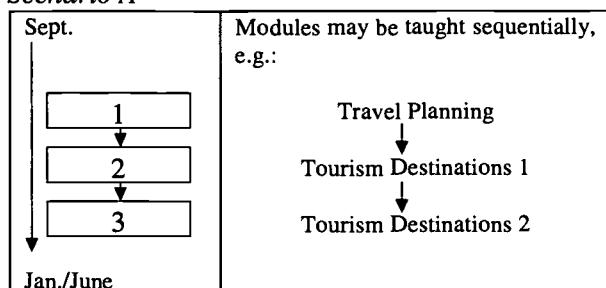

Tourism teachers may come from a variety of backgrounds: Business, Social Studies, Natural Resources, Home Economics or Second Languages. The common qualification is the desire to provide quality service and to be flexible and adaptable. Teachers offering the module TOU1030 Quality Guest Service, and who wish to offer their students the opportunity to be awarded industry-recognized ALBERTA BEST Student

Certificates, must be registered ALBERTA BEST Student Trainers. Training information can be obtained from the Alberta Tourism Education Council. (See Section I, Learning Resources, Distributor Directory for address and telephone number.)

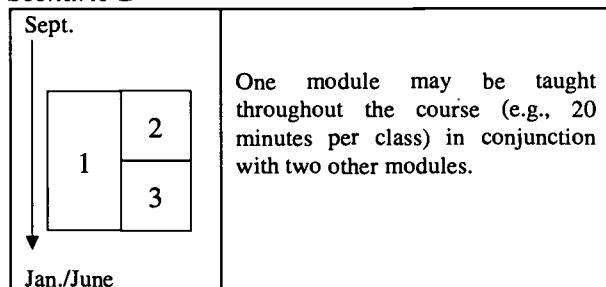

Organizing for Learning

Before selecting modules, teachers should check the module parameters outlined in each module (see Sections D, E and F of this Guide).

Scenario A

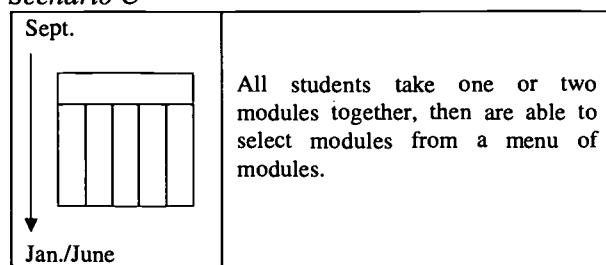

Scenario B

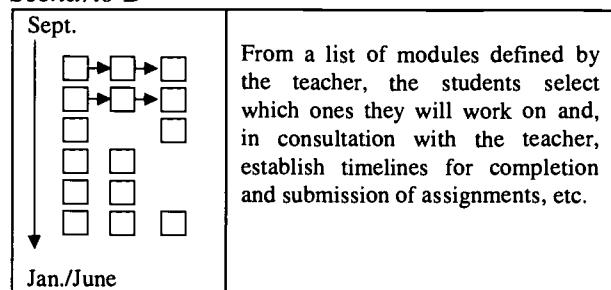

Teachers can also allow students to progress at a rate that is personally challenging; e.g.:

Scenario C

Scenario D

Identifying Linkages

Section H of this Guide describes linkages within CTS and with core and complementary programs.

Note that project modules from the Career Transitions strand may be combined with modules from Tourism Studies to provide increased opportunity for students to develop expertise and refine their competencies. Project modules are **not** designed to be offered as distinct courses and should **not** be used to extend Work Experience 15, 25 and 35 courses.

Improving Smooth Transitions to the Workplace and/or Related Post-secondary Programs

Refer to Section H of this Guide for potential transitions students may make into the workplace and/or related post-secondary programs or other avenues for further learning.

MODULE CURRICULUM AND ASSESSMENT STANDARDS:

SECTION D: INTRODUCTORY LEVEL

The following pages define the curriculum and assessment standards for the introductory level of Tourism Studies.

Introductory level modules help students build daily living skills and form the basis for further learning. Introductory modules are developed for students who have no previous experience in the strand.

Module learner expectations define the competencies a student must demonstrate to achieve success in a module. Assessment standards define the criteria and conditions to be used for assessing the competencies defined in the module learner expectations.

Specific learner expectations provide a detailed framework for instruction to help students build the competencies defined in the module learner expectations. Additional information and suggestions for instruction are provided in the Notes column; teachers may wish to use this space to record their ideas for instruction or student projects.

SECTION G: ASSESSMENT TOOLS

The following pages comprise background information and strategies for assessing student achievement and the assessment tools that are listed in Sections D, E and F of this Guide.

This section of the Guide to Standards and Implementation has been designed to provide a common base of understanding about the level of competencies students are expected to demonstrate to successfully complete a module. The goal is to establish assessment standards for junior and senior high school students that are fair, credible and challenging.

These tools will assist teachers throughout the province to more consistently assess student achievement. The purpose of expanding on the assessment standards is to:

- increase confidence among students, parents, business/industry and post-secondary that students can demonstrate the competencies specified in the modules they have completed
- encourage fairness and equity in how students' efforts are judged
- enable learners to focus effort on key learnings
- support teachers and community partners in planning and implementing CTS.

These tools were validated during the optional stage of CTS implementation.

ASSESSING STUDENT ACHIEVEMENT IN CTS

The CTS assessment standards assess two basic forms of competency:

- What can a student **do**?
 - make a product (e.g., wood bowl, report, garment)
 - demonstrate a process
 - strand-related competencies (e.g., keyboarding, hair cutting, sewing techniques, lab procedures)
 - basic competencies (e.g., resource use, safety procedures, teamwork).
- What does a student **know**?
 - knowledge base needed to demonstrate a competency (link theory and practice).

CTS Defines Summative Assessment Standards

The assessment standards and tools defined for the CTS modules, referenced in Sections D, E and F of this Guide, focus on the final (or summative) assessment of student achievement.

Assessment throughout the learning period (formative assessment) will continue to assess how students are progressing. Teachers direct and respond to students' efforts to learn—setting and marking tasks and assignments, indicating where improvement is needed, sending out interim reports, congratulating excellence, etc.

Teachers will decide which instructional and assessment strategies to apply during the formative learning period. As formative and summative assessment are closely linked, some teachers may wish to modify the tools included in this section to use during the instructional process. Teachers may also develop their own summative assessment tools as long as the standards are consistent with the minimum expectations outlined by Alberta Education.

Grading and Reporting Student Achievement

When a student can demonstrate ALL of the exit-level competencies defined for the module (module learner expectations), the teacher will designate the module as "successfully completed." The teacher will then use accepted grading practices to determine the percentage grade to be given for the module—a mark not less than 50%.

The time frame a teacher allows a student to develop the exit-level competency is a local decision. NOTE: The Senior High School Handbook specifies that students must have access to 25 hours of instruction for each credit. Students may, however, attain the required competencies in less time and may proceed to other modules.

Teachers are encouraged to consult their colleagues to ensure grading practices are as consistent as possible.

High school teachers may wish to refer to "Directions for Reporting Student Achievement in CTS" for information on how to use the CTS course codes to report the credits that students have earned to Alberta Education. (Copies of this document have been forwarded to superintendents and senior high school principals.)

Components of Assessment Standards in CTS

The following components are included in each module:

- **module learner expectations** (in the shaded left column of the module) define the exit-level competencies students are expected to achieve to complete a module. Each MLE defines and describes critical behaviours that can be measured and observed. The student must meet the standard specified for ALL MLEs within a module to be successful.
- **suggested emphasis** (right column of the module) provides a guideline for the relative significance of each MLE and can be used to organize for instruction.

- **criteria and conditions** (middle column of the module) set the framework for the assessment of student competency, specifying the minimum standard for performance and including a reference to assessment tools, where appropriate.

Criteria define the behaviours that a student must demonstrate to meet the designated standard. For example, the criteria could describe the various techniques that must be demonstrated when using a tool, and/or describe the minimum components of a project the student must complete.

Conditions outline the specifications under which a student's competency can be judged. For example, the conditions could specify whether the assessment should be timed or not, or if the student should be allowed to access to support resources or references.

Standard may be defined by (1) assessment tools, which are referenced in this section (or sometimes in approved learning resources) and/or (2) "Illustrative examples" of student work, if appropriate.

Assessment Tools included in this section of the Guide tend to be of two types:

- tools generic to a strand or to the entire CTS program; e.g., a standard five-point rating scale is used in all strands. Other generic tools include assessing reports and presentations and lab safety checklists. (*Names of these tools include the strand code [e.g., "INF" for Information Processing] and a code for the type of tool [e.g., "TDENT" for Text-Data Entry].*)
- tools specific to a module; e.g., assessment checklist for assessing a venture plan in Enterprise and Innovation or a checklist for sketching, drawing and modelling in Design Studies. (*Names of these tools include the module code; e.g., "INF1010-1" indicating that it is the first*

module-specific tool used in Information Processing Module 1010.)

Development and Validation Processes

The "Criteria and Conditions" and "Suggested Emphasis" columns have been validated with extensive input from teachers, professional associations/contacts and post-secondary institutions. The goal is to prepare well-structured assessment standards and related assessment tools that:

- establish an appropriate level of challenge and rigour
- relate directly to the type of learning described in the curriculum standard
- are easy to understand
- are efficient to implement
- can provide a consistent measure of what was expected to be measured.

As students and teachers work with the assessment standards and tools, it is expected that levels of performance will increase as more and more students are able to achieve the minimum standard. Therefore, the assessment standards and related tools will continue to be monitored, and revised as necessary to ensure appropriate levels of rigour and challenge, and successful transitions for students as they leave high school and enter the workplace or related post-secondary programs.

ASSESSING STUDENT ACHIEVEMENT IN TOURISM STUDIES

The Tourism Studies curriculum is based on the notion of recognizable outcomes that may be compared to stated standards. In Tourism Studies, the standards identify students' growth in knowledge, skills and attitudes. The curriculum defines outcomes through the module learner expectations (MLEs) and specific learner expectations (SLEs). It also suggests criteria and conditions for assessment and the emphasis to be placed on each expectation. These elements combine to provide an overall framework for instruction and assessment.

Assessment Tools

A variety of tools have been provided for your reference and use. They are intended to help you assess students' work as accurately and consistently as possible by stating standards of performance for elements felt to be important within the curriculum as a whole or in specific modules. They also provide standards for "basic competencies" students should be able to demonstrate while engaged in learning.

Generic tools developed for Career and Technology Studies have been included in this section. These tools take the form of assessment guides that state standards for specific themes across the levels of the curriculum. For example, a guide is provided for assessing students' presentations and reports. Standards statements are provided that relate to a number scheme 0–4. You could use this as a basis for assessment in most presentation or report-making activities.

Tools have also been developed to provide detail for specific aspects such as conducting research and solving problems. Several observation checklists have also been included that apply to various modules.

Assessing Basic Competencies

Basic competencies are those traits all students are expected to demonstrate no matter the level or context of their learning. An assessment guide for

basic competencies, the Basic Competencies Reference Guide, has been developed and is included in this section. As students progress from one stage or level to another, the expectations placed on them change and in general increase. You may reference Basic Competencies Reference Guide as part of your assessment strategy.

Assessing Project-based Work

A series of "standards statements" have been developed for all CTS strands that briefly describe student performance in five developmental stages. These statements are:

- 4 exceeds defined outcomes. Plans and solves problems effectively and creatively in a self-directed manner. Tools, materials and/or processes are selected and used efficiently, effectively and with confidence.
- 3 meets defined outcomes. Plans and solves problems in a self-directed manner. Tools, materials and/or processes are selected and used efficiently and effectively.
- 2 meets defined outcomes. Plans and solves problems with limited assistance. Tools, materials and/or processes are selected and used appropriately.
- 1 meets defined outcomes. Follows a guided plan of action. A limited range of tools, materials and/or processes are used appropriately.
- 0 has not completed defined outcomes. Tools, materials and/or processes are used inappropriately.

Criteria have been identified to measure these statements. In general, all Tourism Studies students should perform each criterion to the following standard:

Introductory level: Standard = 1

Intermediate level: Standard = 2

Advanced level: Standard = 3

The required standards of performance are stated in the "Assessment Criteria and Conditions" column for each module.

Generic Assessment Tools

Assessment Framework: Presentation/Reports (CTSPRE)

This assessment framework deals with expectations of students as they make presentations and prepare reports at each of the three levels of the curriculum. It has been adapted from a generic pool of assessment tools that may be used in any CTS strand. You can adapt this tool to meet your specific needs or use it as is in conjunction with other assessment tools.

Assessment Framework: Research Process (CTSRES)

As with Presentation/Reports, this assessment framework deals with expectations of students conducting research in any aspect of the Tourism Studies curriculum. It has also been adapted from a generic pool of assessment tools. You can adapt this tool to meet your specific needs or use it as is in conjunction with other assessment tools.

Tourism Studies Career Research Guide (TOUCRG)

This generic tool outlines elements that are important reference points for career research. It is developmental in that there is increased expectation in scope or depth as students progress. The tool forms a basis for all career research-related project assessment. Specific tools have been adapted from these general concepts and are listed where applicable in the Assessment Criteria and Conditions for each module.

Tourism Studies Food Server Skills Observation Checklist (TOUFSS)

This tool may be used when observing students performing food service skills such as in Module TOU1040. Please check the Assessment Criteria and Conditions for each module.

Tourism Studies General Observation Checklist (TOUGOC)

Tourism Studies students may be required to perform numerous tasks when working at functions such as meetings, banquets and conferences. This tool will help assess their performance in these situations.

Tourism Studies Process Framework (TOUPRO)

The Process Framework provides a series of performance statements organized developmentally. These statements help describe student growth. The process framework is related to the problem-solving model through the process components identified. This tool can be used as a basis for recognizing student outcomes as they complete project work.

Tourism Studies Problem-solving Model (TOUPSM)

There are many different approaches to problem solving. This model has been adapted specifically to Tourism Studies. While the model describes a sequence, it is iterative. That is the steps may be revisited several times during problem solving, each time helping to bring the problem closer to resolution. This model can be used as a basis for assessing all problem solving in Tourism Studies. Specific tools have been developed based on this model. These are listed as required in the Assessment Criteria and Conditions for each module.

Tourism Studies Quality Guest Service Observation Checklist (TOUQGS)

This checklist captures the major elements of quality guest service expected of students working in the tourism industry. It is based on identified industry standards. This tool may be applied in TOU1030 and several other modules.

Specific Assessment Tools

A variety of specific assessment tools have been provided for Tourism Studies. The tools provided can be categorized into:

- Presentations/Reports
- Problem Solving
- Career Research Projects or Career/Business Opportunities
- Portfolio Assessment

and various observation checklists dealing with specific issues.

Within each category, common elements such as preparation and planning are repeated. These elements have been drawn from related CTS generic tools. Content is also identified on each tool and is customized to the module requirements. For this reason, there are numerous tools of the same type associated with Tourism Studies. Specific tools have been coded by module number.

In most cases, students will be expected to meet all criteria. Sometimes students may not be required to perform one of the criteria (e.g., teamwork) if it is not applicable. The option of stating "not applicable" (N/A) is available in these cases.

Marks and Mark Ranges

You will note that no marks or mark ranges have been assigned on any of the assessment tools, because you are in the best position to determine the marks students should receive for the work they produce. If a student meets the standards as stated in the assessment tools, he or she should receive credit for the module. However, it may be that one student's work is "better" than another student's because of its scope, technical quality or aesthetic quality. Or it may be that one student is more proficient than another owing to his or her perseverance, responsibility level or technical skill. You can recognize this through your marks even though both students will have met the standard for the module.

BASIC COMPETENCIES REFERENCE GUIDE

The chart below outlines basic competencies that students endeavour to develop and enhance in each of the CTS strands and modules. Students' basic competencies should be assessed through observations involving the student, teacher(s), peers and others as they complete the requirements for each module. In general, there is a progression of task complexity and student initiative as outlined in the Developmental Framework*. As students progress through Stages 1, 2, 3 and 4 of this reference guide, they build on the competencies gained in earlier stages. Students leaving high school should set themselves a goal of being able to demonstrate Stage 3 performance.

Suggested strategies for classroom use include:

- having students rate themselves and each other
- using in reflective conversation between teacher and student
- highlighting areas of strength
- tracking growth in various CTS strands
- highlighting areas upon which to focus
- maintaining a student portfolio.

TOURISM STUDIES PROBLEM-SOLVING MODEL

TOUPSM

Model

There are several different problem-solving strategies but all of them have some common elements. This problem-solving model has been adapted from one used in the Design Studies strand (components in brackets).

Students should use this problem-solving strategy all the time in their project work and teachers may use it as a guide for assessing problem-solving. Please note: students may repeat these steps several times during a project particularly if it is complex.

Description

1. **Identify Assignment/Task:** Introduction (oral, video, written); theme (e.g., an event); focus; problem identification (as in a case study)
2. **Conduct Research:** Variety of sources (interviews, magazines, videos, books, field trips, guest speakers); number of references; detail and depth; reference notation
3. **Plan Assignment:** Includes outline; planners; goals, objectives, deadlines, timelines, calendars, daytimers; material list/equipment lists, checklists; scripts, storyboards, sketches
4. **Create/Follow Procedure:** Check at this point with follow-through based on planning (gathering, booking, equipment/facilities); procedure prescribed by criteria when applicable (e.g., front desk check in); time management
5. **Complete Assignment:** Completing the assignment; pulling together of assignment; meeting content criteria (e.g., teacher may include format, grammar, sentence structure)
6. **Present Assignment:** Based on media used (oral, written); well-organized
7. **Student Self-evaluation/Reflection:** "Did the assignment answer the task?"; student self-critique; "Where does this put me?"; improvements that can be made "What worked? What didn't work?"

SECTION H: LINKAGES/TRANSITIONS

This section of the GSI has been designed to provide an overview of linkages and transitions of CTS modules with a number of organizations. The charts and information presented in this section will assist CTS students and teachers in understanding the potential application of CTS modules as students move into the workplace.

LINKAGES/TRANSITIONS

LINKAGES

With Other CTS Strands

Tourism Studies modules may be linked with modules from other CTS strands to enhance student learning and broaden awareness of specific areas. For example, modules from the Food theme of Tourism Studies may be linked with modules from the Foods strand, which includes the preparation of food products. Modules from the Travel theme may be linked with modules in Management and Marketing or Enterprise and Innovation. As well, teachers may wish to enhance the Attractions theme with modules from the Wildlife strand.

Career Transitions modules offer the possibility of internships and practicums, as well as project modules. Industry placements are an essential way for today's youth to experience the value of work, to develop pride in their work and to mature personally.

Many communities have opportunities for students to intern in the tourism industry or to work with a community organization in tourism events and activities. Internships allow students to observe and participate in daily operations, to develop direct contact with industry personnel, to ask questions about a career, and to perform certain work tasks. Possibilities are limited only by the imagination of the students, teachers and local community.

Potential linkages of Tourism Studies with other CTS strands, determined by course emphasis and area of specialization, are identified in this section (see "Connections with Other CTS Strands").

With Other Secondary Programs

Tourism Studies enhances learning from core areas including Social Studies (geography, culture), Science (environment), Physical Education and Career and Life Management. Tourism Studies also links with complementary programs such as Second Languages (e.g., French, Japanese).

Potential linkages of Tourism Studies with other core and complementary subject areas across the curriculum are identified in this section (see "Tourism Studies: Connections Across the Curriculum").

TRANSITIONS

To the Community/Workplace

Industry-recognized standards have been incorporated into the Tourism Studies curriculum (e.g., Quality Guest Service, Food Functions).

Information from the National Occupational Classification (NOC) regarding occupations in tourism-related areas that can be accessed upon completion of high school is provided in this section (see "Tourism Studies: Related Occupations").

To Related Post-secondary Programs

Tourism-related programs are offered at most post-secondary institutions in Alberta. Advanced placement for students with advanced level modules in Tourism Studies may become possible in some institutions in the future.

An outline of post-secondary institutions in Alberta currently offering programs in tourism-related areas is provided in this section (see "Tourism Studies: Summary of Related Post-secondary Programs").

CREDENTIALLING

One module, Quality Guest Service, offers students the opportunity to be awarded industry-recognized ALBERTA BEST Student Certificates if their teachers are registered ALBERTA BEST Student Trainers (see "Credentialling Opportunities in Tourism Studies").

SECTION I: LEARNING RESOURCE GUIDE

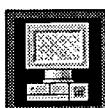

This section of the GSI has been designed to provide a list of resources that support student learning.

Three types of resources are identified:

- Authorized: Resources authorized by Alberta Education for CTS curriculum; these resources are categorized as basic, support, or teaching
- Other: Titles provided as a service to assist local jurisdictions to identify resources that contain potentially useful ideas for teachers. Alberta Education has done a preliminary review of these resources, but further review will be necessary prior to use in school jurisdictions
- Additional: A list of local, provincial and national sources of information available to teachers, including the community, government, industry, and professional agencies and organizations.

The information contained in this Guide, although as complete and accurate as possible as of June 1997, is time-sensitive.

For the most up-to-date information on learning resources and newer editions/versions, consult the LRDC *Buyers Guide* and/or the agencies listed in the Distributor Directory at the end of this section.

CTS is on the Internet.

INTRODUCTION

CTS AND THE RESOURCE-BASED CLASSROOM

Career and Technology Studies (CTS) encourages teachers to establish a resource-based classroom, where a variety of appropriate, up-to-date print and nonprint resources are available. Learning resources identified for CTS strands include print, software, video and CD-ROM formats. Also of significance and identified as appropriate throughout each strand are sources of information available through the Internet.

The resource-based classroom approach accommodates a variety of instructional strategies and teaching styles, and supports individual or small group planning. It provides students with opportunities to interact with a wide range of information sources in a variety of learning situations. Students in CTS are encouraged to take an active role in managing their own learning. Ready access to a strong resource base enables students to learn to screen and use information appropriately, to solve problems, to meet specific classroom and learning needs, and to develop competency in reading, writing, speaking, listening and viewing.

PURPOSE AND ORGANIZATION OF THIS DOCUMENT

The purpose of this document is to help teachers identify a variety of resources to meet their needs and those of the students taking the new CTS curriculum. It is hoped that this practical guide to resources will help teachers develop a useful, accessible resource centre that will encourage students to become independent, creative thinkers.

This document is organized as follows:

- Authorized Resources:
 - basic learning resources
 - support learning resources
 - teaching resources
- Other Resources
- Additional Sources.
- Distributor Directory.

Some resources in the guide have been authorized for use in some or all of the CTS strands, e.g., the Career and Technology Studies video series produced by ACCESS: The Education Station. Further information is provided in relevant sections of this resource guide.

Each resource in the guide provides bibliographic information, an annotation where appropriate, and a module correlation to the CTS modules. The distributor code for each entry will facilitate ordering resources. It is recommended that teachers preview all resources before purchasing, or purchase one copy for their reference and additional copies as required.

HOW TO ORDER

Most authorized resources are available from the Learning Resources Distributing Centre (LRDC) at:

12360 – 142 Street
Edmonton, AB T5L 4X9
Telephone: 403-427-5775 (outside of Edmonton dial 310-0000 to be connected toll free)
Fax: 403-422-9750
Internet: <http://ednet.edc.gov.ab.ca/lrdc>

Please check LRDC for availability of videos.

RESOURCE POLICY

Alberta Education withdraws learning and teaching resources from the provincial list of approved materials for a variety of reasons; e.g., the resource is out of print; a new edition has been published; the program has been revised. Under section 44 (2) of the *School Act*, school boards may approve materials for their schools, including resources that are withdrawn from the provincial list. **Many school boards have delegated this power to approve resources to school staff or other board employees under section 45 (1) of the *School Act*.**

For further information on resource policy and definitions, refer to the *Student Learning Resources Policy* and *Teaching Resources Policy* or contact:

LRDC	<p><i>Student's Travel Map, The: A Guide to Tourism Careers, Education and Training.</i> Canadian Tourism Human Resource Council, 1995.</p> <p>This resource provides a good overview of the tourism industry in Canada, particularly how it is organized and the jobs/careers available within each organizational group. Each job is described in detail and includes job level, duties, education requirements, industry experience requirements and career paths available.</p>	1010 1040 1050 1060 1070		
LRDC	<p><i>TENGBOCHE: A Threatened Sanctuary.</i> (Everest Connection Series.) MediCinema Ltd., 1988. Video.</p> <p>This 27-minute video provides a case study in how Western tourism can affect an exotic sheltered culture. It tells the story of a Tibetan Buddhist monastery located in the Himalayan Mountains of Nepal, which has seen its student enrollment drop as young boys enter the tourist economy instead. The film follows a Canadian-sponsored attempt to remedy this situation throughout the building of a new school that combines both secular and religious studies. The project is spearheaded by Sir Edward Hillary, who appears in the film. This is an excellent resource for the People and Places module.</p>	1020	2070	3100 3110

ADDITIONAL SOURCES

Available to Career and Technology Studies (CTS) teachers, locally and provincially, are many sources of information that can be used to enhance CTS. These sources are available through the community (e.g., libraries, boards, committees, clubs, associations) and through government agencies, resource centres and organizations. Some sources, e.g., government departments, undergo frequent name and/or telephone number changes. Please consult your telephone directory or an appropriate government directory.

The following is a partial list of sources to consider:

TEACHER-LIBRARIANS

Planned and purposeful use of library resources helps students grow in their ability to gather, process and share information. Research activities require access to an adequate quantity and variety of appropriate, up-to-date print and non print resources from the school library, other libraries, the community and additional sources. Some techniques to consider are:

- planning together
- establishing specific objectives
- integrating research skills into planning.

Cooperation between the teacher-librarian and the subject area teacher in the development of effectively planned resource-based research activities ensures that students are taught the research skills as well as the subject content. Also see *Focus on Research: A Guide to Developing Student's Research Skills* referenced in the Alberta Education resources section.

ALBERTA EDUCATION SOURCES

Alberta Government telephone numbers can be reached toll free from outside Edmonton by dialing 310-0000.

The following monographs are available for purchase from the Learning Resources Distributing Centre. Refer to the Distributor Directory at the end of this section for address, telephone, fax and Internet address.

Please consult the "Support Documents" section or the "Legal, Service and Information Publications" section in the LRDC *Buyers Guide* for ordering information and costs.

Developmental Framework Documents

- *The Emerging Student: Relationships Among the Cognitive, Social and Physical Domains of Development*, 1991 (Stock No. 161555)

This document examines the child, or student, as a productive learner, integrating all the domains of development: cognitive, social and physical. It emphasizes the need for providing balanced curriculum and instruction.

- *Students' Interactions Developmental Framework: The Social Sphere*, 1988 (Stock No. 161399)

This document examines children's perceptual, structural and motor development and how such physical development affects certain learning processes.

- *Students' Physical Growth: Developmental Framework Physical Dimension*, 1988 (Stock No. 161414)

This document examines children's normal physical growth in three areas: perceptual, structural and motor development. In none of these areas is the child's growth in a single continuous curve throughout the first two decades of life. Physical growth is characterized by periods of rapid growth and periods of slower growth. Consequently, differences and changes in growth patterns may affect the timing of certain learning processes.

Other

- *Focus on Research: A Guide to Developing Students' Research Skills*, 1990 (Stock No. 161802)

This document outlines a resource-based research model that helps students manage information effectively and efficiently, and gain skills that are transferable to school and work situations. This model provides a developmental approach to teaching students how to do research.

- *Teaching Thinking: Enhancing Learning*, 1990 (Stock No. 161521)

Principles and guidelines for cultivating thinking, ECS to Grade 12, have been developed in this resource. It offers a definition of thinking, describes nine basic principles on which the suggested practices are based, and discusses possible procedures for implementation in schools and classrooms.

ACCESS: The Education Station

ACCESS: The Education Station offers a variety of resources and services to teachers. For a nominal dubbing and tape fee, teachers may have ACCESS: The Education Station audio and video library tapes copied. ACCESS the Education Station publishes listings of audio and video cassettes as well as a comprehensive programming schedule.

Of particular interest are the CTS videos, which are available with utilization guides. The guides outline key points in each video and suggest questions for discussion, classroom projects and other activities. Video topics are listed in the Support Learning Resources section of this guide. The videos and accompanying support material can be obtained from ACCESS: The Education Station. Refer to the Distributor Directory at the end of this section for address, telephone, fax and Internet address.

SECTION J: SAMPLE STUDENT LEARNING GUIDES

The following pages provide background information, strategies and a template for developing student learning guides. Also included at the end of this section are several sample student learning guides for Tourism Studies.

A student learning guide provides information and direction to help students attain the expectations defined in a specified CTS module. It is designed to be used by students under the direction of a teacher.

Many excellent student learning guides (SLGs) are available for use and/or are in the process of being developed. While Alberta Education provides a development template accompanied by some samples, most student learning guide development is being done by individuals and organizations across the province (e.g., school jurisdictions, specialist councils, post-secondary organizations). Refer to the *Career & Technology Studies Manual for Administrators, Counsellors and Teachers* (Appendix 11) for further information regarding student learning guide developers and sources.

Note: A student learning guide is not a self-contained learning package (e.g., Distance Learning Module), such as you might receive from the Alberta Distance Learning Centre (ADLC) or Distance Learning Options South (DLOS).

BACKGROUND INFORMATION

A Student Learning Guide (SLG) is a presentation of information and direction that will help students attain the expectations defined in a specified CTS module. It is designed to be used by students under the direction of a teacher. A SLG is not a self-contained learning package such as you might receive from the Alberta Distance Learning Centre (ADLC) or Distance Learning Options South (DLOS).

Each SLG is based on curriculum and assessment standards as defined for a particular CTS module. Curriculum and assessment standards are defined in this document through:

- module and specific learner expectations (Sections D, E and F)
- assessment criteria and conditions (Sections D, E and F)
- assessment tools (Section G).

The SLG is written with the student in mind and makes sense to the student in the context of his or her CTS program. SLGs are designed to guide students through modules under the direction of the teacher. They can be used to guide:

- an entire class
- a small groups of students
- individual students.

In some instances, the Student Learning Guide may also be used as teacher lesson plans. When using SLGs as teacher lesson plans, it should be noted that they tend to be:

- learner-centred (versus teacher-directed)
- activity-based (versus lecture-based)
- resource-based (versus textbook-based).

Components of a Student Learning Guide

The student learning guide format, as developed by Alberta Education, typically has *seven* components as described below.

1. Why Take This Module?

This section provides a brief rationale for the work the student will do, and also establishes a context for learning (i.e., in relation to the strand, a life pursuit, a specific industry, etc.).

2. What Do You Need To Know Before You Start?

In this section, prerequisite knowledge, skills and attitudes considered necessary for success in the module are identified. Prerequisites may include other modules from within the strand or from related CTS strands, as well as generic knowledge and skills (e.g., safety competencies, the ability to measure/write/draw, prior knowledge of basic information relevant to the area of study).

3. What Will You Know And Be Able To Do When You Finish?

This information must parallel and reflect the curriculum and assessment standards as defined for the module. You may find it desirable to rewrite these standards in less formal language for student use.

4. When Should Your Work Be Done?

This section provides a timeline that will guide the student in planning their work. The timeline will need to reflect your program and be specific to the assignments you give your students. You may wish to include a time management chart, a list of all assignments to be completed, and instructions to the student regarding the use of a daily planner (i.e., agenda book) to organize their work.

5. How Will Your Mark For This Module Be Determined?

This section will interpret the assessment criteria and conditions, assessment standards, assessment tools and suggested emphasis as defined for the module within the context of the projects/tasks completed. Accepted grading practices will then be used to determine a percentage grade for the module—a mark not less than 50% for successful completion. (Note: A module is

“successfully completed” when the student can demonstrate ALL of the exit-level competencies or MLEs defined for the module.)

6. Which Resources May You Use?

Resources considered appropriate for completing the module and learning activities are identified in this section of the guide. The resources may be available through the Learning Resources Distributing Centre (LRDC) and/or through other agencies. Some SLGs may reference a single resource, while others may reference a range of resources. Resources may include those identified in the Learning Resource Guide (Section I) as well as other sources of information considered appropriate.

7. Activities/Worksheets

This section provides student-centred and activity-based projects and assignments that support the module learner expectations. When appropriately aligned with curriculum and assessment standards, successful completion of the projects and assignments will also indicate successful completion of the module.

Strategies for Developing Student Learning Guides

Prior to commencing the development of a student learning guide, teachers are advised to obtain:

- the relevant Guide to Standards and Implementation
- the student learning guide template.

Information communicated to the student in the SLG must parallel and reflect the curriculum and assessment standards as defined for the module. Therefore, critical elements of the Guide to Standards and Implementation that need to be addressed throughout the SLG include:

- module and specific learner expectations
- assessment criteria and conditions
- assessment standards
- assessment tools.

Additional ideas and activities will need to be incorporated into the student learning guide. These can be obtained by:

- reflecting on projects and assignments you have used in delivering programs in the past
- identifying human and physical resources available within the school and community
- networking and exchanging ideas (including SLGs) with other teachers
- reviewing the range of resources (e.g., print, media, software) identified in the Learning Resource Guide (Section I) for a particular module/strand.

Copyright law must also be adhered to when preparing a SLG. Further information and guidelines regarding copyright law can be obtained by referring to the:

- *Copyright Act*
- *Copyright and the Can Copy Agreement*.

A final task in developing a student learning guide involves validating the level of difficulty/challenge/rigour established, and making adjustments as considered appropriate.

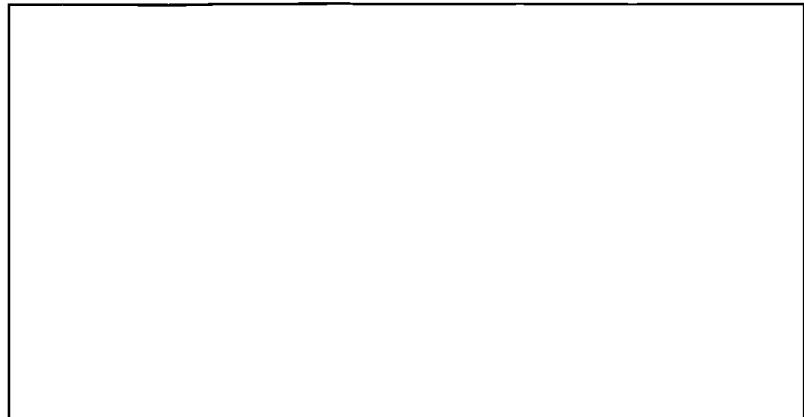

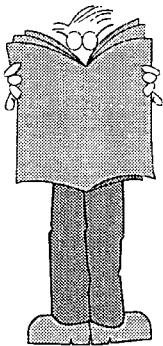

A template for developing student learning guides, also available on the Internet, is provided in this section (see “Student Learning Guide Template,” pages J.5–10). Several sample student learning guides are also provided in this section (see “Sample Student Learning Guides,” starting on page J.11).

TOURISM STUDIES

TOU1010 The Tourism Industry

WHY TAKE THIS MODULE?

- Tourism is predicted to be the largest industry in Alberta by the year 2000 and will provide many of today's students with rewarding careers.
- This introductory module serves as an overview of the industry at the local and provincial level, and investigates many employment opportunities in tourism.

WHAT DO YOU NEED TO KNOW BEFORE YOU START?

- There are no prerequisites identified for this module.

TOURISM STUDIES

TOU1010 The Tourism Industry

WHAT

**WILL YOU KNOW AND
BE ABLE TO DO
WHEN YOU FINISH?**

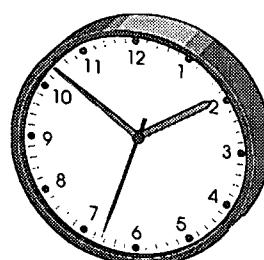

Upon completion of this module you will be able to:

- describe the role of business, organizations, labour and government agencies in the tourism industry
- assess the effect different travel motivators have on industry activity
- evaluate local tourism ventures and promotion strategies used to attract visitors
- identify employment opportunities in the tourism industry
- demonstrate basic competencies.

WHEN SHOULD YOUR WORK BE DONE?

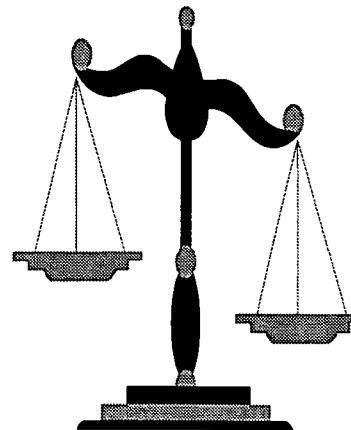

Your teacher will give you a timeline for completing tasks and assignments within this module.

You may also wish to use a time-management planning chart to preplan the work that needs to be done in this module. Plan how you will use your class time as well as extra time needed to complete the assignments in this module.

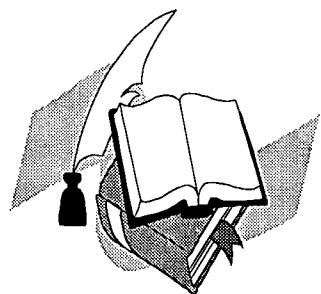

HOW WILL YOUR MARK FOR THIS MODULE BE DETERMINED?

	PERCENTAGE
You must first demonstrate all of the competencies required for this module.	
When you have done this, your percentage mark for the module will be determined as follows:	
• Portfolio (Structure of the industry/travel motivators 40%) (Local tourism 40%) (Employment opportunities 20%)	80%
• Module Exam	20%

WHICH RESOURCES MAY YOU USE?

- Howell, David W. *Passport: An Introduction to the Travel and Tourism Industry*
- Timmons, Veronica. *Tourism and Travel: Focus Canada: A Guide to Canada's Tourism Industry and its Careers*
- ATEC Career resource binder (Available to Alberta Best Trainers)

ACTIVITIES/WORKSHEETS

UNIT A: STRUCTURE OF THE INDUSTRY/TRAVEL MOTIVATORS

1. Complete the “Tourism background information” sheet.
2. Complete the Alberta “Trivia Quiz” #1 and #2.
3. Read chapter 1 of *Tourism and Travel: Focus Canada* and answer the chapter 1 questions.
4. Compose your own scenario where your budget is unlimited and you can travel anywhere in the world. Using travel magazines or drawings, prepare a poster that shows your trip, starting in your town and taking your trip, using each sector of the tourism industry somewhere along the way.
5. Using a map of Alberta, complete the “Getting to know Alberta: Name Game”.
6. Read chapter 2 of *Tourism and Travel: Focus Canada* and complete the chapter 2 questions.
7. Complete worksheet 2-4 from page 50 in *Passport* called “Motivations, Needs and Expectations”.
8. Obtain and complete the chapter 1/2 quiz.
9. Using a map of Alberta as a reference, identify the “tourist zones”, “major cities and towns”, “major rivers”, and “major parks”. Go over them once and fill in as many answers as you can, then get an Alberta map and fill in all of the correct responses.
10. Complete: “Alberta Tourism Zone Report”.
11. Read chapter 3 of *Tourism and Travel: Focus Canada* and complete the chapter 4 questions.

UNIT B: LOCAL TOURISM

1. Review chapter 2 of *Tourism and Travel: Focus Canada*.
2. Develop a “Marketing and Attraction/Event” worksheet and a “Marketing Strategy/Plan” for a local tourism event.
3. Make a presentation of your tourism event and marketing plan.

UNIT C: EMPLOYMENT OPPORTUNITIES

1. Several guest speakers will be called in over the course of this module. For two of the guest speakers, complete a “Guest Speaker Reaction Paper”.
2. Research a tourism career.

GUEST SPEAKER REACTION PAPER

SPEAKER: _____

TOPIC: _____

After each guest speaker's presentation, students must prepare a "Reaction Paper" based on the presentation. The reaction has to include a brief summary of the presentation, followed by personal comments relating to significant points made by the presenter.

The following evaluation scale will be used to grade your reaction papers:

- 5** A well-defined and critically thought-out reaction to the statements made by the presenter.
- 4** The student has reacted to statements made but limited personal or critical thought has been put into the reaction.
- 3** A summary of the presentation has been made, but no personal or critical thought has been put into the reaction.
- 2** The student has made a brief summary of the presentation, but limited effort has been used in completing the objectives of the assignment.
- 1** The student has made a limited effort in completing the assignment. Summary is poorly described and has grammatical errors.
- 0** No assignment turned in.

This paper should be written neatly on the back of, or attached to, this form. Please use complete sentences and write clearly.

This paper is due the next class day following the presentation.

WHY TAKE THIS MODULE?

- This introductory level module deals with the food sector from the perspective of the service provider, and the criteria required to give excellent service.
- You will evaluate food service establishments, explain basic food handling services, demonstrate proper food service skills, and adapt service standards to meet the needs of the guests.

WHAT DO YOU NEED TO KNOW BEFORE YOU START?

Although there are no prerequisites identified for this module, you will need to be able to identify and analyze food service strategies.

Also, *TOU1030: Quality Guest Service* will provide helpful background knowledge to work successfully in this module. Experience in the food service sector will be an asset.

WHAT

WILL YOU KNOW AND
BE ABLE TO DO
WHEN YOU FINISH?

Upon completion of this module you will be able to:

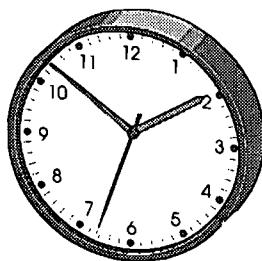

- compare a variety of local food establishments, and identify career opportunities in the food sector
- develop satisfactory food service skills
- develop standards and criteria for excellent food service, and modify service to meet guest needs
- demonstrate basic competencies.

WHEN

SHOULD YOUR WORK BE DONE?

ACTIVITIES/WORKSHEETS

UNIT A: INTRODUCTION TO THE FOOD SECTOR

1. Using resources such as the local Yellow Pages and the local newspaper, and other local promotional materials, identify the "Scope of the Food and Beverage Industry" for your area. Start by making a list of as many food service outlets as possible, then try to classify them into five categories. Include a title page and a table of contents which will describe each of your categories.
2. Read Chapter 7 of *Tourism and Travel: Focus Canada*. Complete Chapter 7 review questions.
3. Using a local or regional newspaper, complete the research project "Employment Opportunities in the Food Sector." In the "Requirements" column, include any relevant training that may be obtained from an educational institution within Alberta.
4. Participate in a class discussion of the food and beverage industry with an industry person from the community and complete a "Guest Speaker Reaction Paper."
5. Complete the "Comparing Fast Food Restaurants" worksheet included in your student guide.

UNIT B: FOOD SERVICE PROCEDURES

1. To begin this unit on food service procedures, consider the food service businesses in your community and try to place them into the following categories of service. Use "Types of Food Service" worksheet and follow the instructions outlined there.
2. On a blank sheet of paper, draw a typical place setting that you would see in a restaurant that has table service. Label all items.
3. Read Chapter 3 of *Dining Room and Banquet Management* and using your own paper, compare the following types of service in chart form:

- FRENCH	- RUSSIAN	- AMERICAN
----------	-----------	------------
4. In your notes, list the advantages and disadvantages of each type of service mentioned above.
5. On a blank sheet of paper, draw a diagram of the traditional American Place Setting that includes a soup and salad course. Include a coffee cup in your diagram, correctly positioned, of course.
6. Read Chapter 4 of *Dining Room and Banquet Management* and complete the review questions 1, 4, 7, 8 and 11. Also answer the following question: What does the term *table maintenance* mean and why is it important? Give an example.

TOURISM STUDIES

TOU1040 The Food Sector

7. Participate in a role play, either with classmates or in a restaurant job-shadowing situation, where you demonstrate the following skills:
 - greet customer, present the menu
 - pour water
 - take order
 - serve courses
 - serve food, dessert or coffee.

You may be evaluated for this activity by your instructor and/or food service industry professional using the Tourism Studies Food Server Skills Evaluation Checklist. Arrange for testing with your instructor.

8. Complete a “Food Service Procedures Quiz” (multiple choice), covering Chapter 3 and Chapter 4 of *Dining Room and Banquet Management*. (This is developed by individual teachers.)

UNIT C: FOOD HANDLING

1. Read Chapter 2 of *Dining Room and Banquet Management* and complete review questions 1, 4, 7 and 9.
2. Complete a “Sanitation Quiz” (multiple choice), used on Chapter 2 of *Dining Room and Banquet Management*. (This is developed by individual teachers.)

UNIT D: OPERATION OF A FOOD SERVICE BUSINESS

1. Complete the “Focus Group Activity” for the school cafeteria and discuss your findings within small groups.
2. Complete PROJECT #1: “Restaurant Critique.”
3. Read the handout titled “The Menu” and using the guidelines discussed, design a menu for your own fictional food service business. You must come up with a name for your restaurant as well as a theme. In addition, design a logo that fits with the name and the theme of your establishment. You will be evaluated based on:

Creativity	Elements of the Menu
Appearance	Pricing
4. Complete PROJECT #2: “Designing your own Restaurant.”

SCOPE OF THE FOOD AND BEVERAGE INDUSTRY

Using resources such as the local telephone book, pamphlets, entertainment guides and your personal knowledge of the food and beverage businesses in the community, make a personal restaurant guide for yourself with the following guidelines:

- 1. Start** by making a rough list of as many food and beverage businesses you can think of in the area (20–30).
- 2. Separate** (classify) these restaurants into 5 categories:
 1. Fast Food
 2. Family Restaurant
 3. Casual Dining
 4. Formal Dining
 5. Other (your own category).
- 3. List** these restaurants, by category using the sheets provided.
- 4. When** your list is complete, design an attractive cover page and title your book.

GUEST SPEAKER REACTION PAPER

SPEAKER: _____

TOPIC: _____

After each guest speaker's presentation, students must prepare a "Reaction Paper" based on the presentation. The reaction has to include a brief summary of the presentation, followed by personal comments relating to significant points made by the presenter.

The following evaluation scale will be used to grade your reaction papers:

- 5** A well-defined and critically thought-out reaction to the statements made by the presenter.
- 4** The student has reacted to statements made but limited personal or critical thought has been put into the reaction.
- 3** A summary of the presentation has been made, but no personal or critical thought has been put into the reaction.
- 2** The student has made a brief summary of the presentation, but limited effort has been used in completing the objectives of the assignment.
- 1** The student has made a limited effort in completing the assignment. Summary is poorly described and has grammatical errors.
- 0** No assignment turned in.

This paper should be written neatly on the back of, or attached to, this form. Please use complete sentences and write clearly.

This paper is due the next class day following the presentation.

TOURISM STUDIES**TOU1040 The Food Sector****TOURISM STUDIES****COMPARING FAST FOOD RESTAURANTS**

1. State your observations for each of the following areas of the restaurants we visited yesterday. Try to draw comparisons and find differences between the two wherever possible. Use point form, but make your answers complete. Responses such as "Good Service" and "Bad Service" are unacceptable; you must be more specific.
2. Make up two of your own categories as well and compare the restaurants according to those as well.

TYPES OF FOOD SERVICE

There are several very distinct types of food service throughout the food industry. For example, at Subway you stand behind the glass as your sandwich is prepared for you, while at the Beefeater, you are waited on by a food and beverage server.

1. Given the following categories, describe what you think is the main service characteristic of each. In other words, what is “fast food service” and what does it look like?
2. Give examples of local restaurants you feel would fit in to each of these categories.

THE FOOD AND BEVERAGE INDUSTRY

MAJOR PROJECT:
PROJECT 1: RESTAURANT CRITIQUE

Choose a place to eat out, such as an ethnic restaurant, a coffee shop or the school cafeteria.

You are assuming the role of a food critique for the Tourism 10 Daily Herald newspaper. I am your editor and here are your instructions for your assignment.

1. Complete the planning form. Complete transportation form (to be signed by your parents/guardians) if you will be driving with a fellow student.
2. From your restaurant experience, develop 10 questions to evaluate a restaurant. List these questions on a sheet of paper and leave enough room to write in information. I will review the questions with you before you use them for your project. Take this sheet with you to the restaurant.
3. Use your responses to these questions, along with any other personal observations, to compose a concisely written newspaper article (typed or neatly handwritten) 200–300 words.
4. Your grade will be based on the following:
 - A. Evaluation of food service,
 - B. Completed and handed in Worksheet,
 - C. Neatness and grammar of report,
 - D. Oral Presentation of report.

THE MENU

Menu is the function of the restaurant—all other factors depend on it.

Requirements:

- needs to be balanced, nutritious and varied
- what the customers are likely to want, and not just what you think they should have.

Presentation:

- written menu creates the first impression about what you offer, your range of offerings, and selling prices
- the sense of satisfaction for receiving value for money from food offering
- menu should reflect the style and theme of your restaurant
- printed menus are expensive—some restaurants use the blackboard style
- food costs rise, menus have to be changed—don't have fancy menus that will have to be redone
- menu descriptions are generally short and descriptive
- menus with too many pages intimidate customers
- if you advertise fresh fruit and vegetables, make sure they are fresh.

Purchasing:

- the menu has a direct impact on the purchasing requirements and practices; e.g.: steaks—what grade, size and specific cut is needed; how will they be purchased (fresh or frozen); how will they be stored
- accompanying items such as potato, vegetable, salad, garnish:
 - what is the source
 - will they be served with sour cream, chopped chives, etc.
 - will bread be served
 - what type of bread, homemade, buns, sliced, etc.

TOURISM STUDIES

TOU1040 The Food Sector

Soups: liquid food made from broth of meat, poultry, seafood or vegetables. Traditionally served as a complete filling meal, however, in North America is regarded as an appetizer that precedes a main course.

Most soups are served hot, however there are exceptions such as jellied consommes, vichyssoise and gazpacho.

Types of soups:

- clear soups
- thick soups
- specialty soups
- cold soups.

Entrees: the main course. Consists of either meat, poultry, seafood and a vegetable (potato and vegetable), or a vegetarian dish.

The theme of the restaurant can be fully developed through the entree.

Desserts: Can vary depending on the type of main course which is offered. Assists in ending a satisfying meal.

Types:

- Cakes
- Pies
- Pastries
- Cream desserts.

PROJECT 2: DESIGNING YOUR OWN RESTAURANT

Using the name and menu you created in your last assignment, you are going to go one step further and design the restaurant. Complete each of the following steps to be successful:

1. You already have the name, logo and menu for your restaurant, now you must create the floor plan. This does not have to be blueprint quality, rather a poster outlining how you plan to position the walls, food preparation area, dining area, washrooms and other fixtures.
2. How will you ensure guest satisfaction at your restaurant? To answer this, develop criteria for excellent service (use ALBERTA BEST service as an example). Develop a written service strategy using the following headings:
 1. **Seating:** When are guests satisfied/dissatisfied with where they are sitting or the seating arrangements themselves? What is your strategy for dealing with guests with special requirements?
 2. **Cleanliness:** When are guests satisfied/dissatisfied with the cleanliness of the restaurant? What is your strategy for dealing with guests with complaints? How will you follow up on these complaints?
 3. **Atmosphere:** When are guests satisfied/dissatisfied with the mood or atmosphere in a restaurant? This is key to your service strategy because it relates directly to the people who work for you. How will you maintain the mood you want in your restaurant? What training will your staff undertake to ensure this?
 4. **Service:** When are guests satisfied/dissatisfied with the service? This also relates directly to the people who work for you. How will you maintain the level of service you need in your restaurant? What training will your staff undertake to ensure this level of service?
 5. **Food and Beverage Products:** When are guests satisfied/dissatisfied with the food or drinks? How will you want your staff to deal with problems with the food? What training will your staff undertake to ensure that the quality of the food is kept at your standards?
3. Develop a sample advertisement for your restaurant. Be creative!

WHY TAKE THIS MODULE?

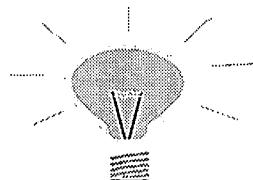

- In this module you will research a variety of travel services, demonstrate knowledge of basic travel information and promotion skills and investigate career opportunities in the travel sector.

WHAT DO YOU NEED TO KNOW BEFORE YOU START?

There are no prerequisites identified for this module.

However, to work successfully in this module you should be able to:

- describe travel motivators and their effect on the travel industry
- appreciate the importance of providing professional service
- practice basic skills essential to providing guest services including effective communication and problem-solving skills.

WHAT

**WILL YOU KNOW AND
BE ABLE TO DO
WHEN YOU FINISH?**

Upon completion of this module you will be able to:

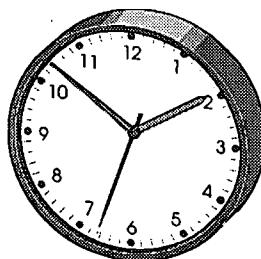

- describe travel services available to the traveller in Alberta
- develop strategies for addressing visitor inquiries
- provide basic travel and transportation information to the traveller in Alberta
- identify employment opportunities in the travel sector
- demonstrate basic competencies.

WHEN

SHOULD YOUR WORK BE DONE?

Your teacher will give you a timeline for completing tasks and assignments within this module.

You may also wish to use a time-management planning chart to preplan the work that needs to be done in this module. Plan how you will use your class time as well as extra time needed to complete the assignments in this module.

SIGHTSEEING TOUR

Design a Sightseeing Tour (in groups of three to five)

Discussion: 30 minutes

Presentation: 5 minutes

Choose an area of your town/city/community that you would like to design a NEW 3-hour sightseeing tour to:

Examples: walking tour of historic buildings
agricultural tour
art tour
plant stores tour
market tour
shopping tour
bicycling tour

Be as creative as you wish. The tour should not already exist in your community.

Now put the tour together:

1. Where are your target markets?
2. Describe your tour step-by-step:
 - time it out
 - how frequently will it be offered?
3. Who is involved? (need permission from?)
4. Cost out the tour.
5. How will you reach your target markets?
6. What will your advertising strategies be?

You have five minutes to present your tour to the class.
