# Missouri State Government Web Guide

September 23, 1997

The *Missouri State Government Web Guide* is an attempt to help information professionals and the general public locate electronic state information in a timely fashion. Due to the constant growth and change encountered on the World Wide Web, this document cannot be considered definitive in any way.

Only state agency sites are included, with a few exceptions where deemed appropriate. Colleges and universities have been omitted, as have census information. For statistical information, see Appendix A, State Census Information.

This guide is divided into two sections. The first is a keyword/title index. Being compiled using only key words, some of the entries will no doubt be lacking more appropriate indexing terms. The second section is organized by Agency/Executive Office.
