ABSTRACT

The Illinois Community College Board (ICCB) has utilized its workforce preparation grant resources to provide an array of services to local businesses and new entrepreneurs. Community colleges in Illinois provided services that resulted in the startup, expansion, development, and retention of several thousand jobs and companies. These services included: (1) customized job training; (2) industrial, attraction, retention, and expansion activities; (3) entrepreneurship workshops and seminars for business owners and operators; (4) individualized counseling and management assistance; (5) contract procurement assistance; (6) workshops and noncredit courses; (7) employment, training, and job search services; and (8) small business incubators. The ICCB workforce preparation grant funds allowed for economic development and employee training during a time of great change, technological and otherwise, in the workplace. Appendices include tables of community college involvement with each of the community services. (YKH)

Report on Business/Industry Services Grants Fiscal Year 1997

REPORT ON BUSINESS/INDUSTRY SERVICES GRANTS FISCAL YEAR 1997

Executive Summary

The Illinois Community College Board provided \$4.65 million in workforce preparation - business/industry services grant funds to community college districts in fiscal year 1997. Colleges used the funds to maintain business/industry centers, provide customized training and services to businesses, offer entrepreneurship workshops and seminars, and to conduct a variety of workforce development activities. Shown below is a statewide summary of the major activities funded by the ICCB workforce preparation grant and the resulting economic impacts reported by the community colleges:

- Community colleges provided customized training to 2,530 companies, serving 91,268 employees which contributed to the start-up or expansion of 89 companies, retention of 117 companies, development of 1,172 jobs, and retention of 8,996 jobs.
- Industrial attraction, retention, and expansion activities conducted by 14 community college districts assisted in the start-up or expansion of 145 companies and the retention of 113 companies, which created 2,942 jobs while retaining 2,240 jobs.
- Colleges conducted 1,555 workshops and seminars for entrepreneurs which helped start or expand 338 companies, retain 188 companies, develop 618 jobs, and retain 583 jobs.
- Community colleges provided individualized counseling and management assistance to 6,410 persons which assisted in the start-up or expansion of 481 companies, retained 308 companies, created 1,037 jobs, and retained 1,159 jobs.
- Fifteen community colleges served 3,395 companies by offering workshops on procurement bid list applications, preparation of competitive bids, and counseling. These services helped start or expand 18 firms, retain 53 companies, develop 250 jobs, retain 846 jobs, and acquire in excess of \$123 million in government contracts.
- Twenty-four community college districts conducted 1,058 workshops for 12,298 persons and/or provided 493 noncredit courses to 6,475 individuals and counseling or placement assistance to 18,760 persons.

The data in this report clearly indicates that Illinois community colleges have devoted their workforce preparation grant resources to providing a comprehensive array of services to the local business community as well as individuals interested in starting business ventures.

REPORT ON BUSINESS/INDUSTRY SERVICES GRANTS FISCAL YEAR 1997

The Illinois Community College Board provided over \$4.65 million in workforce preparation - business/industry services grant funds to all 40 Illinois public community college districts in fiscal year 1997. Business/industry services grants provide funding for a business/industry center at community colleges to provide a variety of employment training and business and industry services both in and outside the classroom. These activities are critical in upgrading the technical skills of individuals currently employed in Illinois. The demand for customized training continues to increase because of the dramatic changes in the use of advanced technology in the workplace. In addition to customized training, colleges used the funds to offer entrepreneurship workshops and seminars, and conduct many other initiatives that helped keep existing jobs and create new ones. Thirty-five thousand dollars is provided to each community college district to staff and maintain a business/industry center that serves as the college's primary contact point for local business and industry and as a coordination center for the college's economic development activities. The remainder of the grant is allocated on the basis of occupational/technical enrollments of each district. This report presents the highlights of economic development and workforce preparation activities pursued by community colleges using ICCB workforce preparation grant funds in fiscal year 1997.

Customized Job Training

Thirty-nine community college districts provided customized job training for area business and industry. Colleges designed or brokered programs that were tailored specifically to meet the training needs of employers. Businesses determined the type of training they need, the schedule that fits their operation, and the location of the training. Customized training was offered in company facilities and on campus. Instructors were chosen from within the companies, among subject-matter experts, or college staffs depending on the demands of the business firms.

Contract training was provided to upgrade the skills of current employees and train or retrain new employees to help companies maintain or increase productivity and profitability. Community colleges also helped businesses acquire training funds through various state and federal programs. Most training expenses, however, were paid by the companies.

During fiscal year 1997, community colleges provided customized training to 2,530 companies serving 91,268 employees. These efforts contributed to the start-up or expansion of 89 companies, retention of 117 companies, creation of 1,172 jobs, and retention of 8,996 jobs. Table A-1 in the Appendix shows a summary of these activities by college.

Compared with fiscal year 1996 figures, community colleges exceeded expectations in a number of areas. Community colleges served 375 (a 17 percent increase) more companies with customized training than last year and trained 8,175 (a 10 percent increase) more employees. Efforts from community colleges saw the start-up or expansion of 18 fewer companies than in the previous fiscal year and a decline of 125 percent in the number of jobs created. Data provided by community colleges indicate that two less companies and 5,290 less jobs were retained in fiscal year 1997 than in fiscal year 1996.

Industrial Attraction, Retention, and Expansion

Availability of training and availability of a skilled workforce are two primary factors that influence a company's decision to locate a new plant in a community. This is particularly true of companies that incorporate new technologies. Recognizing this, community colleges continue to work with state and local economic development organizations to ensure that their communities possess a skilled and trainable workforce.

During fiscal year 1997, community colleges continued to provide occupational training and special programs and services to scores of employees. This facilitated the development and maintenance of a skilled workforce and encouraged companies to locate or to stay in Illinois.

Community colleges have the professional staff in place to assist with extensive community/rural/industrial development efforts at the local level. Their many successful experiences in working with both the public and private sectors enables community colleges to serve as neutral coordinating bodies that bring several economic development entities together.

During fiscal year 1997, industrial attraction, retention, and expansion activities were reported by 14 community college districts. These activities helped to develop 2,942 jobs, retain 2,240 jobs, start or expand 145 companies, and retain another 113 companies in Illinois. Table A-2 in the Appendix shows a summary of these activities.

Six more community college districts reported activity in this category than last year. Their efforts resulted in 104 more companies either starting-up or expanding (an increase of 254 percent), and 91 more companies being retained (414 percent increase) than in the previous fiscal year. This resulted in a 30 percent increase in the number of jobs created and a 44 percent increase in the number of jobs retained. This data illustrates that community colleges have dramatically increased their level of assistance in attracting and retaining companies in Illinois.

Entrepreneurship Training for Business Owners and Operators

In addition to offering training for company employees, Illinois community colleges also provide training for potential business owners/operators. In fiscal year 1997, workshops and seminars on starting and operating small businesses, computer applications, and various financing programs were offered to assist entrepreneurs.

Illinois community colleges also provide entrepreneurship training to businesses via regularly scheduled courses. Examples include courses such as accounting, personnel administration, and business courses in administration, law, and finance. Some colleges offer certificate programs in entrepreneurship training.

During fiscal year 1997, community colleges conducted 1,555 workshops and seminars for entrepreneurs. These efforts helped start or expand 338 companies, retain 188 companies, create 618 jobs, and retain 583 jobs. Table A-3a in the Appendix shows a summary of these activities by college.

Compared to data provided by community colleges in fiscal year 1996, fewer workshops and seminars were conducted, 21 percent more companies were expanded and retained, and 38 percent more jobs were created. Clearly, community colleges are doing their part in assisting potential business owners and operators in Illinois.

Contract Procurement Assistance

Business centers, funded by the ICCB, usually work hand-in-hand with the Procurement Assistance Centers and Small Business Development Centers funded by the Illinois Department of Commerce and Community Affairs. Each of these centers concentrate on a different aspect of economic development and workforce preparation. Some colleges have a Small Business Development Center and a Procurement Assistance Center.

Government purchases represent a significant market opportunity for businesses. Recognizing this, community colleges operated 15 Procurement Assistance Centers in fiscal year 1997 whose purpose was to help Illinois businesses secure federal and defense contracts. Some community colleges provided limited contract procurement assistance from existing services, while other colleges implemented comprehensive contract procurement programs. Such activities boosted the economy by helping to retain existing jobs and develop new ones.

During fiscal year 1997, 15 community colleges served 3,395 firms by offering counseling and workshops on bidder list applications and bid preparations. These services helped to start or expand 18 companies, retain 53 companies, create 250 jobs, retain 846 jobs, and acquire in excess of \$123 million in contracts. Table A-4 in the Appendix shows a summary of these activities by college.

Due to the efforts of the community colleges, more companies were retained than last fiscal year, and 28 percent more jobs were created.

Employment, Training, and Job Search Services

In addition to helping businesses with their economic development activities, community colleges regularly provide training and job search assistance to individuals seeking employment. Many of these activities are done with the assistance of Job Training Partnership Act funds and programs that assist dislocated workers.

Twenty-four community college districts conducted 1,058 workshops for 12,298 persons and provided 493 noncredit courses and counseling or placement assistance to 18,760 individuals. Table A-5 in the Appendix shows a summary of these activities by college.

Fiscal year 1997 data reported by community colleges show an increase over fiscal year 1996 for the number of individuals receiving counseling or placement assistance. Fifty-five percent more people sought assistance from their community college to receive counseling and/or job placement assistance.

Small Business Incubators

The business incubator is a technique used to nurture fledgling businesses. Small business incubators can keep potentially large overhead costs manageable by paying for services on a shared basis or on a fee-for-service basis. The cash flow benefits, access to business assistance sources, and the interaction with other entrepreneurs in an incubator facility can greatly improve the chances of success for start-up companies. As a support system, the incubator helps entrepreneurs become more experienced managers capable of dealing with day-to-day operations.

Incubator facilities are generally targeted toward small firms that may require support in the areas of management, financial operations, or clerical support. Incubators are typically large commercial or industrial facilities subdivided to meet tenant needs for access to shared, centralized services, such as receptionists, clerical and administrative help, shipping and receiving facilities, and building security.

Incubator staff are always striving to improve services and resources for the incubator members so that they may improve the management of their companies and increase their chances for business success.

During fiscal year 1997, three community colleges helped with feasibility studies, planning, setup, and/or operation of small business incubators. Eight community colleges provided services to existing incubators, and two colleges operated incubators. These activities helped to start or expand 22 companies, retain three companies, develop 89 new jobs, and retain 76 jobs. Table A-6 in the Appendix shows a summary of these activities by college.

REPRODUCTION RELEASE

(Specific Document)

t.	DO	CI	IMI	=N7	TIDEN	JTIFI	CA.	TION:
		\sim \sim	<i>.</i>		IDE			IIOIA.

Title: Report on Business/Industry Services Grants, Fiscal Yea	ır 1997
Author(s): Illinois Community College Board	
Corporate Source:	Publication Date:
	January 1998
II DEDDODUCTION DELEACE.	•

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following two options and sign at the bottom of the page.

Check here For Level 1 Release: Permitting reproduction in microfiche (4° x 6° film) or other ERIC archival media (e.g., electronic or optical) and paper copy.

The sample sticker shown below will be affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 1

The sample sticker shown below will be affixed to all Level 2 documents

PERMISSION TO REPRODUCE AND **DISSEMINATE THIS** MATERIAL IN OTHER THAN PAPER **COPY HAS BEEN GRANTED BY**

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Check here For Level 2 Release: Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical). but not in paper copy.

Level 2

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)
