ABSTRACT

An August 1997 report from the Office of the State Auditor, this document contains the results of an enrollment audit of Texas' Public Community and Technical Colleges. It recommends that no adjustments be made to the Public Community and Technical Colleges' 1998-1999 biennial appropriations, due to the fact that the \$7.7 million in errors identified by self-reported items and spring semester estimates fall below the allowable two-percent rate of error. Twenty-six colleges overestimated spring semester estimates by a total of \$3,381,888, and 30 colleges underestimated spring semester estimates by a total of \$1,827,022. In addition, 50 colleges informed the auditor of overreported items amounting to \$2,500,761, and 1 college told of underreported items amounting to \$15,981. The audit found that appropriations could be allocated more accurately if allocations were based on certified data, which could be accomplished by changing the base period or providing for a required adjustment after contact hours have been certified. Appendices include the objective, scope, and methodology, and a summary of self-reported errors and spring semester estimates. (YKH)

Report No. 97-079

Key Points of Report

An Enrollment Audit of the Public Community and Technical Colleges

August 1997

Overall Conclusion

No adjustments should be made to the Public Community and Technical Colleges' 1998-1999 biennial appropriations. The \$7.7 million in errors identified (\$5.9 million overstated and \$1.8 million understated) by self-reported items and spring semester estimates fall below an allowable two percent rate of error.

Key Facts and Findings

- No funding reductions are proposed for the 1998-1999 biennium since no
 institution has combined self-reported errors and spring semester estimates which
 exceed the allowed two percent error rate. A total of \$7.7 million in errors was
 identified, yet collectively the allowable amount totals \$28,520,622.
- Twenty-six colleges overestimated spring semester estimates by a total of \$3,381,888, and thirty colleges underestimated spring semester estimates by a total of \$1,827,022. No adjustments will be made since these errors fall within the parameter of the two percent allowable rate.
 - Appropriations could be allocated more accurately if allocations were based on certified data. This could be accomplished by changing the base period or providing for a required adjustment after contact hours have been certified.
- Fifty colleges self-reported overreported items amounting to \$2,500,761, and one college self-reported underreported items amounting to \$15,981. A total of 6,004 items were voluntarily disclosed by the colleges.

This compliance audit was conducted in accordance with Government Code, Section 321.0133.

Table of Contents

Overall Conclusion
Section 1: Errors Identified Fall Within the Allowable Two Percent Error Rate
Spring Semester Estimates Amount to \$3.4 Million in Overstated and \$1.8 Million in Understated Errors
Self-Reported Corrections Amount to \$2.5 Million
Audit Sampling Testing Not Performed During the 1997 Audit 2
Appendices
1 - Objective, Scope, and Methodology
Semester Estimates
2.4 - Self-Reported Frrors by Attribute

Issues and Recommendations

Section 1:

Errors Identified Fall Within the Allowable Two Percent Error Rate

There was a total of \$5,882,649 overstated and \$1,843,003 understated errors identified in the \$1,426,031,122 appropriated to public community and technical colleges for fiscal years 1998 and 1999. Since all of the errors are within the parameters of a two percent allowable error, no audit adjustment will be recommended. Two percent of the public community and technical colleges appropriations would collectively amount to \$28,520,622. No individual public community or technical college exceeded the allowable two percent error in the recalculation of their appropriations.

Errors in the appropriated amount are identified from three areas: Spring Semester Estimates, Self-reported Corrections, and Audit Sampling Tests. Adjustments are recommended when the net amount of adjustments to a college from the three areas exceeds an allowable two percent error. Adjustments would be recommended only to the extent which the amount is in excess of the allowable error. (See Appendix 2 for more detail of the identified errors.)

Section 1-A:

Spring Semester Estimates Amount to \$3.4 Million in Overstated and \$1.8 Million in Understated Errors

Twenty-six colleges overestimated spring semester contact hours by a total of \$3,381,888, and 30 colleges underestimated their spring semester contact hours by a total of \$1,827,022. These errors are commonly referred to as "spring semester estimates." They are considered to be in error because the enrollment reports relating to the base period which are used to establish appropriations include certified enrollment reports for all terms except the spring 1997 semester, which

is estimated. The certification process of the spring contact hours is completed *after* the Legislature has established appropriation amounts. Since the errors are within the parameters of the two percent allowable error, adjustments are not recommended. The use of "spring semester estimates" along with the two percent allowable error does not permit appropriations to be allocated based on certified data. (Refer to Appendix 2.3 for detailed spring semester estimates by college.)

Recommendation:

Future appropriations to colleges should ultimately be made on certified data. This can be accomplished by:

- Changing the base period so appropriations set by the legislature are based only on certified data, or
- Incorporating language into the rider mandating an adjustment for spring semester estimates regardless of the allowable error rate.

Not only would this encourage accurate reporting, but it would also provide for a more accurate allocation of funds. For fiscal years 1998 and 1999, 26 colleges' funding was enhanced due to overestimating, and 30 colleges lost funding due to underestimating, their spring semester contact hours.

<u>Texas Higher Education Coordinating Board</u> <u>Response</u>:

We concur that the appropriation should be based on certified data and believe that either of the options recommended above would be appropriate. Failure to address this issue will provide a financial incentive for institutions to report inaccurate data.

AN ENROLLMENT AUDIT OF THE PUBLIC COMMUNITY AND TECHNICAL COLLEGES

Issues and Recommendations

Section 1-B:

Self-Reported Corrections Amount to \$2.5 Million

Fifty colleges self-reported overreported items amounting to \$2,500,761, while one college self-reported underreported items amounting to \$15,981. In total, 6,004 items were voluntarily disclosed by the colleges. As in the prior year, the areas in which items were most often self-reported were the collection of tuition by the official reporting date and compliance with the Texas Academic Skills Program requirements. Figure 1 shows, by attribute, the distribution of the self-reported items. (Refer to Appendix 2.4 for detailed self-reporting by college.)

Figure 1

Often after the enrollment data has been reported to the Texas Higher Education Coordinating Board and certified, the college discovers inadvertent errors (including non-reported items) in the reports. The colleges are commended for their efforts of self-reporting these known instances of

noncompliance. It was evident that some colleges performed thorough internal reviews of their enrollment data. By performing these reviews, the colleges are taking the initiative to be proactive to ensure the accuracy of reported data.

Since the errors are within the parameters of the two percent allowable error, adjustments are not recommended.

Section 1-C:

Audit Sampling Testing Not Performed During the 1997 Audit

The State Auditor's Office determined that it would not be cost beneficial to perform audit sampling testing this biennium. Riders in the General Appropriations Act allow institutions an error rate of up to two percent. Two percent of the public community and technical colleges' appropriations would collectively amount to \$28,520,622. Prior years' results indicating that no individual college had a sampling error rate exceeding 1.13 percent, coupled with the internal reviews conducted by the colleges, provide the State Auditor's Office with the assurance that there is a low risk of any additional material error in the reported contact hours. The State Auditor's Office will reevaluate the risk during the next biennium.

Appendix 1:

Objective, Scope, and Methodology

Objective

The objective of the biennial enrollment audit is to determine compliance with Texas Higher Education Coordinating Board rules and regulations, provisions of the General Appropriations Act, and provisions of the Texas Education Code. Compliance is determined by examining the accuracy of enrollment data submitted by the colleges, helping to ensure that the public community and technical colleges receive only those appropriations for which they are entitled. Any excess over the allowed two percent rate of error is returned to the State's General Revenue Fund.

Scope

The hours used in the contact hour base period are subject to audit for accuracy by the State Auditor's Office according to the General Appropriations Act. The colleges are allowed a two percent rate of error for the contact hours reported. Since the error rate for the reporting of contact hours has historically been significantly lower than two percent, no audit sampling tests were performed. The calculation of the total amount of dollars in error for each college was limited to self-reported errors in certified enrollment data and the errors in the spring semester estimates.

For the 1998-1999 biennium, the contact hour base period for academic contact hours and semester length vocational technical contact hours includes the following school terms: Summer 1996, Fall 1996, and Spring 1997. For clock hour/block time vocational technical contact hours, the base period is the quarterly school terms, March - May 1996, June - August 1996, September - November 1996, and December 1996 - February 1997.

Methodology

The enrollment audit methodology included:

- Reviewing self-reported errors in contact hours previously reported and calculating the total dollars in error due to the inaccurately reported hours
- Determining the amount of funds appropriated due to inaccurate spring semester estimates

Self-Reported Corrections - Institutions voluntarily provide listings of known errors in the certified enrollment data. This allows the colleges to make corrections to reported contact hours after the Texas Higher Education Coordinating Board has certified the data. If audit testing is performed, all self-reported items will be deleted or added to the population of contact hours reported prior to selection of an audit sample.

Spring Semester Estimates - Appropriations are calculated using the number of contact hours taught during the base period. When "formula" contact hour appropriations are established by the Legislature, actual certified contact hours are used for all terms in the base period, except for the Spring 1997 term. The hours used for the Spring 1997 term are estimated. Once the Texas Higher Education Coordinating Board certifies the spring contact hours, an adjustment is calculated for the difference between the "formula" amount and the "certified" amount. This adjustment is made only if this adjustment combined with self-reported errors exceeds the two percent allowable error rate.

The audit was conducted in accordance with Generally Accepted Government Auditing Standards.

The audit work was performed by the following members of the State Auditor's staff:

- Kelley Martin
- Duane J. McNaney, CPA (Project Manager)
- Pat Keith, COA (Audit Manager)
- Craig D. Kinton, CPA (Director)

Background Information

State financing of higher education programs for public community and technical colleges is provided from the State's General Revenue Fund. The 1998-1999 biennium appropriations to community and technical colleges for contact hour funding is in excess of \$1.4 billion. These appropriations are allocated to the colleges by the Texas Higher Education Coordinating Board and the Comptroller of Public Accounts (Comptroller). Texas will provide funding to 50 community college districts, three campuses of the Texas State Technical College, and three Lamar University components (two-year colleges) during the 1998-1999 biennium.

The formula for state funding involves multiplying base period contact hours which are submitted by each college in their request for state appropriations by the applicable funding rates per contact hour. Contact hour rates per program are set by the Texas Higher Education Coordinating Board based on a cost study of community college program expenditures.

Funding rates per contact hour for the 1998-1999 biennium vary between program areas and range from \$3.29 to \$13.95. The Legislative Budget Board determines the appropriation for each college as a fraction (total appropriation/total requested) of their requested formula amount. For fiscal years 1998 and 1999, the funding provided by the Legislature amounted to 87.21152936 percent of the funding requested for these years.

To be eligible for state funding, statute requires each community and technical college to comply with the rules and regulations of the Texas Higher Education Coordinating Board, provisions of H.B. 1 (General Appropriations Act), and the Texas Education Code.

AN ENROLLMENT AUDIT OF THE PUBLIC COMMUNITY AND TECHNICAL COLLEGES

Appendix 2:

Summary of Self-Reported Errors and Spring Semester Estimates

The following tables are included to provide amounts reported for self-reported items and spring semester estimates. Self-reported errors were submitted by the individual institutions. Spring semester estimate information was provided by the Texas Higher Education Coordinating Board.

Self-Reported Errors

For each self-reported error, institutions reported course identification information, the term in which the class was offered, the number of contact hours reported for the class, the reason for the attribute in error, and whether the contact hours associated with the course were overreported or underreported. All items were collected and reviewed.

Contact hours are not funded at the same rate for all courses. Funding rates per contact hour for the 1998-1999 biennium vary between program areas and range from \$3.29 to \$13.95. For each error, the appropriate funding rate was identified and applied to the

contact hours reported in error. Next, the funding factor in the amount of 87.21152936 percent was applied to the total dollars in error as reported by the institution to determine the dollar amount of self-reported errors.

Spring Semester Estimates

The Texas Higher Education Coordinating Board provided spring semester estimate information by individual institution. The information included the amount of contact hours estimated for the spring semester, the certified contact hours for the spring semester, and the difference in the estimated versus the certified amounts. These amounts were reported by funding rate. Therefore, the differences in estimates and certified amounts were multiplied by the applicable funding rates. Then, the funding factor of 87.21152936 percent was applied to the total difference. These calculations provided the spring semester estimate dollar amounts.

Allowable Error Rate

Institutions are allowed a two percent error rate for self-reported, spring semester estimate, and audit sampling errors combined. The allowable error rate (amount) is calculated by multiplying each institution's 1998-1999 total biennial contact hour appropriations by two percent.

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE): RECEIVED

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)

Publisher/Distributor:
