HOW THIS BIBLIOGRAPHY IS ORGANIZED

This bibliography represents an attempt to identify print, AV and computer-based materials for teaching about Mexico at the K-12 level that are currently available and accessible to the classroom teacher or school district. An additional goal of the project was to present this information in a format that is efficient and easy to use.

The bibliography has been organized into four principal sections: Print Materials, Audiovisual Materials, Publishers and Distributors, and Index.

Sections I and II, which make up the body of the bibliography, categorize resources by type of material: Print or Audiovisual. The Audiovisual section also includes CD-ROM materials. Both the Print and Audiovisual sections have been subdivided according to seven general topics: General Overviews, Geography, Mexican History, Contemporary/Indigenous Cultures, Celebrations/Holidays/Food, Arts/Folkarts/Music/Literature, and Mexican-U.S. Relations. Resources that are both Print and Audiovisual and/or cover more than one topic have been cross-referenced. Each resource entry includes basic bibliographic data, cost, and a short annotation.

Section III, Publishers and Distributors, is a complete listing of all sources referenced in Sections I and II. Telephone and fax numbers, mailing and e-mail addresses, and websites (when available) have been included.

Section IV, Index, is simply an alpha list, by title, of each resource included in Sections I and II. Numbers refer the user to pages in the bibliography where a description of the resource can be found.

Page numbering is continuous throughout all four sections of the bibliography, pages 1-44. For ease of reference, each page number has also been coded P- (Print,) AV- (Audiovisual), Publisher-, or Index-.

ACKNOWLEDGMENTS

The original *Annotated Bibliography of Supplementary Materials for Teaching About Mexico* (1991) was a project of the Task Force on Mexico in the K-12 Curriculum, and was funded by the William and Flora Hewlett Foundation. This 2nd edition is made possible through support of the San Diego Consortium for Latin American Studies, a collaborative partnership of the Center for Latin American Studies at San Diego State University and the Office of Latin American Studies at the University of California, San Diego.

Special thanks go to Curtis Martin, Graduate Research Assistant and doctoral candidate in Latin American History, UCSD, whose expertise in bibliographic and computer research has resulted in a 2nd edition with more than twice the entries of the original. Mr. Martin not only identified additional print items, but expanded the parameters of the search to include video and CD-ROM teaching materials on Mexico. Additional improvements are the categorization of items by topical focus as well as by type of materials (print or AV). This 2nd edition is much improved, thanks to his efforts.

The Conquest of Mexico, by Steven Lilley. Greenhaven Press, 1997.

Ironically, the Spanish conquistadors and the Aztecs they conquered had much in common. Both societies placed a high priority on conquering and subjugating other nations. Both were intensely religious. Both were ruled by hereditary monarchs. When Spain prevailed over the Aztecs, both cultures understood what it meant to conquer. Offers a clearly written and visually enhanced overview of an important historical event. The book is designed both to acquaint readers with the basics of history and to make them aware that their lives and their historical era are an intimate part of the ongoing human saga. Primary and secondary source quotations, all sources footnoted, comprehensive bibliographies, chronology of events, indexes and other useful appendices, black and white photos throughout. 96-128 pp. Level: 6-12. Price: \$21.19. Also available from Social Studies School Service (\$16.95).

The Conquest of Mexico, by Irene Nicholson. Jackdaw Publications, 1991.

The story of Hernan Cortes' conquest of Mexico is more exciting and more improbable than the wildest fiction. In 1519 the Spaniard set out with a tiny army to conquer an extensive and old-established empire, with an apparently impregnable capital built on an island in the middle of a great lake. Cortes and his companions reached the capital and seized it by guile. They were admitted as honored guests, because the Aztec Emperor thought they were gods. In the savage battles with gained the Aztec Empire for Spain, Cortes and his followers destroyed a magnificent ancient civilization. This Jackdaw spreads before the reader the evidence of that civilization and describes the way in which it met its end. Price: \$35.00.

The Fall of Mexico City, by George Ochoa. Silver Burdett, 1989.

This book illustrates an important chapter of the Mexican-American War. Written in a lively narrative style, the book attempts to make history exciting for young readers. Maps, diagrams, figures and illustrations complete the unit. **Level:** Intermediate-Jr. High. **Price:** \$14.95 library ed.; \$7.95 paperback.

Famous Mexican Americans, by Janet Morey and Wendy Dunn. Pinguin, 1989.

This collective biography of distinguished Mexican Americans introduces students to 14 men and women of Mexican descent who have greatly contributed to contemporary American life and culture. Highlighting their struggles, goals, and lives, the book provides an informative essay on each individual, supplemented with photographs. 176 pp. **Level:** Intermediate-Jr. High. **Hardback Price:** \$14.99. Also available from Social Studies School Service.

Hernando Cortes, by Steven Lilley. Greenhaven Press, 1996.

From a sixteenth-century point of view, Hernando Cortes achieved greatness because of his conquest. Cortes changed the course of Mexican history by deliberately destroying the Aztec civilization. 112 pp. **Reading level:** 5-8; **interest level:** 4-12. **Price:** \$21.19.

Mexican American. George F. Cram Co., 1989.

A tumultuous decade of civil war in Mexico is chronicled in this easy-to-read volume, which details the rise and fall of sometimes idealistic, sometimes ruthlessly ambitious leaders. Tracing key events (including the role of the U.S. military), this book also emphasizes repercussions of the revolution. Their struggle exploded into a violent, chaotic revolution that lasted thirty years. Offers a clearly written and visually enhanced overview of an important historical event. The book is designed both to acquaint readers with the basics of history and to make them aware that their lives and their historical era are intimate parts of the ongoing human saga. Primary and secondary source quotations, all sources footnoted, comprehensive bibliographies, chronology of events, indexes and other useful appendices, black and white photos throughout. 96-128 pp. **Level:** 6-12. **Price:** \$21.19.
