#### ABSTRACT

This is the first in a series of six kits that the U.S. Postal Service (USPS) is publishing to help teach through stamps the history of the 20th century and the people, places, and events that have shaped this nation during the past 100 years. Each kit is designed as a complete and independent unit. This kit, covering the decade of the 1950s, contains: (1) Welcome letter from the USPS; (2) Ten Teacher's Lesson Cards; (3) One "Resource Guide"; (4) Thirty "Topic Cards"; (5) Ballot (with return envelope); (6) Student Magazine; (7) Poster; (8) Sticker Sheet; (9) Teacher's Feedback card. Kits are distributed in a kit storage box, with multiple copies of some materials. On the basis of the ballots, the USPS intends to issue a limited edition of 15 commemorative stamps celebrating the 20th century. (EH)

YOUR STAMP HISTORY

UNITED STATES
POSTAL SERVICE 1M

January 26, 1998

#### Dear Teacher:

Today, there are fewer than 700 days to the new millennium—fewer than 700 days to celebrate the 20th century and prepare for the 21st by honoring our country's heritage, our diverse people, and our many achievements.

The U.S. Postal Service has developed a once-in-a-lifetime participatory program to teach our youth about the people, places, and events that have shaped our nation during the past 100 years. As children learn about the different 20th-century decades, they will cast their official votes--along with all Americans--on which subjects they would like to commemorate with stamps. This is a historic event: never before have Americans been invited to vote on what they would like to see commemorated with United States postage stamps.

This is Celebrate The Century™--the official millennium program brought to you by the U.S. Postal Service. It is the most ambitious stamp education program ever undertaken. It has been created with the participation of teachers and kids from all over the United States and in partnership with the United States Department of Education and leading national education associations.

Secretary of Education Richard W. Riley stated that "The new *Celebrate The Century*™ program of the U.S. Postal Service builds on a long tradition of using stamps as an educational tool. I encourage children, parents, and teachers to get involved and learn about and cast their votes for the individuals or subjects they would like to see commemorated on the stamps of tomorrow." So, make history come alive as you take your class on a field trip through the 20th century. You will receive the entire 20th-century series, which includes six kits, over the next two years. By popular demand, the voting begins with the 1950s, so you have received your 1950s kit first. See your Resources Guide (page 6) for the schedule.

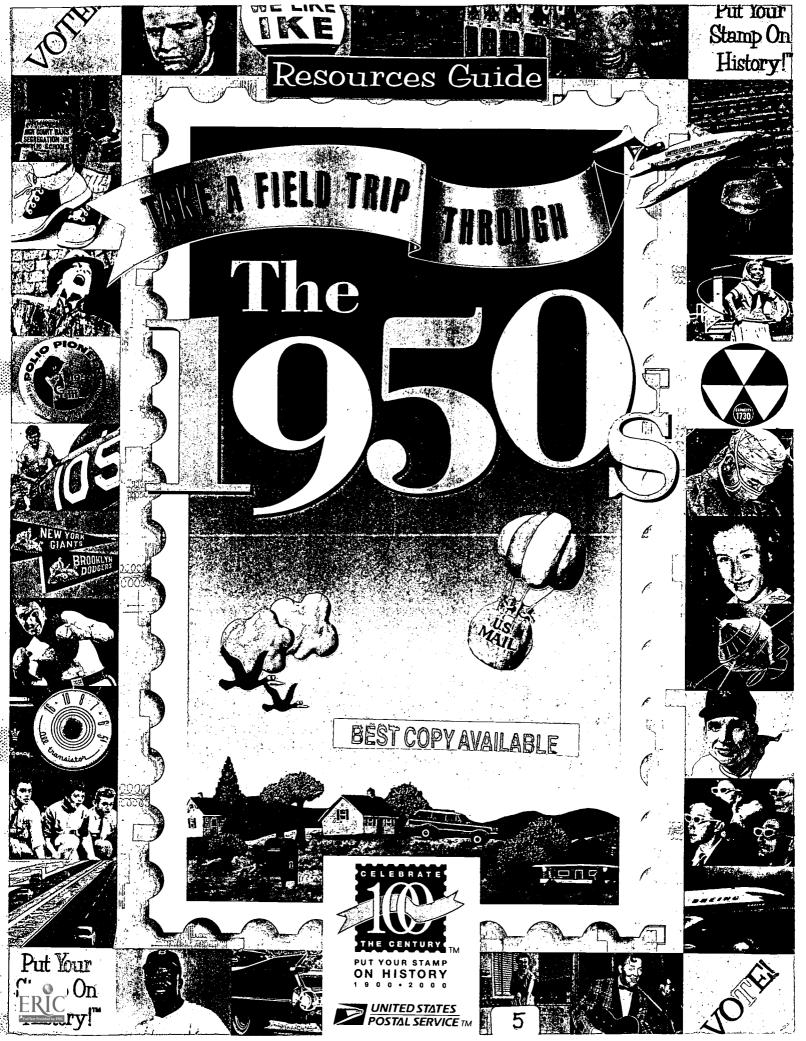

We look forward to making history with you, as millions of students across the country join your class to cast their votes and shape how future generations will look back on this fabulous century.

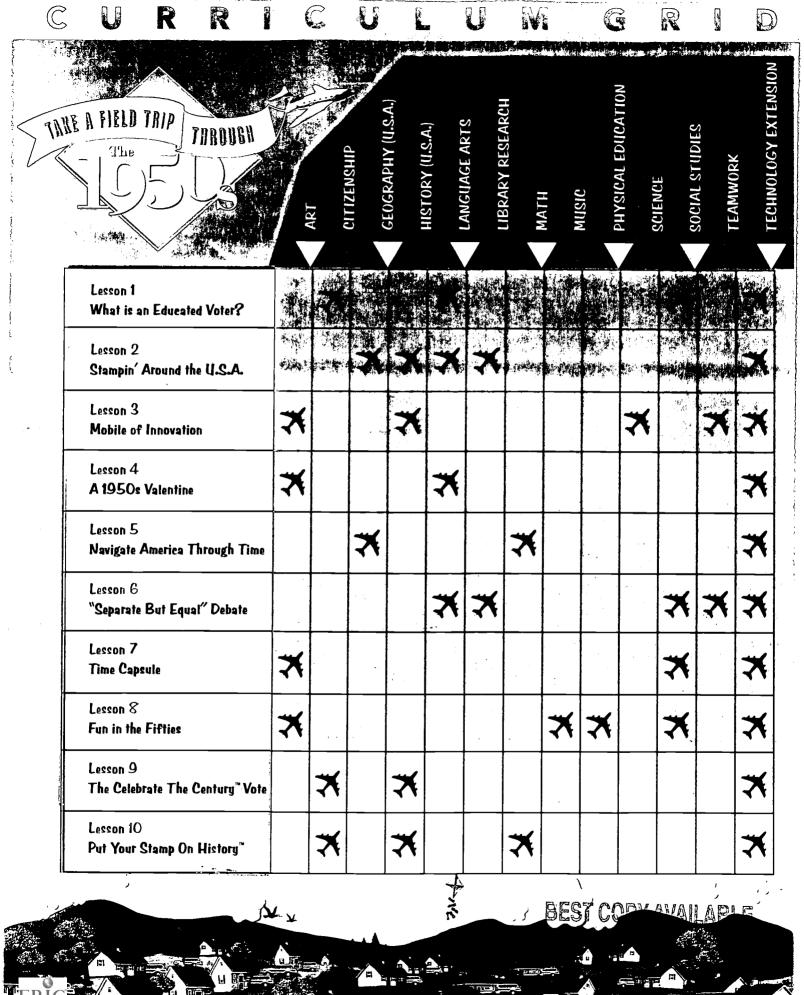

Sincerely,

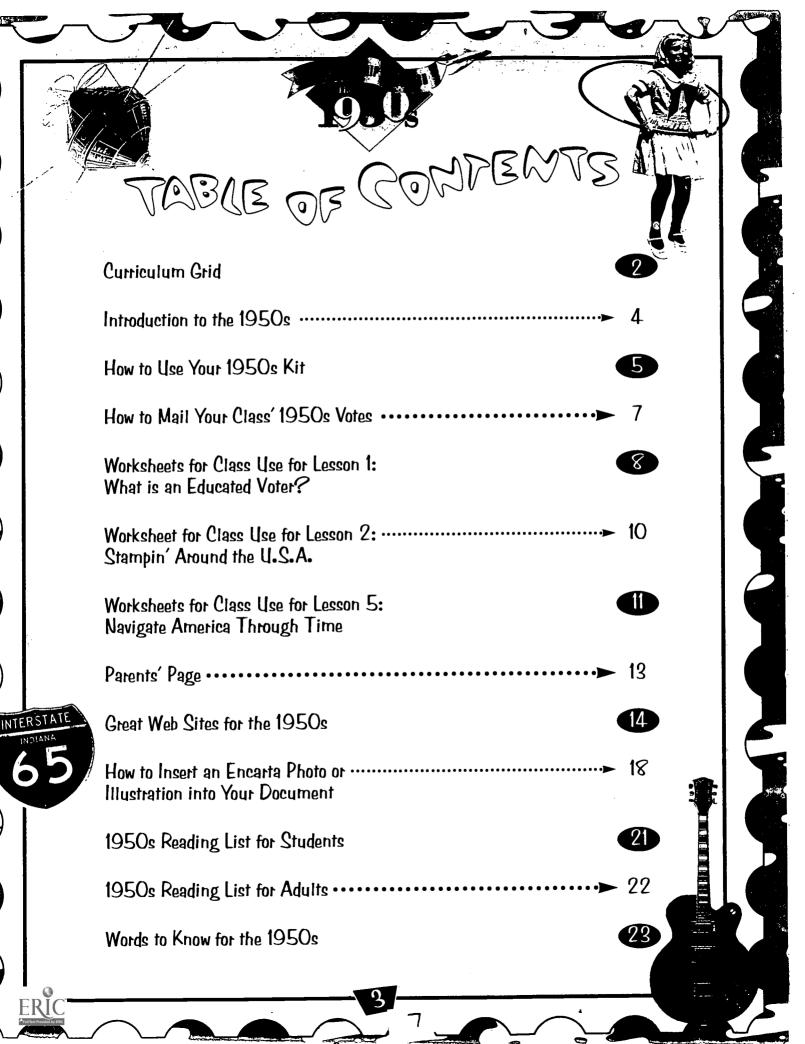

Manager

Stamp Services

#### Introduction to the 1950s

Rock 'n' roll. Duck and cover. I Love Lucy and "I Like Ike." Hula hoop toys. The cold war. The Vanguard Satellite. All of these are commonly associated with the 1950s. Although we often generalize about the character of a decade, real life events do not begin and end in ten-year increments. The trends and events of every decade have their roots in earlier periods, and their influence is often felt for many years. One example is the ENIAC, a computer from the 1940s that made possible the UNIVAC, the first commercially successful computer that used magnetic tape instead of the more cumbersome data cards.

The end of World War II ushered in a period of cold war, characterized by ongoing tensions between the United States and the Soviet Union. The cold war required U.S. forces to remain fully prepared and equipped, and the U.S. intervened in Korea in an effort to contain what U.S. policy makers saw as the spread of communism.

merican companies invested heavily in research and the development of wartime technologies that led to new, improved consumer goods. Fears about entering the "atomic age" gave way to ideas for peaceful applications of atomic power. In this decade, Americans were reaping the benefits of medical advances of the first half of the twentieth century. These advancements included innovations in heart surgery, powerful antibiotic drugs, and the development of the Salk Polio vaccine.

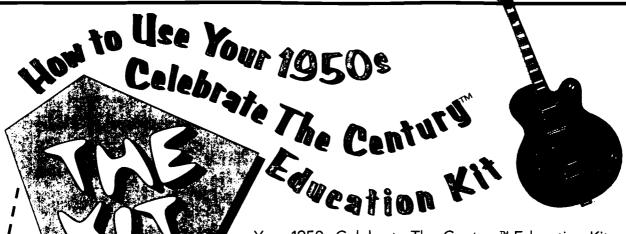

he 1950s were also the formative years of the American Civil Rights movement. The 1954 U.S. Supreme Court case, *Brown v. Board of Education of Topeka, Kansas*, declared that racial segregation was a violation of the Fourteenth Amendment, and led to an order that all American schools be desegregated. New leaders and organizations began the fight for integration on many fronts.

he return of thousands of U.S. soldiers from overseas after World War II resulted in the post-war baby boom. Families moved to newly built suburban neighborhoods in pursuit of the American dream of home ownership. Americans equipped their new homes with a wide array of affordable and readily available consumer goods, from sleek, modern furniture to dishwashers to a new automobile with fancy chrome grilles and big tail fins. Many of the women who had taken war-production jobs were replaced by returning servicemen. Thus, marriage and raising a family became the primary focus of most middle-class women.

hanks to affordable cars and the first commercial jet aircraft, Americans became more mobile in the 1950s. Increased car ownership produced a need for more and better roads resulting in the greatest public works project in history, the Interstate Highway System. A strong interest in automobiles led to the development of a popular pastime, car racing. Stock car racing thrilled Americans and has been growing in popularity ever since.

he 1950s found Americans moving from their chair next to the radio to sitting in front of the television set. They laughed at Lucy Ricardo on I Love Lucy, idealized the model families on Leave it to Beaver and Ozzie and Harriet, and enjoyed the action of the Wild West on westerns like Gunsmoke. The opening of Disneyland in 1955 set a new standard in family-oriented entertainment, and drive-ins, diners, and bowling alleys were popular local gathering spots. Dr. Seuss' The Cat in the Hat™ helped youngsters leam to read. Teenagers, clad in bobby socks, T-shirts and blue jeans and carrying their transistor radios, "rocked around the clock" to the music of Bill Haley, Elvis Presley, and Buddy Holly.

The popular forms of entertainment were going to a local movie, a sporting event or a Broadway show. Movie choices ranged from 3-D horror films to the classic musical, Singin' In The Rain, to the award-winning drama On the Waterfront. Baseball was an American passion. Rocky Marciano, who never lost a professional boxing match, and Maureen "Little Mo" Connolly, who won the Grand Slam of tennis, captured the interest of millions of Americans. Others listened to the memorable music written by Leonard Bernstein as they enjoyed the record-breaking show West Side Story.

Your 1950s Celebrate The Century™ Education Kit is the first in a series of six kits that will span the 20th century. Each kit is designed to be taught as a complete and independent unit.

Your 1950s kit should contain:

- ◆ Welcome letter from the U.S. Postal Service
- ◆ 10 Teacher's Lesson Cards
- ◆ 1 Resources Guide
- ♦ 30 Topic Cards
- ◆ Ballots
- ◆ 1 Ballot Return Envelope
- → 30 Student Magazines
- ◆ 1 Poster
- ◆ 1 Kit Storage Box
- **♦** 2 Sticker Sheets
- ◆ Teacher's Feedback Card

If you need more ballots, please make photocopies. Photocopies are acceptable for student votes. If you need more Student Magazines, please make photocopies or have your students share. If any component of your kit is missing, you can write to us at: Celebrate The Century Education Series, United States Postal Service, PO Box 44342, Washington, DC 20078-0026.

#### THE OBJECTIVES:

Your 1950s kit is designed with the following objectives in mind:

- ◆ To enrich and supplement your existing curriculum
- ◆ To teach children U.S. history with interactive, hands-on lessons
- ◆ To enable your students to participate as educated voters in the United States Postal Service Celebrate The Century vote

#### THE VOTE:

As we head toward the year 2000, the U.S. Postal Service is celebrating the 20th century by issuing a limited-edition sheet of 15 commemorative stamps for every decade. But, because we wanted this to be an uniquely American celebration, we have invited all Americans—including kids—to vote on the stamps!

(continued)

The American public will decide.
Beginning in February 1998, people will find their Celebrate The Century™ ballots in post offices all across the country.

The first Celebrate The Century ballot will cover the 1950s. We did not begin with the 1900s because of what our research with the American public told us. In general, people want to vote on stamps for the second half of the century. They told us to let our official Citizens' Stamp Advisory Committee decide on the stamps for the first half of the century.

#### THE TIMELINE:

Mar. 1999

1900 -

1940s Kit

Sept. 1999

	Receive	Teach	Vote	73
	1950s Kit Jan. 1998	Jan./Feb. 1998	Feb. 1998	وب
-	1960s Kit April 1998	April/May 1998	May 1 <b>9</b> 98	1
	1970s Kit Aug. 1998	Aug./Sept. 1998	Sept. 1998	= ]
	1980s Kit Dec. 1998	Dec. 1998/ Jan. 1999	Jan. 1999	
	1990s Kit	Mar./April 1999	April 1999	=

Sept./Oct. 1999

#### THE CLASSROOM:

We hope that you will enjoy teaching with your Celebrate The Century kit. Here are a few suggestions to help you to use it effectively:

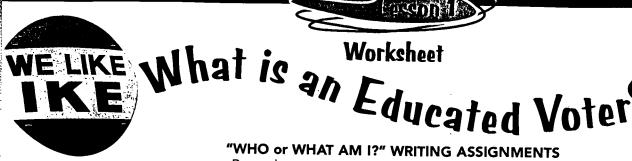

- ◆ Review the Curriculum Grid. Use the lessons that best fit your curriculum. Modify any lesson as needed.
- ◆ The student magazines may be read and used by students independently of the lessons, in class or at home.
- ◆ The official U.S. Postal Service voting period for 1950s commemorative stamp subjects will be throughout February of 1998. Entries should be mailed no later than February 28, 1998.
- ◆ To create a connection with home, photocopy and distribute the Parents' Page to your students. It includes home activities.
- ◆ Watch for your Celebrate The Century
   1960s kit. It will arrive in April 1998 and should be taught in April and/or
   ✓ May for the May 1998 vote.
  - ◆ We hope this kit will be useful as you continue to teach contemporary U.S. history, even after the 1950s voting is over.
  - ◆ Most important, have fun teaching the 1950s. The Celebrate The Century Education Series and stamp collecting are terrific teaching tools with which to get kids excited about history.

10

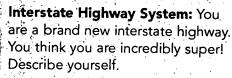

No vote

- ◆ Students should vote in class on the official U.S. Postal Service ballots included in your 1950s kit.
- ◆ They should vote on the "In Class" panel. The "At Home" panel is for students to use with their parents at home.
- ◆ Each student should vote for up to (but no more than) three topics in each of the five categories. They may vote for up to fifteen topics altogether.
- ◆ Students should use dark ink or a soft dark pencil to darken squares completely.
- ◆ Please be sure that they fill in all information on the card.
- ◆ Collect all of the ballots.
- ♦ In Lesson 10, "Put Your Stamp On History," students work with percentages, comparing their votes to the U.S. in general: (See Lesson Card 10.) If you would like to do this follow-up in 6 to 8 weeks after your vote, be sure to take a tally of how students voted after you collect their ballots. You do NOT have to do this to submit your students' votes to the U.S. Postal Service.
- ◆ Mail all of your students' ballots in the enclosed postage-paid envelope on or before February 28, 1998.
- ◆ Ask your students to take the rest of the ballot home with them and complete it with their parents.

Rock 'n' Roll: You are the drums for a 1950s rock 'n' roll band at a wild dance. Talk about how your player is drumming you. Do you love it or hate it? What are people doing? Make up some "sound words" like "brrrrm" to use in your composition.

Singin' In The Rain: There is a famous dance in this movie where Gene Kelly is so happy he dances down the street in the pouring rain. He gets soaking wet. In the voice of Gene's shoes, how do you feel about dancing in the rain?

Suburbs Attract Families: You are the beautiful, green lawn of a new suburban house. You look exactly like 500 other lawns nearby. In the lawn's voice, persuade a young city family to move to your house.

On the Waterfront: You are a 1950s New York City waterfront dock where ships are unloaded. Describe yourself and what you have seen: the water, the weather, the ships, the men unlöading the ships, the fights. Some people care intensely about money and power. What do you care about?

West Side Story: In this show, there is a "rumble," or a fight, between. the Sharks and the Jets. Tony tries to stop it and unintentionally kills Bernardo, Maria's brother, with a knife he picks up. In the voice of the knife, beg Tony to stay away from the fight. Really try to convince him.

The Cold War: In the voice of a 1950s student, write about an air raid drill in school. The bell goes off. You must hide under your desk. What do you see? What do you hear? What do you feel? What do you wish for?

I Love Lucy: Pretend that you are Lucy Ricardo on the I Love Lucy show. Convince Ethel that she should disguise herself as a singing dog (maybe a poodle) so that you and she can appear as a special act in Ricky's show.

Rocky Marciano, Undefeated:

Rocky Marciano was the son of an Italian shoemaker who immigrated to America and saw his son rise to great success. In the voice of Rocky's father, write about how proud you are of your son. (

The Korean War: In the Korean War, nobody won. Do we really need war on earth? Could we have world peace? In the voice of the United Nations, write a letter to your classmates about the Korean War and your hopes for world peace.

Dr. Seuss' The Cat in the Hat™: You are The Cat in the Hat™. Describe yourself. What do you wear? What do you like to eat? What do you dislike? What do you like to play? Try to rhyme as much as possible.

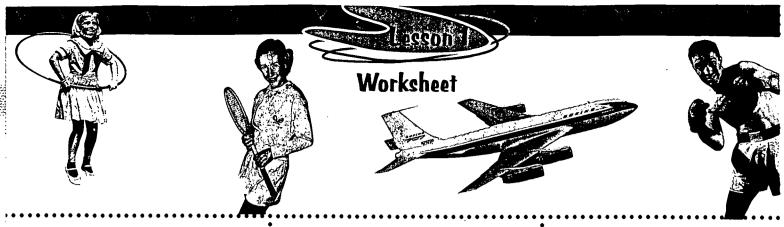

World Series Rivals: In the voice of either a New York Yankees fan or a Brooklyn Dodgers™ fan, tell the other team how great your team is. What makes your team great? Which team will win?

#### President Dwight D. Eisenhower:

You are President Eisenhower in 1957. Write down your thoughts as you send the Air Force paratroopers to Little Rock, Arkansas to help. school desegregation begin there. ERIC

New York School: You are a drip of paint in a Jackson Pollock painting. Describe yourself: your color, your movement on the canvas, how you feel as paint, how you look as part of the painting, what you think of the artist.

Stock Car Racing: Write from the point of view of a stock car. You are racing around a track in a big race. How do you feel?

#### Maureen "Little Mo" Connolly:

You are "Little Mo's" tennis racket at the very end of her last match. You can tell she is tired and you are encouraging her. Talk to her. Make her feel that she can win! **Transistor Radio Created:** In the voice of an old-fashioned TV, beg Mr. Shockley to replace your vacuum tubes with transistors. You are jealous of transistor radios. Your tubes keep blowing out! Complain about them.

Tail Fins and Chrome: Write a conversation between two parked 1950s cars. One is a sleek, bright, new 1954 Plymouth convertible with big fins, and the other one is a 1949 old-fashioned but reliable Ford.

The "Shot Heard 'Round the World": You are Bobby Thomson stepping up to bat. How do you feel? What do you think will happen? What do you see and hear? What do you smell? Write about it.

**U.S. Launches Satellites:** In the voice of outer space, talk to humans just after they launched the Sputnik and Explorer satellites. You are eager for humans to visit you. Describe yourself. Encourage humans to explore you.

**Drive-in Movies:** You are a car at a drive-in movie. Your humans are watching a terrifying movie about a vampire. You can't stand it. You want to get out of there. Beg you humans to leave!

**Victory Over Polio:** As a 1950s child, write a letter to Dr. Jonas Salk. Thank him for saving your life and the lives of your friends from polio.

Advances in Surgery: You are a heart that is being operated on! Imagine your surprise. It doesn't hurt, but you are scared. Are you mad at your human being for not taking better care of you? You make it through the successful surgery. You feel much better. Write about your experience.

Hula Hoop Toys: In the voice of a hula hoop, tell what it is like to be you. You are very popular. Imaginwho owns you. Imagine what it is like to spin round and round. Doe it make you dizzy?

Computers for Business: In the voice of UNIVAC, write a letter to your great-great (you decide how many more "greats!") computer grandchildren. What are your hopes and dreams for them? How might

all of you change the world for

humans?

**Teen Fashion:** In the voice of a 1950s television ad, persuade teenage girls to buy "Cool-Girl" brand poodle skirts.

Movies Go 3-D: You are a kid in t 1950s. You just saw the 3-D movie It Came From Outer Space. The movie looks real. The monsters seem to jump right off the screen into the audience. Write a letter to a friend describing what it was like

Commercial Jet Aircraft: Imagine that you are a passenger on the first commercial jet flight between New York and Paris. It is your first time on a plane. Describe the flight.

American Modern Furniture: You are a molded-plastic chair. You are very proud and think you are superior to old-fashioned wood and cloth furniture. Describe yourself. What color are you? Why are you better?

Desegregation of Public School: It is September 1957. You are 15 years old, African-American, and about to go into the all-white Central High School in Little Rock Arkansas. Write about what you shear, smell, taste, feel, and do.

#### Worksheet

### Stampin' Around the 9.5.A.

Pretend that you and your class work for the United States Postal Service. You must decide on the "Place of Issue" for your stamp. Create a presentation to convince the rest of the class that you made the right decision. Here's how:

- **1.** Learn more about your stamp topic. What town or city does your topic have something to do with? A few ways to do research are:
  - ◆ Find a book or encyclopedia entry on your topic in the library. Use the card catalog.
  - ♦ Use a CD-ROM encyclopedia. Type in a word that is important to your topic to search for information.
  - ◆ Look for information at the Microsoft® Encarta® Concise Encyclopedia at http://encarta.msn.com/encartahome.asp
  - ◆ Visit the Celebrate The Century™ Web site at http://www.usps.gov/ctc
  - ◆ Use the Web sites from the topic cards to learn more about the topics.
  - ◆ For additional sites, use a search engine such as Yahooligans at http://www.yahooligans.com
  - ◆ Interview people you know who lived in the 1950s. Be sure to take notes!

- **2.** Think about your stamp subject and your research, and then choose the best "Place of Issue" for your stamp.
- **3.** Create a presentation for your class. In your presentation, convince the class that your stamp should be issued in the town or city you chose. You can use notes, pictures, slides, real objects, or anything else that might help you to present your stamp subject.
- **4.** Every presentation should include the following:
  - ◆ Introduce and talk about your stamp subject.
  - ◆ Tell the class where your stamp should be issued; show it on the map.
  - ◆ Explain why the "Place of Issue" you chose is best.
  - ◆ Finish by repeating your main points. Thank your audience and ask for questions.
- **5.** You may also draw or design your own make-believe stamp for your subject. Unveil it as part of your presentation!

Lesson 5

# Morksheet A Morks

Your class will travel from your school to the 1950s stamp "Place of Issue." It will be a great bus trip. There's only one catch. You have to go in 1955!

Use the following measures to calculate how far it would be, how long it would take, and how much it would cost for you to make your trip in 1955 as compared with today. Assume that all students in your class ride on one bus with one male teacher, a Mom and a Dad as chaperones, and one female bus driver.

**DISTANCE.** How far is it from your school to the city of the Stamp Unveiling? Use a road map of the U.S.A. The first measurement—for the 1950s—should exclude the interstate highway system because it hadn't been built. Use only state highways and other secondary roads. The second measurement—for the present time—should use the interstate highway system.

Stamp Subject

**TIME.** How long would it take to get from your school to the stamp's "Place of Issue"?

Estimate your driving time as best you can, using the following speeds:

**Interstate Highways:** 65 miles per hour—Present Time only.

**State Highways:** *Divided*: 50 miles per hour; *Undivided*: 30 miles per hour; *Going through a town*: 15 miles per hour.

**Secondary Roads:** 35 miles per hour in Present Time. 15 miles per hour in 1955 because of dirt roads.

In 1955, driving time from my school would						
be	hours and	minutes.				
In Present	Time, driving time	from my school				
would be_	hours and_	minutes.				

**EXPENSES.** Prices were very different in the 1950s than today. Here's how to calculate costs.

**Gas:** Assume the bus gets 12 miles to the gallon on state and secondary roads and 20 miles to the gallon on interstate highways. Your bus holds 40 gallons, and you begin your trip by filling the tank and paying for it. How many gallons does your bus use altogether for a one-way trip?

\_\_\_\_gallons.

Gas:	1955:	\$.15	a gallon.	
Present	Time:	\$1.49	a gallon.	
The cost	for gas	in 1955	would be \$	
The cost for gas in Present Time would be				
\$		,		

M

### Worksheet B Marifacto Unande Time

Motel 1955: In a small town, a motel costs \$15 a night for a room for two. One extra person can sleep in each room on a cot for free. Tax is 2%.

Present Time: In a big motel off the interstate highway: Double room—\$60.00 a night. Price is for 2 people. Two more people can sleep in each room on the extra bed for \$10.00 per person. Add 7 3/4% tax to the total price.

You want to save money, so you put as many people as you can into each room. Each adult should stay in a room with students. However, girls and boys will always be in separate rooms.

My class has \_\_\_\_\_\_boys and \_\_\_\_\_ girls. We will need rooms in 1955 and rooms in the Present.

The cost of a room in 1955 is \_\_\_\_\_ and the cost of a room in the Present is (If one room in the Present has 2 or 3 people in it, the cost will be different than if it has 4 people.) The cost for the motel for the whole group would be \$\_\_\_\_\_ in 1955 and \$\_\_\_\_\_in Present Time.

Food: Food per day per person:

1955: Breakfast is \$.75; Lunch is \$1.00; Dinner is \$1.95. Snacks: One soda for each person is \$.05 each; one chocolate bar for each person is \$.05 each.

Present Time: Breakfast is \$3.75; Lunch is \$6.50; Dinner is \$10.95. Snacks: One soda for each person is \$1.00 each; one chocolate bar for each person is \$.65 each.

in 1955, each person's 1000 cost
\$for one day. The total cost for
food for everyone on the bus for one day
would be \$ The total cost for
food for everyone on the bus for the whole
trip there would be \$
In Present Time, each person's food cost  \$for one day. The total cost for food for everyone on the bus for one day would be \$ The total cost for food for everyone on the bus for the whole trip there would be \$

Summarize your findings below. When was traveling easier? When was traveling cheaper? When was traveling faster? Why?

1955

#### **Present Time** Distance =\_\_\_\_ Distance = \_\_\_\_

Driving Time = \_\_\_\_\_ Driving Time = \_\_\_\_\_

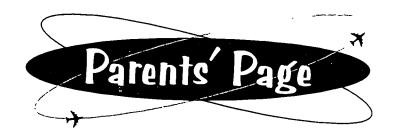

Motel Cost = Motel Cost = \_\_\_\_\_

Gas Cost =\_\_\_\_ Gas Cost = \_\_\_\_\_ Food Cost = Food Cost = \_\_\_\_\_

Total Cost =\_\_\_\_ Total Cost = \_\_\_\_

#### TRY THIS SWEET PROBLEM!

You want to buy a candy bar with your own money so you don't have to share it. It costs \$.05 in the 1950s and it costs \$.65 today. It looks like you could buy many more candy bars in the 1950s than today. Could you? If you got \$.25 as an allowance in the 1950s, which is worth \$1.35 today, in which decade could you buy more?

our child is participating in an exciting new program at school called the Celebrate The Century™ Education Series, sponsored by the United States Postal Service. It is a program that not only teaches 20th century American History, but also empowers your child and you to make history together!

All over the country, throughout the next two years, children and adults will be voting on stamp subjects to commemorate the 1950s through the 1990s. What people, events, and fashions do you think best represent each decade? Starting in February 1998, you can vote on it at your local post office.

Read on for super family activities to reinforce your child's learning at school.

#### PUT YOUR STAMP ON HISTORY:

In February, your child will bring his or her 1950s ballot home to share with you. Can members of your family remember the 1950s? Take the opportunity to ask Grandma or Grandpa. What do they remember? After your family discussion, fill out your ballot and mail it in. Remember, it must be postmarked no later than February 28, 1998, to count.

#### STAMP COLLECTING AT HOME:

Stamp collecting is an enduring, educational hobby. You can begin with stamps that come to your home in the mail. "Float" the stamp off the paper in a dish of soapy water. Children are particularly excited by Endangered Species, Classic Movie Monsters, Bugs Bunny, and The World of Dinosaurs stamps.

#### STAMP TIME ONLINE:

FRĬC

You and your child can explore the 1950s and other decades online:

U.S. Postal Service: http://www.usps.gov

Puzzles, games, stamp collecting, old letters, and more for kids and parents.

Celebrate The Century: http://www.usps.gov/ctc

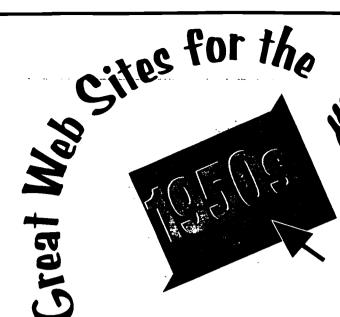

Get the facts on each decade. Games and hot links to other fun Web sites.

Microsoft<sup>®</sup> Encarta<sup>®</sup> Online: http://encarta.msn.com/ctc/

Find exciting, decade-specific learning activities.

Microsoft Encarta Concise Encyclopedia: http://encarta.msn.com/encartahome.asp Free, online version of Microsoft's popular multimedia encyclopedia.

National Geographic's World Magazine: http://www.nationalgeographic.com/world Read biographies of famous people, state your opinion, and more.

These Internet sites can provide additional information in each category. To make it easier for your students to use, bookmark the sites before you ask students to view them. This will also make it easier because they will have less typing to do...and less chance to make a mistake in typing a long address. You can also look for new sites using a search engine designed for students: http://www.yahooligans.com

#### **People & Events**

Fascinating glimpses of the past from
old letters. All about stamps and stamp
collecting. Games and puzzles for kids
and parents. Plus your personal connection
to the U.S. Postal Service—write to the
postmaster!

Celebrate The Century™: http://www.usps.gov/ctc Lots of games. Design stamps, find information, play "Mind over Mail."

Microsoft" Encarta" Online: http://encarta.msn.com/ctc/ Find decade-specific learning activities at Encarta Schoolhouse. Play the new and amazing Encarta Challenge. Check out actual speeches, photos, facts and figures. And you can "Ask an Expert" about ballot topics. Microsoft' Encarta' Concise Encyclopedia: http://encarta.msn.com/encartahome.asp Free, online version of Microsoft's popular multimedia encyclopedia. So much information...and you'll find hot links to more on every topic.

National Geographic's World Magazine: http://www.nationalgeographic.com/world Kids can read biographies of famous people when they were children, state their opinions about the topic of the month, and more.

## n to Insert an Encarta Photo Illustration into Your Document

ou may want to help your students import photos or illustrations from CD-ROM encyclopedias into their projects. Below are instructions on how to do so. In Encarta Online, you can also find video or audio clips and links to useful Internet sites. Encarta Concise Encyclopedia at http://encarta.msn.com/encartahome.asp has all the text and some of the pictures from the CD-ROM version.

- 1. Open the word processor you want to use.
- 2. Open the encyclopedia. Find and open the photo.
- 3. In the upper left hand corner of the photo, pull down the menu.
- 4. Highlight "Copy photo." Click on "Copy photo." Close the photo.
- 5. Switch to the word processor and go to the EDIT menu.
- 6. Paste the photo into your document.

Each photo, illustration, or table carries embedded copyright information. If you are not able to copy a particular photo from an encyclopedia, it probably means that you don't have copyright permission to do so.

#### Where to Find It in Encarta

You can find more information, pictures, video or audio clips on almost all of the 30 stamp subjects in Encarta Online at http://encarta.msn.com/ctc/. For each subject, articles that include pictures and/or information are listed below:

#### **History Overview**

## Words to know for the 1950s

artificial made by humans.

affluence riches; wealth; plenty of money.

abstract real, but difficult to see or touch, as in "freedom" or "democracy"; the kind

of art that is about line and color and does not show realistic objects.

banned forbidden.

communism a form of government in which no one person can own anything; everything

is owned by the whole "community" or by the state.

community any group of people who live together in a certain area and share

government or other interests.

corruption dishonesty.

democracy government of the people by the people themselves, with free elections

and rule by majority vote.

desegregate to stop racial segregation or separation.

fad a popular fashion that doesn't last long.

grille metal bars (or a metal screen with big holes) over an opening, for protection

or decoration.

immigrant a person who moves to live in a new country.

influence power to change other people's opinions and actions.

integrate to unify; to combine parts into a whole.

interstate between or among states; connecting different states.

international between or among nations.

negotiate to discuss and bargain with others to reach an agreement.

polarize to sharply divide into opposites; to make rays of light behave differently

as they go in different directions.

prejudice a feeling or opinion formed without knowing the facts; a feeling or opinion.

usually hostile, about a whole nation, race, or religious group of people.

segregation separation of one group from the larger group; enforced separation of people,

especially by race.

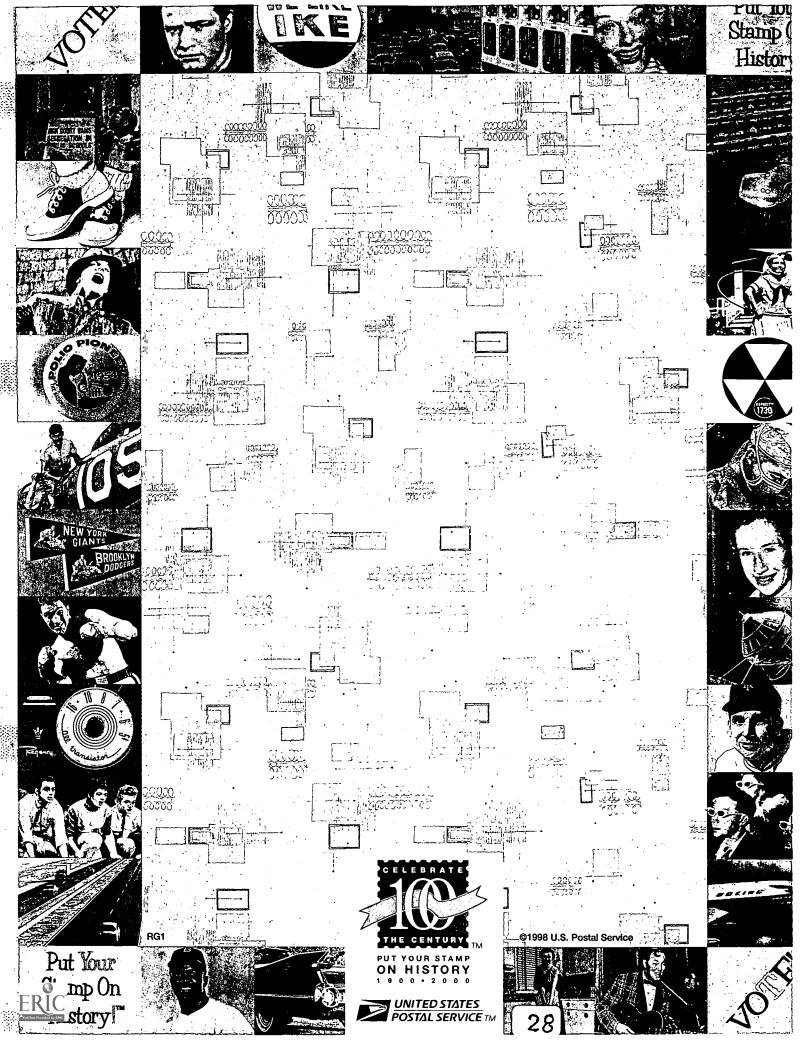

technology the ways in which people create the things of their civilization, especially

methods of science and industry.

vaccine a medicine that prevents an illness by forcing the body to create "antibodies,"

which can then kill off the illness if it invades.

wholesome healthy and morally good.

Objective: To demonstrate to children how time, distance and money can change in actual value over the years.

Begin by telling your class that they are going to take an imaginary class trip to the premiere issue of a new, 1950s stamp. (See Lesson 2 to review "Place of Issue.")

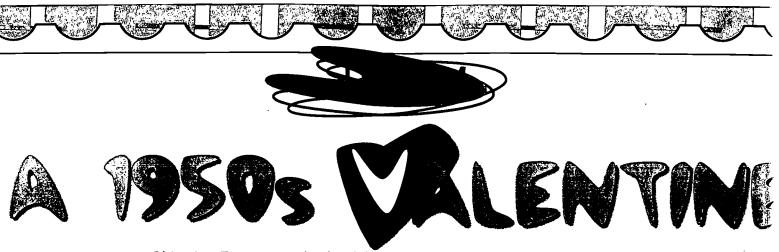

- **◆ There's** only one hitch. The class will take the trip in the 1950s. Then they will compare it with the same trip today.
- ◆ Your kids choose the stamp from the 30 ballot topics and the "Place of Issue" from the continental U.S.A. (For non-continental U.S.A. classrooms, decide on a place to begin and end within the continental North American states.) The destination must be in another state, at a distance that will require at least one overnight stay at a motel.
- + All students will go on one bus with one teacher, two adult chaperones, and one driver. Students will calculate how many miles the trip would be, how long it would take, and how much it would cost to drive there in the 1950s versus in the present. The lesson should be continued whenever appropriate until finished.
- **Photocopy** and use the student worksheets in your Resources Guide, pages 11–12.
  - ◆ **To conclude,** create a U.S.A. bulletin board with the class trip marked out in two colors, one color for the present and one color for the 1950s. Post mileage, time, and expenses for both journeys.

    Celebrate with chocolate bars and soda.

Curriculum Connection: Math. U.S. Geography
Technology Extension: Spreadsheets
Ballot Topics: Interstate Highway System
Time: In Class: About 3-5 class periods.
Materials: Road map of the U.S.A., ruler; calculators; writing materials
Worksheets: Resources Guide, pages 11-12
Teacher Prop Time: 30 minutes. Review lesson plan.
Photocopy worksheets.

- ◆ **To extend** the lesson, plan a class visit to the post office in February or March of 1998 to see the new stamps that commemorate the 1900s and the 1910s. Call ahead and ask the postmaster to talk to your students about commemorative stamps and "Place of Issue."
- + Technology Extension: Students can create spreadsheets to compare data from the two decades. They can find mor information on the relative prices of things from one decade to the next at the Celebrate The Century™ Web site (http://www.usps.gov/ctc).

Objective: To connect school with home as students learn more about the 1950s.

For Yalentine's Day, have students write a letter and create a special art project for a grandparent, friend or relative who remembers the 1950s. Grown-ups always love hearing about what the children are doing in school, and the art project makes a special and different kind of gift for Valentine's Day.

- **To begin,** ask students to think of a friend or relative who lived through the 1950s in the United States. Which 1950s ballot topic would that person like best? If you can, have the children "take it home" by asking the relative or friend about the topics. (All 30 topics are printed in the Student Magazine.)
- → The art: Once the student chooses the stamp subject, the "stamp" can be drawn on any size paper. Students might look at some used stamps to see how they are designed. Have students draw a curvy "perf" line around all four edges, to indicate a stamp's perforated edges. (See example below.) Have students write some information about the stamp subject on the back of their picture—as well as a big, "Happy Valentine's Day!"

**The letter:** Students might explain the Celebrate The Century™ program and that they are learning all about the 1950s. Have them describe the ballot and the voting. Remind them to tell that their vote will count the same as an adult's vote. They can ask if their correspondent is going to vote, too. Perhaps he or she will write back, telling the student all about the 1950s. Finally, be sure the student wishes his or her correspondent a Happy Valentine's Day!

> + To conclude: Be sure students mail or deliver their gifts in time for Valentine's Day.

Curriculum Connection: Art Language Arts

Technology Extension: Previously issued stamps from Celebrate The Century Web site http://www.usps.gov/ctc

Ballot Topics: Any one of 30

Time: In Class: 1 to 2 class periods.

Malerials: Topic Cards, art paper, used stamps, crayons, markers, or paint; writing materials

Teacher Prep Time: 15 minutes. Review lesson plan. Make sure each student has a special person to create a Valentine for.

- **To extend** the activity, have students design Stampers™ Saver Cards for the stamps they brought to class. Stampers Saver Cards are cards on which kids save stamps. The front of the Stampers Saver Card is art work with a place to save the stamp. On the back are interesting facts about the stamp topic.
- +Technology Extension: Students can research their topics at Microsoft® Encarta® Concise Encyclopedia (http://encarta.msn.com/encartahome.asp). They should enter a keyword. (See keyword list for 1950s topics in the Resources Guide, pages 18-20.) They can use word processing to write their letters and computer graphics to create their stamp art. They can also incorporate pictures of previously issued stamps—available at the Celebrate The Century Web site (http://www.usps.gov/ctc)—that are appropriate for Valentine's Day.

Objective: To develop children's public speaking skills as they learn more about all 30 ballot/topics

**Commemorative Stamps** are a great way for a teacher to integrate American geography with American history. For every new stamp that commemorates an historical American event, there is an especially significant American city or town in which the stamp is issued. This is called the stamp's "Place of Issue."

- **For example,** after Americans voted on which image of Elvis Presley they wanted, the Elvis stamp was issued in Memphis, Tennessee.
- ◆**To begin,** introduce the "Place of Issue" concept to your students. Discuss the question: How is the "Place of Issue" chosen? (It must have some special significance relating to the stamp subject. For example, the Elvis stamp was issued in Memphis because that's where Elvis grew up and lived. The Bugs Bunny stamp was issued at Warner Bros. in Hollywood, California.)
- ◆ **Distribute** or have students choose one Topic Card. Each student can figure out a "Place of Issue" for his or her stamp topic by simply reading the card and looking up the topic in a library encyclopedia.
- **Distribute** the photocopied assignment and review it with your class. Students might work on their presentations in class or at home.

◆ To conclude, invite parents and children from other classes to see the presentations. Give your students a practice session first. They can practice in simultaneous groups of 3—all the noise takes the pressure off!

Curriculum Connection: U.S. Geography; U.S. History; Language Arts; Research Skills

**Technology Extension:** Electronic research, word processing; presentation software

Ballot Topics: All 30

7ime: In Class: Individual presentations @ 1 to 3 minutes each.
At Home: One week

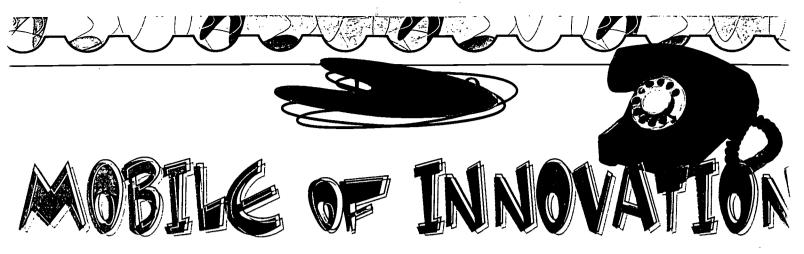

Materials: Map of the U.S.A.; Topic Cards; library and/or electronic research capability; presentation aids (optional) such as flip chart, easel; pictures, overheads, computer slides, etc.

Worksheet: See Resources Guide page 10

Teacher Prep Time: 15 minutes. Photocopy worksheet for class.

- ◆**To extend** the lesson, specify the number of research sources students must use. You might ask students to do a team presentation, in which each team member is responsible for a different aspect of the presentation. This lesson may be followed up with Lesson 5, "Navigate America Through Time."
- ◆ Technology Extension: Encourage children to use Celebrate The Century. Web site (http://www.usps.gov/ctc), the Micros Encarta® Concise Encyclopedia (http://encarta.msn.com/encartahome.asp and CD-ROM encyclopedias. They can use a word processor or present. software to create their presentations. Children may also copy and insmost pictures, as long as they cite the source. (See Resources Guide pa 18-20, "How to Insert an Encarta Photo.")

Objective: To illustrate the way science and technology change and affect all areas of life.

**To begin,** ask your class if they know any technology invented for one purpose that is used for another. For example, Teflon®, an accidental discovery, started out in frying pans and ended up in space suits. In fact, the same is true for most technology!

- ◆ **Ask** your students to create a "Mobile of Innovation." Have them begin at the top of the mobile with a new invention or use of technology from the 1940s or 1950s. They should then "build" the mobile downward. Each "level" of the mobile should represent
  - + a new development in the chosen technology, or
  - a new use of the chosen technology, or
  - a social change that resulted from the chosen technology.

The mobile should finish up in the 1990s.

+Students might work alone or in teams.

• Students begin by researching their topic.

+ Five revolutionary developments of the 1940s and 1950s were the transistor, space exploration, the computer, television, and the heartlung machine used in surgery.

◆ Each student or team should present its mobile to the class with a detailed explanation.

**To conclude,** finish the lesson with a display of mobiles.

Curriculum Connection: Science U.S. History Art Teamwork

Technology Extension: Word processing use

Ballot Topics: 6 Science and Technology topics

Time: In Class: 1 to 2 class periods. At Home: 2 weeks

Materials: Various art supplies for mobile

Teacher Prep Time: 15 minutes. Review lesson plan.

一种是不是的自然是

**To extend** the lesson, ask students to write a report to go with : mobile. In the report, they might explain how the technology changed or time and how it affected society. Display reports with the finished mobiles

**Technology Extension:** Students can choose from a variety of word processor fonts to write and print explanations for their mobiles. They can insert graphics as long as they cite the source from online collections or from CD-ROM encyclopedias. They can locate additional information and games on the Celebrate The Century™ Web site (http://www.usps.gov/ctc) and on Microsoft<sup>3</sup> Encarta® Online (http://encarta.msn.com/ctc/).

## What is an Educated Voter?

Objective: To acquaint students with all 30 ballot topics through reading and writing.

**To begin,** discuss voting in America. Ask: Who in history was not allowed to vote? Are you allowed to vote? Why not? What is an "educated" voter?

- **+ Explain** the Celebrate The Century (CTC) program to your students. CTC begins with a vote on 1950s stamp subjects. Most children are excited that their votes will count the same as adult votes.
- ◆ **Remind** students that they need to be "educated" voters. Their Student Magazine and in-class lessons will make them educated voters.
- ◆ **Distribute** the Topic Cards and corresponding, photocopied "Who Am I?" writing assignments. If you do <u>not</u> wish to use the "Who Am I?" writing assignments, you might ask each student to write a paragraph summary of his or her Topic Card.
- + If you use the "Who Am !?" writing assignments in your Resources Guide, please note that you should review writing in the first person and the use of "voice" with your class.
- → **To conclude**, have each student read his or her composition aloud to the class. Have the class guess who or what the "voice" is. As all children share their compositions with each other, the entire class becomes "educated" on all 30 ballot topics.

Curriculum Connection: Language Arts: Social Studies;

Technology Extension: Word processor, Internet access

Ballot Topics: All 30

Time: In Class: One to three class periods.

Malerials: Topic Cards; optional photocopied writing assignments; writing materials

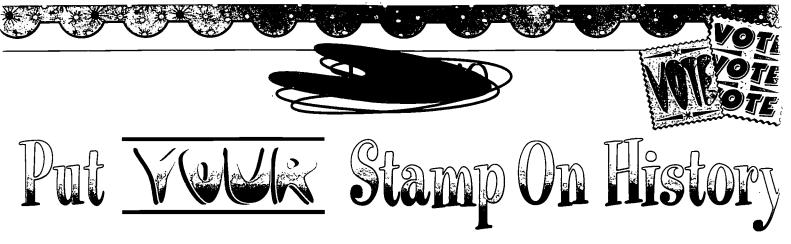

Worksliest: See Resources Guide pages 8-9

Teacher Prop Time: 20 minutes. (Optional) Make

20 minutes. (Optional) Make photocopy of student worksheets, "Who or What Am !?" (Resources Guide pages 8-9). Cut apart the 30 writing assignments.

- ◆ **To extend** the lesson, ask students in teams to do additional research on the Internet (CTC and Microsoft® Encarta® multimedia encyclopedia Web sites) and write a paper on a Topic Card they like.
- → Technology Extension: Students can use a word processor to write, revise, illustrate and share their work with others. Additinformation and a memory game about 1950s ballot topics are available on at the Celebrate The Century Web site (http://www.usps.gov/ctc). Teachers resources and Encarta Challenge, a question-and-answer-type game that includes questions about the 1950s, are on the Encarta Online Web site (http://encarta.msn.com/ctc/).

Objective: To demonstrate how much can be learned from analyzing numbers.

**To begin,** at the end of April 1998, ask students (at home or in school) to check the Celebrate The Century<sup>™</sup> Web site (http://www.usps.gov/ctc) for the outcome of the nationwide vote. Results should be posted 6 to 8 weeks after the close of voting on February 28th. Which of the 30 ballot topics won?

- **◆ Once** you know the 15 winning ballot topics, ask your students to mathematically compare the winning topics to their votes. They might do some of the following:
  - Figure the percentage of the class that voted for each of the winning and each of the losing ballot topics.
  - Create a bar graph for the winning 15 ballot topics that depicts the percent of the class that voted for each.
  - Sequence the 30 ballot topics from "topics getting the fewest class votes" to "topics getting the most class votes."
  - Create a line graph with the sequenced ballot topics on the x axis and from 0 to the greatest number of students who voted on the y axis. Can the students predict what kind of line will result before they plot the numbers? For a dramatic contrast, you might plot the 15 winning topics as the highest number on your graph and the 15 losing ballot topics as 0.
    - ◆ **Stamps** based on the 15 winning 1950s topics will be issued by the U.S. Postal Service in February 1999. They will be available at all local post offices. Information on their unveilings and "Places of Issue" will be available on the Celebrate The Century Web site.
      - **◆To conclude,** discuss the purpose of mathematical analyses in general. What information did students get from their analysis? What other kinds of facts can comparison of numbers reveal?

What ballot numbers would you need to figure out more? What kinds of statistics would be interesting to see? (For example, breakdown by male and female; by adult and child; etc.)

Curriculum Connection: Math: History: Entreeship
Technology Extension: Internet access

Ballot Topics: All 30

Time: In Class: One class period.

Materials: Class tally, previously counted; graph paper; pencils, calculators

Teacher Prep Time: 20 minutes. Read lesson

- → **To extend** the lesson, have your students conduct a simple sur on a topic of interest within their school. (5ample topics: homework, scholunch, favorite movies, worst punishments, etc.) Make sure students inclustatistics on each participant such as age and sex. Then have students analyze their numbers. What can they conclude?
- → Technology Extension: Once your students check out the results of the vote for 1950s stamp topics, they can use the Design A Stamp tool on the Celebrate The Century Web site (http://www.usps.gov/ctc) to print out a frame and design their own stamps.

Objective: To demonstrate to students the importance of the individual in voting.

**To begin,** remind students that they are going to vote on which 1950s subjects they think should be represented by stamps. Make sure your class remembers that every child's individual vote counts the same as an adult's vote. Although their ballots will be mailed together by the teacher, your students are not creating a "class" vote. Every vote counts individually.

- **A good woter** is an educated and thoughtful voter, not someone who just goes along with the crowd. In voting, it is important for each person to decide what he or she truly believes.
- ◆ **Distribute** ballots and review them with the class. One panel is for students to use in class to vote. Students should take the rest of the ballot and the second panel home to their parents. They can vote once more with their parents, or encourage their parents to vote.
- → **Students** and teacher should vote for up to (but not more than) 3 ballot topics in each of the 5 categories. That means choosing altogether a minimum of one topic and a maximum of 15 topics.
- → If you wish the option to follow up with Lesson 10, when everyone has finished voting—and before you collect the ballots—ask some students to help you take a poll. With a show of hands, count how many people voted for each ballot topic. Be sure to write down a number (including 0) for every ballot topic. Also write down the total number of people voting in class that day.
- → If you wish to do more than the suggested statistical analyses for Lesson 10, record other numbers as well, such as most popular ballot topic, male vs. female, etc.
- ◆ Put this tally away in a safe place. You will use these numbers again in about 6 to 8 weeks.
- ◆ **Collect** all the ballots. Put them into the postage-paid envelope and mail them by February 28, 1998.

Curriculum Commaclion: History Chic Awareness

Technology Extension: Internet access

Ballot Topics: All 30

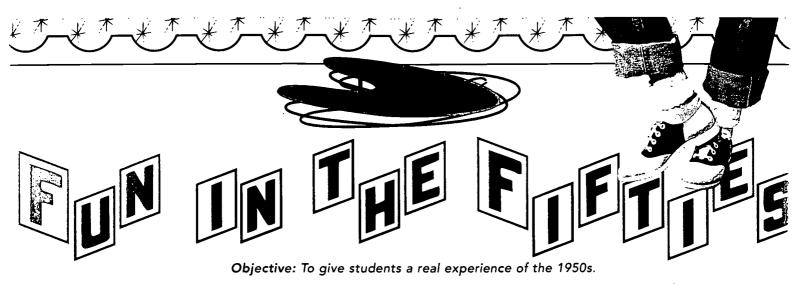

Time: In Class: One class period. At Home: One evening.

Materials: U.S. Postal Service Official Ballots; Topic Cards; pencils; (optional) extra photocopy of ballot for class tally

Teacher Pres. Times: 20 minutes. Read both this lesson and Lesson 10. Photocopy a ballot before the vote for class tally.

- ◆ **To conclude,** encourage students to take the rest of their ballohome to share with their parents. Will their parents vote differently than did? Tell them to find out.
- ◆ **To extend** the lesson, ask students to interview one or both parents. They should ask the parent what they know or don't know abouthe different ballot topics. Instruct the student to make notes, then write their interview. How many kids knew more than their parents?
- → Technology Extension: Young people vote on lots things, and the votes for the Celebrate The Century program really count. If students want to see other things that kids vote for, they can Yahooligans, a search tool for kids on the Internet (http://www.yahooligans.c to see what Web sites the word "vote" shows you.

In a half-day festival, students dress, eat, sing, dance, and have fun the way people did in the 1950s.

- **To begin,** share the idea of a 1950s festival with your students. This activity can be a great way to conclude your study of the 1950s and can culminate in your actual vote.
- **◆ Plan** your agenda with your students. Here are some suggestions:
  - All students come to school dressed in 1950s styles. They can choose "greaser" or "preppie" and fix their hair to match.
  - Plan a "picnic" in class of typical 1950s snacks or lunch. Foods that
    most represent the 1950s are "convenience" foods such as pot pies,
    TV dinners, and frozen cakes that can be defrosted and eaten.
  - Hold a Hula Hoop® competition. Whoever hulas the longest wins.
  - Watch an episode of I Love Lucy and try to notice all the things in the tape that are different from today, including social roles.
  - After showing students pictures of Abstract Expressionist art, have class make their own Abstract paintings or drawings.

 Have a sock hop with music and dancing. Show an American Bandstand video, or better yet, have volunteers demonstrate and teach dances of the 1950s. These might be the Cha-Cha, the Stroll, or the Jitterbug.

- Have students create their own TV game show with questions and answers on the 30 ballot topics, contestants, and a moderator.
  - End your festival with your vote on the U.S. Postal Service Official Ballot.

Curiculum Connection: Art; Physical Education; Social Studies: Music

Tochnology Ealenston: CTC. Web site (http://www.usps.gov/ctc)

Ballot Topics: Teen Fashions, Hula Hoop Toys, Rock 'n' Roll,

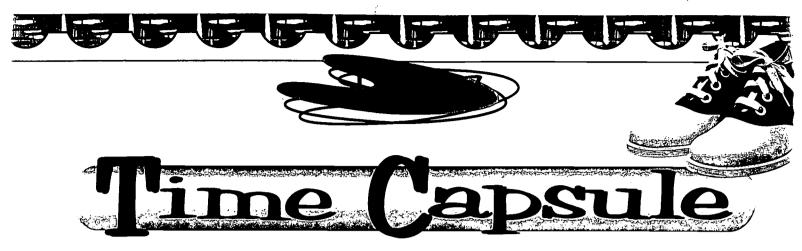

Time: In Class: Half-day. At Home: One week.

Malerials: 1950s music (if possible, a record player with cold records); a VCR and videotaped episode of I Love Lucy, tape of American Bandstand with Dick Clark, art supplies, examples of Abstract Expressionist art; Hula Hoop toys; volunteers to teach 1950s dancing; 1950s snacks or lunch

Teacher Prep Time: 1 to 3 hours, depending on help from students and parents.

- ◆ **To conclude:** To wrap up and wind down, ask students what the like about the 1950s and what they are glad they have now (or don't have in the 1990s.
- ◆ **To extend** the lesson, ask some of the students to take pictures video while you are having your festival. They can then create a photo-es or a "documentary" style video.
- → Technology Extension: More information is available from the Microsoft® Encarta® Concise Encyclopedia at (http://encarta.msn.com/encartahome.asp) and CD-ROM encyclopedias. Teachers' resources and Encarta Challenge, a question-and-answer trivia game that includes questions about the 1950s, are on the Encarta Online Web site (http://encarta.msn.com/ctc/).

Objective: To create a connection between grade levels as students learn more by teaching others.

To begin, tell students they are going to create a "time capsule" for the 1950s. It will be a box that will contain the essence of the 1950s era. Usually time capsules are buried or locked away, but this one will go on display.

- **Pretend** that you are living in 1959. You want to commemorate the 1950s by making a time capsule. What would you include?
- ◆ Each student should bring in an object or a picture from home that actually is <u>from</u> the 1950s, or create an object in school that <u>represents</u> the 1950s. These might include toys, photos, old stamps, clothing, hats, books, or records. Children might draw or model 1950s objects from clay. All materials will be returned, but remind students to ask permission before they borrow something!
- → **Choose** a cardboard box large enough to include a memento from all students. Cut out a "view" window on the side and close the box on top.

  Decorate the box with 1950s pastels or other designs from

the 1950s.

→ Have students arrange their mementos from the 1950s inside of the box. Some 1950s photos from home might be set on the outside of the box. If anyone has a 1950s chair or other furniture, the box might be set on it. Any other large objects could be set around the box.

**Each student** should briefly describe his or her memento. They might write their descriptions on index cards and post all of the cards

on a bulletin board near the box.

Curriculum Connection: Social Studies. Art
Technology Extension: Internet access

Ballot Topics: All 30

7ime: in Class: One class period or Free Time. At Home: One or two evenings

Materials: Large cardboard box; art supplies, mementos

Teacher Prep Time: 10 minutes Review lesson plan.

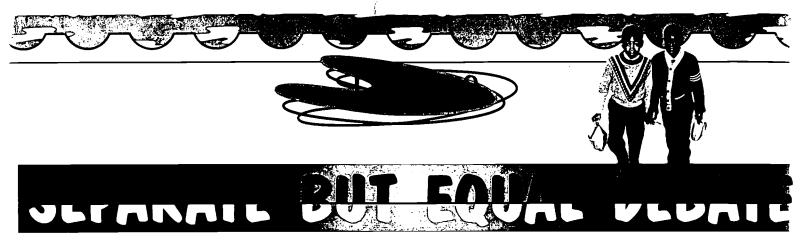

- ◆ **To extend** the activity, ask students to write more than a brief description of the memento. They might do some library research on it, or they might interview their family about it. They could then write up a one— or two—page report.
- → **Technology Extension:** Mementos, favorite things and collectibles are what people include in time capsules. Ask your students what they collect. They can use Yahooligans, a search tool for kids (http://www.yahooligans.com), to see collections of yo-yos, Barbie<sup>2</sup> dolls, lunch boxes and more.

◆ **To conclude**, invite a younger class into the classroom to view the "time capsule." Have some of your students talk about the 1950s to the younger class. Afterward, dismantle the time capsule and return items to their owners.

Objective: To spur students to really think about the issues that ended racial segregation.

### Class One: Segregation (Teamwork)

Divide your class into teams. Read aloud to class Topic Card on Desegregation of Public Schools. Note the 1896 Supreme Court ruling on "separate but equal." (It was established by the 1896 Plessy v. Ferguson decision.) Ask each team to research racial segregation in America's past. What was segregation like in 1950? Buses, train stations, restaurants, even water fountains were segregated in some places. How did that make people feel? Ask each team to write a paper at least one page long that describes segregation. If possible, ask one team to investigate and write about the Constitution's 14th Amendment.

### Class Two: Brown v. Board of Education (Class work)

Ask students to read their papers aloud in class. Revisit "Desegregation of Public Schools" Topic Card and the Brown v. Board of Education ruling. In this ruling, Chief Justice Earl Warren said, "Separate educational facilities are inherently unequal." Why? (Because of the "intangible" effects of segregation itself.) Discuss what "intangible" effects means with your class. (For example, intangible effects were the ways in which segregation affected self-esteem.) How does "separate but equal" relate to the 14th Amendment, which guarantees "equal" treatment for all Americans?

Class Three: "Separate but Equal" in Sports (Class/teamwork) Introduce the question, "Should boys and girls have 'separate but equal' sports teams?" Ask class to think of pros and cons. Ask class to consider: How is this issue similar to or different from Brown v. Board of Education? How is segregation for boys and girls similar to segregation based on race? How is it different? Are there "intangible" negative effects of segregation itself? Could there be "intangible" positive effects? Divide the class into two debate teams, pro and con "separate but equal" sports teams. Meet with each team separately to help them formulate arguments. Make sure that teams reference racial segregation in their arguments. They should argue that girls v. boys is similar to or different from racial segregation. Encourage students to use arguments from Brown v. Board of Education. Have each team compose a one-page opening statement to establish its position.

### Class Four: The Debate

Moderator (the teacher) announces the topic: "Should there be

Curriculum Connection: Language Arts; Social Studies; Research, Teamwork

Technology Extension: Internet access

Ballot Topic: Desegregation of Public Schools

Time: In Class: 4 or 5 class periods. At Home: 2 or 3 weeks.

Materials: Topic card; research materials; writing materials

Teacher Prep Time: 30 minutes. Review lesson plan. This is an ambitious project, but, with help, within the scope of younger children. 🖖

'separate but equal' sports teams for boys and girls?" Each debate team rea its opening statement. The debate may continue by a show of hands or by teacher calling on students. Allow one speaker from each side to finish.

- **◆ To conclude:** You may want to invite an audience to see the debate, especially if you can do the debate a second time. When the debis over, give each team a prize.
- **◆To extend** the lesson, help students delve deeper into research The class might research separate education for boys and girls, as well as separate-sex sports teams.
- + Technology Extension: Students can do research with CD-ROM encyclopedias and with Microsoft® Encarta® Concise Encyclopedia at (http://encarta.msn.com/encartahome.asp). They can use word processing to write their opening statements.

## HOW DO YOU

Is it rock 'n' roll?

Lucy and Ricky?

The Hula Hoop toy:

### Or is it Ike you like?

In their own special way, each made the 50s unforgettable. And now, you have a once-in-a-lifetime chance to remember them. It's Celebrate the Century: the official 20th century commemorative stamp series that you vote for! From the United States Postal Service.

## PICTURE THE 50s?

## HOW DO I JOIN THE CELEBRATION?

Inside, you'll find 30 people and events that helped make the 1950s one of the most important and exciting decades of the 20th century.

### YOUR MISSION-

should you choose to accept it—is to vote for up to three subjects in each of the following categories:

People & Events, Arts & Entertainment,
Sports, Science & Technology and Lifestyle.

It's downright American!

### SO GRAB A PENCIL

or a pen and don't miss the chance to Put Your Stamp On History!"

# Wait... there's more!

## CAN I VOTE FOR OTHER DECADES?

Sure. Voting for the 60s begins in May 1998. Voting for the 70s, 80s, and 90s will take place over the next 15 months.

### WHAT ABOUT THE 1900s - 1940s?

To make sure we could issue the entire 20th century stamp collection by the year 2000, the Citizens' Stamp Advisory Committee previously selected the 1900s - 1940s stamp subjects.

## WHEN WILL YOU ANNOUNCE THE WINNERS?

Winning subjects for each decade (1950-1990) will be announced at your local Post Office about six weeks after each decade vote has ended. See the Celebrate the Century display at your Post Office for further details.

## WHEN WILL THE WINNING STAMPS BE AVAILABLE?

The 1950s stamp series you are voting for will be available in May 1999. Stamps for the 1900s and 1910s are available now at your local Post Office. Join the Celebration today and collect all ten decades!

Guidelines for the 1950s ballot vote: Ballots must be filled out using a pencil or dark ink per. Voters can select a maximum of three (3) subjects in each category. Voting is open to people fall age, and participants may submit multiple ballots. To be fallied, each ballot must be mailed separately with First Class Postage affixed. Photocopies of the ballot will not be accepted. All ballots must be postmarked no later than February 28, 1998.

government used computers. Early computers were as big as a whole room and were difficult to

use. Then, in 1951, engineers Presper Eckert and John Mauchley created a computer for business. It was called the "UNIVAC." This new computer, which weighed 16,000 pounds and was built with over 5,000 vacuum tubes, was the first to record information on magnetic tape. It featured a modular design (using separate parts) and could be mass produced.

Computers were very new in the U.S. Navy, Grace Murray Advances of the 1952 presidential election. It was the first time an election was predicted by a computer.

The government and big business used UNIVAC to help with jobs that involved numbers and complex or tedious calculations. In 1954, twenty industrial computers were sold. By 1960, more than 2,000 computers had become a billion dollar business.

Desk Set, a popular 1957 movie with Spencer Tracy and Katherine
Hepburn, was all about the fear that computers would take over people's jobs.

UNIVAC helped

One of the greatest baseball games of all time was the final 1951
National League<sup>™</sup> pennant game between the Brooklyn Dodgers<sup>™</sup> and the New York Giants<sup>™</sup>. The Giants had won one game and the Dodgers won the other. In the bottom of the ninth inning of the third game, the Dodgers were ahead by two runs. They were about to win the National League<sup>™</sup> pennant. Two players were on base when Giants' batter Bobby Thomson stepped up to the plate. The pressure on Bobby was tremendous. Would he get a hit? He swung, and the crowd

Thomson had hit a

Players rounded the bases and scored, to win the game.
Forever after, Bobby
Thomson's great hit was remembered as the "shot heard 'round the world."

In the 1950s, America's ball teams began to attract smaller crowds. Did this mean Americans cared less about baseball, our "national pastime"? No, it did not. More and more fans were following baseball games on television and radio.

In the 1950s, African-Americans were more widely accepted into the major leagues. Racial integration of baseball helped to make this sport even home run. All three Giants

- more popular.

Taven years old. National female tennis players in the world during the 1950s. She also helped change the image of tennis from an elite game that few people played to an exciting and popular sport. When she started playing in 1945, she was only eleven years old. She was nicknamed "Little Mo." Connolly won the 1951 U.S. National Women's title (now called the U.S. Open) when she was only sixteen years at. http://encarta.msn.com/encartahome.asp old. She was the first woman ever to win the Grand Slam of tennis, by winning all four major international tournaments in 1953. Her ability and hard-hitting style raised the standard for tennis players everywhere. In 1954 she had to stop playing professional tournaments after a horseback riding accident. ◆Her pro-career only lasted four years, but she was almost unbeatable when she played she only lost four tournaments. ◆Connolly won the Wimbledon Singles title from 1952 to 1954, and was the French Open champion in 1953 and 1954. Connolly's example paved the way for Althea Gibson, an African-American athlete from Harlem, who won both the U.S. Open and Wimbledon Singles titles in 1957. Gibson became a role model for other black athletes, and helped women's tennis become even more popular. 17

Since Americans were so in love with their new cars, it was only natural that many people wanted to race them. In stock car racing, racers must modify ordinary, or "stock," cars for racing competition.

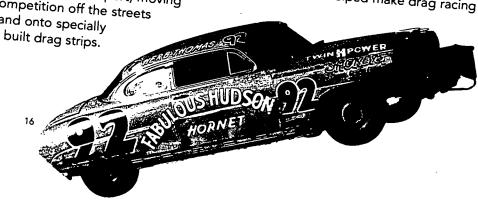

After the National Association of Stock Car Auto Racing (NASCAR\*) was started, stock car racing became more respected in America. Races that NASCAR approved had to be run according to a different NASCAR races and figure out who was best. Racing was becoming a real sport. With NASCAR's help, and with new places to race like the Daytona International Speedway, racing became very popular in 1950s America. www.mshf.com/hof/hofhp.htm

◆According to legendary racer and bootlegger Junior Johnson, stock car racing started when southern moonshiners modified their own cars to outrun the law.

◆NASCAR is still stock car racing's main organization.

The major races on the NASCAR circuit are the Daytona 500™, the Winston 500™, the Coca-Cola 600™ and the Heinz Southern 500™.

◆Also in the 1950s, the National Hot Rod Association helped make drag racing a more respected sport, moving competition off the streets and onto specially

true of the transistor. Before

electronic devices like the radio and television had to use vacuum tubes. A vacuum tube, which was big and broke easily, was either a glass or a metal tube with the air sucked out of it. Electricity passed through it to make the radio or TV work. William Shockley, John Bardeen, and

developed the transistor in 1947. This tiny new device replaced vacuum tubes.

The transistor used less power and generated

could be made much smaller. One of the first products made with the transistor was the small,

transistor radio. Throughout

Sometimes a single invention can change verybody's life. That was fithe transistor. Before ansistor, s like on on the single of the transistor. Selection in the single of the single of

+Shockley, Bardeen, and Brattain received the Nobel Prize in 1956.

During this century, heart disease became the number one killer in America. In the 1950s, doctors and researchers made a series of amazing new improvements in heart surgery In 1952, doctors implanted the first artificial heart valve into a human being Artificial pacemakers were first used to keep the heartbeat regular. In 1952, Doctor F. John Lewis performed the first successful open-heart surgery. By the following year, doctors had a new heart-lung machine to help in surgery. The heart-lung machine fills the patient's blood with: oxygen and keeps the blood circulating in the patient's body. This amazing machine allows

doctors to perform long, complicated operations on people's hearts. This combination of new technology plus new ways of operating has enabled doctors to save many more lives. → In 1950, heart massage methods were first used to revive patients who had been pronounced dead during surgery. ◆The first human aorta transplant (a major artery to the heart) was performed in 1950. → In 1951, leg veins were first used to repair and replace damaged blood vessels to the heart.

◆The first synthetic (man-made) arteries were used to replace damaged arteries in 1957

Cars in the 1950s were big, powerful, and dazzling. Many people felt that their spectacular cars showed how successful they were. It is likely that the style was a celebration of the good times and increasing American affluence after World War II. These cars had lots of gleaming chrome, fancy grilles, bright, shiny paint and soaring tail fins. Style was more important than safety, gas mileage, or even ease of operation. In the 1950s, cars did not have seat belts. The biggest ones could travel only a few miles for every gallon of gas. Some were difficult to operate and even harder to park. Nevertheless, they were very popular. ◆Much of the decade's design inspiration came from the shapes of trains, airplanes, and even submarines. ◆The big tail fins were inspired by the twin tails of the U.S. Air Force P-38 "Lightening" fighter plane. Automobile racing became very popular in the 1950s. There were many racing events approved by the National Association of Stock Car Auto Racing (NASCAR™). ◆By the end of the 1950s, about 80% of all American families owned cars.

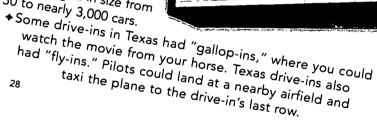

What do families with more money, more free time, more kids, and a big car do? Go to the drive-in, of course. Drive-in movie theaters became very Popular during the 1950s. By 1955, there were about 5,000 drive-in movie theaters in the U.S. Throughout the 1950s, more and more young suburban families piled into the car for a night at the movies. Kids often wore their pajamas and took blankets and pillows. Drive-in movies helped Hollywood compete with television. Drive-in theaters began

to close in the 1960s. Land became more expensive. Even worse, with the new daylight savings time, movies couldn't

begin until as late as 9:00 p.m. ◆Drive-in theaters were invented in the early 1930s by Camden, New Jersey resident Richard M. Hollingshead, Jr. Hollingshead mounted a film projector on the hood of his car and showed home movies on a screen he nailed to a tree.

Movie makers were in trouble. People in the 1950s were so busy watching television, ey went to the movies less often. Movie makers ema owners were losing money. They had to do they made 3-dimensional movies. It worked. 3-D ies, "became a major fad from 1952 to 1954. To leffect, moviegoers wore polarized cardboard orded lens and one green lens. When viewers vies with these glasses, figures seemed to audience. Audiences loved 3-D, but the Came from Outer Space, were too of the fad was short-lived, the image well remembered. early 1900s. It did not become of Mighty Mouse, sold 1.5 val: 25 cents! toys like View-Master, mes, and in mages. and cinema owners were losing money. They had to do something. So they made 3-dimensional movies. It worked. 3-D movies, or "deepies," became a major fad from 1952 to 1954. To see the 3-dimensional effect, moviegoers wore polarized cardboard glasses with one red colored lens and one green lens. When viewers watched specially made movies with these glasses, figures seemed to

jump right off the screen at the audience. Audiences loved 3-D, but the movies, such as Bwana Devil and It Came from Outer Space, were too silly to keep people interested. Although the fad was short-lived, the image of entire audiences wearing 3-D glasses is well remembered.

◆3-D movie technology was introduced in the early 1900s. It did not become popular, though, until the 1950s.

◆The first 3-D comic book, the October 1953 issue of Mighty Mouse, sold 1.5 million copies, even though it cost 250% more than usual: 25 cents!

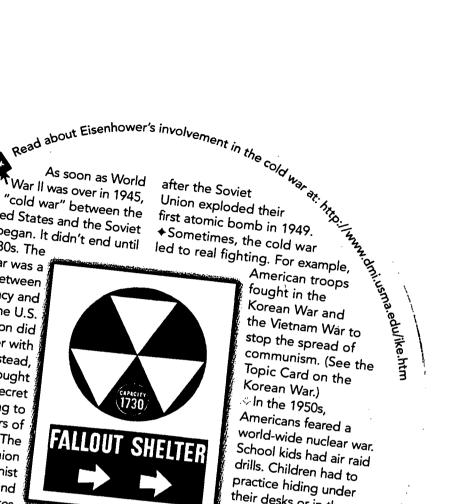

a "cold war" between the United States and the Soviet Union began. It didn't end until the 1980s. The

cold war was a struggle between democracy and communism. The U.S. and the Soviet Union did not fight each other with guns and bombs. Instead, both countries fought with spies, secret actions, and by trying to influence leaders of other countries. The Soviet Union helped communist governments and the United States

helped democratic governments. Americans were uneasy with the Soviet Union's increasing strength. Concern grew

Korean War.) ⋄ In the 1950s, Americans feared a world-wide nuclear war. School kids had air raid drills. Children had to practice hiding under their desks or in the halls, in case of an attack. However,

the only atomic bombs or hydrogen bombs dropped anywhere in the 1950s were for tests only.

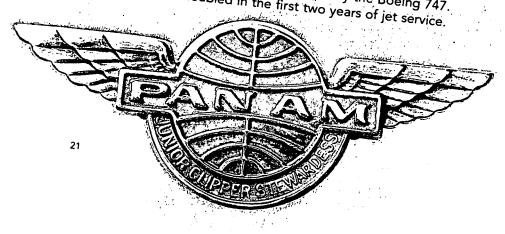

Before jet engine aircraft, airplanes flew with propeller engines. Jet engines were invented 1958, Pan American World Airways used a Boeing 707 jet time a jet plane was used to fly paying passengers. The Boeing 707 was found that it made a great passenger plane. Using jet planes completely Jets could go two times faster than propeller airplanes. The Boeing 707 could afford to fly.

◆Pan American's use of the Boeing 707 jet is a good example of the way in which technology developed for one purpose (war) can be used for a completely different purpose (peacetime travel). ↓ Until 1990, the Boeing 707 was used for Air Force One, the president's private airplane. It was replaced by the Boeing 747. ↓ Air travel almost doubled in the first two years of jet service.

INDIANA

What if one thing distant parts of the United States.

The Interstate Highway

Travel on a Virtual Interstate 95 at: http://interstatelint.com/states/fights change where you lived, worked, shopped, and even took vacations? In the 1950s,

construction began on something that changed life for many Americans in just this way. It was the Interstate

Highway System. In 1956, President

Dwight D. Eisenhower signed the Federal-Aid Highway Act. The new law said that America would build a national system of highways to

connect major American cities. Because of these highways, many Americans moved to the suburbs and could commute to work. Vacations could easily include car trips

to explore

02

States. When the U.S. Army first tried to drive across America in

1919, vehicles got stuck in mud and sand. They slid off icy roads. Military troops and vehicles had to be able to move quickly and easily across our nation, in case there was an attack. President

Eisenhower also felt that interstate highways would decrease accidents,

save time and money, and help business.

◆Building the Interstate Highway System was the biggest public works project in American history.

## People

For the FIRST time ever, KID votes are going to count the same as adult VOTES. In February 1998, vote on which STAMP subjects should be used to remember the 1950s. Here are all of your choices. PICK up to three from each row—up to FIFTEEN stamps altogether. Don't forget—this is a REAL vote. So THINK about it!

#### DESEGREGATION OF PUBLIC SCHOOLS

Following the Brown v. Board of Education ruling in 1954, integration of public schools began.

## INTERSTATE HIGHWAY SYSTEM

The U.S. Interstate Highway System became the largest public works project in history, as well as a model for modern highway design.

## ARTS and ENTERTAINMENT

ROCK 'N' ROLL

With its roots in rhythm & blues and country music, rock 'n' roll appealed directly to teenagers with rhythms that many adults found threatening.

## 8"ON THE WATERFRONT"

The 1954 film, "On the Waterfront," was a hard-hitting exposé of union corruption. It won eight Academy Awards®.

## 9"I LOVE LUCY"

"I Love Lucy" was one of television's most popular shows from 1951 until its last episode in 1957.

## Sports

Rocky Marciano, the "Brockton Blockbuster," was the only heavyweight boxing champion to retire undefeated.

## WORLD SERIES

The New York Yankees® and their crosstown rivals, the Brooklyn Dodgers,™ met five times in the World Series® between 1949 and 1956.

science&

## VICTORY OVER POLIO

A polio vaccine, first licensed in 1955, was administered to children across the country, helping to control the spread of polio.

## 2 COMPUTERS FOR BUSINESS

Marketed as a commercial product, UNIVAC (Universal Automatic Computer) efficiently used magnetic tape, replacing bulky punched cards for storing data.

## Life STYLE

## TEEN FASHIONS

In the 1950s, teens defined a new look: poodle skirts, bobby socks, saddle shoes, blue jeans, and T-shirts.

## AMERICAN MODERN FURNITURE

Modern furniture used simple designs and new synthetic materials that could be mass-produced.

#### **SUBURBS ATTRACT FAMILIES**

he prosperity f the post-war eriod allowed nore families to uy houses and o live farther way from vhere hey worke l.

## ∠ the COLD WAR

In an effort to contain Communist expansion, the U.S. waged a "cold" war.

### THE KOREAN WAR

The Korean War was the first major United Nations military

## PRESIDENT DWIGHT D. EISENHOWER

Popular war hero Gen. Dwight D. Eisenhower was elected president in 1952, and again in 1956.

#### DR. SEUSS' "THE CAT IN THE HAT"

irst published in 957, "The Cat n the Hat" by dr. Seuss continues o delight young hildren (and their arents) with its umorous verse nd rollicking hythm.

#### **NEW YORK** SCHOOL

The artists who worked in and around New York were known for their original, individual styles of expressionism.

## "SINGIN' IN THE RAIN"

One of the most popular films ever made, "Singin' In The Rain" (1952) is an exuberant satire of Hollywood during the transition from silent films to talkies.

## "WEST SIDE STORY"

"West Side Story," which opened on Broadway September 26, 1957, is a contemporary version of "Romeo and Juliet."

#### STOCK CAR **RACING**

Vhile Europeans oncentrated on pecialized acing cars, mericans were ascinated with tock cars ouped-up ersions f ordinary

#### **MAUREEN "LITTLE MO"** CONNOLLY

In 1951, at age 16, tennis player "Little Mo" Connolly won the U.S. National Women's title. In 1953, she became the first woman to win the Grand Slam of tennis.

#### THE "SHOT HEARD 'ROUND THE WORLD"

The New York Giants™ and the Brooklyn Dodgers™ finished the 1951 National League® regular season in a tie for first place. The Giants™ won the best-of-three game playoff with a three-run home run with one out in the bottom of the ninth inning of the third game.

#### COMMERCIAL .. JET AIRCRAFT

Vith the inveiling of the Boeing 707, U.S. arriers began ommercial iet irline service.

#### TRANSISTOR RADIO CREATED

The transistor radio became available to consumers in 1954.

It was one of the first uses of the transistor, which revolutionized the electronics industry.

## U.S. LAUNCHES SATELLITES

The U.S. satellite, Explorer I, was launched January 31. 1958, and was quickly followed by Vanguard I, launched March 17, 1958.

## ADVANCES IN SURGERY

The heart-lung machine was first used in open-heart surgery in 1953. In the same decade, doctors also performed the first successful kidney transplants.

#### TAIL FINS AND CHROME

Cars sported long tail fins, chrome, and convertible tops.

#### DRIVE-IN MOVIES

Drive-ins combined two of America's loves-movies and cars.

## **HULA HOOP**

Within six months after their introduction in the spring of 1958, Americans of all ages had purchased millions of Hula Hoop® toys.

#### MOVIES **夕** GO 3-D

Studios began producing 3-D films, and moviegoers donned cardboard glasses with cellophane lenses to view the special effects.
