ABSTRACT

This report provides a wide range of comparative and historical data on the 34 state institutions of higher education in Georgia for the period 1995-97. Data tables are grouped into the following categories: general information; students; academic information; faculty and staff; financial information; facilities; research; and continuing education and public service. Enrollment data includes headcount and full-time equivalent enrollment; enrollment by class, race, gender, and declared major; student characteristics; off-campus enrollment; residency; first-year retention rates; system transfers; and graduation rates. Academic data includes credit hours generated by division, degrees conferred by discipline and level and by institution, external degree programs, library additions, and admissions and academic policies and programs. Faculty data include full-time faculty by rank, tenure status, highest degree, and employment status. Financial information includes revenues and expenditures for current operations and capital outlays, general revenues and expenditures, and student and other mandatory fees. Data on facilities include capital outlay appropriations, building and land holdings, inventory of area by classification, and student housing capacity. Data on research activities include research and public service activities and contracts and grants received. Continuing education data covers programs and participants by institution. Appended are notes on institutional name changes. (Contains 30 references.) (MAB)

December 1997

Dear Colleague:

The vision statement adopted by the Board of Regents and reprinted in these pages continues to guide the development of the University System of Georgia. This common vision combined with the commitment of our faculty, staff, and students to excellence help explain our many successes. The thirty-four colleges and universities in our System address the needs of the State of Georgia in bold and creative ways, positioning us among the leaders of public higher education in the nation.

This twelfth edition of the *Information Digest* provides a wide range of comparative and historical data to answer the most frequently asked questions about the University System. It is one of our means of being accountable to the citizens of Georgia for their investment in higher education. It includes both data that make us proud and data that tell us where we must do better.

As we continue to strengthen higher education in the State of Georgia, we depend on data to inform our decisions and to serve as a benchmark by which we monitor our progress. We welcome any suggestions you may have for future editions of the *Information Digest*.

Sincerely,

Stephen R. Portch
Chancellor

PREFACE AND ACKNOWLEDGMENTS

Twelfth Edition

The purpose of the *Digest* is to provide summary information concerning the various activities of the University System and reliable statistical data over time. Users needing more specific information are directed to the original sources cited on each page. The choice of contents and the accuracy of translation from the original documents are the responsibility of the editors.

We thank Central Office staff members who provided information on their respective areas. Special appreciation is expressed to John Millsaps, Director of Communications and Marketing, Office of Media and Publications, who designed the cover art and arranged for printing and publication, and Sue Sloop, who designed the maps.

You are encouraged to offer suggestions for future editions of the *Digest*. Many of the changes in this edition are the result of reader comments and suggestions.

GENERAL INFORMATION

- ◆ The University System of Georgia was created in 1931.
- ◆ The System is composed of four universities, two regional universities, 13 state universities, and 15 associate degree colleges.
- ◆ The University System is governed, controlled and managed by a Board of Regents appointed by the Governor.
- ◆ The Board of Regents is composed of 16 members, five of whom are from the state-at-large and one from each of the eleven congressional districts.
- ◆ The Chancellor is elected by the Board as its chief executive officer and the chief administrative officer of the University System.

Vision Statement

ACCESS TO ACADEMIC EXCELLENCE FOR THE NEW MILLENNIUM

As Georgia emerges as a leader in a global society, the University System of Georgia will lead in access to academic excellence. Among the nation's public universities and colleges, Georgia's will be recognized for first-rate undergraduate education, leading-edge research, and committed public service. Georgians will appreciate the System's prestige and leadership in public higher education, including its graduate and professional programs, as fundamental to the state's economic, social, technological, and cultural advancement. The University System of Georgia and its component colleges and universities will sustain close contact with the people of Georgia, be responsive to the needs of Georgians first and foremost while raising their aspirations, and generate a more highly educated populace throughout the state. It will seek to create for students from various backgrounds every possible avenue to intellectual achievement without compromising academic excellence, and challenge them to their full potential for leadership. Its students, who are its heart and soul, will therefore be its strongest supporters.

To these ends, the University System of Georgia will be characterized by:

A whole that is greater than the sum of its parts, in which each campus has a clearly focused and valued mission, and all contribute their strong, bright threads to a network of programs that covers Georgians' diverse needs for higher education.

Students who master their majors and the basic skills of critical reasoning, independent thinking, computation, communication, collaboration, and creativity needed to enter the workplace with confidence, to move beyond entry-level jobs, to pursue lifelong learning, and to exercise leadership as contributing citizens who advance their families, communities, state, nation, and world into the new millennium.

A world-class, diverse faculty and staff who have superior communication and teaching skills; who use new technologies, roles, and curricular innovations creatively to enhance student learning; and who exhibit the highest standards of intellectual achievement and continuing growth, social responsibility, and concern for students.

Active partnerships with business and industry, cultural and social organizations, and government in order to analyze, project, and respond to changing state and regional needs, to support Georgia's economic and cultural development and to insure that its graduates are prepared for the future.

Campus learning communities that engage students with the ideas that mark educated persons, global and multicultural perspectives, and advanced technology to develop both ethical principles and intellectual flexibility for the world of tomorrow; and that celebrate and energize the student spirit, while respecting and supporting the different ways students develop their minds, their persons, and their citizenship.

Leadership in establishing higher state standards for post-secondary education and--with the public schools and technical institutes--in improving and valuing education at all levels, helping students move smoothly within the System and from one educational sector to another, and insuring that all students who enter the University System are prepared to succeed.

A constitutional Board of Regents that establishes clear policies and review procedures to promote the continuing improvement of every unit and of the System as a coordinated whole, that encourages initiative and innovation throughout the System, that requires full accountability from all, and that insures responsible stewardship.

The University System of Georgia will hold itself accountable to the citizens of Georgia for the effective and efficient use of every available material resource, new technology, and human insight and activity to achieve access to academic excellence for all citizens, and to charge its collective intellectual power on behalf of the state.

Guiding Principles for Strategic Action

The University System of Georgia--which includes the Board of Regents, its Chancellor's Office, and all the institutions governed by the Board--

1. Shall stimulate Georgians' aspirations for higher education, have high academic standards for its students and programs, challenge and assist students to meet or exceed those standards, provide sound academic and career advice, help students prepare for employment and lifelong education in a changing world, and increase the number of well educated Georgians.
2. Shall place the welfare of its students, within the context of academic quality, as its first priority in decision-making at all levels.
3. Shall seek a high-quality, diverse pool of students to admit, insuring that the majority has the preparation considered necessary for college success and providing focused support for those students whom it selectively admits without the standard preparation.
4. Shall insure that Georgians comprise the large majority of its students, with special emphasis on the representation of minorities among its successful graduates, and shall strategically recruit students from other states and nations so that all may benefit from a diverse student body.
5. Shall reasonably accommodate the needs of non-traditional learners in providing access, services, and instruction.
6. Shall insure that each of its institutions provides an educational, physical, and social environment that supports learning and growth, raises ethical issues for consideration, embraces cultural diversity as a social norm and economic asset, and prepares its students for leadership, collaboration, and conflict resolution in an international, technological, and environmentally responsible society.
7. Shall insure adequate written policies and procedures for dealing with student complaints and discipline, with proper attention both to advocating students' concerns and to holding students responsible for their actions, in order to provide fair treatment of students collectively and individually at the institutional level, with specified grounds for appeal to its Board of Regents.

ACADEMIC EXCELLENCE AND RECOGNITION

8. Shall promote to Georgians and the nation its commitment to service by supporting strong undergraduate, graduate and professional education; pathbreaking research and creativity; and other national patterns of academic excellence in its curricula and operations.
9. Shall make the best possible freshman-sophomore education available for students at all its institutions, shall ease the transfer of lower-division credits among its institutions, and shall expect all students seeking a baccalaureate degree to undertake and complete a core curriculum at one of its institutions or by transfer from a comparable college or university.
10. Shall use educational technology, innovation, and teaching strategies that produce the most learning by engaging students actively, collaboratively with other students, and in frequent contact with faculty. It shall promote and reward excellence in teaching, and shall maximize the benefit to students and to the state from the research, scholarship, and service activities that complement teaching.
11. Shall make teacher education a high priority, holding all its programs for current as well as prospective teachers to high standards of quality, innovation, and technological advancement.
12. Shall insure that its historically black institutions are models of access to academic excellence, full partners in land-grant and other collaborations, and assets in the entire System's continuing initiatives to eradicate inequities and to increase current opportunities for all Georgians.
13. Shall insure that each of its institutions has a clear, substantive, distinctive mission that supports the mission and vision of the System as a whole; a commensurate array of academic programs; and adequate resources concentrated to emphasize its distinctive strengths. The University System shall also encourage program collaboration and otherwise minimize unnecessary program duplication among its institutions, particularly in costly programs.

Guiding Principles for Strategic Action (Cont.)

DEVELOPMENT OF HUMAN RESOURCES

14. Shall recruit aggressively and nationally for talented, diverse faculty to serve the various missions of its institutions. It shall also develop and retain faculty in an attractive, collaborative, productive environment for teaching and learning that includes, for both non-tenured and tenured faculty: clear personnel standards and policies; expectations and programs for continued professional growth; resources to support excellence in teaching, scholarship, research, and community service; competitive compensation and other recognition for meritorious performance.
15. Shall recruit and retain nationally respected administrative leaders and well qualified staff, who are diverse in background and committed to students and to the missions of their respective institutions. It shall support them with the resources they need to do their jobs, clear personnel standards and policies, professional development opportunities, and competitive compensation to reward achievement, encourage excellence and teamwork, and insure accountability at all levels.
16. Shall have strong written policies and procedures for selecting personnel, for establishing expectations, for making personnel decisions and handling appeals at the lowest responsible level; shall maximize authority and accountability for its institutions to resolve grievances; and shall specify the grounds for personnel appeals to be referred to its Board of Regents.
17. Shall be pro-active in pursuing equity and in managing risk, thereby maximizing the effective talents of its personnel and minimizing human injury and related legal costs.

EFFICIENT USE OF RESOURCES

18. Shall have strategic enrollment policies that determine the number of students its various institutions can serve excellently based on its projected resources. It shall forecast changes in student demand and resources, prepare effectively for those changes, market the full range of its campus settings, and make optimal use of all existing human and physical resources, including the access-cornerstone capabilities of its two-year colleges, to advance Georgians' access to academic quality.
19. Shall encourage its institutions of all sizes to be full partners in inter-unit collaboration, shall provide incentives for technological and other innovations, shall maximize economies of scale in configuring its campuses and academic programs, and shall also use interstate cooperation to meet Georgians' needs for higher education.
20. Shall pay priority attention to regions of the state with unusually underserved populations and/or exceptionally large population growths in managing access to needed academic programs and collaborative delivery of needed educational services.
21. Shall support the responsibility of its individual institutions to monitor and meet local needs, and to take advantage of local opportunities, by initiating collaborations whenever appropriate, by acting on their own when it is consistent with academic quality and mission, and by functioning as effective brokers to bring to bear on local needs the resources of the entire System.
22. Shall base its capital priorities on a Systemwide perspective, strategic and academic program planning, audits of existing and projected physical capacities, and careful analysis to determine the benefits of renovation or new construction as options to meet needs.
23. Shall design and build facilities flexibly to accommodate tomorrow's educational methods and technologies for distance education, and shall balance local initiative and central oversight in their design and construction in order to enhance both campus environments and statewide economic benefits.
24. Shall seek its full share of state revenues to meet a realistic, long-term estimate of its needs; aggressively pursue private gifts in support of quality higher education and public funding at local, state, and national levels; keep tuition reasonable and predictable, with priority consideration for Georgians and undergraduates; and insure that its budgetary policies and practices all support its strategic priorities.

Guiding Principles for Strategic Action (Cont.)

SYSTEM STRENGTH THROUGH GOVERNANCE

25. Shall maximize the effectiveness of its Board of Regents in setting policy and priorities, communicating its will on a continuing basis through a well staffed Chancellor's Office, and guiding toward its vision the System's institutions and program operations through the presidents.
26. Shall exercise the Board of Regents' constitutional governance authority over its institutions within the context of constructive, continuous relationships with the General Assembly, the Governor's office, and other state agencies.
27. Shall use the best management practices of continuous strategic planning and quality improvement, suitable standards and rewards, regular assessment reviews, and a focus on learning productivity, all in an atmosphere of cooperation and accountability. It shall thereby insure the implementation of its policies, the effectiveness of its programs and units and administrative leaders, and proper stewardship by its Board of state resources to provide Georgians access to academic excellence.
28. Shall develop reliable, broad-based data and draw on effective advice--including state, regional, and institutional perspectives of administration, faculty, students, community leaders, and other stakeholders--for its policy decisions.

EFFECTIVE EXTERNAL PARTNERSHIPS

29. Shall create deep, rich partnerships with elementary and secondary schools by initiating and supporting collaborative faculty development, dynamic and sustained pre-college programs, and other projects throughout its institutions to assist in insuring that Georgia's children and young people receive strong preparation and advisement for college study and lifelong learning.
30. Shall maintain an interactive, reciprocal partnership with the Department of Technical and Adult Education that includes distinct missions, collaboration and open communication, bridges between the two systems, complementary involvement in school-to-work and other programs, and the recruitment of students to whichever post-secondary program best serves each individual's immediate educational needs.
31. Shall maintain and expand contacts with business and government leaders and organizations to assist them in accomplishing their goals in an increasingly international environment, to insure that its own non-credit and degree programs are current and flexible, to provide students with opportunities for involvement with business and government, and to bring System resources fully to bear on the state's economic development.
32. Shall maintain both direct and technological linkages with major cultural and social organizations and governmental agencies, encourage joint projects with them, maximize their access to its continuing education and support resources, seek their assistance to develop curricular, research, and service projects and student opportunities, and work collaboratively to advance and enrich the quality of life for all Georgians.
33. Shall pursue coordinated approaches to statewide, national, and international telecommunications and other technological initiatives that maximize public access to information, benefit public health and material well-being, and improve educational access, quality, and cost-efficiency.
34. Shall promote the highest possible public opinion of its impact on the lives of all Georgians by interpreting its needs, activities, and accomplishments with sustained effectiveness to the general public and to business, community, and political leaders at both state and local levels, and by engaging Georgians in strong support for quality public higher education.

UNIVERSITY SYSTEM OF GEORGIA

Institution Location

Brief History

The beginnings of public higher education in the State can be traced to 1784 when the General Assembly set aside 40,000 acres of land for the endowment of "a college or seminary of learning." During the following year, a charter was granted for the establishment of Franklin College, now the University of Georgia. The state later provided appropriations for establishing the following branches: School of Technology in Atlanta, 1885 (now Georgia Tech); Georgia Normal and Industrial College for Girls, Milledgeville, 1889 (now Georgia College & State Univ.); Georgia State Industrial College for Colored Youths, Savannah, 1890 (now Savannah State University); and the South Georgia Normal School, Valdosta, 1906 (now Valdosta State University). Later, the legislature established an agricultural and mechanical arts (A&M) school in each congressional district.

In 1929, Governor L. G. Hardman established a committee charged with recommending reorganization of higher education. The most significant idea was the creation of a central governing board. On August 28, 1931, the Reorganization Act was signed which created the Board of Regents of the University System of Georgia. The Act called for the governor to appoint eleven members, one from each congressional district, and one at large.

In its January 1932 meeting, the Board adopted the following Statement of Plan:

It is the conviction of the Board of Regents that the people of Georgia intended to ordain by the Act creating the Board that the twenty-six institutions comprising the University System should no longer function as separate, independent, and unrelated entities competing with each other for patronage and financial support.

The manifest purpose of the Act creating the Board of Regents is to unify and coordinate the work of these institutions so that the educational program of each shall be integrated with that of every other institution and with the system as a whole. The result aimed at is a correlated, harmonious, and symmetrical structure free from wasteful duplications, but providing the maximum of educational opportunity to the students of the State. In short, the emphasis has been shifted from the interests of particular institutions to the interests of the State.

While the traditions, the welfare and the prestige of the several branches of the system will be an object of care on the part of the Board, all of their problems are to be finally resolved by the answer to the question: What will best serve the educational interests of the State as a whole?

With this as the paramount consideration, the constant aim of this body will be to establish and maintain a system of higher education that will command the sympathy and support of our educational leaders, and at the same time successfully meet our needs by offering the young men and women of Georgia the maximum of education.

To accomplish this result, the Regents will, after careful study, take such steps that to them seem best to coordinate and unify these institutions so that they will be related in purpose and regulated in scope. The only competition in which these schools will hereafter engage will be for preeminence in service and scholarship.

The Reorganization Act of 1931 transferred to the new Board the responsibility for 26 institutions. The Board began immediate reorganization by abolishing the A&M schools and two additional schools and creating two other institutions. The net result was that the System was reduced to 18 institutions. The earliest recorded enrollment was 8,035 in Fall 1933. The System was appropriated \$1,900,500 by the State for 1932-33 but received only \$1,624,928. In 1941, the Southern Association of Colleges and Schools withdrew the accreditation of 10 University System institutions because of irregularities and incidences of outside interference into academic activities at the institutions. In 1943, newly-elected Governor Ellis Arnall sponsored a constitutional amendment to remove such interference by making the Board a constitutional body. The amendment was overwhelmingly approved by the voters.

The principles enumerated in the 1932 policy statement have guided the development of a unified system. Today the Board continues to have constitutional authority to govern, control, and manage the University System, as reaffirmed in the approval of the new state constitution in 1982. These powers include the authority for program approval or discontinuance, internal allocation of the budget, facilities construction, and decisions concerning adding new institutions, upgrading or downgrading the level of an institution, or closure or merger of institutions.

The University System is currently composed of 34 institutions (four universities, two regional universities, 13 state universities, and 15 associate degree colleges). In addition, three of the associate colleges and one state university maintain a postsecondary vocational-technical unit in cooperation with the State Board of Technical and Adult Education.

UNIVERSITY SYSTEM OF GEORGIA

Board of Regents

The Board of Regents is composed of 16 members: five from the state-at-large and one from each of the eleven congressional districts. Members are appointed by the Governor and confirmed by the Senate to serve seven-year terms of office. The Board meets monthly at the Regents' office in Atlanta and occasionally at System institutions or special retreats. All officers of the Board are elected for one-year terms beginning on July 1, except for the Chancellor who serves at the pleasure of the Board. The Chair of the Board has the authority to appoint committee chairs and members. Each committee is charged with studying the problems in the field assigned to it and making recommendations to the Board concerning policies and activities. Special committees may also be authorized by the Board as needed.

Organizational Chart

Source: Office of the Chancellor

UNIVERSITY SYSTEM ADVISORY COUNCIL

The University System Advisory Council has the power to make recommendations to the Chancellor and through him to the Board of Regents regarding educational and administrative matters of concern to the University System. Membership is composed of the Chancellor, the Deputy Chancellor, and the Presidents of the 34 institutions. The Council holds at least one regular meeting each quarter with special meetings held upon the call of the Chancellor. The Advisory Council has both academic and administrative committees which formulate recommendations to be presented to the Advisory Council for consideration. Those matters originating with academic committees are first considered by the Administrative Committee on Academic Affairs prior to consideration by the Advisory Council.

Membership on academic committees is limited to one representative per institution offering work in the field with which the committee is concerned. Administrative committees are of two types: those in which representation consists of one representative from each institution and those with selective representation which are appointed by the Chancellor (Institutional Effectiveness, Research, Testing, Transfer of Credit, and Graduate Work).

ACADEMIC COMMITTEES	CHAIR 1996-97	INSTITUTION
Biological Sciences	John Pasto	Middle Georgia College
Business Administration, Management, and Economics	Jeff Gibbs	Abraham Baldwin Agric. College
Chemistry	Ronald DeLorenzo	Middle Georgia College

Public Service/Continuing Education	Cuba S. McKay	Valdosta State University
Records and Admissions	Kenneth Foshee	South Georgia College
Research Administration	Malcolm Kling	Medical College of Georgia
Student Affairs	Charles Bowen	Dalton College

UNIVERSITY SYSTEM STUDENT ADVISORY COUNCIL

The purpose of the Student Advisory Council (S.A.C.) is to provide a forum for communication and recommendation among students enrolled in University System institutions and the Chancellor, the Board of Regents, state government, and the public, concerning problems and issues in student-related areas. Membership is composed of one elected officer from each of the institutions. The S.A.C. meets at least once annually and works closely with an advisor from the Chancellor's staff as well as the Chancellor. The Council also meets annually with the Board to present a report of its activities and recommendations.

OFFICERS, 1996-97	
Jimmy McEver, Chair Georgia Institute of Technology	John Trainor, Secretary Georgia Institute of Technology
Robert Flournoy, Vice Chair Georgia State University	Natasha Hendriz, Treasurer Augusta State College

STUDENTS

- ◆ The System enrolled 204,322 students in Fall 1996.
- ◆ Blacks comprised 21 percent of the total enrollment.
- ◆ In Fall 1996, 34 percent of students attended part-time.
- ◆ Business, nursing, and education were the most prevalent majors.
- ◆ There were 31,793 first-time freshmen in Fall 1996.
- ◆ System institutions received 23,953 transfer students.
- ◆ About 92 percent of total enrollment was from Georgia.
- ◆ Students came from all Georgia counties, all 50 states, and 181 foreign countries.
- ◆ The average total SAT score of incoming students was 998.
- ◆ In Fall 1996, 39 percent of undergraduates were over age 23.

HEADCOUNT ENROLLMENT

Fall 1987- Fall 1996

Headcount enrollment represents an unduplicated count of all students who are enrolled in credit courses at a University System institution, regardless of course load. Therefore, it includes both full-time and part-time students.

EQUIVALENT FULL-TIME (EFT) ENROLLMENT

Fall 1987 - Fall 1996

EFT enrollment is the conversion of the number of all students enrolled full-time and part-time into an equivalent number of full-time students. It is calculated by dividing the total credit hours taken by all students during the quarter by 15, the load for a full-time student for a quarter.

Freshman: students who have earned 0-44 college credit hours, including joint enrollment students.

Sophomore: students who have earned 45-89 college credit hours.

Junior: students who have earned 90-134 college credit hours.

Senior: students who have earned 135 or more college credit hours.

Graduate: post-baccalaureate and fully admitted students in master's, education specialist, and doctoral programs.

Professional: medicine, dentistry, veterinary medicine, law, pharmacy, and Board designated programs in forestry, social work, and journalism at the University of Georgia; also includes medical residents and interns.

All Other: non-degree seeking students, transients, and auditors.

COLLEGE PREPARATORY CURRICULUM

Policy

In 1984, the University System of Georgia adopted the College Preparatory Curriculum (CPC) policy to be implemented in Fall 1988. In passing the CPC policy, the Board of Regents emphasized that success in college was dependent on strong academic preparation in high school. Board of Regents' policy requires the completion of the college preparatory curriculum for regular admission to any institution of the University System of Georgia. The CPC course requirements have been approved by the Board of Regents and endorsed by the State Board of Education.

REGULAR ADMISSION

The following courses are required of students graduating from high school in the spring of 1988 or later who plan to enroll in regular college programs leading to the baccalaureate degree in University System institutions. The courses outlined represent the minimum standards required by the Board of Regents. Each institution may set higher standards than those listed.

COURSE (UNITS)	INSTRUCTIONAL EMPHASIS
English (4)	<ul style="list-style-type: none">● Grammar and usage● Literature (American, English, and world)● Advanced composition skills
Science (3)	<ul style="list-style-type: none">● Physical Science● At least two laboratory courses from Biology, Chemistry, Physics, or related areas of science
Mathematics (3)	<ul style="list-style-type: none">● Two courses in Algebra and one in Geometry
Social Science (3)	<ul style="list-style-type: none">● American History● World History● Economics and Government
Foreign Language (2)	<ul style="list-style-type: none">● Two courses in one language emphasizing speaking, listening, reading, and writing

PROVISIONAL ADMISSION

Institutions may maintain a provisional admission category for those entering students graduating from high school in or after the spring of 1991 who do not meet the regular admission standards. Institutions may choose not to have a provisional admission category.

In general, if a student did not complete the CPC in either English or math, he or she is required to take the Collegiate Placement Exam (CPE) or the COMPASS exam. Depending on the score on the CPE, the student would either exempt Learning Support or be placed in Learning Support at the appropriate level. A student who did not complete CPC science, social science, and/or foreign language is required to take additional college-level coursework. The student must remove each CPC deficiency by earning at least a "C" in a five quarter-hour course before completing 45 total credit hours. This must be a Core Curriculum Area II or III course respectively for science and social science deficiencies and one additional introductory course for foreign language deficiencies. Any course taken to satisfy a CPC deficiency is in addition to the standard requirements for the program and cannot be counted toward a degree. Institutions may set higher standards for completing the CPC in college or may have additional placement procedures.

After 2001, the provisional admission category will no longer exist. The admissions policy approved by the Board of Regents in June 1996 raises admissions standards for CPC completion. The provisional admissions category will be phased out at some institutions before 2001.

COLLEGE PREPARATORY CURRICULUM

CPC Deficiencies, Fall 1996

This table presents the number and percent deficient in each of the CPC subject areas by institution for all Fall 1996 freshmen. Entering students who graduated from high school prior to 1988 are not subject to the CPC policy and are not included in the base shown here. Further excluded are students in non-degree, certificate, and career associate programs.

- Notes:
1. This table includes only those freshmen who attempted at least five quarter credit hours by Spring quarter 1996.
 2. The composite score is derived by summing the SAT verbal score and the SAT math score. The possible range for SATV and SATM is 200 to 800; the possible composite score range is 400 to 1600.
 3. Medical College of Georgia admits only a limited number of freshmen, and their data are not included.
 4. The number of freshmen in this table should not be used to determine the size of an institution's entering class for the year. Not included are students with missing data on SAT, students with GED's, those admitted into programs that do not require SAT scores, and those who were admitted based on ACT scores.
 5. The *Georgia* and *Nation* scores are recentered on individual scores; the University System means for 1987-1995 were recentered. University System data for 1996 were reported on the recentered scale.

* The Georgia total includes all 1996 Georgia high school seniors who took the SAT any time during their high school years through March 1996. If a student took the SAT more than once, the most recent score is used.

TRANSFERRED TO ANOTHER SYSTEM INSTITUTION

HOW TO READ THE TABLE: 1) Locate the column of the Sending Institution at the top of the page and the row of the Receiving Institution on the left side of the page. For example, GIT (Georgia Tech) received 14 transfer students from KSU (Kennesaw State University) and KSU received 46 transfer students from GIT. 2) To determine how many students transferred from a System institution to another System institution, read the bottom line. For example, 333 students transferred from Georgia Tech to another System institution. Data are not available on numbers who transferred to a non-System Georgia institution or an out-of-state institution.

TRANSFERRED TO ANOTHER SYSTEM INSTITUTION

Sources: 1995-96 Transfer Report; Student Information Reporting System

FIRST-YEAR RETENTION RATES

Fall 1995 - Fall 1996

Retention rates represent the percentages of respective pools of Fall quarter first-time, full-time entering students who are re-enrolled or transferred within the University System in the following Fall quarter. The student pools for which one-year retention rates are calculated are regularly admitted freshmen, black (B) and all other (AO), and Developmental Studies students, black and all other. The institution-specific rates are based on students who are retained in Fall 1996 at the institution at which they matriculated in Fall 1995. The System rates include those students who transferred from the Fall 1995 institution to another System institution.

BACCALAUREATE GRADUATION RATES

Class of 1988

Institution-specific graduation rates are calculated by dividing the number of graduates at the institution by the number of first-time/full-time (FT/FT) freshmen in 1988. The System specific rate includes those students who graduated from any institution in the System in the numerator. Graduates are counted through spring quarter of the indicated year.

ENROLLMENT TARGETS

1998-2002

A cornerstone of continuous improvement is comprehensive planning for the future, and part of the comprehensive planning for the University System of Georgia is strategic enrollment planning. Following are the proposed institutional enrollment targets. Each target represents a range of plus or minus two percent of the target. For an institution to meet its enrollment target, its enrollment for any given year must remain within the corridor created by the that year's target number plus or minus two percent. These targets will be rolling five year targets; each year a new year will be added and the remaining four years reviewed to insure they are still appropriate.

Institution	Planning Period				
	1998	1999	2000	2001	2002

UNIFORM CALENDAR

QUARTER SYSTEM

All institutions in the System operate on a quarter system with the exception of the Law Schools at the University of Georgia and Georgia State University which were granted permission by the Board to operate on a semester system.

LENGTH OF QUARTER

The three regular quarters of the academic year (fall, winter, spring) cannot be less than eleven calendar weeks each, with allowances therein for registration, instruction, examinations, and reporting of grades to the registrars. A quarter normally includes ten full weeks of instruction (a minimum of 47 class days). A minimum of 500 minutes of instruction is required for each quarter credit hour awarded to the student.

The scheduling of summer quarter work may be flexible but with the stipulation that all summer quarter work be equivalent to that done in other quarters, with respect to instructional time.

BEGINNING AND ENDING DATES

The earliest beginning and latest ending dates are approved by the Chancellor and must be followed by all institutions.

	<u>Quarter</u>	<u>Earliest Beginning Date Allowable</u>	<u>Latest Ending Date Allowable</u>	<u>Number of Week Days</u>
FY1998	Summer 1997	June 18, 1997	September 12, 1997	61
	Fall 1997	September 15, 1997	December 19, 1997	68
	Winter 1998	January 2, 1998	March 24, 1998	57
	Spring 1998	March 26, 1998	June 12, 1998	57
FY1999	Summer 1998	June 17, 1998	September 11, 1998	60

SEMESTER CONVERSION

The Board of Regents approved the conversion from a quarter calendar to a semester calendar in December 1995, with actual conversion to be in effect in Fall 1998. All of the System institutions, with the exception of Georgia Institute of Technology, will convert at that time. Because of their extensive involvement with the 1996 Olympic Games, Georgia Tech was granted a one year delay. Their conversion will be in effect Fall 1999.

One of the principal benefits of the semester conversion is curriculum review. Each System institution has completed a thorough review of its academic program offerings. New courses have been added, and some existing courses have been deleted. The Core Curriculum at each institution has been redesigned to facilitate transfer among System institutions. Most courses will be three credits and will meet three times per week. The full-time load for an undergraduate will be 12 semester hours. The full-time load for a graduate student will be 9 semester hours.

New academic calendars have also been approved. Each System institution will begin and end classes during the same week each year.

<u>Academic Year</u>	<u>Earliest Starting Date Allowable</u>	<u>Latest Ending Date Allowable</u>
Fall 1998	August 18 - 24, 1998	December 9 - 15, 1998
Spring 1999	January 5 - 11, 1999	April 27 - May 3, 1999
Fall 1999	August 17 - 23, 1999	December 8 - 14, 1999
Spring 2000	January 4 - 10, 2000	April 25 - May 1, 2000
Fall 2000	August 15 - 21, 2000	December 6 - 12, 2000
Spring 2001	January 2 - 8, 2001	April 24 - 30, 2001

ACADEMIC INFORMATION

- ◆ System institutions conferred 19,837 bachelor's degrees in 1996.
- ◆ More baccalaureate degrees were conferred in business (22 percent) than any other discipline.
- ◆ Institutions awarded 7,002 Master's degrees.
- ◆ More Master's degrees were conferred in education (37 percent) than any other discipline.
- ◆ System universities awarded 740 doctorates.
- ◆ Seventy-three percent of students passed the Regents' Test on the first try.
- ◆ There were 11 million bound volumes and a total investment of \$332 million in library collections.

NOTES

1. FY -- Summer through Spring quarters.
2. Totals may not add due to rounding.
3. Excludes 11,223 in FY1995 and 10,060 sponsored and military hours in FY1996.

DEFINITIONS

Lower Division	- all learning support, freshman, and sophomore courses
Upper Division	- all junior and senior courses
Graduate	- all Master's level or doctoral courses, dissertation hours, and courses in professional programs.

LEARNING SUPPORT PROGRAMS

Developmental Studies programs began in Fall 1974 as a means of bringing the reading, English, and mathematical skills of marginally prepared students up to standard. In 1993, Developmental Studies policy and procedures were revised and Developmental Studies programs were included under a broader Learning Support (LS) structure. LS programs serve students who need preparation in reading, mathematics, English, and/or other areas for success in college. Students who do not meet standards for regular admission are required to take the appropriate part(s) of the Collegiate Placement Exam or Compass exam to determine whether they are to be placed in LS courses. In admissions, placement, and exit requirements, institutions may set higher standards than required by the System. No degree credit may be earned in LS courses, but institutional credit is awarded. LS programs may serve three groups of students:

- 1) Students required to take LS courses because they are below System minimum requirements for placement (430 SAT-Verbal or 400 SAT-Math or CPC English or CPC Math);
- 2) Students who are above the System minimum requirements but are required by the institution to take LS courses or other courses;
- 3) Students who volunteer to take LS courses to prepare for regular college courses.

REGENTS' TESTING PROGRAM

PURPOSE: The Regents' Testing Program (RTP) was instituted in all System institutions to provide System-wide information on the status of student competence in the areas of reading and writing and a uniform means of identifying those students who fail to attain the minimum levels of competence in the areas of reading and writing. Passing the test became a requirement for graduation from undergraduate degree programs (associate and baccalaureate) in 1973. In 1987 the RTP policy was changed to exempt students earning career associate degrees.

DESCRIPTION: The test consists of two parts, reading and essay, and is administered each quarter at all System institutions. The reading part of the test is a 60-item, multiple choice test based on ten reading passages with five to eight questions about each passage. The questions are designed to assess vocabulary, comprehension, and analysis skills. The minimum passing score for the reading section is 61.

For the essay, students have one hour in which to choose and write on one of the two topics that are given. The completed essays are then distributed by the RTP office among six centers in the State, where three independent raters from System institutions score each essay on a four-point scale. The final score is the rating on which at least two of the three raters agree or the middle rating if there is no agreement. Thus, an essay is given a failing grade only if at least two of the three raters assign a failing grade.

REMEDICATION: Students who have earned 75 quarter hours of college-level credit and have not passed both parts of the test must take non-degree credit courses in remedial reading and/or writing until they have passed both parts of the test. If a student fails only one part of the test, he or she is required to repeat only that part. There is no limit on the number of times a student may take remediation or retake the test, although some institutions have policies allowing students to retake the test only when quantifiable progress has been made.

RESULTS: Because institutions vary in their policies concerning the Regents' Test, it is unwise to use the data on the next page to compare institutions.

ACADEMIC POLICIES AND PROGRAMS

CORE CURRICULUM

The institutions of the University System share a common general mission in providing a Core Curriculum for all entering freshmen. The purpose is to aid and facilitate the educational progress of students as they pursue baccalaureate degrees within and among the units of the University System. It is designed to constitute the freshman and sophomore years of study and assure the transfer student that Core Curriculum courses successfully completed at one University System institution, or a fractional part thereof, will be accepted at another University System unit and apply toward a baccalaureate degree. The Core also provides for the preservation of the maximum possible amount of institutional autonomy.

The Core Curriculum is composed of 90 quarter credit hours of study divided among four areas of which 60 hours are in general education and 30 in a major area of study.

<i>Area</i>	<i>Description</i>	<i>Quarter Credit Hours</i>
I	Humanities	20
II	Mathematics and Natural Science	20
III	Social Sciences	20
IV	Major Area	30
	Total	90

The result has been that fewer transfer students lose credit, and institutions, particularly two-year colleges, are no longer placed in the difficult position of attempting to provide excessive curricular offerings to satisfy lower division requirements in various baccalaureate degree programs offered at all four-year institutions. Each institution has developed its Core Curriculum within the broad context of the above plan. The list is maintained in the Core Curriculum Handbook and is updated periodically as changes are recommended.

COUNCIL FOR INTERNATIONAL EDUCATION

The University System is committed to achieving world-class status by empowering its institutions to enable their faculty, students, and staff to participate effectively in a global society. Strategic alliances, partnerships and other collaborative initiatives will link the University System with other parts of the world and bring other parts of the world to Georgia. The synergy thus achieved will provide the international perspective and cross-cultural competence required for Georgians to participate fully and effectively as leaders in a global society.

In March 1995, the Board of Regents approved a policy direction which included the following goals:

- To provide international development opportunities for two percent of University System faculty annually by 1997;
- To design and implement a comprehensive strategy for internationalizing the University System and its institutions by the end of 1997, with special emphasis on international elements being integrated into the curriculum;
- To have two percent of University System students annually participating in study abroad programs by the year 2000;
- To implement a global communications network by 1996;
- To have at least five new international initiatives with Georgia businesses or industries in design or under way by 1998;
- To have established a well-integrated institutional base, statewide scope of responsibility, and System organizational support for the ongoing exercise of these and related functions by the end of 1997.

To accomplish these goals a Council for International Education (CIE) was appointed in the spring of 1995. The CIE includes representatives from the business community and leadership from the institutions and international education. The Council's role is to develop a vision and strategic plan for implementing the goals identified in the International Policy approved by the Board of Regents.

ADMISSION STANDARDS AND PROGRAMS

MINIMUM ADMISSIONS REQUIREMENTS: 1996-97

The following minimum freshman admissions requirements have been approved by the Board of Regents:

Regular admission to programs leading to the baccalaureate degree requires. . .

- Graduation from an accredited secondary school, a high school approved by the institution, or a GED certificate which satisfies the minimum score requirements of the State of Georgia;
- Completion of the Scholastic Assessment Test (SAT) or the American College Testing (ACT) Assessment Program; and
- Completion of college preparatory curriculum (CPC).

Students must have a minimum of a 1.8 high school grade point average (on a 4.0 scale on all academic courses) or a 330 verbal SAT score or a 310 mathematics SAT score (or comparable ACT scores). Students scoring below 430 on the verbal SAT or 400 mathematics SAT or who did not complete the CPC in English or mathematics must be tested for entry into appropriate learning support courses.

Students who have not attended school within the previous five years and have earned fewer than 20 transferable hours may take the University System of Georgia Collegiate Placement Examination instead of the SAT or ACT. The admissions policy was revised in June 1996, and higher standards will be phased in by 2001.

Admission to career degree programs requires. . .

- Graduation from an accredited secondary school, a high school approved by the institution, or a GED certificate which satisfies the minimum score requirements of the State of Georgia and;
- Completion of the University System of Georgia Collegiate Placement Examination.

Satisfaction of these minima does not guarantee admission to any University System institution since institutions may establish both higher and additional admissions requirements.

Source: *The Policy Manual*

JOINT ENROLLMENT AND EARLY ADMISSION PROGRAMS

The purpose of both programs is to provide academically talented high school students with opportunities for acceleration of their formal academic programs. A joint enrollment student is one who is enrolled in courses for college credit while continuing in high school. An early admissions student is one who enrolls as a full-time college student following completion of the junior year in high school. Minimum admissions requirements are 1) a minimum combined Scholastic Assessment Test score of 970 or equivalent ACT scores, 2) a minimum cumulative high school grade point average of 3.0 in academic subjects, 3) written approval (joint enrollment) or written recommendation (early admission) of the high school principal, 4) written consent of parent or guardian (if student is a minor), and 5) completion of CPC. Early admission also requires exemption of all learning support requirements. Institutions may establish higher admissions standards or additional admissions requirements for either or both programs. In Fall 1996, 1,642 students were enrolled through the joint enrollment program, an increase of 18 percent since 1995. Many of these students were enrolled under the Post-Secondary Options program.

Sources: *Academic Affairs Handbook*; Student Information Reporting System

SENIOR CITIZEN ADMISSIONS

Pursuant to a Georgia constitutional amendment passed in 1976, Georgia residents, 62 years of age or older, may enroll as a regular or auditing student in degree credit work on a "space available" basis without payment of fees, except for supplies, laboratory or shop fees. Students must meet all System and institution undergraduate or graduate school admission requirements and follow the same program as other degree-seeking students. The program does not apply to Dental, Medical, Veterinary, or Law Schools. In Fall 1996, 332 persons were enrolled through the program.

INFORMATION AND INSTRUCTIONAL TECHNOLOGY

University System Services, 1996-97

SERVICES OF INFORMATION AND INSTRUCTIONAL TECHNOLOGY

One of the divisions of the Central Office Division of Academic Affairs is the Office of Information and Instructional Technology (OIIT). OIIT is responsible for providing centralized and common information and instructional technology services for the Central Offices and for all units of the University System. OIIT divisions perform the following functions:

Academic Administration Systems

- develops and maintains software for applications systems and supports and coordinates internal data systems which supply information from System institutions to the Central Office
 - Faculty Information System
 - Facilities Inventory, Curriculum Inventory, and Room Utilization Reporting Systems
 - Student Information Reporting System
 - High School Feedback System
- provides installation, training, and on-going support of thirty-one BANNER student information and financial aid systems
- provides consolidated, accurate information to System institutions and produces reports for the Central Office.

Academic Services and Distance Learning

- supports the use of technology in instructional activities
- delivers seminars, presentations, and workshops directed at multimedia course development, the Internet, and distance learning
- serves as the communications liaison between the System and vendor-supported instructional technologies, such as NovaNET, satellite programming, and two-way interactive video (GSAMS)
- develops local support for faculty who integrate technology into instruction.

Business and Finance Systems

- provides support for the central financial software used by the regional universities, state universities, and associate degree colleges
 - College and University Fund Accounting (CUFA) Accounting System
 - Regents Budget Reporting System; Regents Payroll/Personnel System
 - Regents Property Inventory System
- provides coordination with other state agencies on matters relating to business and finance software.

Technology Support Services

- provides technical consulting to System institutions
 - centrally-selected RDBMS—Oracle
 - Control Data Cyber 960
 - centrally-supported minicomputer platforms—IBM RISC 6000, HP 9000, and TI 1500
 - desktop and Local Area Network (LAN) integration
- provides technical support for the BANNER student information and financial aid systems, payroll and human resource systems, and expanded PeachNet user services
 - provides support for the OIIT production services
 - World Wide Web
 - Gopher
 - FTP (file transfer protocol)
 - Electronic Software Distribution System (ESDS)
- supports TSS-managed OIIT Support Center—the first point of contact for problem determination and resolution of Wide Area Networks, LAN, and network utilization.

Telecommunications and Networking

- operates and maintains PeachNet—the University System electronic communications network
- assists with planning and coordinating future systems for voice, data, and video communications
- provides consulting to System institutions for networking and problem resolution.

Policy Initiatives, 1996

In a major strategic planning effort started in August 1994, the Board of Regents, along with Chancellor Stephen R. Portch, his staff, and the presidents of various campuses, committed to make the University System of Georgia a world-class university system. The Board stressed the necessity of making good academic use of available technology and equipment and of preparing an adequate human and organizational infrastructure to implement the System's strategic plan. The concluding paragraph of the reiterates that "The University System of Georgia will hold itself accountable to the citizens of Georgia for the effective and efficient use of every available material resource, new technology, and human insight and activity to achieve access to academic excellence for all citizens and to charge its collective intellectual power on behalf of the state."

To this end, the Board of Regents approved a set of budget technology initiatives: *A Vision for One Statewide Library*, renamed GALILEO—GeorgiA Library LEarning Online; *Connecting Students and Services*; and *Connecting Teachers and Technology*.

A Vision for One Statewide Library—GALILEO

- provides for universal access to materials and information services by all students and faculty in the University System
- enhances student learning
- enhances quality of teaching, research, and service
- provides for a responsible stewardship of system resources
- establishes an information infrastructure which will place the University System in the forefront of information technology

Connecting Students and Services

- improves student transitions from secondary school to college by providing easily accessible registration
- improves student transfers from one college or university to another within the University System, or from vocational-technical institutes to University System units, by increasing transfer articulation agreements and by ensuring easy access—for students and their advisors—to current information on those agreements
- improves student movement through academic programs and requirements into entry-level jobs with appropriate career-advancement potential and increases student access to advisors and advisor access to relevant student information
- improves the System's capability for tracking student transitions from secondary school to college, through college, and from college to work, by ensuring comparable data collection from unit to unit and compatible systems for sharing it

Connecting Teachers and Technology

- expands the number of academic programs using instructional technologies
- increases the number of faculty and staff trained and the number of support staff available to deliver programs by distance education using instructional technologies
- increases the use of distance education to support the delivery of graduate and undergraduate education by System institutions
- expands the technology infrastructure within the University System
- enables faculty and staff to exploit technology and distance learning systems to deliver instruction in new ways and to previously unreachable audiences

PeachNet, Galileo, and GSAMS: 1996-97

Electronic Sources of Information

The University System of Georgia educational data communications network, PeachNet, was established as a comprehensive statewide network based on the TCP/IP communications protocol. PeachNet provides for communications among the University System locations and additional sites listed below and provides a link to the Internet, an international network of networks.

PeachNet Sites

University System of Georgia	47
Office of Public Library Services	63
Department of Education K-12	27
Private K-12 and Higher Education Sites	14
Other PeachNet Sites	12
TOTAL	163

GALILEO, Georgia's statewide library, provides universal access to shared academic materials and services for all students and faculty at the thirty-four University System of Georgia (USG) institutions and is being made available to private colleges and universities, public libraries, and technical schools in the State. GALILEO features electronic databases, an encyclopedia, dictionary, library catalogs, state publications, and census data. These services are enabled by Georgia's statewide educational network, PeachNet, operated by the USG.

* Institutional systems include those managed at the institutional level for multiple departments. Numbers in parentheses indicate the number of such processors installed.

In addition, System institutions support departmental minicomputers and microcomputers, microcomputer/terminal laboratories, and local area networks. Electronic mail and other Internet services are made available to institutions via the University System of Georgia's statewide education data communications network, PeachNet.

FACULTY AND STAFF

- ◆ The System employed 9,194 full-time faculty.
- ◆ Fifty-six percent of full-time faculty were tenured.
- ◆ Thirty-six percent of faculty were female.
- ◆ Nine percent of full-time faculty were black.
- ◆ Sixty-seven percent of full-time faculty held doctoral degrees.
- ◆ There were 31,790 full-time employees in the System.
- ◆ The average faculty salary for all ranks was \$49,628.

FACULTY BY RANK

December 1996

Full-time professors, associate professors, assistant professors, instructors, and lecturers are considered the Corps of Instruction and must be approved by the Board of Regents prior to their initial appointment upon recommendation of the Chancellor and the President of the institution. Promotion to a higher rank must also be approved by the Board upon recommendation of the Chancellor and the President of the institution. The appointment of full-time lecturers is limited to universities.

The following data include full-time teaching faculty, research faculty, general administrators, academic administrators, public service faculty, librarians, and counselors who hold Board approved academic rank and are employed on either an academic or fiscal year contract. Part-time faculty are not included.

FACULTY BY TENURE STATUS

December 1996

Tenure resides at the institutional level. Only assistant professors, associate professors, and professors who are normally employed full-time by an institution are eligible for tenure. Tenure is awarded upon recommendation of the president and approval by the Board of Regents. Tenure may be awarded at the end of a five-year period, and the maximum time that may be served at the rank of assistant professor or above without the award of tenure is seven years. Administrators do not hold tenure in their administrative positions but may be awarded rank and tenure within a department. The Board has also established a non-tenure track policy for persons with faculty rank. There is no limit for years of service in this category, but persons cannot be considered for award of tenure or receive probationary credit toward tenure for years of service in this track.

The data that follow include full-time teaching faculty, general administrators, academic administrators, public service faculty, librarians, and counselors who hold Board approved academic rank and are employed on at least an academic year contract. Part-time faculty are not included.

AVERAGE FACULTY SALARIES

By Rank, December 1996

Average salaries are calculated for all full-time teaching faculty with Board approved rank. The averages exclude faculty whose primary responsibilities are administrative and faculty who hold special chairs. Fiscal year salaries have been adjusted to an academic year base.

DEFINITIONS

FACULTY -- persons whose primary assignments are instruction, research, or public service and who hold academic rank; includes department chairpersons if their principal activity is instructional; includes faculty on nine-month and twelve-month contracts.

EXECUTIVE/ADMINISTRATIVE/MANAGERIAL -- persons whose assignments require primary responsibility in management of the institution; includes department chairpersons if their principal activity is administrative.

PROFESSIONAL NON-FACULTY -- persons with specialized professional training who cannot be classified in any of the other classifications (e.g., librarians, lawyers, physicians).

SECRETARIAL/CLERICAL -- persons such as secretaries, bookkeepers, sales clerks, and data entry clerks.

TECHNICAL/PARAPROFESSIONAL -- persons with technical skills (e.g., computer programmers).

SKILLED CRAFTS -- persons with special manual skills (e.g., mechanics, electricians, machinists, carpenters).

SERVICE/MAINTENANCE -- persons with service or maintenance skills (e.g., food service and cleaning workers, drivers, laborers, and groundskeepers).

FINANCIAL INFORMATION

- ◆ The total University System budget was \$3 billion in FY1997.
- ◆ The state appropriated \$1.4 billion in FY1997.
- ◆ Student fees account for 25 percent of the instructional budget.
- ◆ For residents of Georgia, the approximate cost of tuition for full-time students for three quarters was:
 - ◆ \$2,115 at a university,
 - ◆ \$1,584 at regional and state universities, and
 - ◆ \$1,080 at an associate degree college.

+ Activities other than teaching include experiment stations, extension services, teaching hospitals, marine programs, Regents' Central Office, Advanced Technology Development Center, and payments to non-University System institutions (e.g., private medical schools).

* Internal Revenue consists of student fees, gifts, grants, and miscellaneous other revenues.

** Departmental Sales and Services are revenues used for support of special programs not included in General Operations.

*** Sponsored Operations are funds restricted to a specific use, primarily research and student aid.

AMENDED BUDGET

FY1996 and FY1997

The original state appropriation of \$1.255 billion in FY1996 was amended to \$1.254 billion, a decrease of \$1 million from the original budget. In FY1997 the original state appropriation of \$1.396 billion was amended to \$1.420 billion, and increase of \$25 million from the original budget.

FUNDING FORMULA

The University System operates under a formula funding system developed in 1982 and implemented in the FY1984 budget request. The goal of full funding of the formula was achieved in FY1987.

The formula is a mathematical device that aggregates the funding needs of all institutions to provide a continuous level of support for the Resident Instruction activity of the University System. The formula is used by: 1) the Board of Regents to request Resident Instruction funds from the State of Georgia; 2) the Governor to recommend Resident Instruction funding to the Legislature; and 3) the Legislature to appropriate State funds for Resident Instruction to the Board of Regents. The formula is not used to allocate money to the various institutions.

An array of workload variables is applied to a set of constants to determine Resident Instruction funding needs. Student workload, expressed in terms of quarter credit hours (QCH), directly or indirectly generates about 80 percent of the total budget. Operation and maintenance costs of the physical plant account for another 15 percent of the budget. Thus, the formula is student driven. The workload variables and constants are described below.

I. INSTRUCTION AND RESEARCH

- A. **Instruction.** The formula for instruction is based on QCH generated in three instructional levels (lower, upper, and graduate/professional) and three broad program groups (1-3), plus special program groups for learning support (4) and medicine (5).

Group 1. Law, Letters, Library Science, Psychology, and Social Sciences

Group 2. Area Studies, Business, Communications, Education, Home Economics, Mathematics, Public Affairs, and Interdisciplinary Studies

Group 3. Agriculture, Architecture, Biological Sciences, Computer Science, Engineering, Fine and Applied Arts, Foreign Languages, Health Professions, Physical Sciences, and Technologies

Group 4. Learning Support Programs

Group 5. Medicine, Dentistry, Veterinary Medicine

Total instruction expenditures = academic salary expenditures + instructional support position expenditures + instructional operating expense expenditures.

- B. **Research.** Funding for research is based on an amount equivalent to total graduate instruction expenditures.

- C. **Community Education.** Funding is based on the number of Continuing Education Units produced times a dollar rate.

- II. **PUBLIC SERVICE.** A basic amount is funded for each institution to support a campus coordinator and one support position. Separately organized institutes are specially funded.

TOTAL FUNDING BASE: Sum of I and II
(Instruction, Research, Community Education and Public Service Expenditures)

- III. **ACADEMIC SUPPORT.** 17.7 percent X Total Funding Base = Academic Support Expenditures.

FUNDING FORMULA

(Continued)

IV. STUDENT SERVICES AND INSTITUTIONAL SUPPORT

General Support. 23.1 percent X Total Funding Base = Student Services and Institutional Support Expenditures.

Fringe Benefits. Projected actual needs for benefits such as FICA, health and life insurance, workers' compensation, etc.

Teachers' Retirement.

V. OPERATION AND MAINTENANCE OF PHYSICAL PLANT

Regular Operations. Number of square feet of building space X cost per square foot = Expenditures for Operation and Maintenance of Physical Plant (in FY1995 budget: 29,796,684 square feet at \$3,6991 per square foot).

Major Repair/Rehabilitation Fund. .75% X Current Replacement Value (FY94 replacement value of \$4,065,351,333) = Expenditures for MRR.

Utilities. Number of square feet (above) X cost of utilities per square foot (\$1.6042 in FY94) = Expenditures for utilities.

VI. HEW DESEGREGATION PROGRAMS

VII. **QUALITY IMPROVEMENT PROGRAMS.** 1% of all above expenditures = Expenditures for Quality Improvement.

TOTAL FORMULA REQUIREMENT:
Total of all above expenditures (sum of I through VII).

LESS REVENUE

Student Tuition and Fees. Set at 25% of the total requirement, excluding Public Service and Community Education, Research, MRR, and Desegregation Programs.

Graduate Assistant Fee Reduction

Other Revenue

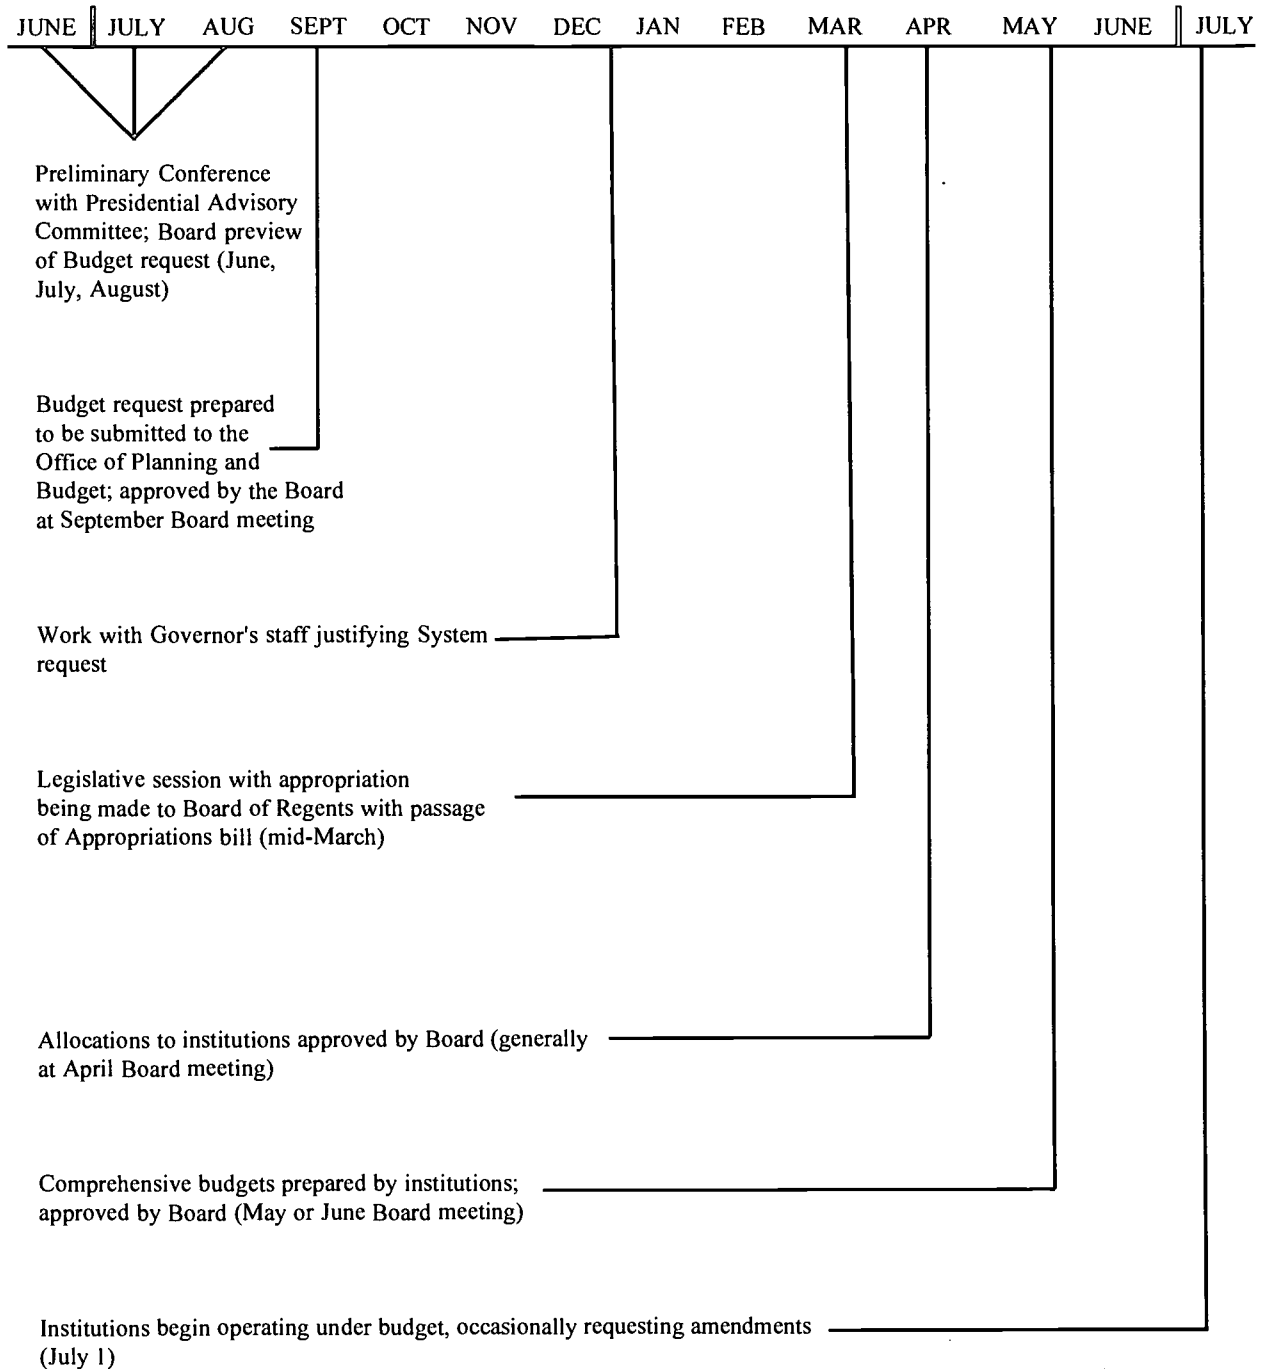

STATE APPROPRIATION REQUEST = Total Formula Requirement Minus Revenue

Source: Formula for Excellence: Financing Georgia's University System in the 1980's (1982); Office of the Senior Vice Chancellor for Capital Resources

BUDGET CYCLE

The budget cycle of the University System is continuous since amendments are carried to the Board at each monthly meeting to reflect the current status of each institution. The development of a budget for fiscal year is illustrated in the following schematic.

Source: Office of Senior Vice Chancellor for Capital Resources

STUDENT FEES

FY1987 and FY1997

Fees are classified as either mandatory or elective. Mandatory fees include 1) fees mandated by the Board for all University System students, such as matriculation fees and non-resident tuition, and 2) fees mandated by the institution and approved by the Board such as student activity fees, athletic fees, health fees, and transportation fees. Elective fees are established by the institution, approved by the Chancellor, and paid by the students who elect and/or benefit from the specific service such as student housing, food service, and special class fees. The Board must authorize increases in tuition and matriculation fees to bring the student's contribution up to 25 percent of the total General Operations revenue in the Resident Instruction budget. Students who do not qualify for resident status must pay both the matriculation and non-resident fees.

* The cost of meals is based on 19-21 meals per week.

FACILITIES

- ◆ The System owned 2,751 buildings valued at \$4.6 billion.
- ◆ Institutions completed \$256.6 million in construction during FY1996.

APPROPRIATIONS

Facilities and Capital Outlay

Among the primary responsibilities of the Board of Regents is that of providing adequate facilities at the 34 institutions. The Office of the Vice Chancellor for Facilities administers Board policy in this area. Title to all properties is vested in the Board of Regents. The Board may hold, purchase, lease, sell, convey, or otherwise dispose of property if deemed appropriate for efficient administration of the University System.

The Board of Regents use the top-ranked building requests from each of the institutions to develop the priority list of new buildings to be included in the University System budget request submitted to the Governor each September. The institutions' lists of major repair and rehabilitation projects are used by the Office of Facilities in administering the annual appropriation to the Major Repair/Rehabilitation Fund, an element of the Regents' funding formula.

While the larger facilities constructed are financed through the sale of bonds issued by the Georgia State Financing and Investment Commission (GSFIC), cash appropriations from the Georgia General Assembly are also a major source of funding for construction projects. Additional funds for construction come from outside sources (i.e., private donors and grants).

CAPITAL OUTLAY APPROPRIATIONS, FY1987 - FY1996

APPROVED IN GENERAL ASSEMBLY SESSION	FOR FISCAL YEAR	MAJOR PROJECTS	MR/RF	DESIGN FUNDS	RENOVATIONS
1987	FY-87 S	25,025,000 (B)		100,000	290,000
	FY-88	35,350,000 (B)	19,958,066 (C)	315,000	770,000
1988	FY-88 S	64,950,000 (B)			802,370

- Notes:
1. Classrooms include general classrooms and large lecture rooms used primarily for instruction (program class codes 11, 12, 13, 52, and 81 with room use codes 111 and 112).
 2. Teaching laboratories include specialized classrooms (e.g., computing, drafting) and classroom laboratories (e.g., physics, chemistry laboratories) used primarily for instruction (program class codes 11, 12, 13, 52, and 81 with room use codes 211 and 212).
 3. ASF is the number of assignable square feet; ASF/EFT is a space utilization measure calculated by dividing assignable square feet by the equivalent full-time enrollment for Fall 1996.

*Albany State University's data are based on Fiscal Year 1994.

Notes: The classification code indicates how the various rooms within a building were used (e.g., faculty office space) as opposed to the major function of the building (e.g., residence hall facility, instructional classroom facility).

Academic -- instruction (classrooms, laboratories, faculty offices), research, public service, cooperative extension, libraries, computing support, ancillary support (teaching hospitals).

Administrative -- executive management, administrative services, fiscal operations, physical plant operations, financial aid, community relations.

Faculty and Student Support -- faculty and staff services (faculty clubs, lounges, cafeterias) and student support (health services, student centers, cafeterias).

Campus Housing -- faculty and student housing.

Other -- unassigned space (capable and incapable of use); building service (closets, stairwells); independent operations (rental property for commercial uses and outside agencies); and parking garages.

MAJOR REPAIR AND REHABILITATION ALLOCATIONS

FY1992 - FY1996

In accordance with the recommendations of the Study Committee on Public Higher Education Finance (1982), the day-to-day operation of the physical plant continues to be funded on the established dollars per square foot funding approach. However, to cover the non-formula component for major repairs and maintenance, the Committee recommended that the appropriation be set at three-fourths of one percent of the current replacement value of all System buildings. This recommendation became effective in FY1984 but was fully funded for the first time in the FY1987 budget. Prior to FY1984, the System received a constant \$2.5 million annually.

Allocations have been used for such projects as reroofing or roof replacement, repairing/replacing boilers and chillers, upgrading electrical systems, providing handicapped access, bringing buildings up to fire code specifications, and the removal of asbestos materials for buildings in the University System.

RESEARCH

- ◆ The universities and regional universities have 228 institutes and centers that conduct research and provide service.
- ◆ Universities received \$360 million in external grants and contracts to support research and service.
- ◆ Regional universities received \$8 million in external grants and contracts to support research and service.
- ◆ State universities received \$33 million in external grants and contracts.
- ◆ Associate degree colleges received \$7.6 million in external contracts and grants.
- ◆ The University System received \$409 million in contracts and grants in FY96.

RESEARCH PROGRAMS

Universities

Research activities serve to expand the existing body of knowledge, provide learning opportunities for graduate students, and find solutions for problems. The research mission in the University System is concentrated primarily in the four universities. Fort Valley State University has an agricultural research mission assigned to it as a result of its designation as an 1890 Land Grant Institution and operates an Agricultural Research Station at Fort Valley. Research programs carried out in the universities had a total extramural support in FY1996 of \$360 million and are described below. Georgia Southern University and Valdosta State University have research missions focused on applied topics.

GEORGIA INSTITUTE OF TECHNOLOGY

Georgia Tech is a major center for advanced technology in Georgia and the Southeast. The Institute conducts research of national significance, provides services and facilities to faculty, students, industry, and government agencies, and supports the economic and technological growth of the state. Research operations are carried out through a group of schools, centers, and laboratories, each performing research in a particular field of interest. Most of the research is supported by contracts with government organizations and private industry. A significant portion of the total research activity is within the broad fields of electronics, environmental science and technology, manufacturing, biotechnology, materials, microelectronics, transportation, and telecommunications. Signal processing, tribology, acoustics, fusion, combustion, rotary wing aircraft, and work on energy conservation and applications are also important areas, as are domestic and international economic development, computer technology and applications, mechanics, and the fields of biological, physical, chemical, material, earth, atmospheric, and social sciences. To assist with the State's economic development, Georgia Tech maintains field offices in Albany, Augusta, Brunswick, Carrollton, Columbus, Douglas, Dublin, Gainesville, Macon, Madison, Rome, Savannah and Warner Robins. Research is also being conducted at various sponsor locations throughout the nation and the world. Extramural support for FY1996 was \$174 million.

GEORGIA STATE UNIVERSITY

Extramurally funded research programs are broadly based and are conducted in the colleges of Arts and Sciences, Business Administration, Health Sciences, Public and Urban Affairs, Education, Law and in interdisciplinary research centers. Priority research areas include economic forecasting and policy, and environmental biology, language research, high resolution astronomy, molecular biology, biochemistry and biophysics. Research in hydrogeology and environmental biology is conducted by several academic departments and the Skidaway Institute at sites on the coast of Georgia as well as the land areas and rivers of north Georgia in cooperation with local, state, and federal agencies. The Economic Policy Center conducts research in the economy, governance, including regulation, and fiscal and social issues and is closely allied with the Economic Forecasting Center focusing on the status of local, state and national economies. The Language Research Center conducts research on Comparative Primate Cognition primarily on the representational and symbolic capacities of primates utilizing computerized systems. The Center for High Angular Resolution Astronomy utilizes speckle interferometry techniques to resolve binary stars, and determine their orbits and other characteristics. The Laboratory for Microbial and Biochemical studies conducts research in the structure of genes and control of gene expression; neural and endocrine control of behavior; the design, synthesis and structure elucidation of biologically important molecules; and the biophysical chemistry of biomacromolecular processes. Extramural support for FY1996 was \$32 million.

MEDICAL COLLEGE OF GEORGIA

Extramurally funded research programs are disease oriented and are carried out in both basic and clinical disciplines in the five schools of Medicine, Dentistry, Nursing, Allied Health Sciences and Graduate Studies. Institutes which focus on specific research disciplines are the Institute of Molecular Medicine and Genetics, the Comprehensive Sickle Cell Center, the Georgia Institute of Human Nutrition, the Georgia Institute for Prevention of Human Disease and Accidents, and an Alzheimer Disease Basic and Clinical Research Center. A special initiative involves the research and development of telecommunications in health care delivery known as Telemedicine. A unique Animal Behavior Center has been established as part of the Alzheimer's program to develop and test new drugs and agents for improving memory. A specialized Heart Development Group carries out research on the origin and molecular biology of congenital heart defects. Significant priorities in research are genetics and molecular medicine, cardiovascular research, children's disease, aging, and health services research which includes minority and women's health. There is significant applied research with emphasis on the development of new intellectual properties, biotechnology and technology transfer. The latter is focused on economic growth of the state and involves consortia with other universities including the Georgia Research Alliance (GRA) and the Education and Research Development Association of Georgia Universities (ERDA). A special program in Biomedical and Bioengineering Research is partnered with the Georgia Institute of Technology. Research programs on campus include asthma, arthritis, cancer, cardiovascular diseases, childhood diseases, clinical pharmacology, diabetes, drug abuse, duodenal ulcers, epilepsy, genetic aspects of aging, geriatrics, glaucoma, hearing, wound healing, inborn errors of metabolism, infectious diseases, kidney, lung, mediators of inflammation, mental health, molecular biology, neurosciences, neuromuscular diseases, nutrition, organ transplantation, receptor pharmacology, reproductive endocrinology, stroke, toxicology of industrial pollutants, and vision. Research in dentistry includes materials research, fluoride, metabolism, bone transplantation, and rehabilitation including dental implants. Extramural support for FY1996 was \$27 million.

RESEARCH PROGRAMS

Universities (Continued)

UNIVERSITY OF GEORGIA

The University of Georgia is both a land-grant and sea-grant college. All thirteen schools/colleges have extensive research programs. The following areas are representative of some of the recognized research strengths. Research in biology and chemistry is conducted in many colleges, departments, and multidisciplinary units, including the Complex Carbohydrate Research Center, the Center for Metalloenzyme Studies, the Center for Plant Cellular and Molecular Biology, the Center for Biological Resource Recovery, and the Center for Computational Quantum Chemistry. Biotechnology research focuses on plant development and production, crop protection, forest science and applications, animal improvement and health, human health, and fermentation applications. Research in the College of Pharmacy focuses on the development of new drugs and toxicology. Agricultural research is conducted at the three major Georgia Agricultural Experiment Stations in Athens, Griffin, and Tifton, and five smaller stations in the state. Research emphasis is on environmentally sound and input-efficient production practices. The Veterinary Medicine Experiment Station and the Poultry Disease Research Center in Athens conduct research on disease problems of agricultural and companion animals. The Veterinary Diagnostic Assistance Laboratories have facilities in Athens and Tifton. Environmental and ecological research is a major emphasis across several colleges, with the recognized activities in the Institute of Ecology and the Savannah River Ecology Laboratory. Marine research is concentrated at the Marine Institute of Sapelo Island, the Marine Extension Center at Brunswick, and the Skidaway Institute of Oceanography. Research strengths in other areas are highlighted in the Institute for Behavioral Research, the Center for East-West Trade Policy, the Humanities Center, the Center for Remote Sensing and Mapping Science, and the Center for Simulational Physics. Ongoing research in math, reading, and science education, as well as learning disorders, is conducted by faculty in the College of Education. Extramural support to The University of Georgia for FY1996 was \$127 million.

GEORGIA SOUTHERN UNIVERSITY

Georgia Southern University focuses its applied research efforts on assisting south Georgia to meet regional development needs and to respond to emerging research and resource development opportunities. All six colleges--Arts & Sciences, Business Administration, Education, Graduate Studies, Health and Professional Studies, and Technology--play a role in these applied research efforts; as do the Institute for Arthropodology and Parasitology (IAP) and several interdisciplinary centers and bureaus. IAP, which houses the U.S. National Tick Collection, is doing research on Lyme Disease (including a collaborative epidemiological study with the Medical College of Georgia) and other arthropod- and parasite-vector-diseases. The Center for Rural Health and Research explores such issues as the maldistribution of health care providers, the AIDS-risk attitudes and behavior of migrant farm workers, and access to health care among minorities and the rural poor. The Bureau of Public Affairs, which operates the Rural Public Administration Network and the Bureau of Business Research and Economic Development, concentrates its applied research and technical assistance on regional planning and economic development issues. Laser-based research on the optical properties of inert gases and alkali vapors is an emerging strength of the Physics Department. The Geology Department in collaboration with the Skidaway Institute of Oceanography is conducting several research projects on coastal and marine resources and challenges. Initial findings from this department's analysis of a locally unearthed 40-million-year-old whale fossil suggest that the whale represents a new genus and species. The implications for evolutionary theory have drawn the attention of paleontologists across the globe. Additional strengths are found in ongoing work on rural atmospheric pollutants, coastal ecological challenges, control of insect pests, threats to the survival of loggerhead turtles and other endangered or threatened species, small business development and exporting opportunities, and the needs of the State's tourism industry. Extramural support for FY1996 was \$5 million.

VALDOSTA STATE UNIVERSITY

Valdosta State carries out research programs in conjunction with its mission as a regional university through the colleges of the Arts, Arts and Sciences, Business Administration, Education, and Nursing. Research on environmental issues, including the environmental impact of industries in South Georgia, is conducted by several departments. The South Georgia Institute conducts research in business and industrial development and conducts economic forecasting and analysis for the region. A significant proportion of the total research conducted in education is in early childhood intervention, speech and language pathologies, and in teacher development. Extramural support for FY1996 was \$4 million.

INSTITUTES AND CENTERS

Both centers and institutes provide an organizational base for research and an opportunity for interdisciplinary activity and involvement in continuing education activities, facilitate efforts to obtain extramural funding, and serve as a link between the academic and professional communities in a given academic area. A center is not an autonomous structure within the organizational structure of the college or university, but an institute may be an autonomous unit. An institute, unlike a center, may offer credit courses and degree programs.

CONTINUING EDUCATION AND PUBLIC SERVICE

- ◆ 351,567 participants enrolled in Continuing Education courses in FY1996.
- ◆ There were 18,945 programs offered in Continuing Education in 1995-96.

CONTINUING EDUCATION

As part of the mission of the University System, public service and continuing education act as an interface between the 34 institutions and the communities which they serve. Such activities are an extension of the traditional on-campus learning process and have been established to improve the welfare of Georgia's citizens and serve business, industry, government, and professional organizations. The public service/continuing education component consists of the following:

- . Instructional services--offering primarily non-degree credit work designed for the purpose of upgrading skills or personal development
- . Applied research--finding pragmatic solutions for identified problems
- . Consultation--providing expertise for solving problems
- . Technical assistance--providing support for completing a task

Board policy mandates that each institution will offer a variety of conferences, institutes, short courses, workshops, seminars, and training programs. The principal unit awarded for participation in these non-degree credit activities is the Continuing Education Unit (C.E.U.), defined as "ten contact hours of participation in an organized continuing education experience under responsible sponsorship, capable direction, and qualified instruction."

The C.E.U. is accepted nationally as the unit for measuring participation in non-credit continuing education programs. There are two categories of continuing education activity, and only those individuals who take programs that meet the criteria for Category I may be awarded C.E.U.'s. Activities in Category I must meet administrative criteria, including being a part of an institution with a continuing education staff that has a library with reference resources and program criteria that include specifying outcomes of the learning experience and stating requirements for measurement of goals and completion of the program. Programs in Category II do not meet the criteria for inclusion in Category I but may meet the needs of the community or help satisfy the service mission of the institution. Category II activities are planned educational events of an instructional nature, with individually registered participants. "Continuing Education Activities" include both Category I and Category II programs. The rapid growth that has occurred in this area is displayed below.

CONTINUING EDUCATION ACTIVITIES 1976-77 -- 1995-96

PUBLIC SERVICE

Public service activities at University System institutions are diverse. To help facilitate these activities, the following special public service organizations have been established:

Georgia Extension Service

The University of Georgia Cooperative Extension Service/Fort Valley State College Cooperative Extension Program operates in 159 counties, serving the people of the state through a traditional concept: taking the University to the people. A staff of highly trained specialists in agriculture, home economics, community and rural development, and youth development supports county extension personnel. In concert with client advisors, they identify key issues, develop programs, and carry out their mission of teaching in an informal, out-of-classroom setting.

The Extension Service, along with other state extension services and the UGA College of Agriculture, has identified issues to target in its programs. They include: alternative agricultural opportunities; building human capital; competitiveness and profitability in agriculture; conservation and management of natural resources; family and economic well-being; improving nutrition, diet, and health; revitalizing rural America; water quality; and youth at risk.

Within the context of these national initiatives and The University of Georgia Strategic Plan, the Extension Service has targeted five critical issues for intensified educational emphasis: agricultural profitability and sustainability; water quality; food quality and safety; rural economic development; and parenting education.

Rural Development Center, Tifton

This unit of the Cooperative Extension Service is an outreach service center for The University of Georgia's Cooperative Extension Service. The primary focus is on the development of the economic potential of the state's agriculture. Agricultural specialists housed at the Center are the link between the knowledge of University researchers and the county agent and farmer. The Center also serves as a conference center offering educational programs designed to help provide solutions to identified state and national issues which encompass the College of Agriculture priorities with emphasis on those issues critical to rural revitalization.

Georgia Center for Continuing Education

Georgia Center for Continuing Education plans and implements educational programs in response to the diverse needs of adults throughout Georgia, the nation, and many foreign lands. These needs are expressed individually or through a range of governmental agencies, business and professional organizations, and civic, cultural, and education groups. The center's staff works with University faculty, other experts, and clientele groups to extend the relevant resources of the University to adult learners.

The center delivers a complex, comprehensive educational program through residential conferences and short courses; on-campus and off-campus programs for credit, non-credit, and certification; credit and non-credit audioconferences and teleconferences; independent study; mass media; and National Public Radio. The Georgia Center's electronic classroom provides distance education opportunities to students nationwide. The classroom is equipped to deliver two-way audio and video via digital compression and is connected to the statewide distance learning system, Georgia State Academic and Medical System (GSAMS), which has over 200 receive sites around Georgia. The classroom is also interconnected to the teleproduction facilities of the center and provides access to Georgia Public Television and the Georgia Center satellite uplink. Other services include cooperative programming with other institutions of higher education; television and film production; print design and production; media library operations; and consultation and supportive services to organizations and agencies.

Economic Development Laboratory

The Georgia Tech Research Institute's Economic Development Laboratory, through its campus-based programs and industrial extension regional offices, is Georgia Tech's primary vehicle for interaction with industry in Georgia. The laboratory holds conferences, courses, and symposia throughout the year. The lab is involved with assisting business with technology, engineering safe workplaces and environments, advancing manufacturing technology, conducting economic and marketing services, and providing education and training.

The Industrial Education Group helps Georgia companies improve their productivity and product quality through in-plant training of managers and supervisors. The many programs include supervisory skills, statistical process control and customized technical training. Classes feature actual case studies and emphasize implementation of what is learned.

Urban Life Center

This center at Georgia State University seeks solutions to urban problems through instruction, research, and service.

PUBLICATIONS

UNIVERSITY SYSTEM OF GEORGIA

Publications, 1990-1997

The following is a partial list of University System of Georgia publications since 1990, many of which are referenced in this document. Not all publications are available for distribution, but all are available for reference in the Central Office. The office listed in parentheses produced the report or document.

GENERAL

Access to Academic Excellence for the New Millennium (1995). A strategic planning progress report. (The Chancellor's Office)

The Policy Manual (second edition, 1982; updated continuously). Codified manual of official Board-approved policies. (Associate Vice Chancellor for Legal Affairs)

The System Supplement: A Monthly Report of the Board of Regents. Newsletter reviewing Board actions. (Media and Publications)

PLANNING

Information Digest (1983-84 -- 1995-97 editions). Data on the System and its institutions. (Planning and Policy Analysis)

ACADEMIC AFFAIRS

Academic Affairs Handbook (1995). A reference to policies and procedures that define the operations of the office of the chief academic officer at each unit in the University System. Available electronically on the Faculty Information System and the World Wide Web. (Academic Affairs)

Core Curriculum Handbook (1991; updated as needed). Reference manual on the Core Curriculum followed at all System institutions. Describes the four areas that compose the 90 hour core and contains an inventory of all courses which meet the core at each institution. (Academic Affairs)

Developmental Studies Report (1993). Annual report on the student enrollment in Developmental Studies Programs, including exit rates. (Regents' Testing)

Facilities/Curriculum/Room Utilization Report (updated each fall quarter). A summary of instructional activity during the fiscal year including data on number of different courses taught, number of different sections, average size of sections, student credit hours produced, student credit hours by CIP code, percentage distribution of sections according to section size, percent of student credit hours by level, quarter credit hours generated, CIR summary by budget program areas, section starting time, space utilization survey reports and definitions, space factors, and average weekly percent of general classrooms in use by the hours. (Planning and Policy Analysis)

A Plan for Change (1991). Recommendations of an external review committee on ways to improve teacher education programs. (Academic Affairs)

Program Inventory/Listing of Degrees and Majors Authorized (updated monthly). A comprehensive listing by institution of all Board-approved offerings with assigned Classification of Instructional Program (CIP) codes. Available electronically on the WWW. (Planning and Policy Analysis)

Student Data Element Dictionary (1981, updated June 1997). Dictionary containing standardized definitions for the Student Information Reporting System. (Planning and Policy Analysis)

Understanding the University System's Core Curriculum (1991). Brochure describing the basic requirements of the core, procedures for revising the core, and the institutional appeals process for transfer of credit problems. (Academic Affairs)

Publications (Continued)

ENROLLMENT

Enrollment and Quarter Credit Hour Projections. Annual projections for a five-year period. (Planning and Policy Analysis)

Quarterly Enrollment Report. Quarterly report of headcount and equivalent full-time enrollment, demographics of students, and enrollment by class by institution. (Planning and Policy Analysis)

STUDENTS

High School Feedback Report. An annual service provided by the University System whereby all high school principals in the state are notified of the academic progress of their graduates at the end of their first year at a System institution. (Planning and Policy Analysis)

Normative Data for the Freshman Class. Annual description of entering freshmen in terms of SAT scores, high school averages, and freshman grade point averages by institution. Equations for predicting average grades for future freshmen are also provided. (Planning and Policy Analysis)

Transfer Student Report (annual). Report of students transferring to and from University System institutions including numbers and grade point averages. (Planning and Policy Analysis)

A Report on Student Retention and Graduation in the University System of Georgia (1995). First-year and multiple year retention and graduation rates by institution, race, and entry status. (Planning and Policy Analysis)

Freshman Academic Admissions Requirements (1993). Report of admissions requirements for each institution. (Planning and Policy Analysis)

FISCAL AFFAIRS

Annual Financial Report (prepared at the end of each fiscal year of operation). Presents the financial statement for each unit and a consolidated statement for the entire System. (Fiscal Affairs)

University System Budget (prepared for each fiscal year of operation). Summary of budget allocations for each teaching institution and activities other than teaching. (Fiscal Affairs)
