INTRODUCTION

Nebraska law requires anyone caring for four or more children at any one time, from families other than their own, for compensation, and on a regular basis, to be licensed.

Nebraska law also requires the Department of Health and Human Services to write and publish the regulations under which care is to be provided. In doing so, the Department has sought the advice and assistance of parents, child care operators, and other knowledgeable persons in the field of child care. A citizen committee was appointed in December of 1978 to assist the Department of Public Welfare in this task. The committee was designed to reflect the varied interests and concerns of parents and child care providers in Nebraska which provided the Department with recommendations for revising the regulations. Using the work of this committee as a framework, the Department wrote and published regulations which defined the minimum level of acceptable care to be provided in centers.

In addition, on January 9, 1996, the Governor of the State of Nebraska signed regulations developed by the Department of Social Services to implement LB 510 and address other changes in the regulations for child care centers.

The purpose of these regulations is to protect and promote the health and safety of children in child care facilities. They have the full force and effect of law.

The fact that a child care center is licensed in no way lessens the responsibility of parents for ensuring that their children receive child care which promotes health development. Those individuals who have a concern or questions about child care should contact:

71-1908. Legislative Findings. The Legislature finds that there is a present and growing need for quality child care programs and facilities. There is a need to establish and maintain licensure of providers of all such programs to ensure that providers are competent and are using safe and adequate facilities. The Legislature further finds and declares that the development and supervision of programs are a matter of statewide concern and should be dealt with uniformly on the state and local levels. There is a need for cooperation among the various state and local agencies which impose standards on providers of programs and there should be one agency which coordinates the enforcement of such standards and informs the Legislature about cooperation among the various agencies.

71-1909. Sections, Purpose.

- (1) The purposes of sections 71-1908 to 71-1917 are to provide:
- (a) Statewide licensing of providers of child care programs; and
 - (b) The Department of Social Services with authority to coordinate the imposition of standards on providers of programs.

-
- (2) It is the intent of the Legislature that the licensing and regulation of programs under such sections exist for the protection of children and to assist parents in making informed decisions concerning enrollment and care of children in such programs.

The license may be a provisional license, a probationary license, or an operating license. A city, village, or county which has rules, regulations, or ordinances in effect on July 10, 1984, which apply to programs furnished for two or three children from different families may continue to license providers of such programs. Any provider not covered by sections 71-1908 to 71-1917 may voluntarily subject himself, herself, or itself to coverage.
- (3) A provisional license shall be issued to all applicants for the first year of operation. At the end of one year of operation, the Department shall either issue an operating license or renew or refuse to renew the provisional license. The provisional license may be renewed once if the Department determines that:
 - (a) A licensee is unable to comply with all license requirements and standards, is making a good faith effort to comply, and is capable of compliance within the next six months;
 - (b) The effect of the current inability to comply with a rule or regulation does not present an unreasonable risk to the health, safety, or well-being of children or staff; and
 - (c) The licensee has a written plan of correction that has been approved by the Department which is to be completed within the renewal period.

-
- (4) The Department may issue a probationary license to a licensee holding an operating license for up to six months. The probationary license may be issued if the Department determines that:
 - (a) A licensee is unable to comply with all licensure requirements and standards or has had a history of non compliance.

 - (6) There shall be a twenty-five dollar fee charged for the issuance or renewal of each license for providers with a licensing capacity of less than thirty children and a fifty dollar fee charged for the issuance or renewal of each license for providers with a licensing capacity of thirty or more children. The license fee shall be paid to the Department which shall retain the fee, except that when a city, village, or county has adopted any rule, regulation, or ordinance which establishes standards for licensed providers pursuant to subsection (2) of section 71-1914 and conducts all necessary inspections of any licensed provider pursuant to such subsection, the Department shall transmit the license fee paid by such provider to the city, village, or county conducting the inspections.
 - (7) A license may be denied for cause, after notice and hearing, in accordance with such rules and regulations as may be adopted and promulgated by the Department. A person who has had a license suspended or revoked pursuant to section 71-1915 shall not be eligible to reapply for a license for a period of two years.

- (1) The Department shall adopt and promulgate rules and regulations establishing standards for the physical well-being, safety, and protection of children pursuant to the licensing of providers. Such standards shall insure that the provider of a program is providing proper care for and treatment of the children served and that such care and treatment is consistent with the children's physical well-being, safety, and protection. Such standards shall not require the use of any specific instructional materials or affect the contents of any course of instruction which may be offered by a program. Before issuance or renewal of a license, the Department shall investigate or cause an investigation to be made, when it deems necessary, to determine if the applicant or person in charge of the program meets or is capable of meeting the physical well-being, safety, and protection standards and the other rules and regulations of the Department. The Department may investigate the character of prospective or existing licensees, any member of the licensee's household, and the staff and employees of programs by making a national criminal history record information check. The Department may at any time inspect or cause an inspection to be made of any place where a program is operating to determine if such program is being properly conducted.

The Department may request the State Fire Marshal to inspect any program for fire safety pursuant to section 81-502 and may request the Department of Health to inspect any program to determine if it meets sanitation and physical well-being standards of the Department of Social Services for the care and protection of the children pursuant to section 71-901. The authority to make such inspections may be delegated to qualified local fire prevention personnel pursuant to section 81-502 or to qualified local environmental health personnel by the Department of Health. The State Fire Marshal and the Director of Health shall immediately notify the Department of Social Services whenever they delegate their authority for such inspections.

Audit results shall be reported to the Department of Social Services.
- (2) The Department of Health discovers noncompliance with section 71-1913.01, the Department of Health shall allow a noncomplying program thirty days to correct deficiencies. The Department of Health shall furnish each program with copies of such rules and regulations and any other material which will assist in carrying out section 71-1913.01.

71-1914. Department; Serve as Coordinating Agency; Local Rules and Regulations; Report of Violation.

- (1) The Department shall be the state's coordinating agency for regulating programs in this state in order to:
 - (a) provide efficient services pursuant to sections 71-1908 to 71-1917,

- (2) A city, village, or county may adopt rules, regulations, or ordinances establishing physical well-being and safety standards for providers of programs whether or not such providers are subject to licensure under section 71-1911. If a city, village, or county adopts any rules, regulations, or ordinances establishing physical well-being and safety standards for providers subject to licensure under section 71-1911,
 - (a) such rules, regulations, or ordinances shall be identical to the Department's rules and regulations for licensed providers pursuant to sections 71-1908 to 71-1917, except that a city, village, or county which has rules, regulations, or ordinances in effect on July 10, 1984, which apply to programs furnished for two or three children from different families may continue to license providers of such programs, and

- (3) Whenever the director finds that an emergency exists requiring immediate action to protect the physical well-being and safety of a child in a program, the director may, without notice or hearing, issue an order declaring the existence of such an emergency and requiring that such action be taken as the director deems necessary to meet the emergency. Notwithstanding the provisions of subsection (1) of this section, such order shall be effective immediately. Any person to whom the order is directed shall comply immediately, except that upon application to the director, the person shall be afforded a hearing as soon as possible and not later than ten days after his or her application for the hearing. On the basis of such hearing the director shall continue to enforce his or her order or revoke or modify it.
