ABSTRACT

Providing a listing of an essential core of content to be taught and learned in each grade level, this paper presents content standards in four major areas of communication/language arts: reading, writing, listening/viewing, and speaking. The standards are organized by separate grade levels for grades K-9 (except grades 9-12) so readers can quickly review what communication/language arts learning is expected at a specific grade. After a preface and introduction, the paper presents the goals, rationales and indicators for reading, writing, listening/viewing, and speaking followed by the detailed listing of the content standards. ## **INTRODUCTION/OVERVIEW**

### **PREFACE**

In 1997, the SD State Legislature passed SB 170 which amended South Dakota Codified Law 13-3-48 to address the issue of challenging state content standards. The adopted amendment read as follows: "The secretary of the Department of Education and Cultural Affairs shall prepare and submit for approval of the South Dakota Board of Education academic content standards in language arts, mathematics, social studies, and science for grades one through twelve. Each school district shall adopt and implement clearly defined and measurable course guidelines so as to meet the state academic content standards".

In accordance with SD Codified Law 13-3-48, this publication presents the SD Content Standards for K-12 Communication/Language Arts. The document is a compilation of numerous drafts developed under the auspices of the federally funded South Dakota Initiative for Challenging Standards project (SDICS, 1994-1997). The original input for the language arts standards was provided by students, parents, teachers, and communities of South Dakota. The final document evolved from a synthesis of published standards from other states, numerous professional publications, and lengthy discussions by experienced K-16 South Dakota teachers. In the development of these standards, the writers researched and reviewed many respected and well-grounded national and state publications related to communication/language arts standards, instruction, and assessment.

After several public hearings and subsequent revisions, based upon comments and suggestions from educators, parents, and concerned citizens, these South Dakota K-12 Communication/Language Arts Standards were presented to the State Board of Education for final review and were officially approved on December 15, 1998.

The standards document begins with this brief introduction and overview which outlines and explains a vision for communication/language arts teaching and learning in South Dakota, the purpose of the document, and the structure/organization of the document.

### **A VISION FOR COMMUNICATION/LANGUAGE ARTS IN SOUTH DAKOTA**

Although the South Dakota Communication/Language Arts Standards provide common goals for K-12 language arts, the "what" of the goals cannot be addressed without also considering the "how" of communication/language arts teaching and learning. The constantly changing, increasingly complex and technological world in which we live demands that the standards be addressed in positive, effective learning environments.

The vision is evident in schools and classrooms which:

- integrate reading, writing, speaking, listening, and viewing so that students see the connections among these skills
- allow student choice within the curriculum framework
- help students develop strategies for accessing information, problem solving, and delivering content using electronic media and its accompanying technologies
- view teaching and learning as reciprocal, participatory, and student-centered processes
- present content, instruction, and assessment in varied and appropriate ways
- view learning to communicate is an incremental process which becomes increasingly challenging as the learner is ready

### **THE PURPOSE OF THE SOUTH DAKOTA STANDARDS DOCUMENT**

The South Dakota Standards serves many purposes. They provide a listing of essential core of content to be taught and learned in each grade level. The standards are intended to promote shared responsibility and accountability for all educational stakeholders in South Dakota by providing a clear understanding of the expectations for all students at each grade level. The document presents a starting point for informed dialogue among those dedicated and committed to quality education in South Dakota: parents, teachers, administrators, board members, and community members. By providing a common set of goals and expectations for all students in all schools, this education dialogue will be strengthened and enhanced.

### **THE ORGANIZATION OF THE SD COMMUNICATION/LANGUAGE ARTS STANDARDS**

The SD Communication/Language Arts Standards document outlines four major areas of communication/language arts: reading, writing, listening/viewing, and speaking. The standards are organized by separate grade levels so that a parent, local school board member, classroom teacher, or administrator could quickly review what communication/language arts learning is expected at a specific grade.

The grade level standards represent the classroom learning objectives or activities which should be provided at each grade. These are presented in single grade levels except at grades 9-12. Currently, in South Dakota, administrative rule requires that high school students take four units/years (1½ unit of writing, 1 unit of literature inclusive of ½ unit of American literature, and ½ unit of speech) of communication/language arts to graduate. It is the responsibility of each school district to “organize” the 9-12 grade level standards into the courses they offer at the 9-12 level.

### **CONCLUSION**

Communication is the key to discovery, learning, and interaction. Students must be able to read, listen, view, write, and speak formally as well as informally within their homes, their classrooms, their communities, and their workplaces. The skill with which students communicate questions, knowledge, opinions, and feelings may determine their

personal and professional well being as adults. Having effective communication skills enables students to express opinions and feelings, share information, and solve problems. Today's rapidly changing world demands that students become discriminating consumers and users of information. They must be able to read for practical, work-related understanding, but also to better understand history and culture, and to prepare themselves intellectually for the demands of the future. The ultimate purpose of these standards is to ensure that all students have the knowledge and skills necessary to be successful communicators in the technological, globally competitive world of the twenty-first century.

COMMUNICATION/LANGUAGE ARTS**

**Goals**

- 1. Students will read at increasing levels of complexity for various purposes.**
  
- 2. Students will write effectively for different audiences and specific purposes.**
  
- 3. Students will use critical listening and viewing skills in various situations and for a variety of purposes.**
  
- 4. Students will speak effectively in a variety of formal and informal situations.**

# **SOUTH DAKOTA COMMUNICATION/LANGUAGE ARTS**

## **Goals and Rationales**

**In this 1998 South Dakota Content Standards document, the format has been organized into four overall K-12 goals which represent the discipline of communication/language arts. Each of the four goals is listed below, accompanied by a rationale. The rationales are brief descriptions of the goal and its importance for our students as they prepare for adulthood.**

### **GOAL 1: READING**

**Students will read at increasing levels of complexity for a variety of purposes.**

#### **RATIONALE:**

Reading is a complex, integrated cognitive process. It begins with developmental understanding of whole texts, building vocabulary, assigning meaning to word and letter patterns, and associating letters with sounds. Effective reading progresses as the student develops and uses various personal strategies to make complex inferences and predictions about text. While schools and communities must decide what reading materials should be taught, all students must be provided the opportunity to experience great literature in order to understand the ideas, thoughts, and opinions of recognized writers world-wide. Students who read not only reinforce their understanding of people, history, and culture, but also prepare themselves intellectually for the demands of the future. The ability to comprehend work-related technical reading has become a life-long requirement. Today's rapidly changing world demands that students become readers who are discriminating consumers and users of information.

### **GOAL 2: WRITING**

**Students will use write effectively for different audiences and specific purposes.**

#### **RATIONALE:**

Effective writers develop a personal writing process that allows them to move from private thoughts to public discourse. Student writers see themselves as a relevant part of the world and integrate their prior knowledge and personal experiences into a variety of writing endeavors. They write for real and imagined audiences with a realization that different audiences have different expectations. Today's world demands that students express their thoughts and ideas in formal and informal ways, and for creative and informational purposes. Students recognize that current and emerging

technology can support and enhance their expertise in various aspects of written communication.

### **GOAL 3: LISTENING/VIEWING**

**Students will use critical listening and viewing skills in various situations and for a variety of purposes.**

#### **RATIONALE:**

In today's world, as people are inundated with a wealth and range of audio-visual information, they must become discriminating consumers of what they see and hear. Using critical listening and viewing strategies and processes is becoming more and more important as students interact with others in academic, social, and work related contexts. They must develop and use personal listening/viewing strategies which progress from simple comprehension to sophisticated interpretation and evaluation of aural and visual information.

### **GOAL 4: SPEAKING**

**Students will speak effectively in a variety of formal and informal situations.**

#### **RATIONALE:**

Speaking effectiveness is developed only when speakers have the opportunity to prepare a variety of speech forms and participate in a wide range of oral communication situations. For this reason, it is essential that oral language instruction begin in kindergarten and continue through twelfth grade. Students must learn to use good organization skills, appropriate grammar and vocabulary, and effective verbal and nonverbal techniques to effectively deliver oral presentations. Students must recognize and use the strategies and the technology which best support and enhance the quality and effectiveness of oral communication.
