ABSTRACT

This document, presents a statistical portrait of the Virginia's 17 public higher education institutions. Data provided include: enrollment figures (broken down in categories such as sex, residency, fulland part-time status, residence, ethnicity, age, and level of postsecondary education); FTE figures; admissions statistics (such as number applied, accepted and enrolled); and degrees awarded from associate's degrees to professional degrees; course distribution; financial aid data; faculty data (such as percentage tenured and average salary); figures on research activity; and financial data (such as tuition and operating budgets). The following institutions are included: Christopher Newport University, Clinch Valley College, College of William and Mary, George Mason University, James Madison University, Longwood College, Mary Washington College, Norfolk State University, Old Dominion University, Radford University, University of Virginia, Virginia Commonwealth University, Virginia Military University, Virginia Polytechnic Institute and SU, Virginia State University, Richard Bland College, and Virginia Community College System. Brief overviews of each institution precede the data. Individual institution information is preceded by an overview of the Virginia public higher education system. Noteworthy results include: (1) headcount enrollment for fall, 1996 was 292,412; (2) 56% of enrolled students were female, 86% were from in state, and 90% were white; (3) 9,052 associate degrees, 23,515 bachelor's degrees, 8,554 master's degrees, 1,024 doctoral degrees, and 1,210 professional degrees were awarded in 1995-96. Christopher Newport University

Christopher Newport University is an urban institution committed to education as a total community process. This is manifest in several ways: (1) Christopher Newport University serves a primarily local student body; (2) it makes use of the community as an instructional resource by drawing upon the cooperation and talent of those who reside on the Virginia Peninsula; and (3) faculty and staff contribute significantly to the community in areas such as consulting and serving on local and state committees and service organizations.

The university is organized and instruction is provided to take into consideration the life-long learning interests and needs of a largely part-time and mobile student body. The university offers programs of equivalency testing and other non-traditional means of earning college-level academic credit, and it cooperates with other colleges and local agencies. In these ways the university expands its learning resources and offers programs and policies to meet the needs of its students, many of whom transfer from other institutions.

The university is divided into the College of Arts and Humanities, the College of Business and Economics, the College of Social Science and Professional Studies, and the College of Science and Technology, each administered by a college dean. Individual faculty members are responsible to the college deans and to the provost in all matters pertaining to instruction. The graduate program is administered by the director of graduate studies, with teaching and research carried out by the graduate faculty.

Christopher Newport University is committed to an international, global education. The Office of International Programs maintains listings of teaching, research, and overseas study opportunities and administers exchange programs between the university and institutions in Japan, Czechoslovakia, Mexico, the Dominican Republic, Kenya, England, and Russia.

Clinch Valley College

Founded in 1954 as a coeducational branch campus of the University of Virginia, Clinch Valley College is now a comprehensive baccalaureate-granting institution, fully accredited by the Southern Association of Colleges and Schools. The college provides undergraduate programs in arts and science as well as select undergraduate professional programs in business, teacher education, and other fields, all characterized by a strong liberal-arts experience.

The college's student-centered learning environment is characterized by small classes taught by faculty who focus on teaching excellence, scholarly activities, and community service. Campus life provides a rich variety of cultural activities that broaden students' perspectives on the world and it's evolving global society.

In 1970, Clinch Valley College granted its first baccalaureate degrees. In 1976, Clinch Valley College began reaching beyond its campus in Wise with a program of continuing education that enables people throughout the region to pursue baccalaureate degrees. The college would like to expand its spectrum of academic programs and activities, especially in health, technology, and graduate education.

The College of William and Mary

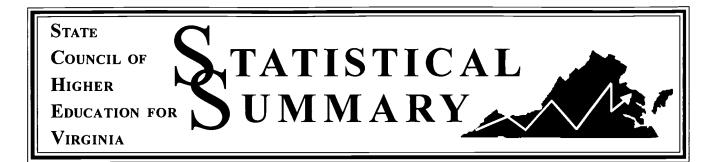

Chartered in 1693, The College of William and Mary is distinctive in combining, in an institution of moderate size, the diversity of a university offering graduate and professional programs with the commitment to liberal education of an undergraduate college of arts and sciences.

The undergraduate program in arts and sciences is central to the aims of liberal education at William and Mary. As a curriculum and as a community, the undergraduate program fosters the aim of liberal education: the development of that critical and creative intelligence through which men and women realize their human potentialities and serve the ends of society through productive work in a world of change.

The graduate and professional programs have evolved during the 20th century to fulfill the educational needs of an increasingly complex society. The program in education became an important mission of the college when the Commonwealth assumed responsibility for its public financial support in 1906; today the School of Education's undergraduate programs are complemented by graduate studies offering both master's and doctoral degrees. The Marshall-Wythe School of Law, which originated in the Revolutionary era, offers the Juris Doctor degree. The School of Business Administration evolved from a program in business established in 1919 and now offers both undergraduate and master's degrees. The college's concern for the marine interest of the Commonwealth for almost half a century is expressed through research facilities as well as the master's and doctoral programs of the School of Marine Science. Where educational needs of the Commonwealth and institutional strengths coincide, the college has undertaken master's and doctoral programs in the arts and sciences.

The service of the college extends beyond its degree programs and the perimeters of its campus. The college's advanced research institutes further enrich its community of learning and provide the Commonwealth with the cultural and economic benefits of their research. In sponsored programs, conferences, and non-credit course offerings, William and Mary serves the needs of the wider public.

George Mason University

With the nation's capital at its doorstep, George Mason University is in the mainstream of the political, artistic, and professional life of the country. Established in 1957 under the aegis of the University of Virginia, the institution granted its first bachelor's degrees in 1968 and its first master's degrees in 1971. In 1972, the college became an independent institution. In 1979, the General Assembly authorized the acquisition of a School of Law and granted doctoral status to the university. The first doctoral degree was conferred in 1983.

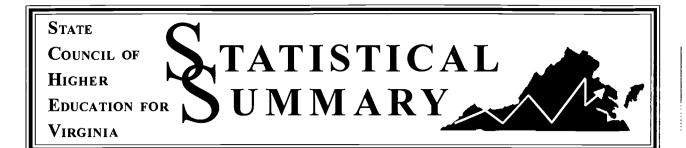

The university offers more than 100 undergraduate, graduate, and professional degrees, including the law degree, Juris Doctor. With 1,114 full and part-time faculty members, the university serves more than 20,000 students through the College of Arts and Sciences, the School of Business Administration, the Graduate School of Education, the School of Information Technology and Engineering, the College of Nursing and Health Science, the School of Law, the university programs in interdisciplinary and individualized study, and degree-granting institutes. The fall 1996 enrollment was 24,368, representing all 50 states, the District of Columbia, and numerous foreign countries.

George Mason is pursuing four complementary paths: creation of a strong and vital undergraduate program to ensure the full development of its students; anticipation of the needs of the future through an emphasis on high technology; exposition of the public-policy implications of new societal directions; and promotion of the cultural life of its students and the region through an emphasis on the performing arts and humanities. The university views research as an integral part of the educational enterprise, involving both students and the faculty. To encourage research, several interdisciplinary degree-granting institutes have been established to work in partnership with industry and other appropriate public and private organizations to advance science, computer technology, international affairs, social science, and the arts. The university is a partner in the development of the cultural and intellectual life of the surrounding community through, for instance, its Professional Development Center and the Institute of the Arts.

George Mason is exploring new approaches to a variety of needs: new curricula for undergraduates; new advanced degrees supportive of the information age; new openings on the cutting edge of telecommunications; new arrangements between the corporate world and higher education; new ways to serve the region's network of urban centers; and new cooperative arrangements with state government agencies and the private sector.

Campus developments throughout the region are planned in the cotext of a new concept of institutional growth, the "distributed university." This new arrangement is responsive to the changing face of urbanization, which emphasizes populations distributed throughout an entire region rather than concentrated in a central location. Programs in Arlington, Prince William, and Loudon counties will offer a full range of university services to support instructional, research, and service activities specifically designed to meet the particular needs of each site.

James Madison University

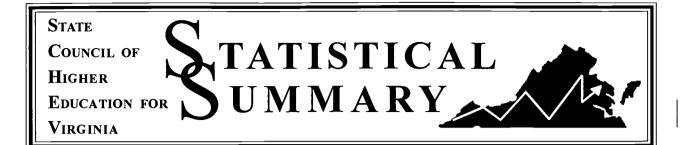

James Madison University was founded in 1908 by the Virginia General Assembly as the State Normal and Industrial School for Women at Harrisonburg. Authorization to award graduate degrees was received in 1954, and the institution became fully coeducational in 1966. In 1977, the General Assembly changed the name to James Madison University in recognition of its achievement of university status.

JMU's enrollment exceeds 13,000 on-campus students, 70 percent of whom are from Virginia. As a selective, predominantly undergraduate institution, the university offers a strong program of general studies that prepares students to major in the humanities, sciences, education and psychology, business, communication, the arts, and health and human development.

In carrying out this mission, JMU is committed to the following interrelated goals: (1) liberal education for all students; (2) the integration of liberal education into the university curriculum; (3) an extensive student-development program committed to affective learning through campus-centered programs; (4) learning experiences that provide students with a global consciousness in a rapidly changing and technologically oriented world; (5) a support system that presents an attractive campus environment, with prompt, personal responses to the needs of the university community; (6) a faculty committed to the effective transmission of knowledge, as well as to its creation, analysis, interpretation, and preservation; (7) graduate programs designed to serve the diverse and growing needs of the individual, the Commonwealth, and the region; (8) opportunities that provide professional growth for faculty and staff so that they can realize their full potential and contribute to the university and the education of a diverse student body; (9) accountability for the proper and wise use of resources through the application of effective evaluation programs; (10) a recognition that the university is composed of many constituencies who, as advocates, provide advice, support, and financial assistance.

In the interest of public service, James Madison University recognizes the growing educational needs of the adult population. The university expects to be comprehensive at the bachelor and master's levels in all areas where it traditionally has shown strength in contributing to the higher education objectives of the Commonwealth. The university has also initiated a Doctor of Psychology degree program. This interdisciplinary program in school and counseling psychology will emphasize strong analytical, interpersonal, and psychological skills and knowledge to address critical needs of the Commonwealth's children, adolescents, and families in school and clinic settings.

Longwood College

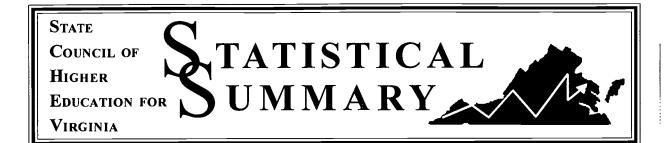

Longwood College, founded in 1839, is a medium-size, state-assisted, coeducational, comprehensive college offering programs leading to the bachelor's and master's degrees. Longwood offers courses both on the main campus and at educational sites in other locations.

The primary educational objective of Longwood College is to provide a baccalaureate and graduate degree curriculum distinguished by academic excellence. Longwood is oriented both to the liberal arts and to professional and pre-professional programs. Its strong commitment to the liberal arts is reflected in its general-education requirement for all students and in its sponsorship of degree programs in the humanities, fine arts, social sciences, natural sciences, and mathematics. In addition to its traditionally strong programs in health-related sciences, pre-engineering, and teacher education, the college offers professional and pre-professional programs in such areas as business, social work, and therapeutic recreation. Longwood also maintains cooperative programs with other institutions of higher learning.

The college also has a strong commitment to public service and economic development, primarily for the citizens of Southside Virginia. This is reflected in a wide variety of continuing education programs; the services of the Small Business Development Center; an extensive calendar of public lectures, concerts, art exhibits, and performances; provision of campus facilities for use by community groups; and the encouragement of community service by faculty, staff, and students.

Mary Washington College

Mary Washington College was founded in 1908 as the State Normal and Industrial School for Women in Fredericksburg. It was renamed Mary Washington College in 1938, after having undergone a transformation from a teacher's college to a public liberal arts college for women. In 1944, Mary Washington became affiliated with the University of Virginia as its women's undergraduate arts and sciences division. In 1970 the entire university became coeducational, and in 1972 the college became an independent, state supported institution for women and men with its own governing board.

The college is a predominantly residential, limited enrollment, undergraduate institution of the liberal arts and sciences. Mary Washington attracts students from all areas of Virginia, particularly the urban areas of Northern Virginia, Richmond, and Tidewater. Approximately 25 percent of its on campus resident students are from other states and countries. The college requires its undergraduates to pursue broad studies in the arts, humanities, and sciences as a necessary supplement to concentration in a particular field, and its curriculum reflects the high value it places upon cultural diversity and global awareness. The college regards the provision of high-quality instruction as its most important function. The role of faculty research and scholarly endeavor is to maintain the vitality of teaching and, accordingly, the college encourages such research and scholarship and the participation of undergraduates in them.

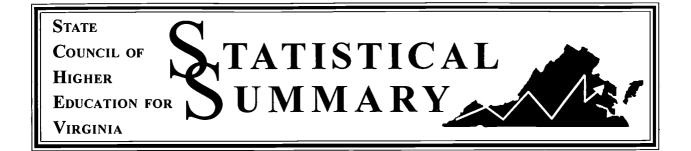

Located in the middle of a rapidly growing Washington-Richmond "urban corridor," Mary Washington also services the educational needs of both full-time and part-time commuting students, in part through the use of its resources in the evenings and on weekends. Its limited graduate offerings are designed in particular for part-time, commuting students, as is the Bachelor of Liberal Studies adult degree program.

The college is organized into academic departments of one or more disciplines and offers undergraduate programs in the liberal arts and sciences and compatible professional fields leading to the degrees of Bachelor of Arts, Bachelor of Science, and Bachelor of Liberal Studies. It also offers an interdisciplinary graduate degree, the Master of Arts in Liberal Studies, and brings selected graduate programs in the professions to Fredericksburg from Virginia's major research universities.

Mary Washington College is sensitive to the educational needs of the growing population within its commuting region. To address such concerns, it has established undergraduate and graduate degree programs designed especially for adult part-time students and have developed a number of public service activities to assist in meeting special community needs. As the focal point for the development of these programs for commuting students, the college has created a special division called the Center for Graduate and Continuing Education. The college has also initiated plans for an additional campus in nearby Stafford County. Pursuant to its own distinctive mission, that campus will be designed to offer appropriate programs as particular needs become manifest and will be developed as requisite funding becomes available.

Norfolk State University

Established in 1935, Norfolk State University is a coeducational, urban institution offering courses in the liberal arts and sciences, technology, nursing, and other fields leading to professional degrees at the associate, bachelor's, and master's levels. Enrollment at the university is approximately 8,300. Virginia residents comprise 72 percent of that number. Nearly 57 percent of the students are residents of Hampton Roads; the remaining students come from elsewhere in Virginia and the United States and from 30 foreign countries and territories. The student body ratio of men to women is approximately 1 to 2.

The university offers a broad range of academic disciplines, including journalism, mass communications, business, education, social work, and the natural and physical sciences.

At the bachelor's level, program emphases lie in the sciences, allied health professions, business, technology, education, performing arts, and social sciences. At the master's level, the institution continues to develop its human-resources programs, including urban affairs, social work, communication, community psychology, fine arts, and music, and has a newly developed program in chemical physics. The university offers a doctoral program in social work.

Norfolk State University has entered into extensive formal student-transfer agreements with all community colleges in Hampton Roads and elsewhere in Virginia. Transfer agreements also have been developed with Old Dominion University, Virginia Polytechnic Institute and State University, and Christopher Newport University. Moreover, the university is a partner in a doctoral program in clinical psychology with the Eastern Virginia Medical School of the Medical College of Hampton Roads, The College of William and Mary, and Old Dominion University.

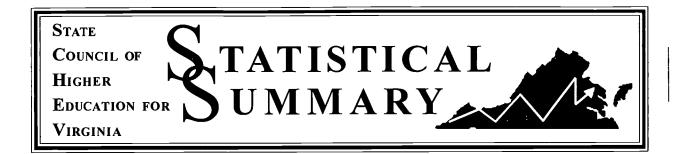

Through the years, Norfolk State University has enlarged its historical purpose of extending services to black Virginians to encompass all citizens. The university continues to identify and encourage non-traditional students seeking development of their full academic potential. A total of 4,913 students submitted applications for the fall 1996 semester. Of this number, 4,701 were accepted and 2,454 enrolled.

To address the severe shortage of minority scientists, Norfolk State University has established the Dozoretz National Institute for Minorities in Applied Sciences. Highly qualified and motivated students receive the best possible education in biology, chemistry, computer science, electronics engineering, mathematics, and physics.

Consistent with its mission, Norfolk State University places a high priority on classroom instruction, offering in-service training opportunities and convening national conferences on teaching dynamics and teacher training. While instruction will continue to receive attention, research activities are expected to expand with the university's growing emphasis on graduate education. A variety of funded and sponsored researches are underway, particularly in the areas of applied science, airway science, and social science.

Old Dominion University

Old Dominion University began formally in 1930 as the Norfolk Division of the College of William and Mary. Virginia Polytechnic Institute began offering freshman and sophomore level engineering courses at the Norfolk Division in 1931. The Division was authorized to offer bachelor's degrees in 1954. In 1962, the General Assembly made the institution independent, and the new Board of Visitors adopted the name of Old Dominion College. The College was designated Old Dominion University in 1969.

Old Dominion University takes its unique character from Hampton Roads, a major center for scientific and technological activities in marine science, aerospace, ship design and construction, advanced electronics, and nuclear physics; the locus of international commerce; and a home to national and international military commands and a culturally diverse population. Old Dominion has a significant commitment to the economic development of the region in science, engineering, technology, commerce and international affairs and cultures. As a metropolitan institution, the University also places emphasis on urban issues, including education and health care, and the fine and performing arts.

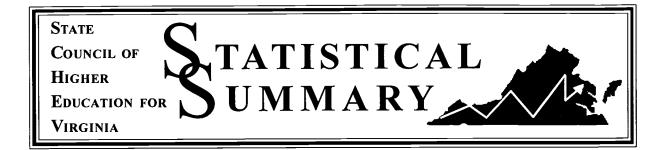

The University serves an undergraduate and graduate student body of over 16,000 in credit programs both on and off campus. The University seeks in its student body a diversity of age, gender, ethnic, religious, social, and national backgrounds. Old Dominion University recognizes its mandate to serve both the academically gifted and those who have the potential for academic success despite educational, social, or economic challenges. Approximately 80% of the undergraduates are full-time students and slightly more than 75% of the graduate students are part-time. Nearly 80% of the students reside within the University's service region. About double the number of those who enroll for credit courses take advantage of the University's non-credit public service programming annually.

The Colleges of Arts and Letters, Business and Public Administration, Education, Engineering and Technology, Health Sciences, and Sciences provide a wide array of baccalaureate degree programs and options. Collectively they offer baccalaureate and master's degrees in the arts, humanities, social sciences, business, international studies, natural and physical sciences, economics, education, engineering, computer science, public administration, urban studies, mathematics, statistics, and allied health professions. Two certificates of advanced study are available in educational leadership and counseling. Doctoral programs are offered in 18 areas. The quality of faculty research has been increasingly recognized in the form of substantial funding from such sources as the National Science Foundation, National Institutes of Health, Department of Education, and other similar agencies. In 1994/1995, research expenditures total approximately \$12 million.

Cooperative and joint degree programs have been developed with neighboring collegeand universities to take advantage of the rich educational resources available in the region, to avoid unnecessary duplication, and to respond to the advanced educational and research needs of the area's residents and communities. Articulation agreements have been initiated with all community colleges in the region and with several other across the state.

The University also has three extended campus centers in the Hampton Roads area, two centers operated in collaboration with Norfolk State University. The centers provide access to a broad range of graduate programs offered in the late afternoon and evening, upper-level

undergraduate courses, and non-credit continuing education. The University also has a significant presence at Langley Air Force Base and other military installations in the area.

Old Dominion University has also initiated, through TELETECHNET, distance education degree programs in engineering, nursing, and engineering technology using televised instruction in the greater Hampton Roads area, the Eastern Shore, Roanoke, Richmond, and in northern and south side Virginia. By 1996-97, students served by televised instruction is expected to increase to 4,500.

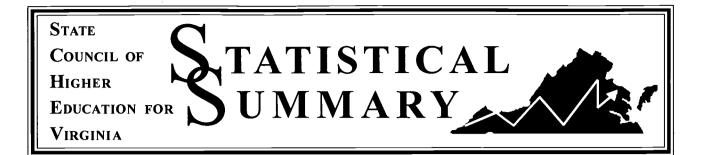

Radford University

Radford University, with an enrollment of approximately 8,500 students, is a medium-sized university located in a small city in the New River Valley, close to the Blue Ridge Mountains. Most students live in university residence halls or in private accommodations within walking distance of the campus. Undergraduate majors are located in the colleges of Arts and Sciences, Business and Economics, Education and Human Development, Nursing and Health Services, and Visual and Performing Arts. The Graduate College offers programs of study at the master's and specialist levels.

The following institutional goals reflect the university's mission and provide a quide for the development of programs and services: (1) To foster standards of excellence in curriculum and instruction at both the undergraduate and graduate levels; (2) To provide a coherent general-education curriculum emphasizing the communication and analytical skills essential for education citizens; (3) To provide opportunities for multicultural studies and development of global knowledge and experience, and to encourage programs that promote an appreciation of cultural diversity; (4) To create an atmosphere that ensures freedom of inquiry in the teaching and learning process; (5) To promote the development of intellect and aesthetic appreciation through a wide variety of formal and informal academic and cultural opportunities; (6) To emphasize and reward exemplary teaching and, con-currently, to encourage faculty research and other professional activities and contributions; (7) To preserve the highest standard of excellence among the faculty and staff; (8) To provide advising, counseling, and academic-support services to assist students in meeting their educational goals; (9) To provide programs, services, and opportunities that promote student development and enhance the collegiate experience; (10) To promote responsible citizenship; (11) To promote the recruitment and retention of a diverse student body, faculty, and staff; (12) To promote widespread participation of the faculty, students, and staff in the affairs of the institution; (13) To develop effective, flexible, and distributed systems of informationtechnology resources; (14) To assess program effectiveness in order to improve the teaching and learning process; (15) To promote cooperative relationships with other educational institutions, businesses and industry, governmental agencies, and community groups to enhance lifelong-learning opportunities at the local, state, national, and international levels.

University of Virginia

The University of Virginia is a major national research university founded in 1819. The fall 1996 enrollment of the university is over 21,000 students, almost all of its students enrolled full-time. Of this total, approximately 13,100 are undergraduates, 8,400 are graduate students, and 1,800 are first professional students.

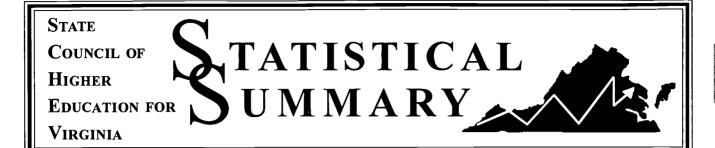

The university is composed of the College of Arts and Sciences and the schools of Architecture, Commerce, Education, Engineering and Applied Science, Graduate Arts and Sciences, Graduate Business Administration, Law, Medicine, and Nursing. The Division of Continuing Education provides courses for part-time students at seven locations throughout the Commonwealth. The University of Virginia Health Sciences Center, which offers students in the health sciences a variety of settings in which to learn, also provides health care through its hospitals and clinics. The university carries out research activities in a wide variety of disciplines. Most are federally or privately funded: the university's annual expenditure for sponsored programs is \$105.8 million.

Thomas Jefferson's university, one of exceptional architectural design, was conceived in the early 19th century to be a university, not a college. It was to be the capstone of public education in the nation. In this "academical village," students and faculty were to live and learn together in an orderly and serene environment, with a curriculum designed to promote learning in all the "useful sciences" and to produce thoughtful, articulate, and public-spirited young leaders. Thomas Jefferson's university also embodied his understanding of and faith in change.

Within recent generations, the university has broadened its vision to embrace many new branches of knowledge while diversifying its community of learners to include women, persons of all races and ethnic backgrounds, and international and non-traditional students. The university's challenge in the 1990's is to reconceive the Jeffersonian idea of the academical village for the year 2000 and beyond. The university must prepare individuals for a world characterized by heterogeneous and increasingly interdependent societies, a complex global economy, dramatic political shifts, rapidly developing technology, environmental concerns, and a knowledge base swiftly expanding in range and volume.

The university must continue to strive for the eminence as a center of higher learning as a balanced enterprise involving education, research, and service. This requires that we build deliberately upon our present disciplinary and interdisciplinary strengths and that we move, with equal deliberation, into selected new areas of inquiry and into collaborative partnerships with other institution. It requires also that we reflect critically on what we currently do, to ensure that we not do it if we cannot do it well. As an institution committed to maintaining its moderate size, the university cannot hope to be truly comprehensive in academic scope.

Virginia Commonwealth University

Virginia Commonwealth University was created by the General Assembly on July 1, 1968, with the merger of the Medical College of Virginia (founded in 1838) and the Richmond Professional Institute (founded in 1917) as an urban research university housed on two campuses and located in a metropolitan center that is also the capital of the Commonwealth.

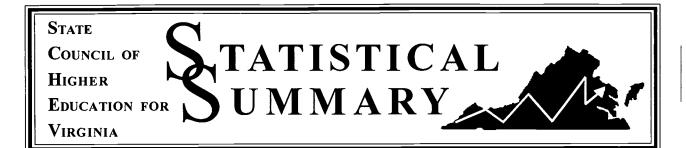

VCU enrolls approximately 22,000 students, over 90 percent of who are Virginians, and 64 percent of who attend the university full time. The university is expected to grow to approximately 25,000 students. Students are enrolled in a wide variety of baccalaureate, master's, doctoral, and first-professional degree programs offered through the College of Humanities and Sciences and 11 professional schools: Allied Health Professions, Arts, Basic Health Sciences, Business, Community and Public Affairs, Dentistry, Education, Medicine, Nursing, Pharmacy, and Social Work. VCU also operates the fourth largest health-sciences complex in the nation, including a major teaching hospital. Joint instructional programs with the University of Richmond, the University of Virginia, Virginia Polytechnic Institute and State University, Old Dominion University, and Virginia State University enhance this broad span of disciplines.

The university is committed to two primary educational objectives: 1) to provide society with educated professional practitioners who have the capacity to deal with the specialized problems of their disciplines and who also possess the attributes of broadly educated persons; and 2) to provide advanced study for practicing professionals and broad educational opportunities for adult, part-time students.

Goals of the university include providing high-quality undergraduate, graduate, and professional programs; fostering a scholarly climate; expanding the boundaries of knowledge; promoting racial and cultural diversity; developing and sustaining a high-quality faculty; providing an optimal environment for high-quality health care; using the urban environment as a laboratory; supporting the liberal, visual, and performing arts; developing innovative continuing education programs; offering diverse opportunities for all qualified students; promoting interdisciplinary studies; and mobilizing its creative energies to serve society as Virginia's major urban university.

Important commitments to research and public service balance the university's commitment to its instructional mission. Teaching has always played an important part in the culture of VCU. More than most major universities, VCU recognizes the value of teaching. At the same time, scholarship in all its forms is seen as an inseparable component of the teaching-learning process. Scholarly activity at VCU not only enhances teaching at all levels, but also enables the university to disseminate to society the results of its scientific, cultural, and professional inquiries. In addition, as an urban university, VCU has a particular obligation to public service, from patient care in the hospitals, to partnerships with the community in exploration of societal issues, to mutual endeavors with the public schools in addressing the educational needs of the children of central Virginia. While the university maintains a balanced commitment to instruction, research, and public service, individual faculty and staff are encouraged to address these functions as most appropriate to the mission and goals of their departments and disciplines, and to their own professional interests and abilities. Thus the multiple missions of VCU are attended to differently by different individuals.

Virginia Military Institute

The Virginia Military Institute, a four-year undergraduate military college for men and women, was founded in 1839 as the nation's first state military college. Today, VMI offers a unique learning environment, the result of more than 150 years of educating citizen-soldiers, preparing them for leadership roles in society and for military leadership in time of national need. VMI cadets form a military corps, with the Governor as commander-in-chief. Applicants, who are academically and physically qualified, and able to participate in all aspects of cadet life, are accepted for admission. Sixty-three percent of the cadets are residents of the Commonwealth. VMI also accepts young men and women from the other forty-nine states and the U.S. territories, as well as foreign students.

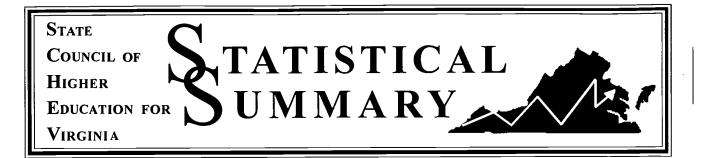

Academic majors at VMI lead to a Bachelor of Arts or Bachelor of Science degree in one of 15 disciplines in the general fields of engineering, liberal arts, and science. In addition, all cadets must complete Reserve Officers Training Corps (ROTC) programs established and maintained by one of the four Armed Services. Graduates who have successfully completed the ROTC requirements, and offered an armed forces commission by one of the services, are encouraged to accept that commission, which carries with it an obligation for various combinations of active and reserve duty.

VMI's primary purpose is the thorough education of young men and women within a framework of military discipline. VMI combines an intellectually enriching program of college studies with the character building experience of cadet life. The college emphasizes the intellectual, personal, physical, and leadership development of its students.

All VMI cadets live in the barracks, eat together in the mess hall, and wear the historic gray cadets uniform. Traditions and rules of the Institute regulate daily life and the cadets' conduct and activities are measured against high standards set by fellow cadets. Undergirding all of this is the cadet honor code to which all cadets subscribe, whether in or out of the barracks and classroom. Cadet life is designed to instill in each cadet the lifelong practice of integrity, devotion to duty, self-discipline, and self-reliance. Because cadets live and work in close association, respect for the rights of others and the strong bonds of loyalty become the way of life.

About 10% of the faculty and many cadets are involved in studies sponsored by state, federal, and private grants. As part of its public service commitment, VMI provides many academic, athletic, recreational, and physical training programs and facilities to the community. Non credit short term courses and seminars are held annually for specific interest groups. Many cultural programs give support to VMI s academic efforts and, because they are open to the public, add substantially to the institute's community service. Faculty and staff members serve on many state boards, community boards, and committees.

Virginia Polytechnic Institute and State University

Virginia Polytechnic Institute and State University, a publicly supported, comprehensive, land-grant university, serves the Commonwealth of Virginia, the nation, and the international community by generating and disseminating knowledge in the humanities, arts, social sciences, scientific, and professional disciplines through instruction, research, and extension. The university instills within each member of the university community an appreciation of the values and obligations of productive citizenship and the responsibilities of leadership while promoting personal and intellectual development. Its scholastic programs are accessible to all that demonstrate academic merit to gain entrance.

To achieve this mission, as the university moves toward the year 2000, it will identify and build on strengths across the university, forge innovative and mutually productive relationships with industry and government, manage resources efficiently, and establish a clear identity as a forward-thinking, high-quality institution that systematically guides and evaluates its future.

Virginia State University

Virginia State University, America's first fully state-supported four-year institution of higher learning for blacks, is a comprehensive university and one of two land-grant institutions in the Commonwealth of Virginia. Its mission is to promote and sustain academic programs that integrate instruction, research, and extension/public service in a design most responsive to the needs and endeavors of individuals and groups within its scope of influence. Ultimately, the university is dedicated to the promotion of knowledgeable, perceptive, and humane citizens--secure their self-awareness, equipped for personal fulfillment, sensitive to the needs and aspirations of others, and committed to assuming productive roles in a challenging and ever-changing global society.

Richard Bland College of The College of William and Mary

Founded by an Act of the General Assembly in 1960, Richard Bland College was established as a two-year branch of the College of William and Mary to provide opportunities for higher education to the citizens of Southside Virginia. Richard Bland College today continues to be governed by the Board of Visitors of the College of William and Mary. Approximately 1,300 on- and off-campus undergraduate students are enrolled; over 97 percent are Virginia residents.

The college consists of the divisions of Business and Computer Science, Humanities and Fine Arts, Life Sciences, Mathematics and Physical Sciences, and Social and Behavioral Sciences. The institution offers the Associate of Arts, Associate of Science, and Associate of Science in Business degrees. About 90 percent of the institution's students are enrolled in programs in the arts and sciences, with the remainder in business. Although semiprofessional skills are developed in appropriate programs, the college's curricular emphasis is on general-education courses offered during the first two years of a baccalaureate-degree program. Developmental programs are provided for students who need to improve skills necessary for success in college. Richard Bland College believes that its uniqueness in the state system of higher education lies in its continuing concentration on the preparation of its students for transfer to a senior institution, particularly those institutions with which it has signed articulation agreements. The College of William and Mary has a special transfer relationship with Richard Bland College.

As would be expected in a junior college, the major focus of the institution is instruction. Research activities are generally limited to efforts by individual faculty members to strengthen their academic specialties. Richard Bland College provides community services and educational resources throughout the area. Many community and state organizations use college facilities. The college provides various testing services, including the Scholastic Aptitude Test, and offers Saturday enrichment programs for area public- and private school students every semester. The college is also actively engaged in programs associated with gifted children and accelerated high-school students. An integral part of the mission of Richard Bland College is to provide cultural events and opportunities to its students and to the greater community. More than 30 cultural events were sponsored in whole or in part by Richard Bland College during the last academic year.

Virginia Community College System

The Virginia Community College System functions within the educational community to assure that all individuals in the diverse regions of the Commonwealth of Virginia are given a continuing opportunity for the development and extension of their skills and knowledge through quality programs and services that are financially and geographically accessible.

The Virginia Community College System, through 23 comprehensive community colleges, provides leadership in determining and addressing both the needs of individuals and the economic needs of the colleges' service areas.

Occupational/technical education, transfer education, developmental studies, continuing education, and community services are the primary avenues through which the mission is fulfilled. To assure that all students have the opportunity for success, each college provides a comprehensive program of student development services.
