ABSTRACT

The 1997-98 school year was the 18th year of statewide student testing under the Arizona Student Achievement Program mandated by Arizona law. For the 1997-98 school year, students in grades 3 through 12 were tested using the Stanford Achievement Test, Ninth Edition (Stanford 9). This test was administered statewide to 536,254 Arizona students in the spring of 1998. Three subtests (reading, language, and mathematics) were administered to all students. This report provides school, district, county, and state level scores representing typical student performance on the Stanford 9. Sections A, B, and C provide tables of scores, one for each of the three subjects. The scores are individual percentile ranks that indicate the estimated percentage of students nationally scoring equal to or lower than the average performance indicated for a school, district, county, or state. (Contains three tables.) (Author/SLD)

Introduction

This is the eighteenth year of statewide student testing under the Arizona Student Achievement Program. To fulfill the requirements of the Arizona Revised Statutes Section 15-741 through 744, a nationally standardized, norm-referenced achievement test in the subjects of reading, language and mathematics must be adopted and implemented for use in Arizona schools.

For the 1997-98 school year, students in grades 3 through 12 were tested using the *Stanford Achievement Test*, Ninth Edition (Stanford 9). This test was administered statewide to 536,254 Arizona students in grades 3-12 during the spring of 1998. Three subtests in the academic content areas of reading, language and mathematics were administered to all students.

This *State Report Appendix* provides school, district, county and state level scores representing typical student performance on the 1997-98 administration of the Stanford 9. Sections A, B and C provide separate scores, one for each subject tested. The three scores cannot be averaged together to produce one overall score for a school, district, county or the state. The scores are called *individual percentile rank scores* and indicate the estimated percentage of students nationally scoring equal to or lower than the average performance indicated for a school, district, county or the state.
