IDENTIFIERS *Jefferson College MO

ABSTRACT

This fall 1997 report describes student characteristics, enrollment, test scores, and outcomes at Jefferson College, Missouri. Statistics are grouped into seven sections. In the Admissions area, sixty-nine percent of students graduated from an in-county high school or General Equivalency Diploma (GED) program. Regarding Total Student Body, for the second year in a row, enrollment increased slightly to 3,963 (29 more students than fall 1996), student credit hours decreased by 118 to 38,188, part-time student enrollment increased slightly, and the number of full-time and full-time equivalent students has stabilized. The Degree-Seeking Students section states that there are fewer degree-seeking freshmen. Area Vocational School experienced enrollment growth in both high school- and college-level programs. The Standardized Testing section reports that average ACT scores for freshman dropped slightly to 19.5, although this average is as high or higher than public two-year institutions in Missouri. Also, Jefferson students score as high or higher than peers on ASSET testing, the CAAP test, and the CBASE. With regard to Student Outcomes, seventeen percent of students earn a certificate or associate's degree, or complete a program each year. In fall 1996, 311 Jefferson students transferred to other Missouri institutions. In 1996, ninety-seven percent of vocational-technical graduates were employed 180 days after graduation. Enrollment statistics for Jefferson College at Arnold are offered in this final section, stating that approximately 40% of the college's student body enrolled in course work there. (Contains 29 tables and 16 figures.) (RDG)

Fall 1997 Factbook

Volume I

Student Characteristics

For the second year in a row, student enrollment has increased slightly to 3,963, 29 more students than last fall. However, there were 118 fewer student credit hours (38,188 total SCH) generated as of census date. The increase in enrollment is attributed to two factors: the increase in returning sophomores (812 this fall -- 52 more than last year) and an increase in dual-enrolled high school students (555 as of census reporting -- 86 more than last year).

The percentage of in-county high school graduates continues to increase. For the Fall 1997 term, fully 69% of the student body has graduated from a Jefferson County high school or the GED program. The number of full-time students has remained stable (1,846 last fall compared with 1,848 for Fall, 1997), but the number of part-time students has increased for the second year in a row (2,115 in Fall, 1997, compared with 2,088 last fall).

Full time equivalent students (FTE) have also been stabilizing over the past three fall terms (2,500 in Fall, 1995; 2,554 in Fall, 1996; and 2,546 in Fall, 1997)

The student body is becoming less female (56.8% this fall) and younger (average age is 25.2 for Fall, 1997). The decrease in degree-seeking freshmen is offset by the increase in non degree-seeking freshmen. Total fall enrollment appears to have stabilized although it is still six percent less than it was at its highest point in Fall, 1992.

The Area Vocational High School continues to experience enrollment growth. This fall, there are 176 students enrolled in the high school level programs and 196 enrolled in the college level programs from ten county high schools. One new program has been added to the AVS curriculum this year and an additional section added to another program to meet the increasing demand.

Enrollment and credit hours have also been increasing at Jefferson College Arnold for the last three school terms. Arnold recorded an enrollment of 1,612 students and accounted for nearly 13% of all student credit hours generated in the Fall, 1997, school term.

Although the average ACT scores of entering freshmen dropped nearly one point to 19.5 this year, incoming freshmen at Jefferson still average as high or higher than those at all Missouri public two-year institutions. On ASSET testing for course placement, entering freshmen continue to score higher than their peers across the nation. Outcomes assessments also reveal that Jefferson graduates score as high or higher than their peers on the CAAP test, and their passing rates on the CBASE continue to match or exceed those of students at other Missouri institutions.

A substantial percentage of the student body (approximately 17% or 676 last year) earn awards each year, and according to the Coordinating Board for Higher Education, 311 Jefferson students transferred to other Missouri colleges and universities in the Fall of 1996. Finally, the job placement rates for Jefferson vocational-technical graduates remains very high. Last year, 97% of vocational-technical graduates were employed 180 days after graduation -- 94% in field related positions.

Source: SRR100, 9/9/97 (and previous census dates)

Fall enrollment has increased slightly for Fall, 1997, although it is still less than the highest level attained in 1992. The enrollment of full-time students has been relatively stable while the enrollment of part-time students is beginning to rebound. The increase this Fall is due to the increase in part-time students

This chart visually depicts the enrollment trends for the past eight years. The proportion of full-time to part-time students has remained relatively constant over the eight year period.

Note: Average Age = 25.2 for Fall 1997

Source: RTK01-972 and previous

Average Male Age, Fall, 1997 = 23.8

Average Female Age, Fall, 1997 = 26.3

The largest portion of the student body is traditionally less than 20 years old. This portion has been increasing for the past six years. The average age of the student body continues to decrease from 27.5 in Fall, 1992, to 25.2 in Fall, 1997; but note the average age for females (26.3) as opposed to males (23.8).

2.4 Student Ethnicity

Ethnicity	Fall Terms

Source: RTK01-972 and previous

The student body at Jefferson College remains predominately white, reflecting the ethnic makeup of the county. However, ethnicity is one of the self-reported student characteristics that is considered to be a "very soft" data element and subject to revision after census date.

2.5 Total Enrollment by Class

Fall Term	Freshman	Sophomore	Other	Total
1991	2,781	1,078	218	4,077
1992	3,233	668	309	4,210
1993	2,817	778	348	3,943
1994	2,939	644	379	3,962
1995	2,828	608	347	3,783
1996	2,825	760	349	3,934
1997	2,818	812	333	3,963

Source: Census date SRR100 reports

2.6 Degree-Seeking Enrollment by Class

Fall Term	Freshman	Sophomore	Other	Total
1991	1,708	886	99	2,693
1992	2,014	555	248	2,817
1993	1,983	672	275	2,930
1994	2,044	558	291	2,893
1995	1,945	533	265	2,743
1996	1,909	666	282	2,857
1997	1,688	722	270	2,680

Source: Census date SRR100 reports

2.7 Non Degree-Seeking Enrollment by Class

Fall Term	Freshman	Sophomore	Other	Total
1991	1,073	192	119	1,384
1992	1,219	113	61	1,393
1993	834	106	73	1,013
1994	895	86	88	1,069
1995	883	75	82	1,040
1996	916	94	67	1,077
1997	1,130	90	63	1,283

Source: Census date SRR100 reports

Student "class" refers to the number of credit hours earned. Freshman class means that a student has accumulated fewer than 30 credit hours.

Sophomore class means between 30 and 60 credit hours accumulated. "Other class" means the accumulation of more than 60 credit hours. For the second year in a row, there is an increase in sophomores enrolled in the Fall.

Degree-seeking students are those who intend to earn a formal award at Jefferson College including associate degrees, certificates, and departmental awards. The increase in degree-seeking sophomores is 56, although there are 177 fewer degree-seeking students in all.

Conversely, there is an increase of 206 non degree-seeking students this school term. Non degree-seeking students include those who intend to transfer to another institution without graduating from Jefferson, those who attend for personal interest or for upgrading job skills, and dually-enrolled high school students.

2.8 Percent of Change in Class Status

Enrollment Category	Freshman	Sophomore	Other	Total
Total				
Fall '96 - Fall '97	-0.2%	6.4%	-4.8%	0.7%
Fall '92 - Fall '97	-14.7%	17.7%	7.2%	-6.2%
Degree-Seeking				
Fall '96 - Fall '97	-13.1%	7.8%	-4.4%	-6.6%
Fall '92 - Fall '97	-19.3%	23.1%	8.1%	-5.1%
Non Degree-Seeking				
Fall '96 - Fall '97	18.9%	-4.4%	-6.3%	16.1%
Fall '92 - Fall '97	-7.9%	-25.6%	3.2%	-8.6%

Note: (1) Formula for calculating percent of change = (second value - first value)/second value)

(2) Percent of change is calculated from the term of highest enrollment (Fall 1992),

with Fall, 1997, and from the previous Fall term, with Fall, 1997.

The last table shows the percent of change in class status for Fall to Fall enrollment 1996 to 1997, and for 1992 to 1997. Fall 1992 is chosen as the term of highest enrollment at Jefferson. Re-enrollment of sophomores accounts for the largest increase in degree-seeking students, while freshman enrollment accounts for the largest increase in non degree-seeking students.

Source: RTK01_972 and previous term reports

Most students who enroll at Jefferson College intend to earn an associate degree. Students seeking certificates also account for a substantial portion of the student body, although there is a notable decrease in these categories this Fall term. The enrollment of dual-enrolled high school students continues to grow. This group now accounts for 14% of the total student body.

The chart on the left depicts the distribution of the Fall, 1997, student body by educational intent. The largest categories are those pursuing associate-level degrees, followed by the high school dual-enrollment program, and certificate-seeking students.

Change:			
Sum. 1992 - Sum. 1997	-28.8%	-34.3%	-34.4%
Fall 1992 - Fall 1996	-5.9%	-12.5%	-12.4%
Spr. 1992 - Spr. 1997	-13.7%	-14.1%	-14.0%

This table presents an historical overview of the headcount, credit hours, and Full-Time Equivalent (FTE) students at Jefferson College for the past seven academic years.

The trend over this period has been downward. The biggest decreases occurred between the academic years 1992-93 and 1993-94. Since then, there have been fluctuations in term enrollment. The Summer sessions have decreased the most while Fall enrollment has decreased the least.

The "change" rows at the bottom of the table show that the gap from the peak year, though decreasing, remains substantial. Since tuition and fees account for a substantial portion of the college's Education & General budget, the stabilization and growth of student credit hours is an important objective to pursue.

Source: Census date SRR100 reports from Registrar's office.
 Notes: Fall and Spring FTEs are derived by dividing the total credit hours by 15.
 Summer FTEs are derived by dividing the total credit hours by 6.
 Annual FTE is calculated as the total annual credit hours divided by 30.

2.11 Headcount Enrollment and FTE by School Term

The chart on the left visually depicts the enrollment fluctuations by school term. Fall is the term of highest enrollment followed by Spring and Summer. FTE mirrors headcount enrollment. The five year trend shows fluctuations in Fall enrollment but continual decreases in Spring and Summer until last year.

2.12 Percent of Change in Headcount, Credit Hours, and FTE

School Term	Headcount	Credit Hours	FTE
Sum. '96 - Sum. '97	6.3%	0.4%	0.4%
Sum. '92 - Sum. '97	-40.5%	-52.3%	-52.4%
Fall. '96 - Fall '97	0.7%	-0.3%	-0.3%
Fall '92 - Fall '97	-6.2%	-14.2%	-14.2%
Spr. '96 - Spr. '97	4.5%	3.4%	3.5%
Spr. '93 - Spr. '97	-7.8%	-10.9%	-10.9%

Note: (1) Formula for calculating percent of change is:

$$\frac{\text{second value} - \text{first value}}{\text{second value}}$$

 (2) Percent of change is calculated from the year of highest enrollment (FY '91-92) with the most recent term, and from the previous term with the most recent term.

This table summarizes the percent of change in the last year and in the last six years by school term. The Fall term has generally been the least affected.

Source: RTK01 census data files

The percentage of in-county students continues to increase and has reached its highest level since 1991. Nearly seven out of every ten students graduated from county schools. The high percentage (20.8%) of students from "other" high schools outside of our immediate geographical area is no doubt related to the in-migration patterns that have contributed to the county's growth in the last two decades.

2.14 High School Locations of Enrolled Students, Fall 1997

A substantial number of students from every county high school are enrolled at Jefferson College. The high number of "other high schools" reflect the in-migration patterns of persons into Jefferson County. It is also noteworthy that the G.E.D. program administered through the College also accounts for a substantial number of student enrollments at the College.

Source: RTK01_972

Note: Ethnicity is self-reported and considered to be "soft" data subject to revision.

Part-time enrollment of degree-seeking students dropped by 152 in the Fall 1997 term. Full-time degree-seeking students now account for 59% of the total for this group.

The gender of degree-seeking students is similar to that of the entire student body. The proportion of male students is increasing.

Compared to the entire student body, there is a higher percentage of degree-seeking students in the 20-24 age range. The average age of this group, however, is comparable to that of the entire student body.

Ethnicity is considered to be "very soft" self-reported data. Nevertheless, the ethnic composition of degree-seeking students is quite similar to that of the entire student body.

Source: Vocational Resource Educator and Program Secretary, Area Vocational School

The area vocational school enrollment continues to grow. In the fall of 1997 there were 176 students enrolled in the high school level programs and 196 in the college level programs.

One new program was added to the AVS curricula at the college level this year - Civil/Construction Tech. Additionally, a second section of Computer Programming was added.

The need for AVS programming has been so great that it is outgrowing its antiquated building. With the cooperation of the participating local school districts, the Jefferson College Foundation, and the state of Missouri, a new AVS building will be constructed on campus in 1998 and 1999 to meet the increasing demand.

Two new schools are sending their students to the AVS: Kingston and Seckman (a second high school in the Fox School District). Currently these schools have grades nine through eleven. During the 1998/1999 school year, each of these schools will be operating with grades nine through twelve.

3.14 Enrollment by Home School - High School Level Programs

High School	Students Enrolled	Enrollment Quota	Per Cent of Utilization
Crystal City	7	9	78%
De Soto	37	31	119%
Festus	16	26	84%
Fox	20	55	36%

Total	196	236	83%

Source: Vocational Resource Educator and Program Secretary, Area Vocational School

High schools are allocated a number of enrollment slots for both the high school and college-level programs. As the two tables to the left show, some schools are able to overutilize the enrollment quotas when they are underutilized by other schools. More importantly, there is participation at both program levels by all area high schools.

Fall 1997 Factbook: Volume I, Student Characteristics

Section 4: Area Vocational School

3.16 High School Program Enrollments by High School

Source: Office of Research & Planning

3.17 College Level Program Enrollments by High School

Source: Office of Research & Planning

The two pie charts to the left graphically depict the distribution of area vocational school students by program level and by home school. In general, the distribution of students is relative to the size of the home school.

4.1 ACT Scores for 1996-97 Enrolled Freshmen

ACT Testing

Mean Scores 1996 - 1997

Notes: Scale of scores is truncated for clarity. ACT scale scores range from 1 to 36. Scores are for enrolled freshmen. Sample Sizes: Jefferson = 484; Mo. Pub. 2-Yr = 8,299; Mo. Pub. 4-Yr = 24,051; National = 544,587.

Sources: ACT High School Profile Reports for : Jefferson College 1996-97 Freshmen; Mo. Public Jr. Colleges 1996-97 Freshmen; Mo. Public Colleges and Universities 1995-96 Freshmen; and National Enrolled Freshmen Class of 1996-97.

Although an admissions test is not required for enrollment at Jefferson College, an increasing number of new freshmen (484 in 1996-97) are taking the ACT test. The chart on the left shows that, although the ACT scores of Jefferson freshmen dropped approximately one point last year, Jefferson College students score higher, on average, than their counterparts in all Missouri public two-year institutions.

4.2 ASSET Course Placement Assessments

ASSET Testing Mean Scores

Note: Scale is truncated for clarity. ASSET scores range from 23 to 55.

The ASSET test is administered to most new students to assist with appropriate course placement. Jefferson College students typically average higher scores on the Reading, Writing, Numeric, and Intermediate Algebra subtests than their counterparts in all other Missouri institutions. Jefferson students also average scores as high as, or higher than, all students across the nation.

4.3 CAAP Outcomes Assessments

CAAP Testing Mean Scores

Note: Scale is truncated for clarity. CAAP scale scores range from 40 to 80. The difference in mean math scores is significant beyond the .05 level of confidence. The user norms for the 2 Yr. Public Colleges are from ACT in November, 1995. Sample sizes: Jefferson College = 1,680; 2 Yr. Public Colleges = 17,413.

The CAAP test is administered to graduating students as a measure of student general education outcomes. The average scores of graduating students at Jefferson for the past six years have been slightly higher than those of all students tested across the nation. Although the differences are not statistically significant, they denote a positive trend.

4.4 CBASE Testing - Passing Rates By Subject

CBASE Passing Rates

Percent Passing on First Attempt

Source: Assessment Resource Center, University of Missouri - Columbia, 7/23/97.
 Sample sizes are: Jefferson = 375; Mo. 2 Yr. = 3,517; Mo. Public = 41,109.

The CBASE test is an assessment of general education outcomes that is taken by many of Jefferson's pre-education majors prior to transferring to a four-year institution to complete a bachelor's degree program in education. One measure of success on the CBASE test is the comparison of the percentage of students who pass the test on the first attempt. The chart on the left reveals that Jefferson students have a higher passing rate on the first attempt on the English, Writing, Math, and Science sections of the test than their peers across the state. Their passing rate on the Social Studies section is equal to that of their peers in two-year public colleges across the state.

5.1 Awards Conferred

Award Type	FY	FY	FY	FY	FY	FY
	91-92	92-93	93-94	94-95	95-96	96-97
Program Completers	n/a	n/a	n/a	n/a	125	129
Certificates (1)	331	316	377	238	112	138
Associates Degree	423	423	398	419	398	409
Total Awards	754	739	775	657	635	676

Source: Computer Services files GRX01, and degSRR31.961, 962, and 973

(1) Note: Program completers and certificates were combined prior to FY 95-96 in this table.

Approximately 17% of enrolled students earn an award at Jefferson each year. The number of total awards is increasing as the college's enrollment again increases.

This chart visually depicts the proportion of the various award categories by year. Note that prior to 95-96, the categories of program completers and certificates were combined in the representation of the data.

5.2 Degree-Seeking Transfer Students Enrolled in Other Institutions in Missouri

Institution	Fall 1992	Fall 1993	Fall 1994	Fall 1995	Fall 1996
University of Missouri - Columbia	15	13	15	19	16
University of Missouri - Rolla	18	15	14	9	15

Maryville College	23	17	0	13	4
Missouri Baptist College	13	26	34	34	28
Webster University	10	14	9	21	12
All Others	48	44	82	43	69
Total	331	308	315	340	311

Source: Missouri Coordinating Board for Higher Education, Statistical Summary of Missouri Higher Education, 1996-1997. Tables 64.1, 64.2

CBHE provides information on first-time, full-time, degree-seeking students who transfer to other institutions within the state.

In the Fall of 1996, 65 Jefferson College students transferred to the University of Missouri system; 84 to other four-year public institutions; 83 to independent institutions; and 79 to other two-year colleges.

Conversely, although these data are not shown here, a total of 158 students transferred to Jefferson College from other Missouri institutions (139 students transferred from other public institutions and 19 from private institutions).

Fall 1997 Factbook: Volume I, Student Characteristics

Section 6: Student Outcomes

5.3 Percent of 1996 Degree and Certificate Graduates Available for Placement and Employed

Job placement of Vocational-Technical graduates remains very high. Annual job placement has exceeded 94% for the past eleven years. This year's overall job placement rate is 97% (94% in jobs related to their field of training, and 3% in jobs not related to their field of training).

5.4 Historical Vo-Tech Job Placement Rates

Academic Year	Employed		Total Placement Percentage
	Related	Not Related	
1996	93%	4%	97%
1995	94%	6%	100%
1994	90%	9%	99%
1993	89%	9%	98%
1992	83%	15%	98%
1991	84%	10%	94%
1990	92%	6%	95%
1989	92%	7%	99%
1988	93%	4%	97%
1987	93%	6%	99%
1986	91%	5%	96%

Source: Career Services Office

Historically, placement of Jefferson College Vo-Tech graduates has been very high. In the past eleven years, the total placement rate has never been lower than 94%. Even in years when employment opportunities have been lessened by economic conditions, the total employment rate of Vo-Tech graduates has been very high.

Historical Vo-Tech Job Placement

The job placement rates for Vo-Tech graduates in related and non-related fields is visually depicted in the chart on the left.

5.5 Beginning Wage Data -- 1995 Graduates

SOURCE: Career Services Office

Only programs with sufficient entry-level wage data are listed. One should be cautioned against drawing any conclusions on wages for programs listing small numbers of students surveyed. Also, when there is a wide range of wages, one or two figures can skew the average considerably in either direction. Finally, students accept jobs for reasons other than wage alone (e.g. distance from home, benefits, advancement opportunities, etc.).

Nevertheless, it is apparent that graduating Vo-Tech students are well compensated initially and will earn substantially more than their counterparts who receive less training.

The attendance center at Arnold significantly impacts the total enrollment and credit hour generation of the college. In spite of the inherent facility limitations,, annual enrollment continues to approximate 3,000 and generates 9,000 credit hours annually. Since Arnold is officially an attendance center, (lacking comprehensive curricular offerings), most students are part-time. During the past seven years, as depicted in the table, approximately 40% of the college's student body enrolled in course work at Arnold.

Note (1): Does not include classes that were cancelled.
Note (2): Headcount is not unduplicated. Some students take courses at both campus locations.

Fall 1997 Factbook: Volume I, Student Characteristics

Section 7: Jefferson College Arnold

6.1 Profile of Jefferson College, Arnold

Descriptor	Profile
Facility size	19, 582 square feet
Classroom sizes	7 rooms -- 24 capacity 2 rooms -- 30 capacity 1 room -- 28 capacity 1 room -- 36 capacity 1 Science Lab -- 20 for lab -- 30 for class 2 Computer labs -- 20 capacity 1 Learning Center 1 Literacy Coordinator Office 1 office (part-time faculty) -- 5 desks 1 Full-time faculty office -- 1 desk 1 Faculty lounge 1 GED Learning Center -- 30 capacity
Parking	186 total spaces
Parking vs. Classroom Capacity	Ratio of .53 to 1 (186 parking spaces vs. 352 classroom seats excluding Learning Center and GED)
Services	GED testing site Computer courses Vocational courses Continuing Education courses Adult Basic Education courses Student Services Book Store Academic Advising Assessment services Library services
Faculty	1 English Instructor (full-time) 2 Learning Center Instructors (part-time) 4 ABE instructors (part-time)
Staff - Office	Director, Jefferson College Arnold Secretary (full-time) Daytime Receptionist (part-time) Evening/Receptionist (part-time)/ Weekend Receptionist ABE (part-time)
Maintenance	1 Day (full-time) 1 evening (full-time) 1 evening (part-time)

The table on the left reveals the magnitude of services available at the Arnold site. There are 14 classrooms excluding the learning center with a capacity for 352 students. Parking, however, is available for only 186 vehicles. There is only one full-time instructor assigned to Arnold, although many faculty members teach courses both at Hillsboro and at Arnold.
