ABSTRACT

This report summarizes the marketing plan developed for the Scottsdale Community College Airpark Campus. In order to eradicate this campus' dependence on the main campus for leadership and funds, the author describes three strategic goals designed to make the Airpark campus self-sufficient within 3 years. The first goal involves the recruitment of students, with the target being to increase full-time student enrollment by 29 percent per year. The second goal is to reduce student attrition by at least one-third; the third goal is to use personnel in a more efficient and effective manner. Each goal--recruitment, retention and staff improvement--is then discussed in relation to 53 marketing tactics, which include the following components: area, target market, needs assessment, market goal, tactic, frequency of tactic, completion date, office responsible, action plan, success indicators and cost. Additional research summarized in the report includes student interests; a survey reports that the student body is fairly homogenous, with most students, who are employed by local companies that support continuing education, preferring short-term, early morning and evening classes. The author recommends using this profile when marketing to potential students, and taking advantage of these findings when scheduling classes. Contains a bibliography. (JJL)

SUBJECT:

Rudiments of a Tactical Airpark Marketing Plan

As promised, you will find attached the rudiments of a tactical marketing plan that has been specifically designed for the very special needs of the Airpark campus. The 53 marketing tactics that I have developed are wide ranging yet focused, for they each have the following components:

- AREA: Each marketing tactic has been subsumed under one of three wider strategic goals which include either recruitment, retention, or personnel.
- TARGET MARKET: The specific target market is identified. Major target sub markets, in some areas, have been identified by previous Airpark market research.
- NEEDS ASSESSMENT: This section identifies the specific need or problem that exists in the target market. In many cases, I have tried to identify the need by citing either specific airpark market research that I have conducted, generic research, or problems that I found at the campus.
- MARKET GOAL: A market goal is established that attempts to deal with the problems outlined in the needs assessment.
- TACTIC: A specific solution is developed to deal with these problems and thus to reach the market goal.
- FREQUENCY OF TACTIC: Whether the tactic is designed for a one time use or is to be used every semester.
- COMPLETION DATE: A date is specified for solving the problem.
- OFFICE RESPONSIBLE: Accountability is emphasized.

BEST COPY AVAILABLE

- ACTION PLAN: Whenever possible, I have included detailed steps, with deadlines, for implementing the tactic; in other cases, I have provided a general outline.
- SUCCESS INDICATORS: Indictors are developed, where possible, for measuring market goal and tactic achievement.
- COST: An attempt has been made to identify the cost associated with implementing the tactic. In most cases, an effort has been made to use existing staff and resources.

What this plan is not. It is important to emphasize what this plan does not include. First, because there is no overall SCC marketing plan, this tactical plan cannot be said to logically flow from wider SCC strategy. I have had to compensate for this by developing unique Airpark strategic goals that are discussed in the next section. These goals focus on recruitment (increasing head count), retention, and key Airpark personnel issues. Other goals, such as increasing cash flow through the leasing of facilities, have not been included but could be added at a later date.

Second, the plan lacks the normal "situation analysis" which usually precedes a tactical plan and which focuses on the Airpark's strengths and weaknesses as well as its competitive environment and census configuration. There was simply no time to develop this component in a formal way. Instead, I have identified target markets by using my own Airpark market research. As such, I have relied heavily on my monographs which have been previously sent to you.* (A bibliography and summary of Airpark market research is included in an appendix.)

Third, I have deliberately stayed away from expensive promotional strategies that would cost the college a lot of money. This is simply a recognition that the college does not have this money AND that it can accomplish a great deal of other things IF it uses its internal resources more efficiently and effectively. Despite this, a promotional segment can easily be added on to this plan if conditions and funds warrant it.

Finally, this document should be seen as a working draft in process. In many areas I have had to work alone without the benefit of wider SCC resources. While this independence has its virtues, flying solo does have its share of problems. Completion dates, for example, reflect my own sense of what can be done rather than the normal political obstacles (such as turf, work rules, etc.) that can change many of these dates dramatically. This is especially so in the personnel area,

BEST COPY AVAILABLE

although it could apply to many of the other tactics as well. On a more strategic level, I have also had to give estimates of breakeven FTSE goals because I have not seen an actual Airpark budget.

What you should do with this plan. Because this is a working draft, I would share this plan with Airpark staff and other key officials. I would then work on a compromise document that, while it might change some particulars, would still be focused on tactics that had completion dates, responsible officials, and success indicators. Doing this will provide much needed direction and accountability. As a side product, it will also enable you to efficiently and effectively utilize Airpark personnel with a minimum of supervision from SCC administration. The result should be less stress (on all sides) and improved morale.

The next section develops the Airpark strategic goals. This is then followed by 53 marketing tactics which are broken down in the areas of recruitment, retention, and personnel.

Students (February, 1999), Airpark Faculty Survey: An Enrollment Summit by Questionnaire (March, 1999), Analysis of Airpark First Semester Course Cancellation and Attrition Data (March, 1999), Student Survey of Interest Results (April, 1999, with Jan Binder), Comparison of Spring '99 & Fall '99 Course Offerings at the Airpark Campus: An Analysis (May, 1999), and, Giving the Airpark Campus a Marketing Edge: The Need for an Aviation Management Program and/or an Aviation Professional Pilot Program at the Airpark Campus (May, 1999). This has also been supplemented by numerous reports generated by your Institutional Research Office which have included census analysis and a business needs assessment survey. I am indebted to Jan Binder for assistance with this latter information. Finally, the tactical format has been taken from that developed by Prince George Community College. See their PGCC Marketing

AIRPARK STRATEGIC GOALS

AIRPARK STRATEGIC GOALS

The absence of an overall SCC tactical plan, as well as a comprehensive SCC marketing plan, creates considerable difficulties when trying to formulate strategic goals for the Airpark campus. Nevertheless, an attempt has been made to do this for three reasons; first, the Airpark campus, because it lacks goals, is currently a rudderless ship that lacks guidance and leadership. This has resulted in morale problems, "wheel spinning," and an ineffective use of resources. Second, the high rent and other fixed costs associated with operating the Airpark campus have required a large District subsidy as well as infusions of funds from the main Scottsdale campus. It is reasonable to assume that this situation will not last forever, and so it is expected that the Airpark campus will come under increasing scrutiny from District auditors, the District budget committee, and Governing Board members unless self sufficiency is reached within three years from the date of the Airpark's beginning semester. And this can only come about if enrollment is increased, attrition is reduced, and personnel are used in an effective and efficient manner.

So, and without pointing blame at anyone, the need for strategic goals is obvious. For purposes of exposition, these goals have been broken down into the areas of recruitment, retention, and personnel. The narrative that follows goes into greater detail for all three areas.

L STRATEGIC GOAL NUMBER #1: RECRUITMENT

By some estimates,* the Airpark has fixed operating costs that are approaching \$500,000 per year because of high rent and a triple net lease arrangement that requires expenditures for utilities, maintenance, and just about everything else. Variable costs such as staffing probably account for another \$500,000 for a total of \$1,000,000. But the Airpark's initial, January, 1999 enrollment had a head count of about 600 which generated FTSE of approximately 100. If we assume that the fall semester will also have a head count enrollment of 600, and that summer school might generate an additional 200, this gives us a yearly headcount of 1400 or FTSE of 233. Self sufficiency, however, (defined as being able to pay for these fixed and variable costs), will require a yearly head count of perhaps 3000 with an equivalent FTSE calculation of 500 if we assume that one FTSE is worth \$2,000. Thus, the Airpark will have to more than double its enrollment if it is to reach some type of breakeven point that does not rely on District and SCC subsidies. On a semester basis, this means that by

^{*} The estimates are for illustrative purposes only inasmuch as I have not seen a separate Airpark budget.

8

the spring semester of January, 2002, the Airpark headcount enrollment that spring should approach 1300 students if self sufficiency is to be attained. This also means that if this growth target (1286 students) is to be reached, Airpark enrollment will have to grow at a compounded rate of 29 percent per year. This is the only way to raise yearly headcount enrollment from 1433 to 3000 over a three year period. Because such growth is unprecedented for SCC, a carefully designed Airpark marketing plan becomes almost mandatory.

The tactical plan developed here recognizes the critical nature of this problem. The 31 tactical recruitment actions that are suggested are wide ranging and comprehensive yet minimal in cost impact. The goal is simply to maximize an Airpark marketing effort, within existing financial constraints, that will result in increased FTSE.

II. STRATEGIC GOAL NUMBER #2: RETENTION

If my figures are correct, the Airpark has lost about 30 percent of its students during its first semester. There are probably a lot of good reasons for this which include the usual pains associated with a new campus as well as the lack of student services that are traditionally found on the SCC main campus. The goal, however, should be to reduce this attrition by at least a third, for it will make the attainment of the first goal (recruitment) that much easier. The strategy here is to create a more student friendly environment and to provide as many student services as possible given the distance from the main campus. Following this, 14 tactics have been developed that are designed to deal with the Airpark retention problem.

III. STRATEGIC GOAL NUMBER #3: PERSONNEL

If the two goals above are to be reached, staff will have to be more efficiently and effectively utilized. Lines of responsibility, authority, and accountability will have to be clarified. Personnel issues that impact on course scheduling, site coverage, registration, and faculty accountability will have to be tackled in a much more open and aggressive manner if recruitment and retention goals are to be attained. The eight tactics contained in this document attempt to deal with these issues by using existing staff to strengthen Airpark marketing efforts, efforts which will have to be labor intensive given financial and budgetary limitations.

SUMMARY OF SUGGESTED AIRPARK STRATEGIC GOALS

I. RECRUITMENT: INCREASE FTSE BY 29 PERCENT PER YEAR OVER THE NEXT 3 YEARS, OR UNTIL BREAKEVEN STATUS IS ATTAINED.

	1999	YEAR 2000	2001	2002
FTSE HEAD	233	300.5	387.73	500
COUNT	1400	1806	2329.74	3005

II. REDUCE STUDENT ATTRITION BY 30 PERCENT OVER THE NEXT THREE YEARS. THE CURRENT RATE OF APPROXIMATELY 30 PERCENT SHOULD FALL TO 21 PERCENT BY 2002.

	1999	YEAR 2000	2001	2002
ATTRITION RATE (%)	30	26.81	23.73	21

III. EFFICIENT AND EFFECTIVE UTILIZATION OF STAFF IN THE AREAS OF

- RESPONSIBILITY
- AUTHORITY
- ACCOUNTABILITY

There is little or no awareness of Airpark weekend course offerings by women with small children, and with child care problems during the week days, who may be able to utilize the weekend college.

MARKET GOAL:

To make women with small children aware of our weekend college.

TACTIC:

Contact women's organizations and child care centers.

FREQUENCY OF TACTIC: One time, with updated material.

COMPLETION DATE:	OFFICE RESPONSIBLE:	OTHERS RESPONSIBLE:
December, 1999	Airpark Campus Director	Public Relations, IR Office

ACTION PLAN:

1. Develop mailing list

2. Send letter and brochure.

DEADLINES

September, 1999

December, 1999

SUCCESS INDICATORS: Increased awareness of weekend course offerings by women with young children. Enrollment increase.

COST: Utilize existing resources; mailing cost.

TARGET MARKET:	AREA:
Airpark Businesses & Employees	Recruitment
	<u> </u>

NEEDS ASSESSMENT:

There is minimal awareness by Airpark employers of the Airpark campus as a resource center that could help them with their business problems.

MARKET GOAL:

To make Airpark employers aware that the SCC Airpark campus is a resource for them.

TACTIC:

Have key SCC Airpark staff write a series of articles that would be placed in the Scottsdale Airpark News.

FREQUENCY OF TACTIC: Continuous

COMPLETION DATE:	OFFICE RESPONSIBLE:	OTHERS RESPONSIBLE:
March, 2000	Airpark Campus Director	Designated staff

ACTION PLAN: DEADLINES

1.	Discussion with editor of Scottsdale Airpark News	September, 1999
	about topics. Topic selection.	
2.	Designation of staff writers.	October, 1999
3.	Submit articles to Airpark News	December, 1999

SUCCESS INDICATORS: Publication of articles in Scottsdale Airpark News

TARGET MARKET:	AREA:
Airpark Businesses & Employees	Recruitment

NEEDS ASSESSMENT:

There is minimal awareness by Airpark employers of the Airpark campus as a resource center that could help them with their business problems.

MARKET GOAL:

To make Airpark employers aware that the SCC Airpark campus is a resource for them.

TACTIC:

Explore feasibility of working with SCC Chamber of Commerce and SCORE to jointly work together on providing technical assistance to small businesses in the Airpark.

FREQUENCY OF TACTIC: One time

COMPLETION DATE:	OFFICE RESPONSIBLE:	OTHERS RESPONSIBLE:
March, 2000	Airpark Campus Director	Designated staff

ACTION PLAN: DEADLINES

1. Meeting with Chamber officials; preparation, submission of feasibility study

December,1999

2. First projects started

March, 2000

SUCCESS INDICATORS: Joint technical assistance projects launched

TARGET MARKET:	AREA:
Airpark Businesses & Employees	Recruitment

NEEDS ASSESSMENT:

There is minimal awareness by Airpark employers of the Airpark campus as a resource center that could help them with their business problems.

MARKET GOAL:

To make Airpark employers aware that the SCC Airpark campus is a resource for them.

TACTIC:

Set up "speaker's list" that consists of designated Airpark staff that would speak on selected topics.

FREQUENCY OF TACTIC: One time

COMPLETION DATE:	OFFICE RESPONSIBLE:	OTHERS RESPONSIBLE:
December, 1999	Airpark Campus Director	Designated staff

ACTION PLAN: DEADLINES

1.	Select designated staff	October, 1999

SUMMARY OF AIRPARK MARKET RESEARCH

SUMMARY OF AIRPARK MARKET RESEARCH

I. FROM THE STUDENT SURVEY OF INTERESTS:

- There may not be much difference between day and evening student preferences for courses and related college services. The Airpark population is far more homogeneous than its counterpart on the main campus.
- A significant number of students are employed by companies that are located in or near the Airpark. Many of these students, moreover, work for companies that have tuition refund policies. On site registration by SCC staff could thus be possible.
- The marketing strength of the Airpark, its attractiveness to students, lies in its proximity for students to home and employment. Marketing efforts should reflect this.
- College mailings and newspaper ads appear to be the most effective medium for reaching Airpark students.
- Career counseling, academic advisors, and financial aid assistance have been clearly expressed by students as needed college services.
- Airpark course offerings, as expressed by student preferences, should be flexible and should limit class frequency per week while also limiting class duration. Classes of 5 to 8 weeks showed the strongest preference.
- The core Airpark market shows the strongest preferences for evening classes (5:00 PM to 10:00 PM) and morning classes in the 8:00 AM to 12:00 noon time period.
- While the data is sketchy at best, the formation of a weekend college might start out with Saturday morning classes that are offered in a package that emphasizes courses of brief duration. Later, this could be supplemented with Friday evening only classes, with possible combinations of Friday evening and Saturday morning.

II. FROM THE SCOTTSDALE AIRPARK BUSINESS/INDUSTRY SURVEY OF INTERESTS:

- Over 50 percent of the businesses employ less than 10 people.
- More than one third of the businesses have a tuition refund policy for their employees and almost half provide release time for educational attainment.
- Employers recognize the benefit of higher education for their employees first by job efficiency followed by job advancement and salary increases.
- There was a considerable interest in week day classes with an emphasis on evening and early evening hours.

- More than two thirds of the responses indicated an interest in accelerated classes.
- Survey response showed a high level of interest in computer and business courses.

III. FROM THE AIRPARK CANCELLATION & ATTRITION STUDIES:

- Low cancellation and attrition rates (less than 15 percent) are found in the BPC, CIS, and SBS courses. Somewhat higher rates are found in the foreign language courses. For some courses (social sciences) there are probably too few sections to generalize.
- The lowest class cancellation rates are found in classes that meet only once a week. As the meeting frequency per week increases, the class cancellation rate increases as well.
- High class cancellation rates were found in general business, math, and English courses.
- While day classes are almost twice as likely to be cancelled as evening classes, there appears to be no significant difference between day and evening attrition rates.
- There appears to be no statistically significant relationship between cancellation rates and attrition rates. It would appear that class cancellations reflect marketing dynamics, while student attrition is more properly a a function of studentship skills, advising, etc.
- A significant portion (27 percent) of Airpark student attrition may be positively affected (reduced) by the addition of advising/LAC interventions.
- As much as 17 percent of Airpark student attrition may be positively affected (reduced) by the addition of counseling interventions.

IV. FROM THE STUDY ON DEMOGRAPHIC & ENROLLMENT CHARACTERISTICS OF AIRPARK STUDENTS:

- Over 50 percent of Airpark students are between 26 and 54 years old, making this a predominantly adult and non recent high school population. The recent high school graduate market appears to be uncultivated at this time.
- The large population over 54 years of age suggests a potentially strong "gray" market for people at or near retirement.
- Major student reasons for enrollment include personal interest/improvement (almost 40 percent) and transfer to another college (almost 24 percent). Job preparation and improvement constitute an additional 25 percent of the reasons cited.

- Student employment characteristics are bimodal, for while 23 percent report that they do not work at all, almost 36 percent report that they work over 31 hours per week.
- The student population at the Airpark is predominantly part time and takes three credits or less. Less than 16 percent are full time students.
- As revealed by zip code analysis, the proximity of home to campus may be the chief driving force behind Airpark enrollment.

V. FROM THE STUDY THAT COMPARED SPRING' 99 & FALL '99 COURSE OFFERINGS AT THE AIRPARK CAMPUS:

- Class offerings have declined from 124 to 112, for a reduction of about 9 percent.
- There is a marked decline in usage of Air 9 for the fall.
- Classes are starting later in the fall relative to the spring semester.
- Morning and afternoon classes have declined in the fall semester, with an
 especially steep drop in afternoon classes. Evening class offerings have
 increased considerably.
- There has been no increase in 8AM to 10AM classes for the fall semester.
- There are five classes in the fall that meet four times per week. No classes like this were offered in the spring.
- There is a sharp drop in fall classes of 5 weeks duration.
