ABSTRACT

This report presents statistics on the dropout rate for the Wake County Public Schools, North Carolina. Before the 1997-98 school year, a steady decline had occurred in the Wake County Public School System's unduplicated dropout rate for grades 7 through 12. The unduplicated dropout rate is the percent of first-time dropouts. The dropout rate rose slightly from 2.6% in 1996-97 to 2.7% in 1997-98. There has been a steady decline in the duplicated dropout rate since 1993-94. The duplicated dropout rate is the percent of first-time in 1997-98 dropouts plus previous year or repeat dropouts. The largest percentage of both duplicated and unduplicated dropouts in the school system came from grade 9. Seventy-five percent of the unduplicated ninth-grade dropouts were overage for their grade. Attendance problems continued to be the major reason why students dropped out. Attachments contain dropout figures per high school and individual high school summaries, as well as a discussion of dropout procedures and data sources. (Contains 11 figures.) (SLD)

WAKE COUNTY PUBLIC SCHOOL SYSTEM 1997-98 DROPOUT REPORT

Author: Daniel L. Howard

Major Findings

Prior to 1997-98, a steady decline in the WCPSS unduplicated dropout rate for grades 7-12 had occurred. Unduplicated dropout rate is the percent of first-time dropouts. The dropout rate rose slightly from 2.6% in 1996-97 to 2.7% in 1997-98 (Figure 1).

Figure 1. State and WCPSS Unduplicated Dropout Rate for Grades 7-12 between 1991 and 1998

There also has been a steady decline in the WCPSS duplicated dropout rate for grades 7-12 since 1993-94. Duplicated dropout rate is the percent of first-time in 1997-98 as well as previous year or "repeat" dropouts. The percentage of WCPSS duplicated dropouts remained the same between 1996-97 and 1997-98.

Figure 2. State and WCPSS Duplicated Dropout Rates for Grades 7-12 between 1991 and 1998

The largest percentage of unduplicated and duplicated dropouts in the WCPSS (38% of the total 1,018 unduplicated grade 7-12 dropouts and 39% of the total 1,079 duplicated grade 7-12 dropouts, respectively) came from the 9th grade. The 390 unduplicated 9th grade dropouts represented 4.9% of the WCPSS 9th grade student population during 1997-98 while the 418 duplicated 9th grade dropouts represented 5.2% of the WCPSS 9th grade student population during 1997-98.

- Ninth grade dropouts. Unduplicated 9th grade dropouts have decreased each year since 1993-94 (the first year in which unduplicated dropout data was collected by grade level). Duplicated 9th grade dropouts have decreased since 1993-94.
- Seventy-five percent of the unduplicated 9th grade dropouts were overage for their grade (16 years old or older). Seventy-six percent of the 9th grade duplicated dropouts were overage. The typical age for a 9th grade student is 14 or 15 years old.
- Attendance problems continued to be the major reason why students dropped out. Sixty-eight percent of the duplicated and unduplicated dropouts have this as the primary reason for dropping out.

INTRODUCTION

Calculating Dropout Rates

In the Wake County Public School System (WCPSS), during 1997-98 (including summer school), there was an unduplicated total of 1,031 students who dropped out of school. The duplicated total of students who dropped out of school was 1,092. Of these 1,092 students:

- 13 students were in grades K-6; and,
- 1,018 students were in grades 7-12 who were first-time dropouts; and,
- 61 students in grades 7-12 also dropped out in previous years.

Calculating Dropout Rates

The State of North Carolina (NC) uses an “event count” to count the number of dropouts each year for the 12-month period which begins on the first day of the academic year and ends on the last day of the following summer vacation. All school systems in NC use the following definition for a dropout:

A “dropout” is an individual who:

1. was enrolled in school at some time during the reporting year;
2. was not enrolled on the 20th day of the current year;
3. has not graduated from high school or completed a state or district-approved educational program; and
4. does not meet any of the following exclusions:
 - transferred to another public school district, private school, home school, or state/district-approved educational program;
 - temporarily absent due to suspension or school-approved illness; or
 - death.

The dropout rate calculated by the NC Department of Public Instruction (DPI) for each school system reflects the duplicated count of students in grades 7-12 who dropped out the previous year. Using the 20th day membership figures, DPI calculates dropout rates for each local education agency according to the following formula:

$$\frac{\text{\# of 1997-98 Dropouts}}{(\text{1997-98 20}^{\text{th}}\text{-Day} + \text{1998-99 20}^{\text{th}}\text{-Day})/2} + \text{\# of 1997-98 Dropouts}$$

For example, the WCPSS rate calculation for grades 7-12 for 1997-98 was:

$$\frac{1,079}{(36,779 + 37,825)/2} + 1,079 = .028 \text{ or } 2.8\%$$

Unless otherwise noted, the data and subsequent analyses contained within this report are based on the duplicated counts of dropouts from grades 7-12 (1,079 students).

SECTION 1

Who's Dropping Out?

Dropout Rates

This section reports dropout rates and percentages relative to the overall student body of the Wake County Public School System (WCPSS). It is important to note that:

rates are based on the average 20th-day membership for two years (e.g., the 1997-98 rates are based on the average of 1997-98 and 1998-99 20th-day membership); and,

percentages are based on the membership for one year (e.g., the 1997-98 percentages are based on the 1997-98 20th-day membership).

Although NC collects dropout data for all grades, K-12, NC calculates the dropout rates for only grades 7-12. The WCPSS dropout rate for grades 7-12 steadily declined from 1993 to 1998 (Figure 3). From 1993-94 to 1994-95, the percent change in dropouts was an 11% decrease. By 1995-96, the percent change in dropouts from 1993-94 was a 23% decrease. The percent change in dropouts from 1993-94 to 1996-97 was a 36% decrease. There was no percent change in dropouts from 1996-97 to 1997-98. The overall decline in dropouts can possibly be attributed to increased dropout prevention efforts and/or improved methodological approaches toward identifying and documenting student dropouts.

Figure 3. WCPSS Duplicated Dropout Rates for Grades 7-12 between 1991 and 1998

Percentage of Dropouts by Grade Level

As shown in Figure 4, the greatest percentage and number of students dropping out, except by a very narrow percentage in 1993-94, was in the 9th grade. This consistent pattern from year to year may occur because at the 9th grade level many students approach 16 years old and school attendance is not legally required after reaching this age.

Figure 4. Dropouts by Grade from 1991 to 1998

Dropout Rate by Race

The dropout rates by race for grades 7-12 show steady decreases for black and white students since the 1994-95 school year (see Figure 5). Other races have fluctuated between 2.3% and 3.2% over the last four school years.

Figure 5. WCPSS Duplicated Dropout Rates for Grades 7-12 Among Race from 1994 to 1998

Dropout Rates by High School

Six of the thirteen regular WCPSS high schools showed a decrease in their dropout rate during 1997-98 from the previous year (Figure 6). Six of the thirteen showed an increase. S.E. Raleigh High School did not exist in 1996-97. Among the alternative schools, Longview High School showed an increase in dropouts during 1997-98, while Phillips High School showed a decrease in dropouts.

* S.E. Raleigh had not been built at this time.

** Longview and Phillips are alternative schools serving special populations.

SECTION 2

A Closer Look at WCPSS Dropouts

Percentage of Dropouts by Grade Levels and Age _____

Figure 7 shows the percentage of dropouts in each grade during 1997-98. The largest percent of dropouts were 9th graders (39%). Grades 7 and 8 accounted for only 3% of all dropouts. Dropouts who were seniors (12th grade) made up the next smallest percentage (13%).

Figure 7. Dropouts by Grade: 1997-98

Dropouts by Grade and Percent of Total Dropouts _____

The largest number and percentage of dropouts are in the 9th grade (Figure 8). There have been much fewer dropouts among 12th graders the past two years, compared to the previous 2 years.

Figure 8. Dropouts by Grade and Percent of Total Dropouts: 1991-1998

Dropouts by Age

Figure 9 shows that the majority of dropouts in 1997-98 were 16 or 17 years old (62.3%). Dropouts under 15 years old have increased from the previous year, while dropouts 18 years old and older have decreased from the previous year.

Figure 9. Dropouts by Age: 1995-1998

Dropouts tended to be older than other students in their grade (see Figure 10). For instance, students in grade 9 are typically 14 or 15 years old; however, 76% of the 9th grade dropouts were age 16 years old and over.

Figure 10. Dropouts by Age and Grade: 1997-98

Withdrawal Reasons

The primary dropout reason in 1997-98 was attendance problems (68%) (see Figure 11). Poor attendance may be a symptom of other problems that are not recorded.

WCPSS PROCEDURES FOR COLLECTING AND REPORTING DROPOUT DATA

Date	Activity	Responsibilities
May	Provide all SIMS technicians and school counselors with a list of NCDPI codes for dropout reasons.	<ul style="list-style-type: none"> • Information Systems distributes list. (Dropout Prevention Specialist)
June	<p>At the end of the reporting year, but prior to the SIMS operator running the year-end process:</p> <p>SIMS technicians run Report 153 (<i>Dropout Summary</i>) which provides a list of W2 and W2A students to compare against dropout list that has been maintained by the school for the year.</p>	<ul style="list-style-type: none"> • Information Systems collects SIMS 153 reports from all schools, builds a single Excel file with this data, and provides E&R with this data on disk. • E&R reviews Excel file for errors (e.g., fields with missing data; students incorrectly recorded as previous dropouts). • <u>E&R notifies SIMS technicians of corrections to be made</u> (e.g., students with missing or incorrect data).
September (day 21 of school year)	SIMS technicians run Report 154 (<i>Previous vs. Current Year Enrollment Status Roster</i>), and track all students without a current year enrollment (schools may use this report as their official <i>School Leaver Roster</i>).	<ul style="list-style-type: none"> • Information Systems collects SIMS 154 reports from all schools, builds a single Excel file with this data, and provides E&R with this data on disk. • E&R submits RAP to Information Systems to determine if students not returning to base school have enrolled at any other WCPSS school in the period between Day 1 and Day 20. • E&R notifies SIMS technicians of corrections to be made (e.g., students reported as dropouts but found to be enrolled at another WCPSS school, or students not enrolled in current year but not reported as dropouts by previous year school).

October	SIMS technicians run Report 153 (<i>Official Dropout Count</i>) and Report 156 (<i>Official Dropout Count – Students at Risk Annual Report</i>) and submit this data to Information Systems.	The official dropout reports are run at each school early in October after all corrections have been made: <ul style="list-style-type: none"> • Corrections for incorrect data; • Corrections for students enrolled (or not) at other WCPSS schools; • Corrections for community college enrollment; and • Other errors identified by E&R.
October	Information Systems runs dropout build for WCPSS and provides disk copy to E&R.	<ul style="list-style-type: none"> • E&R verifies dropout build for accuracy and notifies Information Systems if corrections need to be made (if corrections are necessary, this will require the individual school(s) to make corrections, run their dropout build again, and resubmit this to Information Systems, which in turn must again run the dropout build for the school system).
October	Information Systems electronically transmits dropout data to NCDPI and provides disk copy to E&R	<ul style="list-style-type: none"> • E&R maintains copy of dropout data with data from previous years.
