DESCRIPTORS Attitude Change; \*Health Personnel; Higher Education; Knowledge Level; \*Measures (Individuals); Reliability; \*Service Learning; \*Test Construction

ABSTRACT

To investigate whether the structured and applied nature of a service learning method results in changes in knowledge, skills, and attitudes regarding working with underserved populations, the Service Learning Instrument-Health Professional (SLI-HP) was designed. This instrument measures both student experiences and changes in attitudes, skills, and knowledge resulting from participation in the service learning model. In its pilot administration, the SLI-HP was completed by 53 health profession students. No problems were found with item clarity or respondent's answering. Reliability analysis for the 23 items of the pretest yielded an alpha of 0.85. Copies of the SLP-HP pretest and posttest are attached. (SLD)

Reproductions supplied by EDRS are the best that can be made from the original document.

**Service Learning Instrument-Health Professional (SLI-HP)**

 Rambaldo, Kate Cauley, Carla Clasen, Cheryl Meyer

Service learning is an experiential, educational approach which integrates community service within an academic context. It emphasizes a balance between both community service and student learning, facilitates the process of orienting students to the diverse populations that they will serve, and provides students a opportunity to reflect on their experiences.

In order to investigate whether the structured and applied nature of a service learning method resulted in changes in knowledge, skills, and attitudes regarding working with underserved populations, the Service Learning Instrument-Health Professional (SLI-HP) was designed. This instrument measures both student experiences and changes in attitudes, skills, and knowledge resulting from participation in the service learning model. The SLI-HP consists of both qualitative and quantitative response formats with the majority of the questions quantitative in nature. In its pilot administration, the SLI-HP was completed by 53 health professional students. No problems with item clarity or respondent's answering were reported. Reliability analysis for the 23 items of the pre-test yielded an alpha of 0.85.

As educational systems become more practitioner oriented, service learning opportunities become central to the academic experience. The SLI-HP measures the impact of this experience on the student and is a crucial addition to assessment inventories.

**Center for Healthy Communities  
Student Survey  
Pre-Test**

**This survey is designed to measure student attitudes and perceptions of community service. Relying on your current feelings about the issues raised, please complete all parts of this survey answering each question as honestly as possible. Your responses will be kept confidential. Thank you for your participation.**

**Please answer the survey questions relying on the following definitions:**

**Community Service:** any activity in which a community work component was required that you performed for free.

**Community Resources:** social service agencies, churches, government programs, shelters, support groups, community clinics, or any similar organization.

**Placement, clinical site, training site:** All refer to work done for a course or class as part of a training program at a non-classroom site.

**Demographics**

1. What is your age? \_\_\_\_\_
2. Your gender (please circle the number which applies to you)
  1. Female
  2. Male
3. Your ethnicity (please circle all which apply) [optional]
  1. African American
  2. Asian American/Pacific Islander
  3. Caucasian or European American
  4. Latina/Latino or Hispanic
  5. Native American/ Alaskan Native
  6. Other (specify): \_\_\_\_\_
4. What discipline to you represent? (please circle the number which applies to you)
  1. Medical Student
  2. Nursing Student
  3. Psychology Student
  4. Dental Hygiene Student
  5. Dietetic Technology Student
  6. Physician's Assistant Student
  7. Social Work Student
  8. Other (specify): \_\_\_\_\_
5. How many years does it typically take to complete your academic program? \_\_\_\_\_
6. What year of your program are you currently in? \_\_\_\_\_

**Section I**

Please answer the questions below using the following scale:

- |                |       |                |         |                   |          |                   |
|----------------|-------|----------------|---------|-------------------|----------|-------------------|
| 1              | 2     | 3              | 4       | 5                 | 6        | 7                 |
| Strongly agree | Agree | Somewhat agree | Neutral | Somewhat disagree | Disagree | Strongly disagree |

At this time,

- \_\_\_\_\_ 1. I feel well prepared to practice my profession in a community similar to the community in which my placement is located.
- \_\_\_\_\_ 2. I feel comfortable providing services to people from different ethnic and racial groups than my own.
- \_\_\_\_\_ 3. I believe students should volunteer their time helping people without resources.

Section I, continued

Please answer the questions below using the following scale:

- |                   |       |                   |         |                      |          |                      |
|-------------------|-------|-------------------|---------|----------------------|----------|----------------------|
| 1                 | 2     | 3                 | 4       | 5                    | 6        | 7                    |
| Strongly<br>agree | Agree | Somewhat<br>agree | Neutral | Somewhat<br>disagree | Disagree | Strongly<br>disagree |

At this time,

- \_\_\_\_\_ 4. Upon graduation, I would like to work in settings where health care professionals are underrepresented.
- \_\_\_\_\_ 5. Upon graduation, I would like to work in a setting with patients/clients of various cultural backgrounds.
- \_\_\_\_\_ 6. Upon graduation, I would be interested in working on a multidisciplinary team (e.g., psychologist, physician, social worker, nurse practitioner, etc.)
- \_\_\_\_\_ 7. I believe that health care professionals have a responsibility to volunteer for community service activities.
- \_\_\_\_\_ 8. I believe that health care would be improved by the increased practice of multidisciplinary health care teams.
- \_\_\_\_\_ 9. Health care professionals should always try to incorporate the patient/client's health beliefs/practices when planning treatment.
- \_\_\_\_\_ 10. I feel that I can have a positive impact on the community in which I work by volunteering my time.
- \_\_\_\_\_ 11. It is important for me to be involved in a program to improve the community.
- \_\_\_\_\_ 12. Learning by doing is a necessary component for adequate training of health care professionals.
- \_\_\_\_\_ 13. I believe it should be mandatory for health care professional students to participate in community service.
- \_\_\_\_\_ 14. I feel that it is important to consider a wide range of health care practices (such as nontraditional practices) when planning treatment for my client/patient.
- \_\_\_\_\_ 15. I believe that there are valid alternative health care beliefs/practices that may differ from traditional health care practices.
