ABSTRACT
               This paper briefly describes an assignment designed to
improve teachers' attitudes toward technology through basic instruction. A
group of teachers who were taking graduate level courses were introduced to
computer technology in a non-threatening manner starting with learning the
basic computer skills, such as e-mail, word processing, and conducting an
Educational Resources Information Center (ERIC) search. A field trip to the
university library was scheduled in the early weeks of the semester to
familiarize the teachers with the resources that could be accessed through
the library. A demonstration of an ERIC search was also given by one of the
reference librarians. Another goal was to help teachers develop a working
knowledge of finding resources on the World Wide Web, as well as the ability
to critically evaluate the information retrieved. The assignment was accessed
from a commercial site on the Web, Blackboard.com, so that teachers would be
also introduced to distance learning. A paper copy of the assignment was made
available in the library for easy reference, and a step-by-step demonstration
on locating and accessing the Web site was given by the instructor. (AEF)

Teaching Teachers to Use the World Wide Web

Northeastern Illinois University

Teacher Attitudes

It is important to come to terms with teachers' attitudes about computers. According to Roblyer & Edwards(2000) educational research hasn't provided the evidence needed to convince teachers of the benefits of using computers in the classroom. Sandholtz,Ringstaff & Dwyer (1997) agree that the effort has been directed toward analysis of students rather than investigation of teachers. Teachers are not convinced that this is not the latest fad in education. This skepticism is well warranted considering the aftermath of several education fads (Cuban, 1984). This trepidation is hindering the progress of both teachers and their students. The situation is confounded by many teachers' fear of computer technology. In some cases, the personal computer revolution missed teachers. Currently, many teachers are put in the unfamiliar role of not knowing as much as their students about using computers. For many this is a difficult transition, after all they are the teacher, they should know how to "do".

Teaching the teachers basic computer skills

In order to reverse this unfortunate situation, a group of teachers who were taking graduate level courses were introduced to computer technology in a non-threatening manner starting with learning the basic computer skills such as e-mail, word processing, and conducting an ERIC search. There were no assumptions about prior teacher experience with computer technology. The course follows International Society of Technology Educators (ISTE), standards which has the students, in this case teachers, master basic skills of computer literacy.

A class field trip to the university library was scheduled in the early weeks of the semester to familiarize the teachers with the resources that can be accessed through

the library. One of the reference librarians conducted an ERIC search demonstration, so teachers can understand this process. For some teachers, this was the first time they have been required to conduct an ERIC search. For other teachers, refinement of skills and new techniques in finding information was emphasized.

Harnessing the power of the World Wide Web

After the teachers master the above mentioned skills, harnessing the power of the World Wide Web was the next step in this educational process. It is imperative that teachers be able to gather information about any topic area in order to actively engage their students with current resources.

It is also important for teachers to be able to find resources that will help them build and expand upon their own ideas or help them generate ideas for their lesson plans. They must also be able to find ready made resources like lesson plans and be able to critique and modify these existing lesson plans for their particular classroom needs. Internet access brings thousands of pieces of information literally to the doorstep of the teacher. According to Inktomi, a search engine company, has noted that the number of web pages has past the billion mark last month (Coates, January 2000). Therefore, it is important to develop a working knowledge about not only how to find resources on the Web but to be able to establish reliability of content as well. The problem is that not all the content on the Web is reliable. Due to the lack of editing to ensure accuracy, any type of content can and is placed on the Web. First, teachers must be able to locate information. Then they must develop the ability to critique and evaluate the information they have gathered from a Web site for content accuracy. In turn, these teachers will teach their students how to evaluate Web sites for content accuracy. This entire activity encourages higher order thinking skills on the part of both teacher and student.

Go to Distance

The assignment was accessed from a commercial distance learning site,

Blackboard.com, on the Web. In this way, teachers were also introduced to distance learning. A paper copy of the assignment was made available in the library for easy reference. A step by step demonstration on locating and accessing the web site was done by the instructor. This online assignment can be described as a scavenger hunt to locate designated web sites. Hopefully this assignment will spark interest in the usefulness of a computer and the World Wide Web.

The added advantage of using the World Wide Web will enable teachers to accumulate current and up to date information available. Teacher attitudes have changed in this course. Teachers do not feel like they were left behind in the current tech gold rush. The starter activities and web site examples will provide scaffolding to facilitate web usage. Using a computer as a tool certainly demystified the technology. This is only the beginning of a technological trend. If teachers understand the basics, it is easier to face a classroom. Gone is the era where teachers have to know everything. I feel much better already.

Internet/World Wide Web

For those students who have never "surfed" the World Wide Web, I have required the book *Teaching with the Internet:Lessons from the Classroom* by Donald and Deborah Leu. I have tried to keep costs down for the required texts so I didn't choose *The Teacher's Complete & Easy Guide to the Internet* by Ann Heide and Linda Stilborne. Copies of both these books will be in the **reserve section on the 1ˢᵗ floor of the library.**

For those of you who are comfortable not having instructions in print but via online I have some suggestions:
www.learnthenet.com/english/index.html
     or
www.webteacher.org/macexp/indextc.html
     or
www.ozline.com/learning/workshop.html

The Learn the Net tutorial helps beginners around the Internet while Web Teacher concentrates on many areas including web building for teachers. Learning the World will help in the categories Surf, Stumble & Lurch and What's on the Web

Your assignment is due the 7ᵗʰ week of the semester.

Reproduction Release
(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title: Teaching Teachers to Use the World Wide Web		
Author(s): Joanne M Frey		
Corporate Source:		Publication Date: April 1 2000

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign in the indicated space following.

The sample sticker shown below will be affixed to all Level 1 documents	The sample sticker shown below will be affixed to all Level 2A documents	The sample sticker show 2B
PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY _____ _____ TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)	PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE, AND IN ELECTRONIC MEDIA FOR ERIC COLLECTION SUBSCRIBERS ONLY, HAS BEEN GRANTED BY _____ _____ TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)	PERMISSION DISSEMINAT MICROFICHE ONL _____ _____ TO THE EDUC INFORMAT
Level 1	**Level 2A**	1
↑ [checked]	↑ [ ]	
Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g. electronic) *and* paper copy.	Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only	Check here for Level 21 and dissemina

Documents will be processed as indicated provided reproduction quality permits.
If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche, or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.
