 Title I

ABSTRACT

This report provides important state-by-state information on the characteristics and performance of schools and students in each state, information that is vital to monitoring the progress and evaluating the success of local, state, and national education reforms. The report disaggregates student achievement data so that attention can be focused not only on the average student, but on students in high poverty schools, migrant students, and students with limited English proficiency. Indicators in each state profile are organized into these categories: (1) school and teacher demographics; (2) student demographics; (3) statewide accountability information; and (4) student achievement. Information is also provided for Title I programs in each state. Statewide totals for numbers of students in public elementary and secondary schools are reported for 2 years, the most recent year for which data are available and the baseline year closest to 1990 for which there are data. Indicators are reported for each state, the District of Columbia, and the entire United States. Appendixes contain state proficiency level definitions, state rankings for various indicators, and information on the National Assessment of Educational Progress. (SLD)

U.S. DEPARTMENT OF EDUCATION

TM031289

The Council of Chief State School Officers (CCSSO) is a nationwide non-profit organization composed of the public officials who head departments of elementary and secondary education in the states, the District of Columbia, the Department of Defense Education Activity, and five extra-state jurisdictions. CCSSO seeks its members' consensus on major education issues and expresses their view to civic and professional organizations, to federal agencies, Congress, and to the public. Through its structure of standing and special committees, the Council responds to a broad range of concerns about education and provides leadership on major education issues.

Because the Council represents each state's chief education administrator, it has access to the educational and governmental establishment in each state and to the national influence that accompanies this unique position. CCSSO forms coalitions with many other education organizations and is able to provide leadership for a variety of policy concerns that affect elementary and secondary education. Thus, CCSSO members are able to act cooperatively on matters vital to the education of America's young people.

The State Education Assessment Center was established by chief state school officers to improve the information base on education in the United States, especially from a state perspective. The Center works to improve the breadth, quality, and comparability of data on education, including state-by-state achievement data, instructional data, indicators of quality in areas such as mathematics and science, and performance assessment of teachers and students. In collaboration with state education agencies, the federal government, and national and international organizations, the Center contributes to the development of a set of useful and valid measures of educational quality geared, when appropriate, to education standards.

STATE EDUCATION INDICATORS WITH A FOCUS ON TITLE I 1999

Rolf K. Blank

Jennifer Manise

Barbara C. Brathwaite

The 1999 report on State Education Indicators was completed under a project of the CCSSO State Education Assessment Center. Funding was provided by the Planning and Evaluation Service of the U.S. Department of Education. The indicators were developed and reported through cooperation of the state departments of education and components of the U.S. Department of Education, including the National Center for Education Statistics, the Office of Elementary and Secondary Education, and the Planning and Evaluation Service.

At the edge of a new century and an increasingly competitive global economy, we know that our children's futures will be determined in large part by the quality of the education they receive.

William Jefferson Clinton

The task of the modern educator
is not to cut down jungles,
but to irrigate deserts.

C. S. Lewis

This report, State Education Indicators with a Focus on Title I, provides important state-by-state information on the characteristics and performance of schools and students in each state—information that is vital to monitoring the progress and evaluating the success of local, state, and national education reforms.

Importantly, the report disaggregates student achievement data so we can focus not only on the average student, but also on students in high poverty schools, migrant students, and students with limited English proficiency. This will help ensure that no student is left behind as schools work to help all children reach high standards.

This is a crucial time in the national effort to raise standards for our students. Six years after the enactment of the Improving America's Schools Act, one of the most important requirements of the Act comes due. States must have in place standards for student achievement, assessments that are aligned with the standards, and procedures for holding schools accountable for the results they achieve with all students. This report provides a snapshot of state progress toward implementing these requirements, demonstrating the considerable progress many states have already made, as well as the additional work still ahead.

This report is the product of an ongoing partnership between the U.S. Department of Education, the Council of Chief State School Officers, and the States. By continuing to work together, we can complete the task at hand: Strengthening our schools and improving teaching and learning by insisting on the same high expectations for all of our children.

Michael Cohen
Assistant Secretary for Elementary and Secondary Education
U.S. Department of Education

Our Council is privileged once again to be publishing an important report of State Education Indicators. With a decade of reporting experience behind us, the 1999 edition includes new information and an adjusted format to assist policy makers and practitioners, parents and students, the media and public in reviewing and interpreting key factors about education in the United States. This report offers state profile information about students and their achievement, teachers, and standards for student learning. It includes special data about the education of children in poverty and the assistance they receive toward achieving state standards through Title I, the largest single federal education program. A particular feature of our report for 1999 is the inclusion of state accountability summaries.

The 1999 report has been prepared with great cooperation from the states and through a joint effort of our Council and the Planning and Evaluation Service of the United States Department of Education. We thank the Department for its support and join with them in hopes the report serves you well. Please let us know of your reactions and suggestions for future reports.

Gordon M. Ambach
Executive Director
Council of Chief State School Officers

Acknowledgments

The Council received valuable contributions from many organizations and individuals in preparing the 1999 State Education Indicators report. We consider the report a truly collaborative effort, and we look forward to working on future editions in the series.

We received strong support from chief state school officers, state assessment directors, and state Title I directors for the idea of a 50-state report profiling key statewide education indicators and indicators of progress of Title I programs. States provided excellent cooperation in reporting not only the state assessment data required under Title I, but also further details about state assessment programs and student demographics that provide the context for analyzing assessment results. State education staff carefully reviewed the data in the state profiles and provided important suggestions for improving the report,

and we thank them for their continued assistance which make the profiles possible.

Funding support for the State Education Indicators report was provided under a task order from the U.S. Department of Education, Planning and Evaluation Service. We very much appreciate the guidance and assistance provided by staff in the Planning and Evaluation Service, including Valena Plisko, Daphne Hardcastle, Collette Roney, Joanne Bogart, and Kathryn Doherty, as well as staff in the Office of Compensatory Education Programs, including Janet Carroll, Elois Scott, and Grace Ross. The National Center for Education Statistics provided access to data files from the Common Core of Data, NAEP, and Schools and Staffing Survey, and we particularly thank John Sietsema for his assistance. The database for the state profiles was developed in collaboration with Westat, Inc., and we appreciate the efforts of

Beth Sinclair, Nina Blecher, and Babette Gutmann in data collection and project support.

The design files were created by Anastasia Miller and the layout work was done by Cynthia Dardine. The data were proofed by Cynthia Dardine and Thomas MacMillan. This report would not have been completed without their combined assistance and we are grateful.

An expert advisory panel guided CCSSO in selecting and developing the indicators for 1991 as well as assisting in refining the report design, and we would like to thank the panel members who assisted us this year: Paul Barton, Barbara Clements, Ellen Forte-Fast (CT), Ken Gentry (KS), Leslie Lawrence, Sam Lester (TX), Dori Nielson (MT), John Poggio (KS), Peter Prowda (CT), Hal Sanderson (UT), John Sietsema, and Phoebe Winter.

The Council of Chief State School Officers (CCSSO) established its leadership in reporting state-by-state education indicators in 1984. Since our initial reports, which provided a core set of indicators focusing on student outcomes, state context, and state policies, the Council continues to find strong interest in reliable, comparable state indicators. We aim to provide meaningful statistics for use by state leaders, local educators, parents, teachers, professional organizations, federal agencies, and researchers.

Report Objectives and Design

For the 1999 report entitled *State Education Indicators with a Focus on Title I*, CCSSO collaborated with the state departments of education to compile, analyze, and report key indicators of the condition and progress of K-12 public education. While the goals for the state indicators reports have remained consistent for 15 years, new indicators have been added and existing indicators have been refined to improve their use and applications. The CCSSO approach to education indicators has three emphases: 1) consistent, reliable indicators to allow analysis of trends for each state over time, 2) high data quality to provide comparability from state-to-state, and 3) accessible indicator formats for increased uses by a variety of audiences.

The design for the CCSSO State Education Indicators report is based on two-page profiles that report the same indicators for each state. The present format originated in 1997 with the start of our partnership with the U.S. Department of Education to incorporate indicators of state progress in implementation of Title I state accountability systems. The profiles format has several advantages—first, readers can easily find all of the relevant indicators for a state; second, focus is

placed on trends for a state over time; and, third, less emphasis is given to use of indicators for ranking states against each other.

The indicators included in the 1999 report were selected through a three-step process: consultation with state education leaders; input from U.S. Department of Education officials; and review by an expert advisory panel comprised of researchers, data managers, and educators. All of the indicators presented in the prior reports received critical analysis by our panel to ensure the reliability and validity of the measures that would be used this year. We have received excellent cooperation in obtaining data for this report from state departments of education and various offices of the U.S. Department of Education.

Guide to State Indicator Profiles

CCSSO's State Education Indicators are reported to widely diverse audiences. It is our hope that all of the readers—public officials, educators, citizens—will find the profiles useful and informative. The profiles that follow are key measures of the quality of K-12 public education in each state. The 1999 profiles focus on the status of each indicator as of the 1997-98 school year, or the most recent year for which data were available. The profiles also provide data trends over time for many of the indicators.

Our purpose in reporting state indicators is not to answer each question or address every need for state-level information on the intended topics. We hope that readers will turn to the data sources for state indicators for more detailed information and explanation. The Appendices contain several 50-state tables for reviewing indicators that are directly comparable from state-to-

state. The indicators in each state profile are organized in four categories:

School and Teacher Demographics

The indicators in this category provide a statewide picture of important characteristics of the public K-12 school system, including schools, teachers, teacher preparation, and finance. The statistics for each state on number of school districts, public schools by grade level, student-teacher ratios, and sources of funding are from the Common Core of Data surveys conducted by the National Center for Education Statistics (NCES) through the state departments of education. The data on professional development of teachers in the fields of reading, mathematics, and science education are compiled from teacher questionnaires distributed with the National Assessment of Educational Progress (NAEP). The data for percentage of secondary teachers with a major in their main assignment field is from the NCES *Schools and Staffing Survey*. Appendix B provides 50-state tables summarizing context and demographics, including expenditures per pupil, Title I funding, Sources of funding, percent of population that is school-age, percent of children living in poverty, per-capita personal income, educational level of adults, and public K-12 teachers.

Student Demographics

Statewide totals for numbers of students in public elementary and secondary schools are reported for two years, the most recent school year available and the baseline year closest to 1990 for which data were available. An important aspect of the assessment and evaluation for Title I is the disaggregation of student achievement results by student characteristics, particularly race/ethnicity, disabilities, English proficiency, and migrant status. The data give readers a picture of the size of these student populations in

each state. Included in this section are two measures of student outcomes from secondary schools—the high school dropout rate (based on annual percent of 9–12 students leaving school, or “event rate”), and the post-secondary enrollment rate (percent of high school graduates enrolled in college one year later). Finally, the bar graph showing counts of public schools by percent of students eligible for free lunch program (i.e., students from families below the poverty level), are useful for reviewing the disaggregated student achievement results reported on the second page of each profile.

Statewide Accountability Information

The 1999 State Education Indicators report marks the addition of a new indicator section that reflects CCSSO’s first effort to report information on the statewide accountability systems operating in the 50 states. The information on accountability systems was compiled from state reports on the Internet, printed reports, surveys and research by CCSSO (Taylor, *Case Studies of State Accountability Systems*, 1999; Olson, et al., *Annual Survey, State Student Assessment Programs*, 1999), and Title I accountability indicators by state (Miller, *Title I Report*, 1999).

Our purpose is to provide four indicators of the status of state accountability systems as of fall 1999. A majority of states have developed and implemented school-level accountability measures and improvement targets which apply to all schools, and all states are required by federal law to develop a system of school accountability for Title I programs which measures “adequate yearly progress” (AYP) according to the state’s standards and measures of progress. Thus, the four indicators in the state profile (identified below) are intended to provide a basic picture of how the state has developed its accountability system statewide and for Title I. Further information on each state system can be found under the “Sources” listed for each state

(following state profiles).

- Statewide Goal for Schools on Student Assessment—30 states have established a goal, such as percentage of students in a school, that will attain the state-defined proficient level on state student assessments in specific subjects (see assessment name and state definition of “proficient” on second page of profile).
- Expected School Improvement on Assessment—26 states have set a target for amount of improvement in student achievement scores for the school by a certain time period (e.g., annually).
- Indicators for School Accountability—31 states have defined one or more indicators that are used in the accountability system.
- Title I AYP Target for Schools—All 50 states have measures of adequate yearly progress, as required under Title I. Some states have a transitional definition of AYP. In 17 states the AYP target for school improvement is based on the statewide accountability system, and we list “same” for this indicator. If it is different, the Title I target is summarized.

Title I Schools

In an effort to expand the focus on Title I in our report, we have added several indicators of Title I programs. We report the total enrollment in Title I and race/ethnic percentages for Title I students. In addition, we report the Title I funding allocation per state and the number of schools with Title I programs. States report the data on Title I programs through the U.S. Department of Education’s *Title I Performance Report*. The number of schools in 1997–98 are compared with the numbers for 1995–96 and 1994–95.

Student Achievement

State assessment aggregate scores were obtained by CCSSO from the *Title I Performance Report (Part 7)*

submitted by states to the U.S. Department of Education. States reported the average percent of all students meeting each of three state-defined levels, and the average percent of students meeting the three levels using several disaggregated school and student categories specified by Title I.

Each state determines its state test, how levels are set and defined, and the grade at which students are tested. Thus, student achievement scores are not comparable state-to-state. Student results for a state, e.g., percent meeting the state’s “proficient” level, can be compared with the same state’s performance in the prior year. State level results on the National Assessment of Educational Progress (NAEP), which are comparable state-by-state, are reported in the lower right corner. Definitions of state proficiency levels when not listed in the profile are available in Appendix A. NAEP proficiency definitions are available in Appendix C.

States reported student achievement results for the 1997–98 school year for mathematics and reading/language arts at three grade levels, as specified by Title I requirements: elementary-grade 3, 4 or 5; middle-grade 6, 7, or 8; and high-grade 10, 11, or 12. We report disaggregated assessment results for states reporting by Title I programs, school percent of students from low income families, limited English proficient students, and migrant students. Results by other student characteristics are listed in the table on page xii.

The “student achievement trend” at the bottom of the page shows a histogram with the percent of students in different school categories that meet or exceed the state level for “proficient.” Histograms are displayed for eight states with 1996–97 as their baseline year for analysis—and eleven states with 1995–96 as their baseline

year. In order for a trend to be reported for multiple years, a state must disaggregate by school poverty level, use the same assessment tool, and keep the same definition of proficient. Changes in these assessment characteristics disqualifies a state from having a trend analysis.

State Progress toward Standards and Assessments

CCSSO aims to assist states and the U.S. Department of Education in tracking the progress of Title I programs, and particularly the developments and use of state standards and assessments in state accountability for the programs. A goal of our annual report is to chart the progress of states in developing Title I accountability systems based on state content standards and aligned state assessment programs. Title I is the largest single grant program of the federal government. For over 30 years, it has earmarked funds for states to provide additional educational support for the neediest children in all 50 states and the outlying territories. Ninety-seven percent of schools with more than seventy-five percent of their students living in poverty receive some level of Title I funds. Schools with greater than fifty percent poverty are eligible to become a "schoolwide" program which allows funds to be distributed throughout the entire school. Targeted assistance programs channel funds directly to the neediest students.

The Improving America's Schools Act (IASA) of 1994 reauthorized federal funding for compensatory education in schools and changed the requirements and systems for assessment and evaluation of Title I. The new law requires states to monitor the progress of schools in improving the achievement of low-income students, and also requires alignment of student achievement tests

with state standards for learning that apply to all students.

The individual state profiles and trends in assessment results in the CCSSO State Education Indicators report are useful for initial determinations of educational improvements that may be related to Title I programs. In addition, the status of components of state accountability systems can be used to assess the progress of states toward meeting the requirements of the IASA by the school year 2000. We have organized the information on state systems in a 50-state matrix table (following) which displays five key indicators of state progress in developing accountability systems for Title I.

1. Content Standards—49 States

As of 1999, 49 states have completed and implemented content standards for K-12 education in the core academic subjects of English/language arts and mathematics, and 47 states also have standards for science and social studies/history.

2. Performance Standards met Criteria—25 States

The U.S. Department of Education is reviewing the process by which states have developed performance standards in language arts/reading and mathematics. As of 1999, performance standards developed by 27 states met the review criteria set by the Department. State performance standards are a critical step in aligning state assessments with state content standards—and in defining how the assessments will be designed and how results will be scored, aggregated, and reported.

3. State Assessment Results reported by Proficiency Levels—33 States

For the 1997-98 school year, 33 states reported state assessment results using three or more proficiency levels that were defined by the state. The

matrix in Appendix B identifies the name of each assessment instrument and the year in which the proficiency levels were set by the state.

4. State Achievement Results Disaggregated—35 States

A key feature of the IASA was a provision that assessment results could be disaggregated by characteristics of schools and students. The goal for Title I accountability is to report assessments such that educators and policymakers can easily determine the progress of schools according to key characteristics of students. By 2000, states must report their assessment results disaggregated for Title I schools—by Schoolwide and Targeted assistance—and by school according to the percent of students in each school from families in poverty. States must also disaggregate results according to student's gender, race/ethnicity, and their status as disabled, limited-English proficient, and/or migrant. For 1997-98, 35 states reported assessment results using some of the disaggregated categories.

5. Assessment Trends Analysis—11 States

As of 1997-98, 19 states had reported two years of assessment results using consistent assessments, levels, and grades; and 11 states reported three years of results that could be analyzed as trends.

Sample State Trends Analysis

The following is an example of trend analysis in student achievement using data from North Carolina's assessment program. We examine the extent of gains in language arts/reading and mathematics from 1996 to 1998 using consistent data from three years of assessment results, based on the same test with results reported by proficiency levels and disaggregated by school poverty level.

NC End of Grade Test—Grade 4

Reading Level 3 and higher		Gain	
	1996	1998	
All Students	69.4%	70.9%	1.5%
00-34 % Poverty	77.3	79.4	2.1
75-100% Poverty	52.0	52.9	0.9
Math Level 3 and higher		Gain	
	1996	1998	
All Students	67.8%	76.3%	8.5%
0-34% Poverty	66.4	75.4	9.0
75-100% Poverty	45.8	61.2	15.2

Test-CRT; levels set in 1992
 North Carolina Level 3 Students performing at this level consistently demonstrate mastery of grade level subject matter and skills and are well prepared for the next grade level.

In both Reading and Mathematics, a disparity in achievement is evident between schools with few low-income students and schools with many low-income students. For example the average school has 76.3 percent of students above Level 3 in mathematics, while high-poverty schools have 61.2 percent above this level. Mathematics results did improve significantly in the past

two years in math in high-poverty schools—a gain of 8.5 percentage points on Math Level 3 (i.e., proficient). Improvement in reading in high-poverty schools is above the rate of improvement for all students.

Across all North Carolina elementary schools, three-quarters of students are at or above the expected levels of performance in mathematics and reading. In schools with high concentrations of low-income children, only sixty percent of students are proficient in math and fifty percent of students are proficient in reading. The high poverty category in North Carolina includes 100 elementary schools from a total of over 1,200 schools.

North Carolina's accountability system and levels have been in place since 1992. A total of 5 percent of students were excluded from testing in grade 4 reading and math due to exemptions for disabilities and English proficiency.

The progress of North Carolina students in mathematics as measured on NAEP is consistent with the progress of students on the state assessment during the period 1995 to 1998. For example, the percent of high poverty schools at or above Basic mathematics level on NAEP improved 19.7 percentage points over four years from 1992 to 1996 (from analysis of NAEP data, School Poverty and Academic Performance: NAEP Achievement in High Poverty Schools, U.S. Department of Education, 1998). Mathematics gains in high poverty schools on the state assessment showed 8.5 percentage points gain at Level 3 over two years. The progress of North Carolina students in reading on NAEP from 1992 to 1994 is different from the trend on the state assessment from 1996 to 1998. With each assessment, high poverty schools made small gains in reading scores while NAEP actually slightly decreased.

Uses of State Indicators

The CCSSO State Education Indicators report is a collaborative effort. State departments of education committed extensive staff time to analyzing and reporting student assessment results and reviewing and editing the state profiles. Assessment directors reviewed the report design and indicators selection through the CCSSO Education Information Advisory Committee and provided valuable suggestions and revisions. The U.S. Department of Education provided funding and analysis support for the report, facilitated our use of data, and advised on the reporting of indicators.

This report comes at an important time for states, schools, and students. Standards and assessments are at the center of education reform in the states. Schools are working with Title I programs to develop new approaches to education for low-income students and other at-risk students. An important goal of these efforts is to close the gap in education opportunity and student learning between poor and wealthier students. We hope that State Education Indicators will be a useful tool in analyzing the effectiveness of state education systems. We look forward to reader feedback on ways we can improve both the types of indicators we report and how they are presented and explained. We hope to continue to examine indicator trends in these indicators and to expand the usefulness of our reports for analyzing the development and implementation of state systems of reporting and accountability.

Assessment Information

Assessment Reported
Stanford Achievement Test version 9, used since 1996

Progress Toward Assessment Aligned with Standards
Performance standards did not meet review criteria of the U.S. Department of Education.

State Definition of "Proficient," used since 1996
The "Academic Caution" level reflects the percent of students scoring at the 4th stanine.

Definition of Title I Targeted Assistance
All students in Title I schools at tested grade are included in the assessment results.

Exclusion from Assessment
LEP committee decisions, LEP committee decisions, or PEP decisions for 504.

Other Assessments
None.

Assessment Information

Assessment Reported

Louisiana Educational Assessment Program, used since 1989. Currently, Louisiana's criterion-referenced testing program results are reported at two levels only—Attaining and Not Attaining. Future plans include a new standards-based assessment program, with implementation being phased in between 1998-99 and 2001-02. At that time, Louisiana will have five proficiency levels: Advanced, Proficient, Basic, Approaching Basic, and Unsatisfactory. Progress Toward Assessment Aligned with Standards Performance standards at two grades met review criteria of the U.S. Department of Education. Exclusion from Assessment No information given Other Assessments No information given

Assessment Information

Assessment Reported
 Maryland School Performance Assessment Program, used since 1992
 Progress Toward Assessment Aligned with Standards
 Performance standards met review criteria of the U.S. Department of Education.

State Definition of "Proficient," used since 1993
 Satisfactory: A realistic and rigorous level of achievement indicating proficiency in meeting the needs of students.

Definition of Title I Targeted Assistance
 All students in Title I schools at tested grade are included in the assessment results.

Exclusion from Assessment
 Certain students with disabilities and LEP students

Other Assessments
 Comprehensive tests of Basic Skills, given each year to all students in grades 2, 4, and 6. Maryland Functional Tests in Reading, Mathematics, and Writing. Minimum competency tests required for high school graduation. (Effective with the 1999-00 school year)

Assessment Information

Assessment Reported
Multiple Assessment Tools. Scores reported by elementary, middle, and high levels rather than by grade.

Progress Toward Assessment Aligned with Standards
Performance standards did not meet review criteria of the U.S. Department of Education.

State Definition of "Proficient"
Four Levels of Proficiency were defined. State standards were established for the NRT. Each district submitted standard points for the CRT which were reviewed by the SEA. Standard Criteria for the combined NRT and CRT points determine the level of performance. The pre-emerging and emerging levels represent the level of partially proficient as defined in the law.

Definition of Title I Targeted Assistance
All students in Title I schools at tested grade are included in the assessment results.

Exclusion from Assessment
No statewide testing, only Title I

Assessment Information

Assessment Reported
New York State Pupil Evaluation Program Test, used since 1973
Progress Toward Assessment Aligned with Standards
Performance standards did not meet review criteria of the U.S. Department of Education.

State Definition of Proficient
Score at or above the state's "minimum reference point," but below mastery level

Definition of Title I Targeted Assistance
All students in Title I schools at tested grade are included in the assessment results.

Exclusion from Assessment
LEP students are tested using alternate assessments

Other Assessments
No information provided

Progress Toward Assessment Aligned with Standards
 Performance standards met review criteria of the U.S. Department of Education.

State Definition of "Proficient"

Proficient/Achieved Standard: At this level, students demonstrate the ability to apply concepts and processes effectively and accurately. Students communicate ideas in clear and effective ways.

Exclusion from Assessment

Extended absences, alternate assessments

School and Teacher Demographics

Number of districts

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1997-98
Notes: All local school districts are included in these counts. Separate supervisory unions, regional education services agencies, and state-operated institutions are excluded.

Number of public schools in state

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1997-98
Notes: School counts based on NCEs definitions in Digest of Education Statistics. Schools are broken into five categories: Elementary, Middle, High, Combined, and Other. A school is classified as combined if it provides instruction at both the elementary (grade 6 or below) and the secondary (grade 9 or above) levels.

Student/teacher ratio

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1997-98
Note: Number of public school students divided by number of teachers in full-time equivalents.

Number of FTE Teachers in state

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1997-98
Notes: Teacher counts based on NCEs definitions in Digest of Education Statistics. Schools are broken into five categories: Elementary, Middle, High, Combined, and Other. A school is classified as combined if it provides instruction at both the elementary (grade 6 or below) and the secondary (grade 9 or above) levels.

Professional development of teachers in field

Source: U.S. Department of Education, National Center for Education Statistics, NAEP Mathematics and Science Teacher Questionnaire, 1996

Note: Percent of teachers with 16 or more hours professional development or inservice education in the fields of mathematics/science in the past 12 months. Standard errors reported in NAEP Mathematics Cross-State Compendium, NCEs, 1998; NAEP Science Cross-State Compendium, NCEs, 1998.

Race/ethnicity and gender of teachers

Source: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey, Public School Teacher Questionnaire, 1994

Notes: Standard errors reported in SASS by State, NCEs, 1996

Secondary teachers with major in main assignment

Source: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey, Public School Teacher Questionnaire, 1994

Notes: Teachers have undergraduate or graduate major in the same field as their main teaching assignment. Standard errors reported in SASS by State, NCEs, 1996.

Sources of funding

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, National Public Education Financial Survey, 1996-97 school year.

Notes: Information is shown for three major revenue sources: Federal, State, and Local. A fourth category, Intermediate, is shown only for those states which have funds in this category.

Student Demographics

Public school enrollment

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1989-90 and 1997-98

Notes: These numbers do not include ungraded students. Public Preschool Enrollment is recorded according to state definition of public preschools and state decision on data collection.

Race/ethnicity of K-12 students

Source: U.S. Department of Education, Office for Civil Rights, State Summaries of Elementary and Secondary School Civil Rights Survey and the National Center for Education Statistics, Common Core of Data, 1989-90, 1997-98

Students with disabilities (K-12)

Source: U.S. Department of Education, Office of Special Education Programs, 1990-91 and 1997-98

Notes: The figures shown represent the percentage of children ages 6 to 17 served under IDEA, Part B.

Limited English Proficient (K-12)

Source: U.S. Department of Education, National Clearinghouse for Bilingual Education, 1989-90, 1996-97

Notes: The number of LEP students enrolled in public schools

Migrant (K-12)

Source: U.S. Department of Education, Office of Migrant Education, 1993-94, 1997-98

Notes: The criterion for migrant status was reduced from six to three years in 1994. Data will only be tracked from that point forward. The figures shown represent the "12-month" count of students identified for the Migrant program. The 12-month count is the unduplicated number of eligible children ages 3-21 who, within three years of making a qualifying move, resided in the state for one or more days during the reporting period.

High school drop-out rate (annual)

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1993-94, 1996-97

Notes: Only states whose definitions complied with NCEs's definition were included. Annual, or "event," rate is the percentage of 9-12 students dropping out during one school year (1996-97 most recent year available).

Post-secondary enrollment

Source: U.S. Department of Education, National Center for Education Statistics, Residence and Migration of First-Time Freshmen Enrolled in Higher Education Institutions, Fall 1994 and Fall 1996; Common Core of Data; and Private School Universe Survey.

Notes: Accounts for first-time students attending college in any state, and does not account for graduates who

attended college outside of the United States. The Residence and Migration portion of the Fall Enrollment Survey is administered every two years. The Common Core of Data provides the number of public high school graduates for the prior school year; the Private School Universe Survey provides the number of private high school graduates.

All schools by percent of students eligible for the Free Lunch Program

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1997-98
Notes: The figures shown represent the percentage of students eligible to participate in the Free Lunch Program under the National School Lunch Act. This does not include those eligible only for reduced-price lunch.

Notes: Data reported for public schools only. Some states did not satisfy one of the guidelines for school sample participation rates. See Appendix E for further information and definitions of proficient and basic.

Further State Proficiency Level Definitions

Colorado
 Proficient: Students understand directions, recognize author's point of view, explain reaction, define problem or solution, make predictions and draw conclusions, differentiate among printed materials, discriminate among various media, extract information from complex stimulus, identify character's reactions/motives, identify sequence, support opinion, classify familiar vocabulary, and interpret poetry in a concrete manner.

Connecticut

Grade 4
 Reading Score Band 3: Scores in this band are at or above the statewide goal for reading. Students who score in this range possess the knowledge and skills necessary to successfully perform the tasks and assignments appropriately expected of fourth graders with minimal teacher assistance. Generally students who score in this range can comprehend textbooks and other materials typically used at grade four or above.

Math Score Band 4: Scores in this band are at or above the statewide goal for mathematics. Students who score in this range possess the knowledge and skills necessary to perform the tasks and assignments expected of fourth graders with minimal teacher assistance. Generally, these students demonstrate well-developed computational skills, conceptual understandings and problem-solving abilities.

Grade 8

Reading Score Band 3: Scores in this band are at or above the statewide goal for reading. Students who score in this range possess the knowledge and skills necessary to successfully perform the tasks and assignments appropriately expected of eighth graders with minimal teacher assistance. Generally, students who score in this range can comprehend textbooks and other materials typically used at grade eight or above.

Math Score Band 4: Scores in this band are at or above the statewide goal for mathematics. Students who score in this range possess the knowledge and skills necessary to perform the tasks and assignments expected of eighth graders

with minimal teacher assistance. Generally, these students demonstrate well-developed computational skills, conceptual understandings and problem-solving abilities.

Grade 10

Reading Score Band 3: Scores in this band are at or above the response to literature standard. Students at this level have demonstrated perceptive and insightful comprehension of the text. They have presented their interpretation of the text and have supported it by making connections between the text and other experiences or sources. Students at this level have also demonstrated the ability to apply the conventions of English.

Math Score Band 4: Scores in this band are at or above the goal for mathematics. Students who score in this range have demonstrated a strong understanding of the concepts and skills expected of Connecticut high school students. These students have the problem solving abilities required to apply what they know to complex problems and effectively communicate their understanding.

Florida

Proficient: Above the 50th percentile for district norm-referenced tests in reading comprehension and math concepts/applications at grades 4 and 8; a passing score on Communications and Mathematics parts of the High School Competency Test.

Iowa

Grade 4 Reading

Intermediate: Understands some factual information; sometimes can draw conclusions and make inferences about the motives and feelings of the characters; and is beginning to be able to identify the main idea, evaluate the style and structure of the text, and interpret non-literal language.

Grade 4 Mathematics

Intermediate: Is beginning to develop an understanding of most math concepts and to develop the ability to solve complex word problems, use a variety of estimation methods, and interpret data from graphs and tables.

Grade 8 Reading

Intermediate: Understands some factual information; sometimes can draw conclusions; make inferences about the motives and feelings of characters; and apply what has been read to new situations; and sometimes can identify the main idea, evaluate the style and structure of the text, and interpret non-literal language.

Grade 8 Mathematics

Intermediate: Is beginning to develop an understanding of most math concepts and to develop the ability to solve complex word problems, use a variety of estimation methods, and interpret data from graphs and tables.

Grade 11 Reading

Intermediate: Understands some factual information; sometimes can make inferences about the characters; identify the main idea, and identify author viewpoint and style; occasionally can interpret non-literal language and judge the validity of conclusions.

Grade 11 Mathematics

Intermediate: Is beginning to develop the ability to apply a variety of math concepts and procedures, make inferences about qualitative information, and solve a variety of novel, quantitative reasoning problems.

Kentucky

Student demonstrates knowledge of major concepts even though she/he overlooks or misunderstands some less obvious ideas or details. Student can apply core concepts and skills to solve problems. Student makes connections among major concepts. Student communicates ideas effectively.

Maine

Basic: Students demonstrate a command of essential knowledge and skills with partial success on tasks involving higher level concepts, including applications of skills, make connections among ideas, and successfully address problems and tasks. Communications are direct and reasonable effective, but sometimes lack the substance or detail necessary to convey in-depth understanding of concepts.

Missouri

Grade 4 Math

Proficient: Students communicate math processes; add and subtract common fractions, and decimals (money only); use standard units of measurement; identify attributes of plane and solid figures; create and interpret data from graphs; recognize, extend, and describe pictorial or numeric patterns; apply strategies to solve multistep and logic problems.

Grade 8 Mathematics

Proficient: Students communicate math processes; recognize transformations; solve problems using units of measurement; interpret data from multiple representations; extend and describe patterns and relationships using algebraic expressions; develop and apply number theory concepts; use inductive and deductive reasoning to solve problems.

Grade 10 Mathematics

Proficient: Students communicate math processes; usually analyze and evaluate information; estimate; recognize reasonableness; identify needed information; make predictions; find probability; identify various representations of data; represent situations algebraically; apply properties of real numbers; use multiple strategies to solve problems.

New Hampshire

Grade 3 Reading/Language Arts

Proficient: Students at this level demonstrate an overall understanding of the materials they read, hear, and view. They are able to identify main ideas and draw conclusions. Their responses show thought and are supported with some detail. When writing, they communicate competently and are able to adequately develop and support their ideas. Although they demonstrate a firm grounding in the mechanics of written expression, they may make errors in spelling and grammar. However, these do not interfere with a reader's ability to understand the text.

Grade 3 Mathematics

Proficient: Students at this level are able to estimate and compute solutions to problems and communicate their understanding of mathematics. They can, with reasonable accuracy, add 3-digit whole numbers; subtract any two-digit numbers; and

multiply whole numbers up to five. They are able to demonstrate an understanding of place value as well as the relationship between simple fractions and decimals; read charts and graphs; make measurements; and recognize and extend patterns.

Grade 6 Reading/Language Arts

Proficient: Students at this level demonstrate an overall understanding of literary, narrative, factual, informational, and practical works. They extract main ideas, analyze text, evaluate and organize information, draw conclusions, and make inferences and interpretations. They critically evaluate materials they read, hear, and view. They effectively organize, develop, and support ideas so that a reader can easily understand the intent of their writing. They demonstrate a firm grounding in the mechanics of written expression; however, they may still make some errors.

Grade 6 Mathematics

Proficient: Students at this level demonstrate an overall understanding of mathematical concepts and skills. They make few, if any, errors in computation. They use tables and graphs to organize, present, and interpret data. They employ appropriate strategies to solve a wide range of problems. They clearly communicate their solutions and problem-solving strategies.

Grade 10 Reading/Language Arts

Proficient: Students at this level demonstrate a solid understanding of a wide range of literary, narrative, factual, informational, and practical works. They make meaningful connections between and among ideas and concepts in materials they read, hear, and view. They evaluate and organize information, make and communicate informed judgments, and provide evidence for inferences and interpretations. Their writing is clear, logical, and shows evidence of fluency and style. They effectively control the mechanics of language including spelling, capitalization, grammar, and punctuation.

Grade 10 Mathematics

Proficient: Students at this level demonstrate a solid understanding of mathematical concepts and skills. Their work displays a high degree of accuracy. They make meaningful

connections among important concepts in algebra, geometry, measurement, and probability and statistics. They identify and use appropriate information to solve problems. They provide supporting evidence for inferences and solutions. They communicate mathematical ideas effectively, with sufficient substance and detail to convey understanding.

Tennessee

Grade 4 Reading

Proficient: Students interpret figures of speech. They recognize paraphrase of text information and retrieve information to complete forms. In more complex texts, they identify themes, main ideas, or author purpose/point of view. They analyze and apply information in graphic and text form, make reasonable generalizations, and draw conclusions. In written responses they can identify key elements from text.

Grade 4 Mathematics

Proficient: Students compare, order, and round whole numbers; know place value to thousands; identify fractions; use computation and estimation strategies; relate multiplication to addition; measure to the nearest half inch and centimeter; measure and find parameters; estimate measures; find elapsed times; combine and subdivide shapes; identify parallel lines; interpret tables and graphs; solve two-step problems.

Grade 8 Reading

Proficient: Students identify genre and author craft. They recognize consistency in attitudes or viewpoints expressed in text. They synthesize ideas across various parts of the text to identify theme or central purpose. They infer connections between characters and events across texts and interpret data in graphic organizers. In written responses, they provide some justification or support for their answers.

Grade 8 Mathematics

Proficient: Students round to the nearest 10 or 100; compare and order integers; understand percents; solve proportions; compute with rational numbers; interpret division remainders in real world contexts; find volumes; use concepts of similarity, congruence and symmetry; find average of whole numbers, use data to solve problems and understand trends; evaluate algebraic expressions; solve multistep problems.

Expenditures per pupil, 1996-97

National Assessment for Educational Progress—Definitions and Further Information

Mathematics Achievement Levels—Grade 4

Basic Fourth-grade students performing at the basic level should show some evidence of understanding the mathematical concepts and procedures in the five NAEP content strands. Fourth graders performing at the basic level should be able to estimate and use basic facts to perform simple computations with whole numbers; show some understanding of fractions and decimals; and solve some simple real-world problems in all NAEP content areas. Students at this level should be able to use—though not always accurately—four-function calculators, rulers, and geometric shapes. Their written responses are often minimal and presented without supporting information.

Proficient Fourth grade students performing at the proficient level should consistently apply integrated procedural knowledge and conceptual understanding to problem solving in the five NAEP content strands. Fourth graders performing at the proficient level should be able to use whole numbers to estimate, compute, and determine whether results are reasonable. They should have a conceptual understanding of fractions and decimals; be able to solve real-world problems in all NAEP content areas; and use four function calculators, rulers, and geometric shapes appropriately. Students performing at the proficient level should employ problem-solving strategies such as identifying and using appropriate information. Their written solutions should be organized and presented both with supporting information and explanations of how they were achieved.

Note The following states did not satisfy one of the guidelines for school sample participation rates—Alaska, Arkansas, Iowa, Michigan, Montana, Nevada, New Jersey, New York, Pennsylvania, South Carolina, and Vermont.

Mathematics Achievement Levels—Grade 8

Basic Eighth-grade students performing at the basic level should exhibit evidence of conceptual and procedural understanding in the five NAEP content strands. This level of performance signifies an understanding of arithmetic operations—including estimation—on whole numbers, decimals, fractions, and percents. Eighth graders performing at the basic level should complete problems correctly with the help of structural prompts such as diagrams, charts, and graphs. They should be able to solve problems in all NAEP content strands through the appropriate selection and use of strategies and technological tools—including calculators, computers, and geometric shapes. Students at this level also should be able to use fundamental algebraic and informal geometric concepts in problem solving. As they approach the proficient level, students at the basic level should be able to determine which of the available data are necessary and sufficient for correct solutions and use them in problem solving. However, these eighth graders show limited skill in communicating mathematically.

Proficient

Eighth-grade students performing at the proficient level should apply mathematical concepts and procedures consistently to complex problems in the five NAEP content strands. Eighth graders performing at the proficient level should be able to conjecture, defend their ideas, and give supporting examples. They should understand the connections between fractions, percents, decimals, and other mathematical topics such as algebra and functions. Students at this level are expected to have a thorough understanding of basic level arithmetic operations—an understanding sufficient for problem solving in practical situations. Quantity and spatial relations in problem solving and reasoning should be familiar to them, and they should be able to convey underlying reasoning skills beyond the level of arithmetic. They should be able to compare and contrast mathematical ideas and generate their own examples. These students should make inferences from data and graphs; apply properties of informal geometry; and accurately use the tools of technology. Students at this level should understand the process of gathering and organizing data and be able to calculate, evaluate, and communicate results within the domain of statistics and probability.

Note

The following states did not satisfy one of the guidelines for school sample participation rates—Alaska, Arkansas, Iowa, Maryland, Michigan, Montana, New York, South Carolina, Vermont, and Wisconsin.

Reading Achievement Levels—Grade 4

Basic

Fourth-grade students performing at the Basic level should demonstrate an understanding of the overall meaning of what they read. When reading text appropriate for fourth graders, they should be able to make relatively obvious connections between the text and their own experiences, and extend the ideas in the text by making simple inferences.

Proficient

Fourth-grade students performing at the Proficient level should be able to demonstrate an overall understanding of the text, providing inferential as well as literal information. When reading text appropriate to fourth grade, they should be able to extend the ideas in the text by making inferences, drawing conclusions, and making connections to their own experiences. The connection between the text and what the student infers should be clear.

Note

The following states did not satisfy one of the guidelines for school sample participation rates—Montana, Nebraska, New Hampshire, Pennsylvania, Rhode Island, Tennessee, and Wisconsin.
