IDENTIFIERS Ohio

## ABSTRACT

This document helps districts implement the new teacher licensure standards and ensure that staff are assigned to classes they are qualified to teach. It identifies both the existing certification areas and the new licensure areas that are required for teaching specific courses. The areas included are: agriculture; business; career-based intervention programs; computer technology; education of the handicapped; English language arts; family and consumer sciences; foreign language; health education; health occupations; industrial technology/technology education; library/media; mathematics; music; physical education; science; social studies; trade and industrial; and visual arts. For each area, the document provides information on subject code and title; subject definition; subject credit; license type; license code; licensure area; certificate type; certificate code; and certificate area. ## Introduction

Teacher expertise is the most important factor in determining student achievement. Two recent reports, *What Matters Most: Teaching for America's Future* (NCTAF) and *Pursuing Excellence* (TIMSS), point to the close relationship between students' achievement and the knowledge, skills, and the expertise of their teachers.

The following research supports that teacher quality is crucial to what students learn:

1. Teachers' expertise accounts for far more variation in students' achievement than any other factor (Ferguson, 1991).
2. A review of 60 studies finds that teacher education, ability, and experiences are associated with significant increases in student achievement. (Greenwald, Hedges, and Laine, 1996).
3. A study of high- and low-achieving schools in New York City with similar student populations reports that differences in teacher qualifications accounted for more than 90% of the variation in student achievement in reading and mathematics at all grade levels tested. (Armour-Thomas, Clay, Domanico, Bruno, and Allen, 1989).
4. A Tennessee study of the effects of teachers on student learning indicates that elementary school students who are assigned to ineffective teachers for three years in a row score fifty percentile points lower on achievement tests than those assigned to the most effective teachers over the same period of time. (Sanders and Rivers, 1996).

These and other studies confirm that teacher knowledge and expertise are critically important to student achievement. Thus it is important that teachers are assigned to teach only those courses they are fully qualified to teach.

Two recent developments in Ohio are impacting districts in the area of teacher qualifications. First, the new teacher licensure standards that became effective in 1998 are being implemented throughout the state. Second, local district report cards will report on out-of-field teaching in each district, beginning in the year 2000.

This document is designed to assist districts in implementing the new licensure standards and in ensuring that staff are assigned to classes they are qualified to teach. This document identifies both the existing certification areas and the new licensure areas that are required for teaching specific courses. Teachers should hold either the certificate or license identified in this document for each course they teach. Ohio Revised Code sections 3319.30 and 3319.36 prohibit districts from employing teachers without appropriate certification.

Please note that some very old certification codes (prior to 1970) are not listed in the charts. Such codes were omitted in order to minimize confusion over codes that are rarely used today. However, EMIS will continue to accept these codes as appropriate for teachers who still teach under those certificates.

In addition, not all subject areas are included in this document. We have included that vast majority of teaching areas, but some will need to be added over the coming year.

As with any complex document comprised of multiple charts and codes, there may be some omissions or misalignments. If you note any areas in which you feel there is an error, please contact us. We will continue to edit and refine this document as needed to ensure that it is accurate and helpful to districts.

For questions or comments about the EMIS codes in this document, contact Edna Kimm at [ims\\_kimm@ode.ohio.gov](mailto:ims_kimm@ode.ohio.gov). For questions or comments on the credentials required for teaching specific courses, contact Leonard Crawford via e-mail at [lc\\_crawford@ode.ohio.gov](mailto:lc_crawford@ode.ohio.gov) or at the following mailing address: 65 S Front Street, Room 412, Columbus, Ohio 43215-4183.

Intervention/Review Mathematics 111950	Courses contain little or no significant new content from courses taken previously. Courses may focus on helping students who have taken but not yet passed proficiency tests. Courses such as general mathematics, business mathematics, and consumer mathematics should be reported using this code if based upon content and skills from the middle childhood (grades 4-8) portion of the Model Competency-based Mathematics Program. This code should be used for pre-algebra courses that address content primarily from the grades 6-8 portion of the Model Competency-based Mathematics Program. (high school credit optional in grades 9-12, not for high school credit below grade 9)	Math AYA MC	110094 110100 (grade 9 only)	Integrated Mathematics Middle Childhood-Math	4-9 7-12	110100 (grade 9 only) 110000	Middle Grades Math (4-9) High School Math (7-12)		
Transition to College Mathematics 111850	A course designed for students in grades 11 or 12 who may have not previously been college-intending to make a transition to a college-preparatory program or study of mathematics. Content includes new topics and may revisit some previously addressed topics with increased emphasis on formalization, symbol manipulation, and mathematical structure.	Math AYA	110094	Integrated Mathematics	7-12	110000	7-12 High School Math		
AP Calculus 119950	Based upon most current Advanced Placement program syllabus for Calculus AB or Calculus BC and prepares students for Advanced Placement examination.								
AP Statistics 119550	Based upon most current Advanced Placement program and prepares students for Advanced Placement examination.								
Applied Mathematics 110500	Covers new, high-school level content through workplace, business, and consumer contexts and applications.

Physical Education 080300		A comprehensive subject area which incorporates fundamental motor skills, body control and balance, physical fitness, leisure sports and game skills, cognitive skills as well as stress management skills. It develops the social, emotional / physical skills essential to a happy and healthy lifestyle.	PE	080305	PE	7-12 K-12	Physical Education (7-12) Physical Education (K-12)	080310 080305		
Dance 080302		Provides students with opportunities to develop and aesthetic perception of dance as an art and an understanding of the creative process, as well as to develop technical skills and kinesthetic awareness through the artistic modes of expression and response. Instruction will emphasize the basic elements of dance: time, space, and effort (weight and energy). Activities will enable students to express personal ideas, feelings and values through dance; to learn how past and present societies have expressed their values and beliefs through dance; to respond to the dance performance of others, and to develop the body as a sensitive instrument for dance.	Dance PE	080302 080305	Dance PE	7-12 K-12 7-12 K-12	Dance (K-12) Dance (7-12) Physical Education (7-12) Physical Education (K-12)	080302 080314 080310 080305		
Lifetime Sports 080405		Activities taught throughout the school life with emphasis on learning experiences that can be turned into healthful lifetime skills.	PE	080305	PE	7-12 K-12	Physical Education (7-12) Physical Education (K-12)	080310 080305		
Adapted Physical Education 080505		Adapted Physical Education is specially designed instruction in physical education. According to federal law, physical education means the development of (a) physical and motor fitness (b) fundamental motor skills and patterns; and (c) skills in aquatics, dance, and individual and group games and sports (including intramural and lifetime sports).	PE	080305	Adapted Physical Education *endorsement in APE is attached to multiage license in PE	7-12 K-12	Adapted Physical Education *endorsement in APE is attached to a certificate in PE	080310 080305

Science MC 131110	Integrated Middle Childhood course, which enables all students to develop standards-led fundamental abilities and concepts. Courses enable all students to develop standards-led understanding about scientific inquiry and abilities necessary to do scientific inquiry. Middle childhood standards-led science content includes: life sciences, including the structure and function in living systems, reproduction and heredity, regulation and behavior, populations and ecosystems, and diversity and adaptations of organisms; physical science, including properties and changes of properties in matter, motions and forces, and transfer of energy; and earth and space science, including structure of the earth system, earth's history, and Earth in the solar system. Vocational Adjustment Lab 179996	<p>Specialized program designed to change inappropriate work behaviors, work attitudes, and social skills into more appropriate ones utilizing a controlled work environment. The laboratory is directed to handicapped students who, in all likelihood, would be unsuccessful in vocational pursuits as a result of their handicapped condition. Admission to the VAL is based upon recommendation generated at a meeting held after students have completed the vocational evaluation process. Only those handicapped students requiring behavior modification techniques relating to work attitudes, critical work skills, social behavior, or physical capabilities can be referred to VALs. The laboratories are one element of a total program of services that should be available to serve that handicapped population. They operate on an open entry/open exit concept whereby students remain only long enough to accomplish the intended objective.</p>	Vocational 	Voc 	179996	Vocational Adjustment Lab	Voc 	179996	Vocational Adjustment Lab

Visual Arts 020000	Two- and three-dimensional art forms are created and studied in relation to works created by artists in other cultures and historical periods. Principles of art criticism and aesthetics are employed to reveal the works expressive, formal, and technical properties.	Art	MA	020012	Visual Arts	7-12 K-12	020015 020012	Visual Arts 7-12 Visual Arts K-12	
Art Appreciation 020100	Exemplary works of visual art from diverse cultures and historical periods are examined with emphasis on products created by contemporary artists and by the student. The social, creative, and aesthetic values of the works are considered in terms of alternative philosophical points of view.								
Art History 020101	Inquiry is made into the reciprocal impact of visual art and culture (particularly of philosophy, religion, economics, politics, and other art forms). Key works are studied both chronologically and thematically in terms of style, subject matter, formal organization, and medium.								
Design 020210	Students explore in their own work the expressive qualities of the elements of the works of art (line, color, shape, texture, form, and space), and the ways they can be organized according to the principles of unity, variety, composition, rhythm, overlay, balance, emphasis, movement, repetition, proportion, and contrast. How elements and principles have been used by professional artists are also studied.
