ABSTRACT

In fall 1999, for the seventh time since 1991, all Wake County Public School System (WCPSS), North Carolina, parents were asked to give their opinions on school and district issues. The results are reported in this document by school level: elementary, middle, and high school. Although 25% of Wake County's students are African Americans, only 17% of the returned high school forms were from parents of African American students. Overall, a lower percentage of parents in all categories and all schools returned completed surveys in 1999 than in 1997. Fifty percent of all elementary and middle school parents returned surveys, but only 35% of high school parents returned surveys. Although the decline in return rate from 1997 to 1999 is a cause for concern, the results of the 1999 WCPSS survey are encouraging. Higher percentages of parents are agreeing that the school system is providing a high quality education and academically challenging their children. Comparisons of the WCPSS Parent Survey results with some of the most recent national surveys consistently indicate that parents have higher opinions about the quality of their own child's school than that of other schools in the area or public schools in general. Attached tables show final tallies of responses to all survey documents. (Contains 71 tables and 4 references.) (SLD)

RESULTS FROM THE 1999 WCPSS PARENT SURVEY

HOW DO PARENT OPINIONS ABOUT WCPSS COMPARE TO LOCAL AND NATIONAL ATTITUDES TOWARD THE PUBLIC SCHOOLS?

Author: Carol Speas

WCPSS Parent Surveys Compared over Time

In fall 1999, for the seventh time since 1991, all Wake County Public School System (WCPSS) parents were asked to give their opinions on school and district issues. The WCPSS Evaluation and Research Department sent 94,523 surveys home with students.

The results are reported by school level: elementary (K-5), middle (6-8), and high (9-12). More elementary (50%) and middle school parents (50%) returned surveys than high school parents (35%). Two other ways of looking at return rates are described below:

1. What percentage of the overall student population is comprised of White, African-American and other students - and what percentage of the returned surveys falls within each category? For example, although 25% of WCPSS high school students in fall 1999 were African-American, only 17% of the returned high school forms were from parents of African-American students. As shown in Table 1, parents of African-American students were underrepresented at all school levels.

Table 1: Composition of Student Population and Returned Sample by Race & School Level

| | Elemer | ntary | Mido | lle | High School | | |
|------------------|------------|-------------|------------|-------------|-------------|-------------|--|
| | Percent of | Percent of | Percent of | Percent of | Percent of | Percent of | |
| | Population | All Returns | Population | All Returns | Population | All Returns | |
| White | 63 | 70 | 65 | 69 | 68 | 70 . | |
| African-American | 26 | 17 | 27 | 19 | 25 | 17 | |
| Öther | 11 | 13 | 8 | 12 | 7 | 13 | |

Note: "Other" includes members of Alaskan/Native American, Hispanic, Asian-Pacific Islander, and Multi-Racial categories as well as students whose parents did not identify race of child.

2. What percentage of parents within each category completed and returned the survey form, and is this changing over time? Overall, as shown in Table 2, a lower percentage of parents — in all categories and school levels — completed the survey form in 1999 than in 1997.

Table 2: Percent of Parents Returning Surveys by Race and School Level.

| | Elementary | | Mid | dle | High School | | |
|------------------|------------|------|------|------|-------------|------|--|
| | 1997 | 1999 | 1997 | 1999 | 1997 | 1999 | |
| White | 54.3 | 54.2 | 51.2 | 50.2 | 35.1 | 23.3 | |
| African-American | 32.0 | 31.4 | 35.9 | 33.8 | 23.9 | 22.5 | |
| Other | 75.8 | 59.2 | 88.6 | 72.4 | 69.8 | 62.3 | |

Note: "Other" includes members of Alaskan/Native American, Hispanic, Asian-Pacific Islander, and Multi-Racial categories as well as students whose parents did not identify race of child.

The 1999 parent responses are less representative of the overall WCPSS parent population than in earlier years. Consistent with reports from previous years, we did not statistically adjust for the under-representation of specific groups for this report. However, strategies for addressing low response rate will be considered carefully when future surveys are conducted.

School and System Quality Compared to Previous Surveys

As shown in *Table 3*, parents' views on the overall quality of the WCPSS and of their own schools were generally as positive or more positive in fall 1999 than in earlier years. Parent satisfaction with individual schools remained greater at the elementary level than at the middle and high school levels. However, high school parent views in 1999 showed improvement on more items from previous surveys than the other two levels. In the discussions below, parent responses are reported as ranges, from lowest to highest percentage, across the three school levels (elementary, middle, and high).

The 1999 parent views of <u>system quality</u> were more positive than the 1997 survey at all levels, with the greatest increases at the elementary and high school levels. The majority of parents agreed the Wake County system was:

- providing a high quality educational program (ranged from 64-67%, depending upon the grade level, with increases of more than 3 percentage points at the elementary and high school levels),
- improving over time (53-64%),
- offering opportunities for success to all students (58-59%, up 3 percentage points at the high school level), and
- promoting understanding among students (62-67%, up 3 percentage points at the elementary level).

Fewer parents (43-45%) were satisfied with the attention received when calling central office, but responses to this item also showed some improvement over previous surveys.

When asked about <u>their child's school</u>, parents at all levels in 1999 responded more positively in regard to the following:

- the school providing a high quality educational program (77-85% across the levels, up 4 percentage points at the high school level),
- the school having high expectations for the child (70-85%), and
- their child being challenged academically in classes (72-80%, up 3 percentage points at the high school level).

Parent views of school facilities - attractiveness, cleanliness, safety - improved most at the high school level, but perceptions remained highest at the elementary school level. Parents also continued to show an increase in satisfaction on survey items related to school climate and student behavior. Although parents' perceptions of student behavior in 1999 were again less positive than their views on other school-related issues, these results were higher than in previous WCPSS surveys, particularly at the high school level (up 7 percentage points).

Note: Shaded boxes represent an increase of 3 or more percentage points from the previous survey.

Parent Involvement and Communications

As shown in *Table 4*, more WCPSS parents in 1999 reported that they were:

- comfortable visiting their child's school (84-95%, up 3 percentage points at the high school level).
- informed of their child's progress regularly (72-91%, up 3 percentage points at the high school level),
- informed of school activities regularly (69-94%, also up 3 percentage points at the high school level),
- given sufficient opportunities for parent involvement (74-95%, up 3 percentage points at the middle school level and 7 percentage points at the high school level),
- receiving courteous attention when calling their school (73-92%),
- supported by the school when they shared concerns regarding their child (59-82%), and
- finding it easy to contact teachers at their school (62%-87%, up 3 percentage points at the high school level).

Local Gallup Surveys of Wake County Adults

In 1998 and again in 2000, the Gallup Organization conducted a study sponsored by the Raleigh News and Observer, A.J. Fletcher Foundation, and the Greater Raleigh Chamber of Commerce in conjunction with Wake Education Partnership, a local non-profit education organization that supports the goals and mission of WCPSS. These surveys were designed to gauge the perceptions of Wake County residents, ages 18 and above, about WCPSS schools, the school district as a whole, and education issues in general. For local Gallup studies, a random telephone survey of 600 (1998) or 640 (2000) Wake County residents was conducted. Several items in the Gallup survey were identical to items in the WCPSS parent surveys, with respondents asked to agree or disagree with a series of statements.

The Gallup results serve at least three functions in relation to this report. First, they include respondents who are not parents, allowing a better measure of the total community. Second, they provide a way of cross-validating WCPSS parent survey results. Since they have a lower non-response rate, the Gallup results are less likely to be biased in either a positive or negative direction. Finally, the Gallup organization has high credibility with the public, based on a history of polling and methodology open to public and professional scrutiny.

System Quality

A majority of both local Gallup survey participants (Wake County adults) and WCPSS parents agreed that the school system is improving over time. Half (51%) of the adults polled by Gallup in 1998 and 59% in the more recent survey agreed that "The overall education program in this system is improving over time". This can be compared to the 53-64% of WCPSS parents who agreed that the system "is improving over time".

Half of the local Gallup respondents in both 1998 and 2000 agreed that "The overall education program in WCPSS is of high quality", compared to a higher percentage (64-67%) of WCPSS parents. As in the past, within the local Gallup sample, a higher percentage of public school parents (54%) agreed than did respondents who were not public school parents (48%), indicating that parents with children enrolled in the public schools have perceptions of higher quality. Related to quality, half of all adults in the 2000 local Gallup survey, as well as the public school

parents within the group, agreed that "WCPSS offers opportunities for success to all students", and 58-59% of parents responding to the WCPSS Parent Survey agreed.

National and Local Comparisons

Grading the Schools

The 31st national Phi Delta Kappa/Gallup annual education poll asked approximately 1500 adults in the U.S. for their perceptions of the public schools. As on the two local Gallup surveys, one item asked respondents to grade the public schools in their communities on a scale of A to F. The percent of PDK/Gallup respondents assigning their <u>local</u> public schools a grade of A or B increased slightly in 1999 (from 46% to 49%). In contrast, for a second question requesting a grade for the <u>nation's</u> public schools, only 22% of the respondents assigned a grade of A or B. These ratings reaffirm what every annual national PDK/Gallup survey has shown: the closer the association with public schools, the higher the satisfaction with public schools.

Wake County adults surveyed by Gallup were asked how they would grade the Wake County Public System in the same way students are graded. This question is very similar to the national survey question in which respondents are asked to grade "the public schools in your community" and the WCPSS Parent Survey in which parents are asked to grade their child's school. Seventy-seven percent of WCPSS parents in 1999 (up from 70% in 1997) assigned their child's school a grade of A or B. Another 15% assigned a C, bringing the total of WCPSS parents giving a passing grade to Wake County schools to 92%, compared to 88% in 1997.

In addition to giving higher grades for schools in 1999, WCPSS parents continued to grade their schools more positively (A or B=77%) than did local/county residents (A or B=50%) and the public nationwide (A or B=49%). *Table 5* depicts the percent for each letter grade on the WCPSS, local Gallup, and national PDK/Gallup surveys of 1997-2000.

Table 5: Grades Given To Schools: WCPSS Parents, Local and National Gallup Respondents

Safety

In an open-ended question, PDK/Gallup respondents were asked to identify the biggest problem faced by schools in the community. In 1999, as in 20 other years since 1969, lack of discipline

topped the list. Fighting/violence was next on the list. Related to this, respondents were asked another open-ended question as to what they would like to change in the public schools. The need for discipline, more control, and stricter rules topped this list. Despite the reported concern about discipline and fighting/violence on these survey items and national media attention to recent school shootings, 24% of the PDK/Gallup respondents still believed that the schools in their community were "very safe and orderly", and another 62% believed they were "somewhat safe and orderly". When public school parents among the PDK/Gallup group were asked about the school their oldest child was attending, the percentage choosing "very safe and orderly" increased to 42%, with another 50% selecting "somewhat safe and orderly".

At the local level, the percentage of adults agreeing that "Each public school is a safe place to learn" increased from 44% in 1998 to 57% in the 2000 local Gallup poll, an increase of 13 percentage points. In comparison, for the 1999 WCPSS Parent Survey, the percentage of respondents agreeing that "My child's school is a safe place to learn" ranged from 76-93%, indicating that the closer the relationship with schools, the higher the perception of safety. The WCPSS survey results also indicate that perceptions of safety decrease as school level increases: elementary (93%), middle (80%), and high school (76%). Table 6 depicts the percent of agreement for the three types of survey statements regarding school safety, 1997-2000.

Table 6: Percent of Agreement on School Safety: WCPSS Parent, Local Gallup, and National PDK/Gallup Surveys

Note: WCPSS parent agreement is reported as a range, from lowest to highest percent, across the three school levels.

Preparation for Future and Jobs

 $\left(\frac{\mathbf{v}_{i}}{\mathbf{v}_{i}} \right) = \left(\frac{\mathbf{v}_{i}}{\mathbf{v}_{i}} \right)^{2} + \left(\frac{\mathbf{v$

In a new question related to public school effectiveness, the 1999 national PDK/Gallup survey asked respondents for their perception of how well their oldest child was being prepared for tomorrow's job market. In what PDK's analysts called a "surprising result", 79% of parents polled believed that the education their child was receiving was either "very effective" or "somewhat effective" in preparing students for a changing job market.

Local Gallup survey results regarding job preparation were lower. While 81% of respondents to the 2000 local Gallup survey considered students being prepared to take a job of great or much importance among characteristics of a successful school, only 43% agreed that this was likely to be happening. Similarly, 92% of the parents within the local Gallup survey group considered another characteristic, preparing students for continuing on to higher education, of great or much importance, but only 43% indicated that this was likely happening. In contrast, about two-thirds (63%) of parents of high school students gave ratings of excellent or good when responding to the 1999 WCPSS survey question "How would you rate this school in helping your child prepare for jobs?" Additionally, 73% of them gave ratings of excellent or good to the question "How

would you rate this school in preparing your child for college?" Again, the closer the relationship with the schools, the higher the satisfaction with student preparation for the future.

Facilities

Regarding the nation's school facilities, 47% of the national PDK/Gallup respondents identified overcrowding as a "very serious" problem, followed by classrooms in poor physical condition (41%). When "very serious" and "somewhat serious" were combined for these two items, the responses were 74% and 64% respectively. In Wake County, on a one-to-five scale, 88% of the parents and 79% of the non-parents within the 2000 local Gallup survey considered a sound physical facility of great or much importance. At the same time, only 56% of them considered this likely to be happening, results similar to those of the national survey.

WCPSS parent perceptions of space and renovation needs varied by school level. In the 1999 survey, 36% (elementary) to 53% (high school) of the parents responded "yes" to the statement "My child's school is too crowded". Also, 27% (elementary) to 40% (high school) of the parents responded that "my child's school needs to be renovated", indicating views of greater need for space and renovation at the secondary levels.

<u>Technology</u>

Almost two-thirds of the national PDK/Gallup respondents selected technology as a high priority for federal funding of schools. Local Gallup respondents apparently viewed technology as a higher priority. Eighty percent of parents and 82% of non-parents in the 2000 local Gallup poll rated use of computers in classroom instruction as either an "important" or "very important" education outcome.

When asked for priorities regarding renovating/modernizing schools, 93-95% of the 1999 WCPSS parents reported that building computer labs was either "very important" or "somewhat important". When asked about home computers, 81% (elementary) to 88% (high school) of WCPSS parents reported that their child had access to a computer at home. As shown in *Table 7*, 75-81% of them also reported Internet access at home, and 61-64% of parents reported that they used e-mail either daily or weekly. The largest increases from 1997 to 1999 were in Internet access at home.

Diversity

In the 1999 national PDK/Gallup poll, respondent attitudes toward diversity varied with the specificity of questions. Overall, responses tended to be more positive when questions were more abstract or general. For example, 93% of all PDK/Gallup participants agreed that "acceptance of people of different races and ethnic backgrounds" is a value that should be taught to all public school students in their community. Also, 71% supported "acceptance of people who hold unpopular or controversial political or social views" as a value to be taught to all students. However, when questions were asked about the situation for their own child, attitudes differed for some parents. For example, 17% of the respondents reported that, assuming free choice of a public school, having their child exposed to a less diverse student body would be a "very important" factor in the selection process. Another 28% considered having a less diverse student body an "important" factor.

In Wake County, 85% of adults responding to the 2000 local Gallup poll rated "learning to respect those not like oneself, or an appreciation of diversity" as important or very important. Likewise, 93% of all respondents rated "fair treatment of all the children" as important or very important, although only 59% of the parents and 49% of the non-parents agreed that this was likely to be happening. When asked about some proposed actions that could be taken by WCPSS, local Gallup participants gave "high" or "top priority" ratings to the following statements:

- Assure equal access to school's resources (87%),
- Respond to needs of growing multicultural population (69%), and
- Maintain racial and economic diversity in schools (60%).

Nevertheless, when local Gallup respondents were asked how much they supported the use of some specific alternatives to maintain diversity within WCPSS, there was more variation in their responses. Alternatives receiving the most support were "creating more affordable housing in all areas of the county" (72%) and "expanding the magnet school concept to additional schools" (74%). Alternatives receiving least support were "limiting the number of low-performing students at each school" (35%), and "limiting the number of poor students at each school" (24%). Finally, in another response that may seem inconsistent with some of the earlier ratings, 79% of the local Gallup parents supported "having students attend the closest schools, even if it means schools may not be diverse." Overall, there was little difference between the responses of parents and non-parents within the local Gallup group. Responses of both national and local poll participants appear to reflect a pattern of general support for "acceptance of diversity" as a value to be taught to all students -- and less support for application/implementation of the practices to ensure diversity in local schools, particularly the school their own child attends.

WCPSS Parent Survey questions had a different focus: asking parents about the acceptance of diversity that currently existed in their child's school and in the system as a whole. The questions were an attempt to gauge progress in two important goals that mutually support each other: excellence in academic achievement and equity. Fifty-three percent (high school) to 83% (elementary) of the parents agreed with the statement "At my child's school, programs help students understand and get along with others". In response to the statement "Race relations at

my child's school are ...", 59-77% of the parents rated race relations as good to excellent. When asked about the school system as a whole, 53-64% of the parents agreed that "WCPSS promotes understanding among the students", and 62-67% of them agreed that "WCPSS offers opportunities for success to all students". As shown in *Table 8*, in all instances ratings were highest at the elementary level and lowest at the high school level.

Table 8: Percent of Parent Agreement on WCPSS Diversity Items, 1995-1999

| | Elementary | | Middle | | | High | | | |
|--|------------|------|--------|------|------|------|------|------|------|
| At My Child's School | 1995 | 1997 | 1999 | 1995 | 1997 | 1999 | 1995 | 1997 | 1999 |
| Programs help students understand and get along with others. | 76 | 82 | 83 | 57 | 60 | 61 | 49 | 50 | 53 |
| Race relations are ("good" to "excellent") | 70 | 76 | 77 | 51 | 63 | 64 | 38 | 52 | 59 |
| School System | | | | | | • | | | |
| Promotes understanding among students. | 63 | 62 | 64 | 56 | 55 | 57 | 46 | 50 | 53 |
| Offers opportunities for success to all. | 66 | 64 | 67 | 61 | 63 | 64 | 56 | 60 | 62 |

Note 1: Percentages of agreement are shown as "agree" and "strongly agree" responses for three items -- and as "good" to "excellent" responses to one item, as indicated.

<u>Curriculum and Standards</u>

About 60% of those surveyed in the 2000 national PDK/Gallup poll agreed that current achievement standards are "about right", while 33% indicated that standards are "too low". Almost 80% of poll participants favored a requirement that high school students take a standardized core curriculum focusing on English, math, science, and social studies – generally considered a method of raising standards.

Opinions regarding the teaching of values were last explored in the 1993 PDK poll, but few changes were noted in the 1999 responses. As in the earlier survey, 90% or more of respondents agreed that honesty, democracy, acceptance of different races and ethnic backgrounds, caring for family and friends, moral courage, and patriotism should be taught in the public schools.

When 1998 local Gallup poll respondents were asked to choose the top priorities for actions to be taken in the county schools, 89% chose "increase the standards for achievement" and "assure equal access". In the 2000 poll, respondents selected mastery of basics (97%), high academic standards (93%), challenging curriculum (89%), and students challenged to develop potential (92%) as important or very important characteristics of a very successful school. Next, respondents were asked to rate the likelihood of occurrence of those characteristics in the county schools. Although those ratings were lower than the priority ratings, the overall likelihood-of-occurrence ratings for curricular areas increased between the 1998 and 2000 polls. Ratings by parents were higher than those by non-parent poll participants.

Respondents to the 1999 WCPSS Parent Survey agreed that their child's school was providing a high quality educational program (77-85% across the levels) and that their child was being challenged academically in classes (72-80%). Additionally, parents agreed that their child's school was *excellent* or *good* at helping their children learn reading (80-89%), writing (78-89%), math (79-87%) social studies (80-84%), and science (80-82%). Although parent ratings were, in all instances, highest at the elementary level, gains were greatest at the high school level.

Note 2: Shaded boxes represent an increase of 3 or more percentage points from the previous survey.

Summary

Although the decline in return rate from 1997 to 1999 is a cause for concern, the results of the 1999 WCPSS Parent Survey are encouraging. Higher percentages of parents are agreeing that the school system is providing a high quality education and academically challenging their children.

Comparisons of the WCPSS Parent Survey results with the most recent national PDK/Gallup and local Gallup survey results consistently indicate that parents have higher opinions about the quality of their own child's school than that of other schools in the area or of public schools in general.
