ABSTRACT

Focuses on the Oklahoma 1997-98 fiscal year (FY) educational and general (E&G) primary budget, both revenue and expenditures. The FY98 institutional E&G budget increased by 8.2%, or \$75.4 million, to \$991.8 million. This increase was a result of: an increase of \$45.9 million or 7.9% in state appropriations to institutions; a budgeted fee and tuition revenue increase of \$9.2 million or 3.9%; and increases in non-fee revolving fund income of \$20.3 million or 20%. The increased funding will make possible systemwide salary increases, 94 new faculty positions, substantial investments in technology enhancements, increased spending for library materials, and a 7% increase in fee and tuition waiver scholarships. The primary functions of instruction, research and public service increased by \$39.5 million or 7.4%, while institutional support (central administration) increased by 7.1% and declined from 7.9% to 7.8% of the total. Teaching salaries showed the largest dollar increase at \$22.4 million, or 8.2%. Among the objects of expenditure, Professional Services showed the largest percentage increase at 36.7%, although the increase of \$1.9 million is only 2.5% of the budget increase. Scholarships increased by 7.7%, up from last year's increase of 6.9%. Use of carryover funds from the previous year declined by 6.9%, from \$15.3 million to \$14.2 million. (VWC)

The Oklahoma State Regents for Higher Education in compliance with Titles VI and VII of the Civil Rights Act of 1964, Executive Order 11246 as amended, Title IX of the Education Amendments of 1972, Americans with Disabilities Act of 1990 and other federal laws do not discriminate on the basis of race, color, national origin, sex, age, religion, handicap, or status as a veteran in any of its policies, practices, or procedures. This includes but is not limited to admissions, employment, financial aid, and educational services.

This publication, duplicated by the State Regents' central services, is issued by the Oklahoma State Regents for Higher Education as authorized by 70 O.S. 1991, Section 3206. 175 copies have been prepared and distributed at a cost of \$80. Copies have been deposited with the Publications Clearinghouse of the Oklahoma Department of Libraries.

BUDGET HIGHLIGHTS - Institutions

- Systemwide, the FY98 institutional E&G budget increased by 8.2 percent or \$75.4 million to \$991.8 million. This increase was a result of:
 - 1. an increase of \$45.9 million or 7.9 percent in state appropriations to institutions;
 - 2. a budgeted fee and tuition revenue increase of \$9.2 million or 3.9 percent; and
 - 3. increases in non-fee revolving fund income of \$20.3 million or 20 percent.
- If one deducts from the total new funding of \$75.4 million, \$3.8 million in mandatory costs and 2.2 percent or \$1.6 million for general inflation, the FY98 budgets will show real growth of 7.6 percent.
- The increased funding will make possible systemwide salary increases, 94 new faculty positions, substantial investments in technology enhancements, increased spending for library materials, and a seven percent increase in fee and tuition waiver scholarships.
- The primary functions of instruction, research and public service increased by \$39.5 million or 7.4 percent, while institutional support (central administration) increased by 7.1 percent and <u>declined</u> from 7.9 percent to 7.8 percent of the total.
- All salary categories showed an increase systemwide. Teaching salaries showed the largest dollar increase at \$22.4 million, or 8.2 percent.
- Faculty salary increases, averaging 4.5 percent, are budgeted or planned at all institutions. Three universities, OU, OSU and Langston University, will defer action until after the beginning of the fall semester.
- Each institutional budget, with one exception, indicates compliance with State Regents' caps on administrative costs.
- Among the objects of expenditure, Professional Services showed the largest percentage increase at 36.7 percent, although the increase of \$1.9 million is only 2.5 percent of the budget increase. This increase is due to continued expansion of outsourcing and increases in maintenance contracts.
- Scholarships, for the most part fee and tuition waiver scholarships, increased by 7.7 percent, up from last year's increase of 6.9 percent. To provide additional student financial aid, institutions normally increase fee waiver scholarships in years of tuition and fee increases.
- Use of carryover funds from the previous year declined by 6.9 percent, from \$15.3 million to \$14.2 million.
- The Educational and General Budgets, Parts I and II, total \$1.2 billion.

Institutional Budgets Fiscal Year 1998

INTRODUCTION

Oklahoma's colleges and universities will see a second year of sustained strong growth, with \$75.4 million in new dollars added to the \$76.2 million in FY97. The FY98 budget shows an overall increase of 8.2 percent, comprised of 7.8 percent growth in state support and 8.8 percent growth in self-generated revolving funds.

Unlike the budget of the current year, the FY98 budget is not encumbered by onerous increases in the employer contribution to the teachers' retirement system. It should be noted, however, that the employee contribution on the first \$25,000 of compensation will increase from 6.5 percent to 7 percent; the effect of this change is that all compensation is now assessed at the 7 percent level. Most institutions make this payment on behalf of the employee; the benefit category shows growth that reflects this obligation.

If one deducts from the total new funding of \$75.4 million, \$3.8 million in mandatory costs and 2.2 percent or \$1.6 million for general inflation, the FY98 budgets will show real growth of 7.6 percent.

The overall budget growth accomplishes three priorities:

- 1. Mandatory increases are held to a minimum after several years of substantial obligations. New funding is provided for operating expenditures of 1992 bond-funded facilities. Increased funding has also been provided apart from the Educational and General Budget for major capital expenditures.
- 2. New funding is available for competitive salaries and programmatic priorities, including 94 new faculty positions. The system will be able to strengthen the existing base through funds for faculty and staff salary increases and increases for library acquisitions and student services.
- 3. Institutions are able to make investments in technology.

This report will focus on the Educational and General primary budget, both revenue and expenditures, as well as highlight the programmatic aspect of institutional budget decisions. A section is also included on the sponsored budgets, particularly sponsored research, as it becomes ever more important to the economic development of the state.

WHAT IS THE EDUCATIONAL AND GENERAL BUDGET?

The Educational and General (E&G) budget is the principal operating budget of the institution. It includes the primary functions of <u>Instruction</u>, <u>Research</u>, and <u>Public Service</u>, as well as the activities that support these three main functions. It is distinct from the capital budget, which includes expenditures for new construction, major repairs or renovations, and major items of equipment. It also excludes auxiliary enterprises, which

provide services tangential to the education process, such as housing, food services, and the college store.

Just as the activities funded in these three budgets (Educational & General, capital, auxiliary enterprises) differ, so do the sources of revenue. Most of the activities in the E&G budget are funded from state appropriations, student fees, and grants and contracts. The capital budget is funded from revenue bond proceeds, special appropriations, dedicated monies (Section 13 and New College Funds), and major private gifts. Auxiliary enterprises are self-supporting operations funded through fees charged to the recipients of the service.

The Educational and General Budget has two parts. Part I - the primary budget, is funded mainly from public sources -- appropriations and student fees. Part II - the sponsored budget, is funded from external sources -- federal awards, grants, and training contracts; private contracts; and contracts from other state agencies. At \$210.9 million in FY98, the sponsored budget is about one-fifth the size of the primary budget. Of the \$210.9 million, 81.6 percent or approximately \$172.1 million is related to OU, OSU and their constituent agencies, as shown on tables 8-13.

REPORTING CONSISTENCY

A high priority of the State Regents' office is ensuring consistency in institutional financial reports. Periodic review of the mandated guidelines of the National Association of College and University Business Officers (NACUBO) is a joint project of institutional personnel and State Regents' staff. The most recent workshop, in April 1997, focused on administrative costs, as reported in the Institutional Support function, advising and counseling activities, and the activities of the TANF program.

As a result of the recent emphasis on consistency, certain shifts in expenditure categories appear in the FY98 budgets that reflect not programmatic changes, but reporting refinements. These changes will be noted later in pertinent sections of this report.

STATE REGENTS' BUDGET PRINCIPLES

For FY98, the State Regents adopted budget principles that support the continuing Academic Planning/Resource Allocation effort by institutions, emphasizing the following:

Institutional resources should be focused on:

- Academics priority programs and courses in the institution's academic plan, including libraries; the central academic mission of the institution; preparation of students for an increasingly complex society and technologically advanced workplace;
- Programs of excellence use of new dollars to enhance targeted areas of strength, rather than thin support for all programs and services;

> Efficient use of resources, including reduction of administrative costs and elimination of unnecessary duplication.

Institution budgets should conform to the following guidelines:

- > Mandatory cost increases estimated to be \$3.8 million, although no employer contribution increase is required to OTRS;
- budget caps on administrative costs based on enrollment and type of institution;
- > salary increases to ensure recruitment and retention of outstanding faculty;
- > teacher education as an area for special investment to implement the recommendations for improvement;
- investment in technology to upgrade and expand computer equipment and technology services to students; to develop campus-based technology, including faculty and staff training, program and course development, telecommunications networking equipment and staff support; and
- > consistency as ensured by systemwide compliance with financial accounting and reporting standards of the National Association of College and University Business Officers.

SUMMARY

The institutional budgets, together with supporting information, indicate congruence between the State Regents' FY98 Budget Principles and Guidelines and institutions' budgeting priorities. The increases in revenues have been directed toward faculty and staff salary increases, new faculty and other positions and technology enhancements. Students on a number of campuses will profit from new computer facilities and services established for their benefit. Systemwide, budgeted administrative expenditures declined.

The internal review of program and service offerings continues, with an eye to judicious expansion in certain priority areas. A section of this report on programmatic impact lists examples of impacts to academic program areas and students needs and services.

Mindful of their responsibility to the constituents of Oklahoma's public higher education system, the State Regents annually present revenue and expenditure information on institutional budgets. This report is intended to be a comprehensive, detailed account of the budgeted use of resources by institutions in The Oklahoma State System of Higher Education. It presents information on revenue sources, budgeted expenditures by function and by object, compensation, and sponsored programs. Schedules of budgeted income and expenditures for each institution are attached as appendices to the report.

9

INSTITUTIONAL FUNDING BENCHMARKS

(in millions of dollars)

FUNDING	<u>FY 88</u>	<u>FY98</u>	% INCREASE
E&G, I	\$492.6	\$991.8	101.3%
State appropriations	370.7	627.5	75.3%
Revolving funds	121.9	364.3	198.9%
E&G, II	76.9	210.9	174.3%
Sponsored research	27.4	108.3	295.3%
Total	\$569.5	\$1,202.7	111.2%

- Although the higher education institutions have received a 75.3% increase in state appropriations over the past ten years, when adjusted for inflation, this increase represents real growth of 37.2 percent, or less than four percent per year, on average. At the beginning of this ten-year period, "Oklahoma's Secret Crisis" reported that Oklahoma higher education was 50th in overall funding. Although the past two years have seen solid growth in state support, Oklahoma public higher education is still more than 20 percentage points short of the goal of the median national appropriation per student recommended by the report.
- Substantial increases above inflation have come from self-generated revolving funds.
 Revolving fund growth is due to some degree to fee revenue resulting from both
 enrollment growth and fee increases, but in recent years the non-fee component has
 seen dramatic growth (20 percent in FY98). State appropriations as a percentage of the
 budget have declined over the period, while the self-generated sources of the budget
 have likewise increased.
- Sponsored research, a measure of the competitiveness of our comprehensive research universities, has increased dramatically (295.3 percent), as a result of institutional priorities and incentives provided by the State Regents in the form of EPSCoR and other research match programs.

OVERVIEW OF THE INSTITUTIONAL OPERATING BUDGETS

The overview of operating budgets of universities, colleges and constituent agencies consists of a summary and analysis of two primary components of the budget: (1) Budgeted Income and (2) Budgeted Expenditures. Topics to be included in the following analysis are:

Budgeted income

Total budgeted income by source Changes in sources of income

Budgeted expenditures

Budgeted expenditures by functional classification Budgeted expenditures by object of expenditure

Compensation increases - salaries and benefits Administrative costs Fee waivers Programmatic impact Sponsored budgets

Higher Education as a Percentage of Total State Appropriations **FY80 to FY98**

* Higher Education's share of the total state appropriated budget for FY98 is essentially unchanged from the previous year, rising from 15.33% to 15.34%.

* Higher Education's FY98 share of total state appropriations is still well below the FY80 level of 18.55%. If Higher Education had maintained its same share as FY80, it would have received an additional \$145.0 million dollars.

SYSTEMWIDE BUDGET - Fiscal Year 1997-98

OVERVIEW

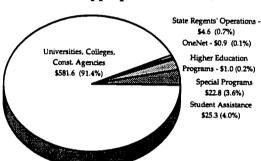

FY97 Total Budget \$988.3

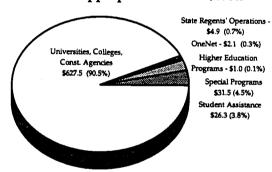

FY98 Total Budget \$1,074.1

FY97 State Appropriated Funds \$636.2

FY98 State Appropriated Funds \$693.3

TOTAL BUDGET	<u>FY97</u>	<u>FY98</u>	<u>Dollar</u> <u>Increase</u>	Percent Increase
Budgeted Revenues: State Appropriations	40000	4000	.	
Revolving Funds	\$636.2	\$693.3	\$57.1	9.0%
Total Budgeted Revenues:	352.1	380.8	28.7	8.2%
Total Budgeted Revenues:	<u>\$988.3</u>	<u>\$1,074.1</u>	<u>\$85.8</u>	<u>8.7%</u>
Budgeted Expenditures:				
Universities, Colleges & Constituent Agencies	\$916.4	\$991.8	\$75.4	8.2%
Special Programs	23.4	32.1	8.7	37.2%
Higher Education Programs (Ardmore, Idabel)	2.5	2.6	0.1	4.0%
State Regents' Operations (includes OneNet)	9.0	9.3	0.3	3.8%
Student Assistance Programs	<u>37.0</u>	<u>38.3</u>	<u>1.2</u>	<u>3.3%</u>
Total Budgeted Expenditures:	<u>\$988.3</u>	<u>\$1,074.1</u>	<u>\$85.8</u>	8.7%

- is .
- The total budget for FY98 has increased by \$85.8 million or 8.7 percent over FY97.
- Institutions continue to comprise approximately 92 percent of the total budget. The other components of the budget remain essentially unchanged.
- Institutions' budgets have also maintained a steady share of 91 percent of the total state appropriated budget.
- The FY98 budget for OneNet is \$3.3 million. Oklahoma State Government's wide-area telecommunications network, OneNet is used by state and local government, higher education, common education, vocational education, the court system, the library system and health care entities to transport video, data and voice applications throughout Oklahoma and the world. Revenue from customer use charges and state appropriations is used to support the cost of operation.
- The \$38.3 million shown in student assistance does not include an additional \$38.7 million in the institutional budgets for fee and tuition waivers and other scholarships.
- The Regional University Baccalaureate Scholarship Program continues to grow as the fourth class of students is added. Funding is now at \$750,000 per year, to fund scholarship awards.
- The Oklahoma Tuition Aid Grant Program will increase by 7.5 percent in FY98 thanks to \$1 million in new state funding.
- The Endowed Chairs program has been restored to its former level of \$7.5 million, up from \$7.2 million. The larger amount is still insufficient to meet existing matching commitments, as several institutions have had strong successes in this program. Two institutions are expected to qualify for their first matching funds in FY98.

COMPARATIVE SUMMARY OF BUDGET ALLOCATION FY 1997 TO FY 1998

Institutional Educational and General Budgets, Part I Fiscal Year 1997-98

SOURCES OF REVENUE

- The FY98 total budgeted operating income increased from \$916.4 million to \$991.8 million, an increase of \$75.4 million, or 8.2 percent.
- In spite of an average seven percent increase in resident and nonresident tuition, general enrollment fees declined as a share of total revenue from 17 percent in FY97 to 15.9 percent in FY98, and nonresident tuition declined from 5 percent to 4.9 percent of the total. The original estimate for revenue growth from these sources was \$14 million. Institutions were more conservative, however, budgeting only \$3.7 million in new tuition revenue. In part this prudence is a result of uncertainty regarding the implementation of the tuition increase. With the approval of the blended tuition rates for the fall 1997 semester, institutional revisions to the budget reflecting increased revenue are likely.
- Budgeted income from state appropriations increased by \$45.9 million, from \$581.6 million to \$627.5 million (7.9 percent). These new state dollars helped offset mandatory cost increases (\$3.8 million), cover new facilities operating costs (\$2.2 million) and support salary increases for faculty and staff (\$28.3 million).
- Local appropriated (ad valorem tax) revenue is budgeted to increase by 16.4
 percent or \$3 million. Tulsa Community College, Rose State College and
 Oklahoma City Community College are the sole beneficiaries of this source of
 revenue.
- Self-generated revolving fund income increased by 8.8 percent, from \$334.8 million to \$364.3 million, in spite of the caution in budgeting fee revenue.
- A dramatic increase is evidenced in the gifts and grants revenue, which grew from 2.2 percent to 3.8 percent of the total. This \$17.5 million (88.3 percent) increase is due to an expansion of the educational services provided by two-year colleges and the technical branches to recipients of Temporary Aid to Needy Families, increased indirect cost reimbursement from sponsored programs, and growth in private support.
- Budgeted carryover funds declined by 6.9 percent from \$15.3 million to \$14.2 million.

- Gifts and grants include indirect cost reimbursements for federal grants, revenue from foundations, reimbursements from DHS for education of parents in the Temporary Assistance for Needy Families (TANF) program, federal subsidies for the Tom Stead Building at Rose State College.
- Sales and services of educational departments include sale of core samples from the Geological Survey, copies of curriculum materials by Oklahoma City Community College, Law School publications.
- Organized activities include sale of dairy and farm products at Murray, Eastern, NEOA&M, and certain clinic services of the Veterinary Medicine College.

Summary & Analysis Page 17

EXPENDITURES BY FUNCTION

At Oklahoma public institutions for FY98, as shown on the pie charts on the following pages:

- The primary functions of instruction, research and public service continued to make up over 58 percent of the Educational & General Part I budget.
- Instruction showed the largest dollar increase of \$28.6 million (6.4 percent) and, as expected, is the largest function at 47.9 percent of the whole.
- The other two primary functions, research and public service, increased 15 percent and 8.7 percent respectively.
- The scholarship category, made up primarily of fee and tuition waivers, increased by \$2.8 million, or 7.7 percent, for a total of \$38.6 million. This amount does not include expenditures from State Regents' scholarship programs: OHLAP, OTAG, Regional University Baccalaureate scholarships and Academic Scholars stipends.
- The second largest percentage increase was shown in the academic support area, which increased 12 percent. Part of this growth is programmatic growth, especially in the educational media services subactivity, which includes a portion of the technology purchases. Reporting refinements also contributed to the increase. Libraries make up nearly half of this function category at \$41.6 million. Library expenditures are projected to grow by 5.6 percent.
- Operation and maintenance of plant expenditures are expected to grow by 10.8 percent, as the last increment of 1992 bond funded facilities are open for use.
- Data processing also showed a significant increase at 9.6 percent.
- Institutional support (general administration) continued to decline from 7.9 percent to 7.8 percent of the budget.

Functional Classifications: Explanatory Notes

All universities and colleges budget expenditures in accordance with the standards defined by the National Association of College and University Business Officers (NACUBO). This national classification system provides uniform guidelines to ensure consistent financial statements for audit purposes and to permit comparisons among institutions within the state, as well as with regional and national data, and with peer institutions.

The three primary functions of a higher education institution are:

<u>Instruction</u>, which includes expenditures for all activities that are a direct part of the instructional programs. The function includes general academic programs as well as vocational-technical programs and community or continuing education.

Summary & Analysis Page 18

Research, which includes the creation, the organization, and the application of knowledge. This category does not include federal or externally funded research. That item is included in the sponsored budget, Educational and General, Part II.

<u>Public Service</u>, which includes activities to make an institution's unique resources and capabilities available as a response to a community need or a solution to a community problem. This function includes the agriculture cooperative extension services at both OSU and Langston, as well as any public broadcasting activities supported with E&G funds.

The comprehensive research universities are assigned all three functions. The four-year universities and the two-year colleges engage in research and public service to a much more limited extent.

Budgeted support activities are classified as follows:

<u>Academic Support</u> activities support directly one or more of the three primary functions. Library budgets are a major component of this category.

<u>Student Services</u> are those activities carried out with the objective of contributing to the emotional and physical well being of the institution's students, as well as to their intellectual, cultural, and social development outside the context of the institution's formal instruction program. Included are counseling and career guidance, financial aid services, student records, and student health services.

<u>Institutional Support</u> includes expenditures for: (1) central executive-level management and long-range institutional planning, such as the governing board, planning and programming, and legal services; (2) fiscal operations; (3) space management, (4) personnel services and records, (5) purchasing, security, storerooms; (6) faculty and staff support services not operated as auxiliary enterprises; and (7) activities concerned with community and alumni relations, including development and fund raising.

<u>Physical Plant Operations</u> consist of those expenditures related to operating educational facilities and grounds, including maintenance, utilities, fire protection, property insurance and similar items.

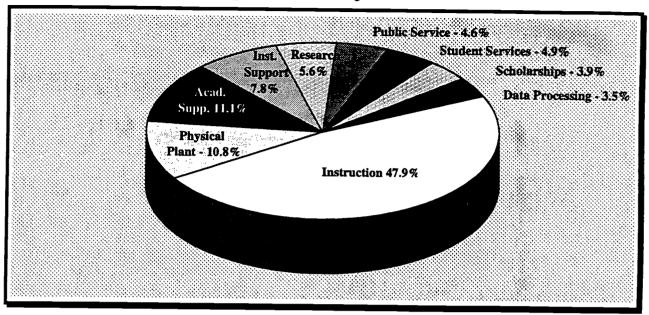

<u>Scholarships</u> and <u>Fellowships</u> are grants to students.

<u>Data Processing - Academic Support</u> includes computer services that provide direct support for one or more of the institution's primary academic programs.

<u>Data Processing - Institutional Support</u> includes computer and data processing services that provide support for institution-wide administrative functions.

EXPENDITURES BY OBJECT

Unlike the functional categories, which conform to national norms, the objects of expenditure are established in conjunction with the Office of State Finance for accounting purposes.

- Personnel related expenditures (salaries, benefits) increased by 6.7 percent; non-personnel expenditures increased by 12.4 percent.
- Personnel related expenditures have declined slightly as a percentage of the budget from 73.9 percent in FY97 to 72.9 percent in FY98.
- The decline as a percentage of the total is attributable to smaller than 8.2 percent average increases in the categories of professional and research salaries and benefits.
- The significant increases in benefits in recent years will abate in FY98, due, as has been noted to the absence of a mandated increase in the employer contribution to the teachers' retirement system. Benefits will comprise 15 percent of the budget in FY98, down from 15.5 percent in FY97.
- The category of teaching salaries continues as the largest component of the budget. This category is 29.6 percent of the total budget at \$293.8 million in FY98.
- The budgeted increase for teaching salaries is 8.2 percent, but this amount will likely increase later in the year, as OU, OSU and Langston finalize compensation plans. (A separate section of the report will discuss compensation more fully.)
- Research and professional salaries are the second largest component, at 16 percent of the total.
- Significant increases in the categories of property, furniture and equipment and supplies and other operating expenses were not unexpected, due to the new facilities coming on line and technology purchases. These categories showed increases of 16.8 percent and 19.4 percent, respectively.
- Scholarships increased by 7.7 percent to \$38.7 million.

Same Broken Broken

COMPENSATION INCREASES: SALARIES AND BENEFITS

Salary increases were reported at all institutions and constituent agencies in the State System; however, the University of Oklahoma, Oklahoma State University and Langston reported plans to provide increases at a later date. Each of the two higher education centers is giving general salary increases, as well.

Approximately 92 percent of full-time faculty will receive some salary increase; of those receiving increases, 80.6 percent were between 3 and 5.9 percent and 12.9 percent received 6 percent or greater. The average increase is 4.5 percent.

Nonacademic professional staff who received no salary increase comprise 9.3 percent of the total. Of those professional staff receiving increases, 23.8 percent received increases of 6 percent or greater; 72.5 percent received increases between 3 and 5.9 percent.

Approximately 94 percent of nonprofessional staff will receive salary increases. Of the increases, 78.6 percent are between 3 and 5.9 percent; 15.1 percent are 6 percent or greater.

The highest average salary increases are shown at the University of Science and Arts of Oklahoma at 6.7 percent and Carl Albert State College at 6.6 percent.

The universities under the Board of Regents of the Oklahoma Colleges have given increases ranging from 5.9 to 4.1 percent on average.

In general, salary increases above 10 percent represent promotions and changes in responsibility.

One-Time Stipends:

One-time stipends were not part of compensation packages for FY98, with the exception of 20 individuals at Oklahoma City Community College and the employees at the McCurtain County Higher Education Program.

Overview of Faculty Salary Increases:

- The University of Science and Arts of Oklahoma, Northeastern State University and Northwestern Oklahoma State University gave faculty salary increases averaging 6 percent or greater.
- East Central University, Carl Albert State College, Rose State College and Tulsa Community College gave increases of 5 to 5.9 percent on average.
- At the following institutions, the average faculty salary increase was equal to or
 greater than the average salary increase for the non-teaching professionals and
 other staff: East Central University, Northeastern State University,
 Southeastern Oklahoma State University, Murray State College, Northeastern
 Oklahoma A&M College, Northern Oklahoma College, Redlands Community

College, Rogers University - Claremore, Rose State College, Seminole State College, Tulsa Community College and Western Oklahoma State College.

Non-teaching Professional and Other Staff

- At most institutions, the average increase for non-teaching professional staff is
 the same as, or less than, the average increase for faculty. At seven institutions,
 non-teaching staff received a higher average increase than faculty.
- Some effort was made to favor the lowest-paid employees. At five institutions, support and other staff received the larger increases, on average, than either faculty or non-teaching professional staff.
- Northwestern Oklahoma State University projects that an increase to their entry salary base will result in improved ability to recruit quality faculty and retain veteran faculty.

Growth in Benefits

- Since FY 88, the rate of growth in benefits expenditures has been more than double the growth rate of salaries.
- Benefits have increased 164.2 percent over the past 10 years, compared to 72.1 percent in salaries. This growth is attributable to steep increases in health insurance costs in the early part of the decade and substantial increases to the Oklahoma Teachers' Retirement System in recent years. Total compensation (salaries and benefits) as a percentage of total budgets has declined from 78.3 percent in FY88 to 72.2 percent in FY98.
- Unlike the budget of the current year, the FY98 budget is not encumbered by onerous increases in the employer contribution to the teachers' retirement system. It should be noted, however, that the employee contribution on the first \$25,000 of compensation will increase from 6.5 percent to 7 percent; the effect of this change is that all compensation is now assessed at the 7 percent level. Most institutions make this payment on behalf of the employee; the benefit category shows growth that reflects this obligation.
- Benefits declined slightly as a percentage of total budgets in FY98, from an alltime high of 15.5 percent in FY97 to 15.0 percent budgeted for FY98.
- OU is budgeting \$165,000 to fund 50 percent of the cost of graduate assistant health insurance premiums. The extension of some degree of health insurance support to graduate assistance has been a volatile issue on a number of campuses recently. The insurance offered is not comparable to that of permanent faculty and staff, but is similar to that available for purchase by students.

FY98 SUMMARY OF INSTITUTIONAL SALARY INCREASES

(includes only those institutions providing salary increases)

ADMINISTRATIVE COSTS

• The State Regents' FY98 Budget Principles state that institutions' administrative expenditures budgeted under the Institutional Support function should comply with the following caps:

OU and OSU	10%
OU-HSC, Veterinary Medicine, OSU College of Osteopathic Medicine	
Four-Year Universities (enrollments above 3,500 FTE)	
Four-Year Universities (enrollments below 3,500 FTE)	16%
Two-Year Colleges & Technical Branches above 3,500 FTE	13%
Two-Year Colleges & Technical Branches below 3,500 FTE	16%

The budgetary caps are pegged to national and regional norms for this expenditure function.

- For FY98, each institutional budget, with one exception, is in compliance with the above percentage for institutional support.
- The Institution Support function systemwide showed a 7.1 percent increase and declined as a percentage of the total budget.
- Administrative costs, including administrative data processing, now constitute 8.9 percent of the total budget, well below national, regional and peer averages.

Summary & Analysis Page 33

FEE WAIVERS

- State Regents' policy authorizes institutions to grant fee waivers for resident students in an amount up to 3 percent of the current year Educational and General budget.
- A total of \$28.2 million is authorized for FY98 resident fee waivers. The budgeted amount is \$18.4 million or 65.3 percent of the authorized amount.
- Systemwide resident fee waivers are budgeted to increase by \$1 million or 5.3 percent.
- Seventeen institutions budgeted at least 75 percent of the authorized amount.
- Nonresident tuition waivers are budgeted to increase by seven percent or \$900,000. The budgeted amount for FY98 is \$14 million; approximately one-third of this amount is for graduate and research assistant compensation.
- Twenty institutions are budgeting an increased amount for scholarships in FY98; one institution is budgeting a lesser amount; nine are budgeting the same amount as last year. (Three constituent agencies do not offer instruction and do not, therefore, charge student fees.)
- Constituent agencies that offer professional programs do not normally grant fee waivers to the same extent as institutions.
- Total fee waivers and scholarships paid from E&G budgets are projected to increase from \$35.9 million in FY 97 to \$38.6 million in FY98, an increase of approximately \$2.8 million or 7.7 percent.

PROGRAMMATIC IMPACT

Colleges and universities are projecting 2,700 new students or enrollment growth of 1,460 FTE (1.3 percent) for 1997 fall semester. Institutions likewise expect to offer 190 additional course sections.

Academic Program Impact

- 94 new faculty have been employed at 19 system institutions and agencies for next year. Thirteen of these positions are senior faculty; for some time institutions could afford to hire only beginning level faculty due to budget constraints.
- The University of Oklahoma has added 22 new faculty positions for next year, 4 at the senior level. An area of particular focus is international programs. The cost of the 22 positions is \$1.4 million.
- Oklahoma State University will increase graduate stipends 10 percent as the second step of a strategy to enhance quality of graduate students. They have also implemented a "female faculty recruitment program" for underrepresented areas.
- Eastern Oklahoma State College will expand the McAlester Branch Campus, improving accessibility.
- Rose State College is continuing cooperative efforts with sister institutions, regional universities, particularly UCO, and area vocational-technical schools. Plans are also in progress to develop an aviation alliance.
- Seminole State College has a cooperative agreement with the University of Oklahoma College of Liberal Studies to offer the Bachelor of Liberal Studies Administrative Leadership Concentration on the SSC campus to provide access to numerous place-bound students unable to continue their education beyond the associate degree.
- To meet the needs of public schools in east central and southeastern Oklahoma, East Central University offered the superintendent's certification courses in FY97 and will add graduate certification courses in school psychometry and school psychology in fall 1997.
- Connors State College has developed a Patient Care Technician Program in concert with the Indian Capital Vocational-Technical School in Muskogee, expanding opportunities for students to enter the growing provider job market.
- In FY98 the Rose State College Communications Center will open, with new facilities for music, art and journalism programs.

- The University of Central Oklahoma will not reduce full-time faculty positions, although positions will be shifted to accommodate changing instructional needs. Also, the institution will hire more adjunct faculty in FY98, due to fluctuating enrollment.
- East Central University is at the mid-point in its ten-year NCA accreditation. ECU has responded to all concerns identified in its last accreditation visit. A new library will open in August 1997. The academic structure has been reorganized; assessment activities and strategic planning have been implemented. The university has established a faculty senate. The campus has been infused with computer and information technology. Graduate faculty scholarship and appointment procedures have been strengthened. Deferred physical plant maintenance has been corrected. A new University Center opened in January 1997. Through APRA and normal institutional review processes the academic programs have been strengthened and resources reallocated internally. University officials feel that the university has never been stronger, academically and fiscally.
- Northwestern Oklahoma State University has reallocated faculty positions to meet identified, growing academic needs. An FTE faculty position in Business was reallocated to Spanish to address the expanding enrollment in foreign language and anticipated enrollment demand caused by the teacher education mandates. An FTE faculty position in Computer Science was reallocated to Mathematics to address current instructional needs. An FTE in Education was reallocated to increase the rate of pay for adjunct faculty, thus enhancing the potential to recruit and maintain quality adjunct faculty.
- Southeastern Oklahoma State University faculty will review the program review document in FY98 and continue to implement the 23 recommendations of the external task force on teacher education. The university will also perform a comprehensive review of student recruiting and community service functions in an effort to generate additional revenue.

Nursing and Other Health Sciences Initiatives

- East Central University will initiate delivery of its nursing program at Idabel and SEOSU.
- Oklahoma Panhandle State University has established a 2+2 Bachelor of Nursing program in a collaborative effort with OSU-OKC and UCO.
- The University of Oklahoma Health Sciences Center will expand the nursing baccalaureate program to Cameron University. Cameron will complete the phase-out of its associate degree in nursing this year and collaborate with HSC on the baccalaureate program.

• Eastern Oklahoma State College will implement a new certification program to address the need for assisting personnel to nursing staff.

Position Reduction and Other Reallocation Activities

- At OSU Technical Branch, Oklahoma City, several faculty members have been reassigned from low enrollment programs, such as electronics, to high enrollment discipline areas, such as physics and mathematics. One faculty position has been reconfigured to develop existing programs in Energy and Environmental Resource Management and Occupational Health and Safety.
- Cameron University, as noted above, will eliminate the associate in nursing program, and also the Institute of Applied Telematics and Multimedia Design Department.
- The FY98 budget of OSU Technical Branch, Okmulgee reflects a decrease of one staff position. These funds were reallocated to provide additional staffing for the library.
- Between 1992 and 1996, East Central University divested itself of an applied science division and two technical programs and reinvested the savings in priority programs in the arts and sciences and education. During 1996-97, the academic school structure was reduced from six to four. In addition, an enormous investment in computer and electronic technology over the past four years and a commitment to infusing this technology into the teaching and learning process have positioned ECU to move forward in the use of this technology. However, in order to complete the transformation two major tasks remain. First, additional resources are needed to complete the electronic campus: additional new OneNet classrooms and teaching labs must be constructed, and student computer labs and faculty computers must be maintained at state-of-the-art levels. Second, faculty must be engaged in serious and prolonged retraining and professional development in the effective use of these new technologies.
- Northeastern State University has eliminated the electronics option in industrial management, restructured the allied health degree and gerontology option and restructured education degrees in compliance with the Teacher Education task force recommendations.
- On the basis of earlier elimination of academic and related programs and reallocation of resources, the University of Science and Arts of Oklahoma has created two new positions in marketing and speech pathology, two new technical support positions in multimedia computing and television/video production, one new counseling position in student services, and one new position in financial aid services.
- Rose State College is eliminating four faculty positions and two physical plant positions. The college will continue to contract for custodial and security

services and expand outsourcing arrangements to include internal audit services as well.

- Seminole State College will merge the assessment and testing services into one department. This restructuring will permit the college to utilize an employee to support other areas.
- Rogers University Tulsa has reorganized the campus safety activities to utilize CLEET certified off-duty law enforcement officers rather than maintaining full-time campus police officers. The institution has also eliminated seven administrative positions.
- Tulsa Community College utilizes a process called Project Management that addresses each program, discipline and budgetary unit of the college. This process involves listing the strengths and weaknesses of each area along with the means of accomplishing the listed objectives. This process results in recommendations for eliminating, reducing or restructuring programs and support services.

Technology Initiatives

- At Oklahoma State University, the academic areas need technical support to learn how to use new technology in classrooms and laboratories. To that end, OSU plans to establish a \$50,000 permanent pool to train faculty in the use of technology. In FY98, the university will begin implementation of PETE II, the electronic information system of the OSU library. An upgrade of both the software and the hardware systems is necessary for integration with the Internet and the current desktop environment. The total project is estimated to cost about \$700,000 and will be funded from a combination of existing resources and new allocations as resources become available.
- With Library Services changing to a more computer-based system and the student's need for self-paced instruction and testing in many areas, OSU Technical Branch, Okmulgee will add equipment and personnel in the Learning Resources Center.
- At the University of Central Oklahoma, a new extended-hours computer lab will be completed in the Library in July 1997 to allow greater access to computer services in a safe environment.
- At Northeastern State University, computer proficiency will be required of all incoming freshmen during FY98. Multimedia training sessions will be provided for faculty.
- The University of Science and Arts of Oklahoma will have two fully equipped interactive TV classrooms; one fully equipped television production studio; a new computer lab in education and expansion of others in business and the library.

- Carl Albert State College has constructed one interactive television studio and will be opening a second during this fiscal year. These facilities will allow for sending and receiving televised courses to and from remote sites.
- Eastern Oklahoma State College has expanded the interactive instructional links to high schools in Pittsburg County. With the expanded links a total of nine area high schools will have access to televised instruction.
- Northeastern Oklahoma A&M College has hired an instructional technologist to assist faculty to develop quality visual aids in their presentations (multimedia, distance learning, classroom and lab). The college has allocated funds for installation of 12-15 additional TV/VCR monitors in academic classrooms. The college will also offer distance learning general education courses to area vocational-technical schools in fall 1997.
- Oklahoma City Community College is funding the development of learning activities using technology, expanded student Internet access, provision of student e-mail accounts, and student access to adjunct faculty voice mail boxes; upgrading computers in labs, the test center, classrooms, the library and faculty offices; enhanced classroom multimedia capabilities; upgrading broadcasting equipment for the journalism degree program; learning software for the developmental math program; expanded hours in the math computer lab and staffing in the business computer technology lab.
- Redlands Community College plans further enhancement of the Information Commons, IETV classrooms and student computer labs.
- Rose State College continues to expand efforts in distance learning and interactive video instruction and hired a specialist in instructional design to assist with the media component of courses.
- Southeastern Oklahoma State University is investing in a campus fiber optic network in order to provide student and faculty access to e-mail, the Internet, OneNet and library services. The university will also open four IETV classrooms.
- Western Oklahoma State College will increase budgets for professional
 development of faculty to improve their multimedia skills. A high priority is
 updating computers campus-wide and expanding the number in high-use
 locations such as the Learning Resource Center. The college notes the
 completion of the learning resource center, ITV studio and a fully equipped
 developmental and instructional lab funded with bond and Section 13 offset
 funds.
- Northwestern Oklahoma State University has increased its use of
 interactive television (ITV) to deliver courses to northwest Oklahoma. For
 example, the Business Administration bachelor's degree program has been
 restructured so that ITV courses can be delivered via OneNet to multiple sites
 and in cooperation and collaboration with a regional two-year college. Increased

investment of academic and support resources in this restructured program has proven beneficial.

Other Initiatives

- Seminole State College will expand its course offerings by providing access to educational programs in Holdenville, Wewoka, Prague, Tecumseh and Shawnee.
- At Oklahoma Panhandle State University, Hughes Strong Auditorium was completed, which will enhance the fine arts programs. Asbestos removal from Hefley Hall, the Student Union and Field Hall is complete.
- The Rose State College Communications Center, through an agreement with the City of Oklahoma City, will host performing arts programs normally held in the Oklahoma City Civic Center during its renovation period. The array of diverse cultural programs should have a positive impact on RSC students, as well as residents of eastern Oklahoma County.
- Oklahoma State University will implement a strategy to enhance University Extension and general outreach capabilities to further Oklahoma's international, social, economic and cultural development:
 - 1. College extension units will develop performance plans each year, including budget commitments and recommendations on future budget allocations. New funding to University Extension will be managed to promote extension and outreach program growth.
 - 2. College extension units will be reviewed to determine relevance, effectiveness, and efficiency of program support activities. Activities not supporting extension and outreach programs will be eliminated and associated funding redistributed to college units following their performance and growth plans. In areas where duplication exists among college extension units and centralization is appropriate, such activities and processes should be eliminated at the college level.
 - 3. A university-wide program development fund will support economic development and public service initiatives. These initiatives will be funded cooperatively by central administration and the college extension units.
 - 4. The Office of International Programs will be assigned to the Dean of University Extension to integrate more fully international program activity with the college units and to support our commitment to international programs.
 - 5. The Dean of University extension will work with each of the college units to develop commitment and support to promote economic development, public service and other university-wide program efforts at OSU. This may involve reallocation of base funding and program earnings. Each

unit will plan the use of a significant portion of base funding toward initiatives that are timely, important to the state, and provide public service programs and activities to address these concerns.

- Oklahoma State University will update 50 percent of the general university classrooms during FY98, including improvements for multimedia and distance learning.
- Eastern Oklahoma State College is coordinating with other state higher education institutions for the delivery of upper and graduate level course work on campus. The college has implemented a new program in Environmental Science/Natural Resources to address the demand of both the transferring student and needs of industry. Adult educational opportunities will be extended through the area-wide ITV network in area high schools to provide night classes.

Student Services

- Northern Oklahoma College has implemented a Learning Center in the guidance and counseling area that will include all tutorial, testing and lab facilities in a central location for the convenience of students.
- Rose State College will open an enrollment and advisement area in FY98 with an emphasis on streamlining the student enrollment process.
- Rose will also build on the Wellness Initiative, begun in FY97, to provide both an academic program and services for college staff and students.
- The University of Oklahoma will add two new financial aid positions to address student needs.
- Oklahoma State University has installed emergency phones in strategic locations throughout campus and will expand the number of sites in order to improve campus security.
- At the University of Central Oklahoma, a new recreational park was completed in FY97. The process will continue in FY98 with pocket parks and a trails system to improve the campus environment. Auxiliary Services is also making improvements to the dorms and replacing worn furniture.
- Eastern Oklahoma State College has restructured their student orientation with the goal of improving student retention. The college has also developed two additional 24-hour accessible computer labs for students, bringing the total number of available labs to 10.
- Oklahoma City Community College is expanding recruitment efforts for concurrent high-school students, graduating high-school seniors and adult students. The college will also offer improved financial aid services to students.

An organizational change in student services will provide a strengthened academic advisement and retention.

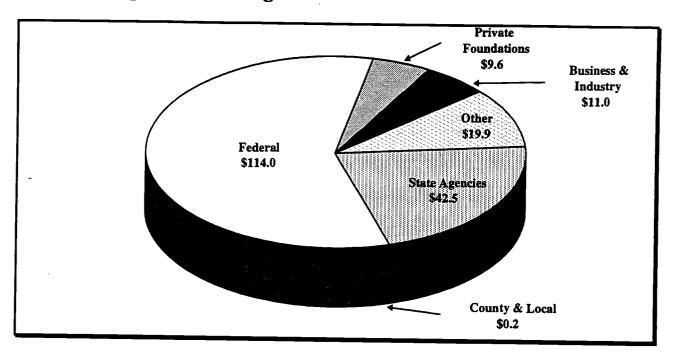

- The continued expansion of the Seminole State College Transfer Center will be a high priority during FY98. This program affords SSC students an opportunity to make contact with four-year college transfer advisors prior to completion of the freshman year.
- SSC also plans to expand the collaborative efforts with the three federally sponsored TRIO programs. These initiatives will work to promote these programs to internal and external entities, provide access and inclusion of TRIO recipients into the activities and services of SSC and create a seamless transition from TRIO to a successful college career.
- Northwestern Oklahoma State University has reallocated resources to student services to augment the international student advisor office. This investment is aimed to enrich further the campus student body with an infusion of students from multicultural backgrounds.
- A KIOSK system at Redlands Community College will change how students access the college. The system will increase the options for both current students and the general public on gaining information about programs, courses and student services. Beyond the RCC campus, the KIOSK will be offered to all members of the OKC Metro consortium as an expanded student service. RCC will also introduce a debit card system. This system will provide library, bookstore and food services, as well as the KIOSK. The debit card will eliminate a series of manual processes now required for students to do business or carry out certain academic activities at the college.
- Western Oklahoma State College is planning to relocate all student services into a centralized location to provide coordinated services to all students, including assessment, counseling and activities. The college is aggressively seeking grant funding for these enhancement plans.

EXTERNAL FUNDS - SPONSORED BUDGETS

For FY98, the Educational and General Budget, Part II, comprising externally funded projects, is \$210.9 million. The two research universities and their constituent agencies made up 56.3 percent of the E&G I budget; they account for considerably more of the total system sponsored budget – 81.6 percent.

- The E&G Budget, Part II, increased by \$13.6 million or 6.9 percent over FY97.
- Federal funds are still the largest source of revenue for the sponsored budget at \$118.7 million or 56.3 percent of the total, down slightly from 57.8% in FY 97.

Sources of Sponsored Budgets

Uses of Sponsored Budgets

- Uses of sponsored revenue funds are substantially for research and public service, respectively 51.4 percent and 24.7 percent of the total sponsored budget.
- Since FY 88, sponsored research in the State System has shown an increase of 295.3 percent. Research has become a target area for improvement in the State System with investments in the Oklahoma EPSCoR program and the State Regents' Research Match program. In FY98 these programs will provide \$14 million in matching funds for federal and other sponsored research at the state's universities.

- The research matching programs are also complemented by the annual investment of over \$14 million in the State Regents' Endowed Chair Program.
- It is noteworthy that, in general, at the research universities, the sponsored budget for research is considerably larger than the primary (E&G I) budget for research.

Return on Investment of State-Funded Research

Overall, an investment of \$55.8 million in university and college state dollars for research yields more than a 2 to 1 return in the form of externally funded research, as shown in the following table.

At some entities, the return is substantially greater. For example, the Health Sciences Center invests only \$3.6 million, yielding a return of \$35.9 million or more than 10 to 1.

	Externally Funded Research	State Funded Research	Return on Investment	% Return Investment
ou	36.2	8.8	4.1:1	411%
OU - HSC	35.9	3.6	10:1	997%
OSU	16.4	13.8	1.2:1	118%
OSU - Veterinary Medicine	2.6	2.2	1.2:1	118%
OSU - Agriculture Experiment Sta.	11.9	25.2	0.5:1	47.2%
OSU - Osteopathic Medicine	0.3	0.3	1:1	100%
System	108.3	55.8	1.9:1	194%
