ABSTRACT

This report provides information about student enrollment in Illinois' community colleges. Comparisons with past enrollments and completions, and summary data for the four previous fiscal years (1996-1999), are also presented. Detailed tables comparing fiscal year 1999 and fiscal year 2000 credit headcount, full-time equivalent (FTE) enrollments, and graduates by college are included. Highlights include: (1) the Illinois community college system recorded a total of just over one million (1,008,027) students in credit and noncredit courses in fiscal year 2000, an increase of 3.7 percent since fiscal year 1999; (2) credit-generating students accounted for about two-thirds (66.3 percent) of the overall fiscal year 2000 headcount; (3) minority (non-white) students accounted for 34.4 percent of the credit students enrolled, over one-half percent (0.7) more than in 1999; (4) baccalaureate/transfer remained the largest credit instructional program area enrolling 34.0 percent of fiscal year 2000 Illinois community college system students; (5) statewide, occupational credit program enrollments accounted for 26.4 percent of all credit students; (6) enrollments in occupational programs increased 2.8 percent from the previous year; and (7) more than 16 percent of the credit-generating students are known to have already earned some type of college certificate or degree. This includes 33,915 who earned a bachelor's degree or higher, which is an increase of 315 over last year. Appendices include Credit Enrollment Date Tables, Noncredit Course Enrollment Data Tables, and Completion Data Tables.

INTRODUCTION

The colleges in the Illinois Community College System submit detailed student records twice during each fiscal year. Fall opening enrollment (E1) data for credit-generating students are recorded by the colleges at the end of the regular fall registration period, which is usually the 10th day of the term. Annual student enrollment and completion (A1) data are reported for all students who are officially enrolled at the college in credit coursework at any time during the fiscal year. An A1 record is also submitted for students who graduate, but are not officially enrolled during the year. The N1 submission includes data on noncredit course enrollment. Fiscal year 1999 marked the first year that the Illinois Community College System had undertaken a noncredit course enrollment database to house demographic information on the wide range of noncredit instruction provided annually. As with any new data collection initiative of this magnitude, one can expect a transition period where gradual improvements are made to the process of gathering and reporting the array of requested data. Previously, since fiscal year 1994, only aggregate noncredit enrollment data have been gathered through the use of a yearly survey. During the transition period, both detailed data (N1) and aggregate data (paper survey) are being gathered.

Fall enrollment data provide a point-in-time or "snapshot" of opening fall term enrollment allowing year-to-year and institution-to-institution comparisons and are comparable to fall enrollment data in postsecondary institutions nationwide. Looking at the fall and annual data for fiscal year 2000 shows the substantial differences between the coverage of these submissions for Illinois community colleges. During the fall term included in fiscal year 2000, there were 339,673 students enrolled in credit coursework in public community colleges. During the fall term semester. During the entire fiscal year of 2000 a total of 668,676 students took credit coursework at the colleges. Hence, just one-half of the students who attended a community college during the entire fiscal year of 2000 were enrolled at the beginning of the fall term. Stated another way, community college annual enrollments are nearly twice as large as the fall credit opening enrollments reflect. In the noncredit arena, the differences are even more pronounced as fall noncredit data only accounted for 35.1 percent of the annual 2000 noncredit enrollments. Hence, to more fully capture the impact of the community college system the focus should be on annual data.

The diversity of the community college system and its students are best captured in annual student enrollment and completion records. This is because the age, attendance patterns, and goals of the community college student are unconventional. Students "stop in and out" of college according to their individual needs and may not always be enrolled at the beginning of a fall semester. The increase in module classes adds to the complexity of tabulating student enrollments at any given point-in-time. Additionally, with elevated emphasis on student outcomes and program effectiveness, analyses of student completions have become increasingly important. Therefore, the analyses in this report focuses on annual enrollment and completion data in an effort to secure the most comprehensive and accurate information available.

This year's report is based on fiscal year 2000 enrollments and completions. For comparison with past enrollments and completions, summary data for the four previous fiscal years (1996-1999) are also presented. Detailed tables comparing fiscal year 1999 and fiscal year 2000 credit headcount, full-time equivalent (FTE) enrollments, and graduates by college are included. More detailed tables for noncredit course enrollments will become available for future reports as the noncredit database evolves. FTE enrollments in this report are based on all credit hours attempted (including nonreimbursable credit hours).

HIGHLIGHTS OF FISCAL YEAR 2000 ANNUAL REPORT

Student Enrollments

- ▶ The Illinois community college system recorded a total of just over one million (1,008,027) students in credit and noncredit courses in fiscal year 2000, an increase of 3.7 percent since fiscal year 1999.
 - ▶ Credit-generating students accounted for about two-thirds (66.3 percent) of the overall fiscal year 2000 headcount.
 - ▶ During fiscal year 2000, the 48 public community colleges in Illinois enrolled 668,676 students in instructional credit courses, 2.8 percent more than the previous year. The full-time equivalent (FTE) enrollment was 217,311, an increase of 0.3 percent since fiscal year 1999.
 - ▶ Noncredit course enrollment figures for fiscal year 2000 are the higher value of information generated by the Noncredit Course Enrollment Data submission (NI) or the Annual Noncredit Enrollment Survey.
 - ▶ Statewide, 33,970 noncredit course sections were conducted during fiscal year 2000.
 - ▶ From fiscal year 1999 to fiscal year 2000, the number of individuals receiving instruction through noncredit course offerings increased 5.7 percent to 339,351 students.
 - ▶ Statewide, more than 35,400 students of the 1,008,027, enrolled in both credit and noncredit courses during fiscal year 2000 (A1 and NI). While there is some overlap these data suggest that credit and noncredit courses are meeting largely different student and community needs.
 - ▶ Females comprised 55.6 percent of the fiscal year 2000 student population enrolled in credit-generating programs.
 - ▶ Minority (non-white) students accounted for 34.4 percent of the credit
- ▶ students enrolled, over one-half percent (0.7) more than in 1999. Black student representation was about the same as last year and at its lowest (14.0 percent) in the past five years. Participation by Hispanic students increased by 0.9 percent. Both foreign/non-resident alien and Asian student participation were unchanged.
 - ▶ The median age of credit-generating students was 27.3 during fiscal year 2000, slightly older than the previous year. Likewise, the average age increased slightly to 31.6 years.
 - ▶ Baccalaureate/transfer remained the largest credit instructional program area enrolling 34.0 percent of fiscal year 2000 Illinois community college system students. Enrollments in Baccalaureate/transfer programs increased 1.6 percent from last year.
 - ▶ Statewide, occupational credit program enrollments accounted for more than one-quarter of all credit students (26.4 percent). Enrollments in occupational programs increased 2.8 percent from the previous year.
 - ▶ Although 34.0 percent of the fiscal year 2000 credit student population was enrolled in the baccalaureate/transfer area, only 26.4 percent of all students indicated an intent to transfer.
 - ▶ Students enrolled in adult education courses comprised 18.5 percent of the credit generating students. Enrollment in adult education increased by 4.4 percent over fiscal year 1999.
 - ▶ Of the students in adult education, nearly 55 percent were enrolled in English as a Second Language (ESL) courses. In fiscal year 1999 only 48.8 percent of adult education enrollees were involved in ESL.
 - ▶ More than one-half (56.8 percent) of the fiscal year 2000 credit students enrolled in Illinois community colleges indicated that they were not

HIGHLIGHTS OF FISCAL YEAR 2000 ANNUAL REPORT

(Continued)

Student Enrollments

pursuing a degree, but attending only to complete one or several courses. Participation in college with a focus on taking courses instead of degree or certificate completion increased 5.4 percent over last year.

- ▶ About three out of four credit students attended on a part-time basis during both the fall (73.3 percent) and spring (75.3 percent) semesters in fiscal year 2000.
- ▶ Over 16 percent of the credit-generating students are known to already have earned some type of college certificate or degree. This includes 33,915 who earned a bachelors degree or higher which is an increase of 315 over last year.
- ▶ Illinois community college students were enrolled in 6,519,365 credit hours throughout fiscal year 2000 and earned over 73 percent of those hours.
- ▶ Accumulated credit hours were available for 69.6 percent of the fiscal year 2000 student population. Of that percentage, 32.0 percent had accumulated 30 or more college-level hours (sophomore level).
- ▶ Cumulative grade point average data was reported for 64.1 percent of the fiscal year 2000 students. Forty-six percent held an A-B average.
- ▶ Noncredit course enrollment figures in the report for fiscal year 2000 are the higher value of information generated by the Noncredit Course Enrollment Data submission (N1) or the Annual Noncredit Enrollment Survey. The collection of noncredit individual student data submission (N1) is evolving and are expected to become increasingly complete in the future.

percent over last year. Similarly, the duplicated headcount or "seatcount" was 2.4 percent higher than the previous year.

- ▶ Female students accounted for 56.5 percent of 2000 noncredit enrollments for which gender data were reported.
- ▶ Minority students accounted for nearly one-quarter of the individuals enrolled in noncredit programs who supplied racial/ethnic data.
- ▶ Nearly one-half of the noncredit students were 40 years of age or above.
- ▶ Nearly fifty percent of the noncredit offerings were in the personal and social development category of activity. Nearly 36 percent of the noncredit coursework were dedicated to developing workplace skills: professional/vocational (26.8 percent) and business and industry contractual training (8.8 percent).
- ▶ Across all categories of activity, six programs (two-digit CIP) had over 10,000 noncredit students enrolled. These six program areas accounted for over three quarters of the students enrolled in noncredit courses where CIP data were reported. Over one-quarter of these enrollments are in work related programs: business management (10.8 percent), computer information systems (9.8 percent), and transportation workers (5.2 percent).
- ▶ Instructional site information shows that 59.8 percent of the noncredit courses offered in 2000 were held on main college campuses.

HIGHLIGHTS OF FISCAL YEAR 2000 ANNUAL REPORT

(Continued)

Student Completions

- ▶ Collegiate level degrees and certificates were awarded to 34,800 students at Illinois community colleges in fiscal year 2000, 3.8 percent more than in fiscal year 1999.
- ▶ Nearly 12,900 baccalaureate/transfer degrees were earned during the fiscal year, a decrease of -1.1 percent since 1999, accounting for 36.9 percent of all completions.
- ▶ Exactly 60 percent of all fiscal year 2000 collegiate degrees and certificates were earned through completion of occupational programs.
- ▶ Students successfully completed nearly 20,900 occupational degrees and certificates in Illinois community colleges during fiscal year 2000, a 6.0 percent increase from the previous year.
- ▶ Forty-one percent of the occupational degrees and certificates awarded in fiscal year 2000 were associate in applied science degrees.
- ▶ Females accounted for 60.4 percent of all completions during fiscal year 2000. A similar proportion was reflected in the baccalaureate/transfer and occupational program areas.
- ▶ The largest number (2,950) of male completers of a specific degree or certificate was in the associate in applied science degree program. However, the majority of AAS graduates (65.7 percent) were female.
- ▶ Although small in number (84), the Associate in Engineering Science program had the highest proportion of male graduates (92.9 percent).
- ▶ Minority students earned one-quarter of the collegiate-level degrees and certificates granted in the Illinois community college system during fiscal year 2000. Black students achieved 13.9 percent, Hispanic students earned 6.9 percent and Asians earned 3.6 percent of the degree and certificates.
- ▶ Minorities accounted for 16.4 percent of the total baccalaureate/transfer degree recipients. Black students accounted for 7.8 percent, 5.3 percent were Hispanic, and 2.4 percent were of Asian origin.
- ▶ A larger number of minority graduates was found in the occupational area (6,221) than in the baccalaureate/transfer area (2,081).
- ▶ Among the largest minority groups, Black students completed more than twice as many collegiate-level programs than Hispanic students.
- ▶ Over fifteen percent of the students who were awarded degrees and certificates during fiscal year 2000 were less than 21 years of age. The age groups with the largest percentages of graduates were the 21 to 24, (31.4 percent), 25 to 30 (17.8 percent), and 31 to 39 year olds (16.8 percent).
- ▶ The proportion of occupational graduates increased as age advanced.
- ▶ Over 70 percent of the students who successfully completed baccalaureate/transfer degrees in fiscal year 2000 indicated an intent to transfer to a four-year institution.
- ▶ Twenty-two percent of the fiscal year 2000 AAS degree graduates indicated their goal was to only complete one or several courses or finish a certificate, *not* to earn an associate degree. This demonstrates that students sometimes alter their goals as they progress through the community college system.

OVERALL FISCAL YEAR 2000 STUDENT ENROLLMENTS

The Illinois Community College System recorded a total of just over one million (1,008,027) students during fiscal year 2000. This overall enrollment figure, which includes student enrollments in credit and noncredit courses, increased 3.7 percent since fiscal year 1999. In fact, overall enrollments have increased each year since annual aggregate noncredit headcounts were first collected six years ago. Fiscal year 2000 totals are 9.1 percent higher than those reported in fiscal year 1996.

Table 1 provides a summary comparison of fiscal year 1996 through fiscal year 2000 credit and noncredit unduplicated enrollments. Total enrollments do not reflect those students who may be concurrently enrolled in credit-generating and noncredit courses during the fiscal year.

Unduplicated Headcount	FY 96	FY 97	FY 98	FY 99	FY 00
Credit	675,554	677,314	659,069	650,605	668,676
% Change	-1.0%	0.3%	-2.7%	-1.3%	2.8%
Noncredit**	248,062	262,234	298,746	321,062	339,351
% Change	11.3%	5.7%	13.9%	7.5%	5.7%
Total*	923,616	939,548	957,815	971,667	1,008,027
% Change	2.0%	1.7%	1.9%	1.4%	3.7%

*Estimated-individuals may be concurrently enrolled in credit and noncredit courses

**FY 1999 and 2000 higher value generated by Noncredit Course Enrollment Data Submission (NI) or Annual Noncredit Enrollment Survey
SOURCES OF DATA: Annual Enrollment (AI) Records
Annual Noncredit Enrollment Surveys or NI Records

Comparisons of fiscal year 1996 through fiscal year 2000 unduplicated credit and noncredit headcount enrollments for each community college are provided in Appendix tables A-1 and B-1, respectively.

Fig. 1. Overall Annual Enrollments, FY 1996-2000

As depicted in Figure 1, credit-generating students account for slightly less than two-thirds (66.3 percent) of the overall fiscal year 2000 headcount. An examination of the five-year period indicates that the proportion of credit-generating students has decreased 1.0 percent since fiscal year 1996, when the proportion of credit-generating students was just under three-fourths (73.1 percent) of the overall student population. Proportionate noncredit enrollment growth is evident in every year between 1996 and 2000 with noncredit enrollments peaking at more than one-third in the latest figures.

Statewide, more than 35,400 students of the 1,008,027, enrolled in both credit and noncredit courses during fiscal year 2000 (AI and NI). While there is some overlap, these data suggest that credit and noncredit courses are meeting largely different student and community needs.

FISCAL YEAR 2000 STUDENT CREDIT ENROLLMENTS

Student Credit Enrollment by Community College

Annual enrollment for fiscal year 2000 was 668,676, and full-time equivalent (FTE) students totaled 217,311. Table 2 contains comparative enrollment data for the last five years. Fiscal year 2000 total headcount enrollment increased 2.8 percent from the previous year, and fiscal year 2000 FTE enrollment increased only 0.3 percent. Headcount enrollments have decreased 1.0 percent since 1996, while FTE enrollments increased 0.1 percent. Headcount enrollments were at their highest at 727,310 in fiscal year 1992. FTE enrollments peaked at 237,762 in fiscal year 1993, little change has occurred the past four years.

	<u>FY 96</u>	<u>FY 97</u>	<u>FY 98</u>	<u>FY 99</u>	<u>FY 00</u>
Headcount	675,554	677,314	659,069	650,605	668,676
% Change	-1.0%	0.3%	-2.7%	-1.3%	2.8%
FTE	217,055	218,662	217,310	216,593	217,311
% Change	-0.9%	0.5%	-0.6%	-0.3%	0.3%

SOURCE OF DATA: Annual Enrollment (A1) Records

Table A-1 in the appendix provides a comparison of fiscal year 1996 through fiscal year 2000 headcount enrollments for each community college. Note that the last reported Metropolitan Community College figures from fiscal year 1999 only include fall 1998 data, which was the last semester the college operated. Since that time, the East St. Louis Community College Center (ESLCCC) has been providing educational programs and services to area residents through cooperative efforts of other higher education institutions. Enrollment and completion figures for the ESLCCC are included in the records of the colleges providing the

programs and services. Of the 48 community colleges, 30 colleges experienced increases in headcount, while 11 exhibited decreases during the past year. Seven colleges experienced little or no change (1.0 percent or less) over the last year. Table A-2 contains a comparison of FTE enrollments for the five-year period, indicating 26 colleges with increases, 13 with decreases, and 9 with little change.

Male/Female Distribution

The male/female distribution of students typically fluctuates little from year to year. Females comprised 55.6 percent of the student population in fiscal year 2000. The percentage of male students has averaged 44.3 percent over the past five years. (See Table A-3.)

Ethnic Origin

In fiscal year 2000, just over one-third (34.4 percent) of those attending credit courses in community colleges were minority (non-white) students. Current data show that minority representation increased slightly (0.7 percent) over last year. During the past five years, minorities have comprised an average of about one-third (33.6 percent) of the student population. The fiscal year 2000 minority participation increase is largely due to proportionate increases in Hispanic (0.9 percent) student participation. Hispanic students (96,176) are now the largest minority group followed by Black students (92,762). In fiscal year 2000, proportionate representation by African American students was at its lowest (14.0 percent) level in the past five years. (See Table A-4.)

Student Age

The average age of the Illinois community college student was 31.6 years in fiscal year 2000 just slightly higher than in fiscal year 1999. The median age was 27.3 years, which is slightly older than last year. The largest proportion of students (22.7 percent) was in the 17-20 year old category. Once the third largest group (fiscal years 1994-1996), the next in size, 21-24 year old students (19.9 percent), remained constant. The next largest age group by proportion, 40-55 (18.9 percent), increased slightly. However, the next two groups by proportion, 31-39 (16.7

BEST COPY AVAILABLE

percent) and 25-30 (15.9 percent), declined somewhat. The 31-39 year old group had previously (fiscal years 1994-1996) been the second largest age bracket. Always the smallest in size, the 16 and under age group grew slightly, but still represented only 0.7 percent of the student population in fiscal year 2000. (See Table A-5.)

Summary of Enrollments by Instructional Program Area

The baccalaureate/transfer program is the largest instructional program offered in the Illinois Community College System. Statewide, this program area increased 1.6 percent in the past year, but is down nearly 20 percent between 1996 and 2000. An examination of the longer term trend data reveals a large increase in the total number of baccalaureate/transfer students in 1994, followed by two years of level enrollments and then a substantial drop in the transfer program category for 1997. Further study reveals that the large shift in enrollments was due to the inclusion of adult education (specifically English as a Second Language) students in the baccalaureate/transfer programs at City Colleges of Chicago in 1994 through 1996. Then in 1997, Chicago switched category usage back to adult education, along with an expanded use of general studies programs. Changes by the City Colleges of Chicago in the use of general studies (decrease) and vocational skills (increase) were noted in the 1999 submission. On a more positive note, the programmatic distribution of enrollments in Chicago's fiscal year 1999 and 2000 submissions shows continuity in how students were classified.

Occupational programs are the second largest credit program in the Illinois Community College System. Occupational enrollments increased 2.8 percent from last year and decreased 2.6 percent over the five-year period. In the past year, enrollments increased in vocational skills (13.9 percent) programs. Enrollments decreased in both General associate degree programs (-6.7 percent) and general studies certificates (-12.7 percent) (See Table A-6a).

Students enrolled in adult education courses comprised 18.5 percent of the credit generating students in fiscal year 2000. Hence, nearly one out of five community college students is enrolled in adult education skills building coursework. Statewide, there was a 4.4 percent increase in

adult education enrollments over the previous year. In fiscal year 2000, nearly 55 percent of the students in adult education were enrolled in English as a Second Language (ESL) courses. In fiscal year 1999, only 48.8 percent of adult education enrollees were involved in ESL.

The City Colleges of Chicago account for nearly one-half of statewide community college adult education enrollments. Adult education enrollments at the City Colleges of Chicago decreased slightly compared to last year (-3.0 percent), which parallels the overall enrollment change in Chicago. Excluding the City Colleges of Chicago, there was an 11.8 percent increase in adult education coursetakers over fiscal year 1999. Hence, across the rest of the community college system, adult education enrollments are showing growth. (See Table A-6a and A-6b)

Across all instructional program areas, overall between 1996 and 2000 excluding City Colleges of Chicago, the rest of the system experienced a moderate increase (4.1 percent) in enrollments. Analysis of instructional program area information, excluding City Colleges of Chicago data, produces mixed results. Relatively little change was exhibited in baccalaureate/transfer (-1.8 percent) programs between 1996 and 2000. Adult education growth was substantial (27.1 percent) over the five-year period. The general associate (58.2 percent) and general studies (7.8 percent) programs recorded higher growth without Chicago data. Little change was evident in the occupational (-2.8 percent) programs. There was a fairly large increase (13.6 percent) in the vocational skills programs (see Table A-6b). While occupational credit enrollments have decreased, the number of students enrolled in noncredit courses, many of which are suitable for updating professional skills in business and industry, increased. A review of noncredit course enrollments is provided in the next major section of this report.

Instructional Program Enrollments by Gender. During fiscal year 2000, females outnumbered males in all instructional areas; the adult education (ABE/ASE/ESL) programs contained the highest proportion of male students (48 percent). The highest proportion of female students (59.2 percent) were enrolled in the general studies certificate program

followed closely by the general associate program (59.1 percent) and baccalaureate/transfer program (58.1 percent). (See Table A-7.)

Fig. 2. Fiscal Year 2000 Minority Enrollments in Baccalaureate/Transfer and Occupational Programs

Instructional Program Enrollments by Racial/Ethnic Origin. Figure 2 illustrates the distribution of minorities in the two largest program areas, baccalaureate/transfer and occupational/career. An examination of each racial/ethnic group's representation across program areas in fiscal year 2000 indicates that the largest percentage of white (39.4 percent), Asian (32.4 percent), Black (30.1 percent), and American Indian (31.1 percent) students were enrolled in baccalaureate/transfer programs. The highest percentage of Hispanic (46.0 percent) students and Nonresident Alien students (54.5 percent) were enrolled in English as a Second Language programs. Overall, minority students were least represented in the vocational skills (21.1 percent), general studies certificate (22.6 percent), and baccalaureate/transfer (24.5 percent) areas (see Table A-8).

Instructional Program Enrollments by Age. During fiscal year 2000, 42.0 percent of community college students were under 25 years of age. Nearly half (48.9 percent) of the students under 25 were enrolled in baccalaureate/transfer programs. Almost one-third of the student population was between 25-39 years of age; 30.7 percent were enrolled in the occupational program area, while another quarter (26.3 percent) were enrolled in baccalaureate/transfer programs. More than one-fifth of Illinois' community college students were at least 40 years of age. Nearly one-third of students 40 years of age and older were enrolled in occupational programs. Students 40 years of age and older also had substantial enrollments in vocational skills (22.1 percent) and baccalaureate/transfer (20.7 percent) programs. (See Table A-9.)

Largest Occupational Programs. An examination of occupational curricula with at least 5,000 students enrolled during either of the last two years revealed no changes in order according to program size. With nearly 11,950 students, Business Data Programming remained the largest program as enrollment increased by 7.0 percent (784 students). Associate Degree Nursing remained the second largest program, although enrollment decreased by 3.9 percent (-386 students). Enrollment in Criminal Justice Technology declined by 9.8 percent (-815 students), but it remained the third largest program. The remaining two programs, Child Care Provider/Assistant and Business Administration & Management remained fourth and fifth, respectively. Both showed little change in enrollment (0.8 percent for Child Care Provider, -0.8 percent for Business Administration & Management).

Instructional Program Enrollments by Intent. Intent data convey the primary goal that the student wants to achieve as a result of his/her studies. Intent data are self-reported by students when they initially enroll at the college. College staff are asked to require students to update this information periodically by providing a current intent, as well as entry intent. An examination of the intent data across program areas illustrates the diversity of student interests and needs that community colleges serve. Three goals combined to represent the aspirations of 56.21 percent of community college students: 26.4 percent were preparing for transfer to a four-year institution, 15.3 percent were improving their basic

skills/GED pursuit, and 14.6 percent were preparing for a job immediately after community college.

Examination of student intent by program area reveals interesting observations. With the exception of adult education and baccalaureate/transfer, less than half of the students in any program area were pursuing the particular goal most often associated with a given major. Only 53.7 percent of those students enrolled in baccalaureate/transfer programs indicated that they intend to transfer to a four-year institution. Similarly, just 53.2 percent of the students in occupational programs enrolled with the intent of preparing for a job after community college attendance or to improve their present job skills. About three-quarters of the ABE/ASE and ESL students listed a desire to remedy basic skills deficiencies or to prepare for the GED test as their reason for attending. (See Table A-11.)

Instructional Program Enrollments by Degree Objective. Degree objective data are also self-reported and are designed to assist colleges in classifying students by curriculum or course enrollee category. The objective conveys the student's expected outcome from attending the community college. In fiscal year 2000, 56.8 percent of the students indicated that they were enrolling with no intention of pursuing a degree — only to complete one or several courses. A review of student objectives by program area reveals expected results: 55.7 percent of the baccalaureate/transfer students plan to complete an associate degree, while 39.5 percent are interested in completing one or several courses. Less than half (41.7 percent) of the occupational/career students indicated that they expected to complete an associate degree, while 40.4 percent expected to complete one or several courses. About 17 percent wanted to complete a certificate. These data illustrate the variety of aspirations among students enrolled in community college occupational programs. Many students complete an entire program, while others simply want to improve their current skills or obtain new skills to enter a different career. Particularly in a strong economy, employers often do not require the completion of a formal certificate or degree, only that individuals acquire the skills necessary to perform specific job duties. In the ESL, general studies, ABE/ASE, and vocational programs, the vast majority (96.6;

94.0; 91.2; and 92.0 percent, respectively) of students planned only to complete one or several courses. (See Table A-12.)

Enrollment Hours by Term and Type of Attendance

More than nine out of ten students attending during the summer term of fiscal year 2000 were part-time (less than nine credit hours). Over 73 percent of the students attended college on a part-time (less than 12 credit hours) basis during the fall semester. The part-time proportion was slightly higher (75.3 percent) in the spring. In a pattern not typical among higher education institutions, Illinois community colleges enrollment during the fall (385,514) and spring semester (385,486) was about the same. (See Table A-13.) Typically spring enrollments would show a larger decrease. Statewide, 203,419 students attended in both the fall and spring semesters.

Fig. 3. Fiscal Year 2000 Headcount Enrollment by Prior Highest Degree Earned

Highest Degree Earned by Students Prior to Attending Community College

The prior earned degree data reiterate that community colleges serve diverse populations. Figure 3 illustrates the educational background of fiscal year 2000 students. Among the 72 percent of students who reported their prior degrees (excluding adult education students who would typically not possess earned degrees), nearly 17 percent earned some type of

of postsecondary certificate or degree. Fourteen percent had already earned degrees at or beyond the community college level. (See Table A-14.)

Attempted vs. Earned Credit Hours

At all colleges and universities, there are students who, for a variety of reasons, are unable or unwilling to complete the requirements for the class(es) in which they enroll. In 2000, Illinois community college students completed 4,779,813 credit hours, or 73.3 percent of their attempted hours. Overall, full-time students earned a slightly higher percent of attempted hours than did part-time students. (See Table A-15).

Of the 465,444 students (69.6 percent) for whom data were available, more than two-thirds had accumulated less than 30 college-level hours (freshman level). Nearly 19 percent had accumulated between 30 to 59 credit hours (sophomore status), and 13.4 percent earned 60 or more credits. (See Table A-16.)

Grade Point Averages

Cumulative grade point average data were available for nearly two-thirds of the students enrolled in fiscal year 2000. More than 82 percent of the students had a grade point of 2.01 or above, which is a "C" average or above. Slightly over 36 percent had achieved a grade point between 2.01 and 3.00 ("C" to "B"), while 45.9 percent were in the 3.01 to 4.00 ("B" to "A") range. (See Table A-17.)

High School Graduation Percentile Rank

High school class rank was reported for about 14 percent of the fiscal year 2000 community college students. Of this population, nearly 5 percent were in the top tenth percentile of their graduating class, while 48 percent graduated in the top half of their class. (See Table A-18.)

ACT Scores of Community College Students

ACT score data were available for 10 percent of the students. Nearly 57 percent of the students received a 19 or higher on the ACT exam. A minimum of 18 on the ACT exam is typically required for acceptance into many colleges or universities. For those fiscal year 2000 students from whom data were gathered, the average ACT score was 19.1. The median score was 19. (See Table A-19.)

FISCAL YEAR 2000 STUDENT NONCREDIT COURSE ENROLLMENTS

Student Noncredit Course Enrollment by Community College
Illinois community colleges provide a wide range of noncredit instruction to meet a variety of community needs. Table 3 contains comparative noncredit enrollment data for the last five years. Fiscal year 1994 was the first year in which annual noncredit course enrollment data were collected. Note that noncredit course enrollment figures for both fiscal year 1999 and 2000 are the higher value of information generated by the Noncredit Course Enrollment Data submission (NI) or the Annual Noncredit Enrollment Survey.

Fiscal year 1999 marks the second year that the Illinois Community College System has undertaken a noncredit course enrollment database (NI). As with any new data collection initiative of this magnitude, one can expect a transition period where gradual improvements are made to the process of gathering and reporting the array of requested data takes place. During the transition period, both detailed data (NI) and aggregate data (paper survey) are being gathered.

During fiscal year 2000, 33,970 noncredit course sections were conducted throughout the state or about 0.4 percent greater than the previous year. Course offerings have, in fact, increased each year in the five-year period. From fiscal year 1996 to fiscal year 2000, the total number of course sections offered through the colleges increased 25.5 percent. The rate of increase has slowed considerably during the last two years.

Noncredit offerings are an important and growing part of college efforts to meet community and employer needs. As illustrated in Figure 4, student enrollments have also increased dramatically. In the past year, the unduplicated noncredit headcount (in which students are counted only once, regardless of the number of noncredit courses in which they enroll) increased 5.7 percent. Unduplicated noncredit headcounts have increased 36.8 percent over the last five years. The fiscal year 2000 duplicated headcount (also known as "seatcount") was 2.4 percent higher than the previous year and 30.7 percent higher than five years earlier.

The number of noncredit course offerings and enrollments at the community colleges often vary from year to year, depending on the needs of the surrounding communities. Comparisons of fiscal year 1996 through fiscal year 2000 noncredit headcount enrollments and course sections conducted for each community college are provided in Appendix Tables B-1, B-2, and B-3.

Fig. 4. Noncredit Course Enrollments, FY 1996-2000

Characteristics of Noncredit Students

The collection of noncredit individual student data submission (NI) is evolving and expected to become more complete with the passage of time. The possibility also exists that, as data collection requirements become increasingly stringent, reported enrollments may level off or decrease. College officials are recognized for the substantial effort they put into collecting these detailed data on noncredit students. Due to extensive work by college officials during the transition period, sufficient information is available to provide percentages about the characteristics of the students who enrolled in noncredit coursework at community colleges in fiscal year 2000. The following student characteristic information is based on unduplicated counts.

Noncredit Student Gender. Similar to the distribution for credit programs, female students accounted for 56.5 percent of 2000 noncredit enrollments for which gender data were reported. Five percent of the gender data were missing.

Noncredit Student Ethnic Origin. Racial/ethnic data for noncredit students were less complete as just over one-fifth of the racial/ethnic information were missing from the noncredit records. Minority students accounted for nearly one-quarter of the individuals enrolled in noncredit programs who supplied racial/ethnic data. In credit programs during the past five years, minorities accounted for an average of about one-third of the student population. Available noncredit data indicated the following racial/ethnic distribution: Whites (76.8 percent), Blacks (11.6 percent), Hispanics (6.7 percent), Asians (4.1 percent), Aliens (0.4 percent), and American Indians (0.3 percent).

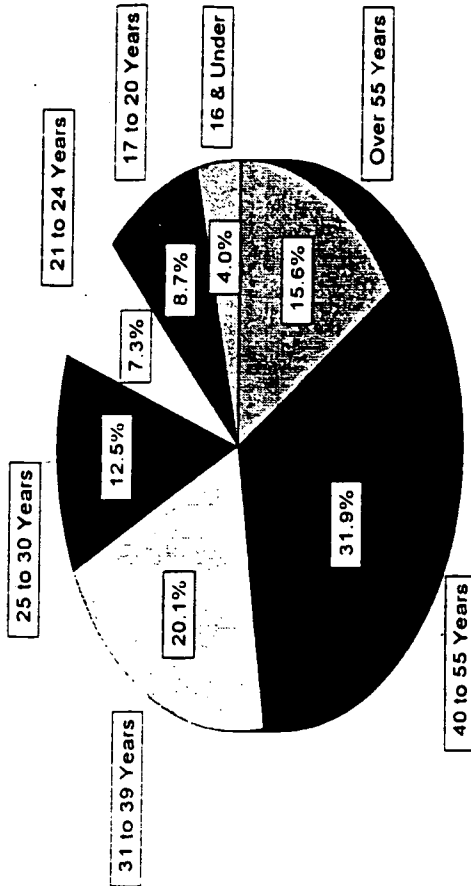

Fig. 5. Age Distribution for Noncredit Course Enrollments, FY 2000

Noncredit Student Age. Based on available data, the average age of students enrolled in noncredit coursework during fiscal year 2000 was 36.8 years and the median age was 36.3 years. Age information was missing for one-fifth of the noncredit students. As depicted in Figure 5, available data indicates that, during 2000, noncredit programming served a more mature clientele than credit courses. Nearly one-half of the noncredit students were 40 years or above. The largest group of

noncredit students were between 40 and 55 (31.7 percent). One-fifth of noncredit students were under 25 years of age. The 25-39 old age group accounted for nearly one-third of the noncredit enrollments.

Noncredit Category of Activity (Duplicated)

For state reporting purposes, noncredit coursework is grouped into four broad categories. Records were not added to the database unless category of activity information was supplied. Duplicated noncredit enrollment counts are used in the category of activity information in Figure 6.

Fig. 6. Category of Activity for Noncredit Course Enrollments, FY 2000

Nearly one-half of the noncredit offerings were in the personal and social development category. Personal and social development programming is an important community service provided by the colleges. Typically, these courses are offered as long as demand is sufficient to at least cover the cost of course delivery. Nearly 36 percent of the noncredit coursework was dedicated to developing workplace skills: professional/vocational (26.8 percent) and business and industry contractual training (8.8 percent). Frequently, area residents are interested in acquiring new skills without earning academic credit.

Customized training is an important economic development activity in which the colleges actively participate. Colleges are relied upon extensively to develop and deliver coursework to meet the unique needs of area business, industry, and government. The remaining 15 percent served the needs of youth (e.g., learning skills enrichment, athletic skills building, college for kids, etc.).

Fig. 7. Largest Noncredit Offerings, FY 2000

BEST COPY AVAILABLE

Largest Noncredit Offerings (Duplicated)

Two-digit classification of instructional program (CIP) codes provide additional information about the areas where noncredit instruction were provided. In future data collection on noncredit coursework, the colleges will be moving toward reporting more detailed information on the kinds of courses they are providing. Sixteen percent of the CIP data were missing. Percentages cited are based on known CIP codes. Across all categories of activity, six programs (two-digit CIP) had over 10,000 noncredit students enrolled. These six program areas accounted for over three quarters of the students enrolled in noncredit courses where CIP data were reported. Over one-quarter of these enrollments accounted for in Figure 7 are in work-related programs: business management (10.8 percent), computer information systems (9.8 percent), and leisure activities

workers (5.2 percent). The "all other category" includes 42 separate two-digit CIP codes. The remaining 50.3 percent were in the following areas: leisure and recreation (28.1 percent), self improvement (18.6 percent), and basic skill development (3.5 percent).

Noncredit Term of Attendance (Duplicated)

Term of enrollment was provided for all noncredit coursework for fiscal year 2000. The distribution of enrollments by term follows: spring (38.4 percent), fall (35.1 percent), summer (24.4 percent), and winter (2.0 percent). Overall, the distribution is similar to fiscal year 2000 credit offerings with somewhat higher summer noncredit activity and lower fall noncredit enrollments.

Noncredit Enrollment Distribution by Site/Location (Duplicated)

For state reporting purposes, five broad instructional site locations have been identified. Acquiring more complete information about community college facility utilization and needs was one of the underlying reasons for collecting more detailed noncredit data. Complete data were available on the instructional site which show that most enrollment occurs on main college campuses:

- main campus (59.8 percent),
- community-based (15.3 percent),
- off-campus college-owned (13.1 percent),
- off-campus college-leased (8.5 percent), and
- business-based (3.2 percent).

Further information about the differences between the categories follows. Community-based sites are rented or leased and site maintenance and upkeep are the responsibility of the organization furnishing the space. For off-campus college-leased sites, the college controls the property and is responsible for maintenance and upkeep. Off-campus college-owned facilities are college-controlled branch or extension center sites located away from the main campus. Business-based sites are provided by businesses who contract for training services.

The current report contains new information about noncredit enrollments due to extensive efforts by college officials to gather these data using a new format. Readers can anticipate the availability of more detailed information on noncredit activity via the Noncredit Course Enrollment (NI) as the system gains more experience with this substantial new data collection initiative.

FISCAL YEAR 2000 COMPLETIONS

Degrees and Certificates Awarded by Community College

The number of collegiate-level degrees and certificates awarded to Illinois community college students in fiscal year 2000 totaled 34,800. Table 4 contains comparative completion data for the last five years. The number of degrees and certificates awarded increased by 3.8 percent over fiscal year 1999. Compared to fiscal year 1996, the total number of fiscal year 2000 completions increased 2.7 percent.

Table C-1 in the appendix provides a comparison of fiscal year 1996 through fiscal year 2000 duplicated completions for each community college. Compared to last year, among the 48 colleges, 31 experienced increases in degree and certificate awards, while 14 exhibited decreases in the past year. Three colleges experienced little or no change.

Degrees and Certificates Awarded by Program Categories

Of the 34,800 completions during fiscal year 2000, 60 percent were occupational degrees or certificates. Baccalaureate/transfer degrees accounted for 36.9 percent of all the collegiate-level completions. Among these baccalaureate/transfer degrees, the associate in arts degree was most commonly awarded (61.2 percent). One-third of the baccalaureate/transfer degrees earned were associate in science degrees. The proportion of AA and AS degrees granted has been remarkably stable over the past five years. The total number of transfer degrees awarded decreased -1.1 percent since fiscal year 1999. Overall, the number of baccalaureate/transfer degrees awarded in fiscal 2000 showed little change from five years earlier (an increase of 119 or 0.9 percent).

An examination of the occupational degrees and certificates awarded in fiscal year 2000 indicates that 41.2 percent (8,604) were associate in applied science degrees. Nearly 36 percent of the completions were for occupational certificates of less than one year. Overall occupational completions are up 6.0 percent compared to last year. This overall increase is attributable to increases in certificates of one year or more (5.2 percent) and certificates of less than one year (14.6 percent). Although small in volume, the number of vocational skills certificates awarded in fiscal year 2000 remained about the same as last year. A comparison of fiscal year 2000 occupational completions to those awarded five years earlier reveals that the total number of awards increased by 2.8 percent. A closer examination shows increases in three out of four categories: short-term certificates (20.2 percent), long-term certificates (7.9 percent), and vocational skills certificates (113.1 percent or 153 completers).

Summary of Graduates by Degree Categories

Gender of Graduates by Degree Category. During fiscal year 2000, six out of ten degrees and certificates were earned by females. The three degrees and certificates attained by the highest proportion of females were the associate in arts (65.2 percent), associate in applied science (65.7 percent), and vocational skills certificate (68.4 percent). Although

	<u>FY 96</u>	<u>FY 97</u>	<u>FY 98</u>	<u>FY 99</u>	<u>FY 00</u>

% Change	-2.2%	1.9%	2.3%	-2.1%	0.5%
Occupational	20,310	19,565	20,386	19,694	20,881
% Change	-3.7%	-3.7%	4.2%	-3.4%	5.7%
TOTALS	33,874	33,393	34,529	33,542	34,800
% Change	-3.1%	-1.4%	3.4%	-2.9%	3.8%

SOURCE OF DATA: Annual Enrollment and Completion (A1) Records.

small in overall number (84), associate in engineering science — one of the newest degree programs in the Illinois Community College System — had the highest proportion of male graduates (92.9 percent). Certificates of less than one year were the specific award category with the largest number of male graduates (3,320). The male/female distribution within the baccalaureate/transfer degree and occupational degree and certificate areas drive the overall proportion. (See Table C-3.)

Racial/Ethnic Origin of Graduates by Degree Category. One-quarter of all degrees and certificates in fiscal year 2000 were awarded to minority (nonwhite) students. Sixteen percent of all fiscal year 2000 baccalaureate/transfer degrees were earned by minority students, the majority of which were associate in arts degrees (70.7 percent), while 26.3 percent were associate in science degrees. The overall proportion of minority baccalaureate/transfer completers was similar to last year. Almost three times as many minority graduates completed occupational degrees and certificates (6,221) than baccalaureate/transfer degrees (2,081). More than twice as many Black students (4,837) completed collegiate-level programs than did Hispanic students (2,385) in fiscal year 2000. (See Table C-4). Figure 8 illustrates the distribution of minority students who successfully completed degree programs in the Illinois Community College System during fiscal year 2000.

Age of Graduates by Degree Category. Slightly over 15 percent of the completers were in the under 21 year old age group. These graduates were predominately (61.0 percent) in baccalaureate/transfer programs. The 21-24 age group accounted for 31.4 percent of the total graduates, while the 25-30 and 31-39 age groups accounted for 17.8 and 16.8 percent, respectively. Nearly half (48.3 percent) of the students 30 and under completed baccalaureate/transfer degrees, while only (16.1 percent) of the graduates over the age of 30 completed baccalaureate/transfer programs. More than three-quarters (79.6 percent) of those graduates age 30 or above earned occupational degrees and certificates. Across all age groups, the proportion of occupational graduates increased as age advanced. (See Table C-5.)

Fig. 8. FY 2000 Associate Degrees Earned by Minority Students

Intent of Graduates by Degree Category. Self-reported intent data disclose the primary goal that a student wants to achieve as a result of his/her studies. The community colleges examine current intent versus student intent at the time of initial enrollment at the college. In these analyses, current intent (when available) was analyzed to reflect the changing needs and desires of the community college student. Only seven out of ten students who attained a baccalaureate/transfer degree indicated that they intended to prepare for transfer to a four-year institution. Just over one-tenth of these successful students indicated a desire to prepare for a job immediately after community college or to improve present job skills — intent that would most often be associated with seeking an occupational degree or certificate. Likewise, only 57.1

percent of those students who attained an occupational degree or certificate indicated that they were preparing for a job immediately after completing community college or improving present job skills. One-fifth of the occupational graduates indicated that they were preparing for transfer to a four-year institution. Pursuing an occupational degree does not preclude a student from transferring. More than half of these occupational completers who indicated a desire to transfer were Health Professions and Related Sciences and Business Management and Administrative Services graduates. (See Table C-6.)

Degree Objective of Graduates by Degree Category. The self-reported degree objective provides an indication of the student's expected outcome from attending the community college, and one might anticipate that they would mirror student completion patterns. Nearly 80 percent of the students who earned baccalaureate/transfer degrees in fiscal year 2000 indicated that they enrolled with a desire to complete an associate degree. However, 16.5 percent indicated that they wanted to complete only one or several courses and were not pursuing a degree. A review of occupational graduates reveals the same pattern; 77.3 percent of the occupational students who earned an associate in applied science degree had listed completing an associate degree as their objective, but 17.2 percent of the students who had planned to only complete one or several courses or a certificate ended up surpassing their goal by earning an associate degree. (See Table C-7.)

SUMMARY

As indicated by the demographic data presented in this report, the Illinois Community College System serves a diverse student clientele through a variety of credit and noncredit programs and courses. For students enrolled in credit coursework, more than half are female (55.6 percent), more than one-third are of minority ethnicity, and two out of every five students are 31 years of age or older. Available information on students enrolled in noncredit courses show nearly identical gender representation (56.5 percent female), less minority participation with one-quarter minority noncredit enrollments, and the participation by a more mature population in noncredit courses with just over two-thirds of the students 31 years of age or above.

In the past year, based on fiscal year 2000 annual data, there were increases in both overall community college enrollments and completions. The accelerating number of students served through both credit and noncredit courses affirms that the Illinois Community College System continues to adapt to the evolving educational needs of the communities the colleges serve.

Illinois was among the leading states in the early development of community and junior colleges and has a newly developed statewide strategic plan to guide the system into the new millennium. 2001 marks the 100-year celebration of Joliet Junior College, which is the nation's oldest community college. Joliet Junior College began operating in 1901 as an experimental postgraduate high school program developed by J. Stanley Brown, Superintendent of Joliet Township High School, and William Rainey Harper, President of the University of Chicago. This significant milestone in the community college movement is being recognized at the state and national levels.

As the Illinois Community College System moves into the new millennium, the colleges and communities they serve have collaborated to develop a new systemwide strategic plan called the *Promise for Illinois*. To help Illinois compete successfully in the global marketplace, Illinois community colleges pledge to: address workforce development needs with flexible, responsive, and progressive programs; offer rigorous courses and programs designed for college and university transfer; expand adult education and literacy programs necessary for individuals and families to improve their lives; equip Illinoisans with technology skills needed for success; emphasize high quality in all programs, services, and operations; deliver affordable learning opportunities to the doorstep of Illinois residents; and model and promote leadership and ethical decision-making. With *The Promise for Illinois* as a guide, the Illinois Community College System will continue to move ahead and fulfill its mission to provide high-quality, accessible, cost-effective educational opportunities for individuals and communities across the state.

Illinois Community College Board

Table A-1
(Continued)
SUMMARY COMPARISON OF ANNUAL CREDIT HEADCOUNT ENROLLMENTS
BY COLLEGE, FISCAL YEARS 1996 - 2000
