Online Resources for K-12 Teachers: Language and Literacy Education. ERIC Digest.

THIS DIGEST WAS CREATED BY ERIC, THE EDUCATIONAL RESOURCES INFORMATION CENTER. FOR MORE INFORMATION ABOUT ERIC, CONTACT ACCESS ERIC 1-800-LET-ERIC

The use of online resources in education has grown rapidly since the late 1990s. A survey (Wujcik, 2000) investigating Internet use among 30,200 public schools in the United States during the school year 1999-2000 revealed that 94% of America's elementary and secondary schools have Internet access. In addition, more than 60% of

schools report that their teachers make use of the Internet for instructional purposes (Wujcik, 2000). In response to this educational trend, we have selected a list of online resources we believe most likely to help educators plan and design their curriculum. Preparation of this Digest began with a retrospective review of language arts-related questions received over the last five years by the Reference Staff of the ERIC Clearinghouse on Reading, English, and Communication. Six categories of frequently asked questions were then defined: (1) professional organizations, (2) national research and development centers and other federally funded projects, (3) listservs and online discussion groups, (4) online journals, (5) children's literature, and (6) lesson plans. Finally, using Guidelines for Evaluating Web sites (Abdullah, 1998), we selected the following web sites for each of these categories.

1. PROFESSIONAL ORGANIZATION

In this section, we highlight web sites that inform educators of issues and news in the field of language and literacy education, and that also provide a variety of resources teachers can use to advance their careers and skills.
