ABSTRACT

The North Carolina State Board of Education, as part of the Quality Assurance Program, initially established a computer proficiency requirement for diplomas issued to the Class of 2000. In October of 1995, the Board modified the requirement by making it effective beginning with the graduating Class of 2001. Students who were in grade eight for the 1996-97 school year and beyond are required to satisfy the computer proficiency requirement in order to receive a North Carolina high school diploma. The first opportunity to meet the computer skills proficiency requirement arises during eighth grade. Passing the computer skills standard is defined as passing both the multiple-choice and performance portions of the North Carolina Tests of Computer Skills. The purpose of this document is to report the performance on the computer skills tests of students in the Class of 2004 as eighth graders, the Class of 2003 as ninth graders, the Class of 2002 as tenth graders, and the Class of 2001 as eleventh graders. For the 1999-2000 school year, about 73% of students who took the tests met the requirement at the end of eighth grade. There were disparities in performance among subgroups. The Hispanic (46.8%), Black (55.7%), and American Indian (63.2%) subgroups had lower percentages passing the proficiency requirement than the Multi-Racial (73.4%), Asian (76.8%), and White (82.4%) subgroups. For 1999-2000, 78.3% of students who took the tests met the requirement by the end of grade nine. Hispanic (51.4%), Black (65.2%), and American Indian (68.4%) subgroups had lower percentages passing the proficiency requirement than the Asian (72.7%), Multi-Racial (74.8%), and White (86.5%) subgroups. For 1999-2000, 86.8% of students who took the tests met the requirement by the end of tenth grade. Percentages passing were 70.1% for Hispanics, 77.3% for Blacks, 80.6% for American Indians, 80.6% for Asians, 85.0% for Multi-Racial, and 91.8% for Whites. For the 1999-2000, 86.6% of students who took the tests met the requirement by the end of eleventh grade. Percentages passing were 73.3% for Hispanics, 77.8% for Blacks, 81.3% for Asians, 81.3% for Multi-Racial, 81.6% for American Indians, and 90.8% for Whites. Sample questions are included in the report to provide examples of items on the tests. A list of charter schools is appended. (AEF)

Acknowledgments

This report is the collaborative work of many individuals. The North Carolina Testing Program is conducted by the North Carolina Department of Public Instruction (NCDPI), Division of Accountability Services, Testing Section. Technical support services for the program are carried out in collaboration with the Center for Urban Affairs and Community Services at North Carolina State University under the Technical Outreach for Public Schools (TOPS) program.

Mildred Bazemore, Chief of the Testing Section, and Monica Geary, Educational Research and Evaluation Consultant, at NCDPI designed and wrote the report. Erin Lyjak, Kathleen Snyder, Betty Marsh, Anthony Wells, and Jeff LaBelle at TOPS assisted in report production.

Thanks are due especially to the Regional Accountability Coordinators, and the Test Coordinators and Accountability staff at the 117 public school systems and the many charter schools who went to unprecedented lengths to organize, audit, and confirm the data presented here. This report could not exist without the dedication of these professionals.

Executive Summary
1999-00 Report of Student Performance
North Carolina Tests of Computer Skills

Background

- The State Board of Education, as part of the Quality Assurance Program, initially established a computer proficiency requirement for diplomas issued to the Class of 2000. In October of 1995, the Board modified the requirement by making it effective beginning with the graduating Class of 2001. Students who were in grade eight for the 1996-97 school year and beyond are required to satisfy the computer proficiency requirement in order to receive a North Carolina high school diploma.
- The first opportunity to meet the computer skills proficiency requirement arises during eighth grade. Passing the computer skills standard is defined as passing both the multiple-choice and performance portions of the North Carolina Tests of Computer Skills.
- The Class of 2001 completed the eighth grade at the end of the 1996-97 school year, the Class of 2002 at the end of 1997-98, the Class of 2003 at the end of 1998-99, and the Class of 2004 at the end of 1999-00.

**Findings for
Eighth Grade**

(Class of 2004)

- For the 1999-00 school year, about 73 percent of students who took the tests met the requirement at the end of grade eight.
- There were disparities in performance among subgroups. The Hispanic (46.8%), Black (55.7%), and American Indian (63.2%) subgroups had lower percentages passing the proficiency requirement than the Multi-Racial (73.4%), Asian (76.8%), and White (82.4%) subgroups.

**Findings for
Ninth Grade**

(Class of 2003)

- For the 1999-00 school year, 78.3 percent of students who took the tests met the requirement by the end of grade nine.
- There were disparities in performance among subgroups. The Hispanic (51.4%), Black (65.2%), and American Indian (68.4%), subgroups had lower percentages passing the proficiency requirement than the Asian (72.7%), Multi-Racial (74.8%), and White (86.5%) subgroups.

**Findings for
Tenth Grade**

(Class of 2002)

- For the 1999-00 school year, 86.8 percent of students who took the tests met the requirement by the end of grade ten.
- There were disparities in performance among subgroups. The percentages passing were 70.1 percent for Hispanics, 77.3 percent for Blacks, 80.6 percent for American Indians, 80.6 percent for Asians, 85.0 percent for Multi-Racial, and 91.8 percent for Whites.

**Findings for
Eleventh Grade**

(Class of 2001)

- For the 1999-00 school year, 86.6 percent of students who took the tests met the requirement by the end of grade eleven.
- There were disparities in performance among subgroups. The percentages passing were 73.3 percent for Hispanics, 77.8 percent for Blacks, 81.3 percent for Asians, 81.3 percent for Multi-Racial, 81.6 percent for American Indians, and 90.8 percent for Whites.

Introduction

The State Board of Education, as part of the Quality Assurance Program, initially established a computer proficiency requirement for diplomas issued to the Class of 2000. In October of 1995, the Board modified the requirement by making it effective beginning with the graduating Class of 2001. Students who were in grade eight for the 1996-97 school year and beyond are required to satisfy the computer proficiency requirement in order to receive a North Carolina high school diploma. The requirement is based on the kindergarten through grade 8 competencies of the K-12 computer skills curriculum approved in July 1992 by the State Board of Education. These competencies are defined in the North Carolina *Standard Course of Study* (SCS). The goals of the requirement are to ensure that: (1) most students enter high school with sufficient computer skills and (2) no student exits North Carolina high schools without sufficient computer skills.

The North Carolina Tests of Computer Skills (multiple-choice and performance) must be administered by the end of grade eight with subsequent opportunities during high school, as needed, to allow students the opportunity to satisfy the requirement before completing their senior year in high school. The multiple-choice test assesses (1) word processing; (2) keyboarding; (3) database use; (4) spreadsheet use; (5) telecomputing skills; (6) societal issues; (7) ethics; (8) terms, operations, and care of computers; and (9) the use of computers in various curricular areas. The performance test consists of four parts: keyboarding techniques, word processing/editing, database use, and spreadsheet use.

Computers have become an integral part of today's world, both in the home and marketplace; therefore, computer proficiency is necessary for graduates of North Carolina's high schools.

Initially, in order to meet the requirement, students were required to achieve a scale score on the performance part of the test equal to or greater than 49 *and* a combined scale score equal to or greater than 46. Under the old standard when the pass/fail status was assigned, it was assigned for student performance for both parts of the test. The multiple-choice and performance parts of the test were not separate but considered together to determine in a compensatory model a student's pass/fail status.

At the recommendation of the Computer Skills Advisory Committee, after input from educators and others, the State Board of Education modified the standard for passing the computer skills requirement effective July 1, 1997. The modified standard requires that the test be separated into two tests: a multiple-choice test and a performance test. Either test may be passed independently of the other. To pass under the new standard, a student must achieve a performance test scale score of 49 or above *and* a multiple-choice test scale score of 47 or above.

When documented through the Individualized Education Program (IEP), some students with disabilities may fulfill the computer skills proficiency requirement through the use of the portfolio assessment accommodation.

The purpose of this document is to report the performance of students in the Class of 2001 as eleventh graders, the Class of 2002 as tenth graders, the Class of 2003 as ninth graders, and the Class of 2004 as eighth graders on the computer skills tests. Sample questions have been included in the report to provide examples of items on the tests.

Background

Definitions

- The first opportunity to meet the computer skills proficiency requirement is during the eighth grade. Passing the computer skills standard is defined as passing both the multiple-choice and performance tests.
- The Class of 2001 completed the eighth grade at the end of the 1996-97 school year. The Class of 2002 completed the eighth grade at the end of the 1997-98 school year. The Class of 2003 completed it at the end of 1998-99 and the Class of 2004 at the end of 1999-00.

The Standard

- Beginning with the fall of 1997 testing, a student must have a scale score of at least 47 on the multiple-choice test and a scale score of at least 49 on the performance test to meet the computer skills proficiency requirement.

Computer Skills Requirement Guidelines

- Students are retested only on the test(s) that they have not passed.
- Beginning with students in the eighth grade during the 1996-97 school year, in order to receive a North Carolina high school diploma, students must demonstrate computer skills proficiency.
- Beginning with the eighth grade, a student must be provided focused remedial instruction when the student fails to demonstrate proficiency by passing the multiple-choice and/or performance test(s).
- Each senior must have at least one additional opportunity during the last month of school prior to graduation to demonstrate computer skills proficiency.

Testing Accommodations

- Accommodations are available for students with disabilities with current IEPs or current Section 504 Plans and students with current limited English proficiency plans.
- Accommodations may be provided in accordance with recommendations noted in *Testing Modifications and Accommodations for Students with Disabilities* and *Guidelines for Testing Students with Limited English Proficiency* or to fulfill the needs of individual students.
- The need for accommodations must be documented (for example, in the student's current IEP, current Section 504 Plan, or limited English proficiency plan). Accommodations used are to be consistent with routine instructional use and must not invalidate test results.

**Computer Skills
Portfolio**

- The expectation is that all students will take the tests during the eighth grade. The portfolio assessment is available for those students with disabilities (only) who cannot take the test under standard administration conditions or with accommodations. Portfolio use must be documented on the Individualized Education Program (IEP) or Section 504 Plan.
- The purpose of portfolio assessment is not to provide an easier alternative to demonstrating competency, but to provide an appropriate alternative that meets the same high standards as the tests.
- There is no time limit for completion of the portfolio except that to demonstrate proficiency successful completion is required prior to graduation.
- The expectation is that work to be included in the portfolio will be completed within the school setting over a period of time. The student's teacher and principal must verify the authenticity of the student's portfolio work.

Scoring Portfolios

- The LEA is responsible for scoring all portfolios for that system.
- The LEA test coordinator, the exceptional children's administrator, and the computer coordinator provide direction for the scoring and approval process for completed portfolios. The LEA may involve other personnel as deemed appropriate.

**Exemptions from
Testing**

- Exemption from testing **does not** exempt students from the graduation requirement. Exemption from the computer proficiency requirement denies the opportunity for the student to meet one of the requirements for a North Carolina high school diploma.
- When a student is exempted, the parent and student are advised of the long-term consequences of exemption. LEAs are to reference the most recent publications of *Testing Modifications and Accommodations for Students with Disabilities* and *Guidelines for Testing Students with Limited English Proficiency* for proper procedures to follow for exemptions.

**Supported Software
Packages for
Performance Test**

- For the administration of the computer skills performance test, the NCDPI prepares diskettes to accommodate the range of integrated software packages commonly used in schools. For the 1999-00 school year, the following software packages were supported:
 - Works 2000
 - AppleWorks for Mac 5
 - AppleWorks for Windows 95
 - Claris Works for Mac 2, 3, 4, 5
 - Claris Works for Windows 3, 4, 5
 - MS Office Pro 4, 95, 97, 2000
 - MS Works for DOS 2, 3
 - MS Works for Windows 2, 3, 4, 2000
 - MS Works for Mac 2, 3, 4

- Effective with the 1999-00 school year, the NCDPI no longer supports the DOS version of PFS First Choice and AppleWorks 1.0, 2.0, 3.0, and 4.0 for the Apple IIE when providing test diskettes. LEAs using such platforms were to upgrade so that the upgraded platforms provide a higher level of standardization and are more in line with technology requirements for the 21st century.

Scoring the Tests

- For the 1999-00 school year, the North Carolina Test of Computer Skills multiple-choice was scored and aggregated locally. The performance tests were scored by a contractor, selected through a competitive bidding process, who provided the score reports to the LEAs.

Data Verification

- The LEAs provided the NCDPI with a pass/fail flag for each student enrolled by submitting an updated "masterbuild" file in the fall of 2000, or by allowing the original "masterbuild" file aggregated in the spring of 2000 to be used. *

Notes: *The "masterbuild" file includes exempted, absent, and foreign exchange pupils.

Differences in Data Analysis: 1996-97 to 1999-00

- The data collected for the computer skills tests in 1997 and 1998 used the same denominator, which included the number of pupils tested in both performance and multiple choice. In 1999 and 2000, the denominator included the number of pupils on the NCDPI "masterbuild" file, including exempted, absent, and foreign-exchange pupils (but excluding mid-year graduates). These differences should be noted when making comparisons from year to year. As the testing program and methods of reporting data are standardized, differences in data reporting will be eliminated.
- In 1997, Fall and Spring data were merged centrally and LEAs had the opportunity to correct the final file of pupils. In 1998, all test administrations from Fall 1997 to Spring 1998 were merged centrally, accounting for the North Carolina State Board of Education's change in the standard. Most school systems edited the merged file locally and returned a file of pupil data that had a pass/fail flag for performance and a pass/fail flag for multiple choice. In 1999, a blank form was sent to LEAs to collect summary data (not pupil data), with a column for the number of pupils on the "masterbuild" (including exempt and absent pupils) and a column for the number passing both performance and multiple choice. In 2000, the LEAs updated scores as needed in their data systems and submitted a "masterbuild" file that contained each pupil's pass/fail flag (data updated after February 1, 2001 are not incorporated in the 1999-2000 report). In every year, it was the responsibility of the LEA to submit accurate data, and the NCDPI reported data exactly as it was submitted.

Resources Provided by NCDPI

- Lesson plans and staff development activities have been provided by the NCDPI since the computer skills curriculum was revised in 1992. Some of the lesson plans are available on the DPI InfoWeb (www.ncpublicschools.org) and through the NCDPI Office of Publications.
- A released form of the computer skills test was provided to all LEAs. Copies have been provided at conferences and workshop presentations. A copy of sample test questions are also available on the DPI Infoweb.
- The NCDPI Division of Accountability Services/Testing Section provides all school systems and charter schools with ample copies of the *North Carolina Tests of Computer Skills Student Handbook* to be distributed to the appropriate students. The handbook includes information about the proficiency requirement, computer skills test taking strategies, and sample questions.

Findings

1999-00 Student Performance

- For the 1999-00 school year, 73.0 percent of eighth graders, 78.3 percent of ninth graders, 86.8 percent of tenth graders, and 86.6 percent of eleventh graders had passed the computer skills proficiency requirement.
- At the end of the 1999-00 school year, approximately 343,062 students were eligible for both the multiple-choice and performance tests. Of these, 276,009 students passed both parts, for an overall passing rate of 80.5 percent. This is an increase from the overall passing rate of 77.2 percent in 1998-99.
- The percent of eighth graders passing the proficiency requirement increased from 74.8 percent in 1996-97 to 77.5 percent in 1997-98, but then decreased from 74.9 percent in 1998-99 and to 73.0 percent in 1999-00.

Student Performance by Ethnicity

- There were disparities in performance among subgroups of eighth graders, ninth graders, tenth graders, and eleventh graders.
- By the end of the 1999-00 school year, a smaller percentage of eighth graders had passed the proficiency requirement in the Hispanic (46.8%), Black (55.7%), and American Indian (63.2%) subgroups than in the Multi-Racial (73.4%), Asian (76.8%), and White (82.4%) subgroups.
- The percent of eighth graders passing the proficiency requirement increased slightly for the Black subgroup from 1996-97 (55.0%) to 1999-00 (55.7%) and increased for the American Indian subgroup from 1996-97 (60.6%) to 1999-00 (63.2%) while it decreased for the Hispanic subgroup from 1996-97 (56.9%) to 1999-00 (46.8%).
- By the end of the 1999-00 school year, the percentages passing for ninth graders were 51.4 percent for Hispanics, 65.2 percent for Blacks, 68.4 percent for American Indians, 72.7 percent for Asians, 74.8 percent for Multi-Racial, and 86.5 percent for Whites.
- By the end of the 1999-00 school year, the percentages passing for tenth graders were 70.1 percent for Hispanics, 77.3 percent for Blacks, 85.0 percent for Multi-Racial, 80.6 percent for American Indians, 80.6 percent for Asians, and 91.8 percent for Whites.
- By the end of the 1999-00 school year, the percentages passing for eleventh graders were 73.3 percent for Hispanics, 77.8 percent for Blacks, 81.3 percent for Asians, 81.3 percent for Multi-Racial, 81.6 percent for American Indians, and 90.8 percent for Whites.

**Student
Performance by
Ethnicity,
continued**

- For the Class of 2001, the percent of students passing the proficiency requirement by ethnic subgroup from 1996-97 (cohort at grade 8) to 1999-00 (cohort at grade 11) increased significantly for the American Indian (60.6% to 81.6%), Black (55.0% to 77.8%), and Hispanic (56.9% to 73.3%) subgroups. The Multi-Racial (74.8% to 81.3%) and White (84.4% to 90.8%) subgroups showed an increase in the percentage passing and the Asian subgroup had a slight decrease (81.6% to 81.3%).

**Student
Performance by
Gender**

- Females have higher passing rates than males on the North Carolina Tests of Computer Skills. At the end of the 1999-00 school year, 77.0 percent of females and 69.2 percent of males had passed at the end of grade eight. At the end of grade eleven, 88.8 percent of females and 84.3 percent of males had passed.

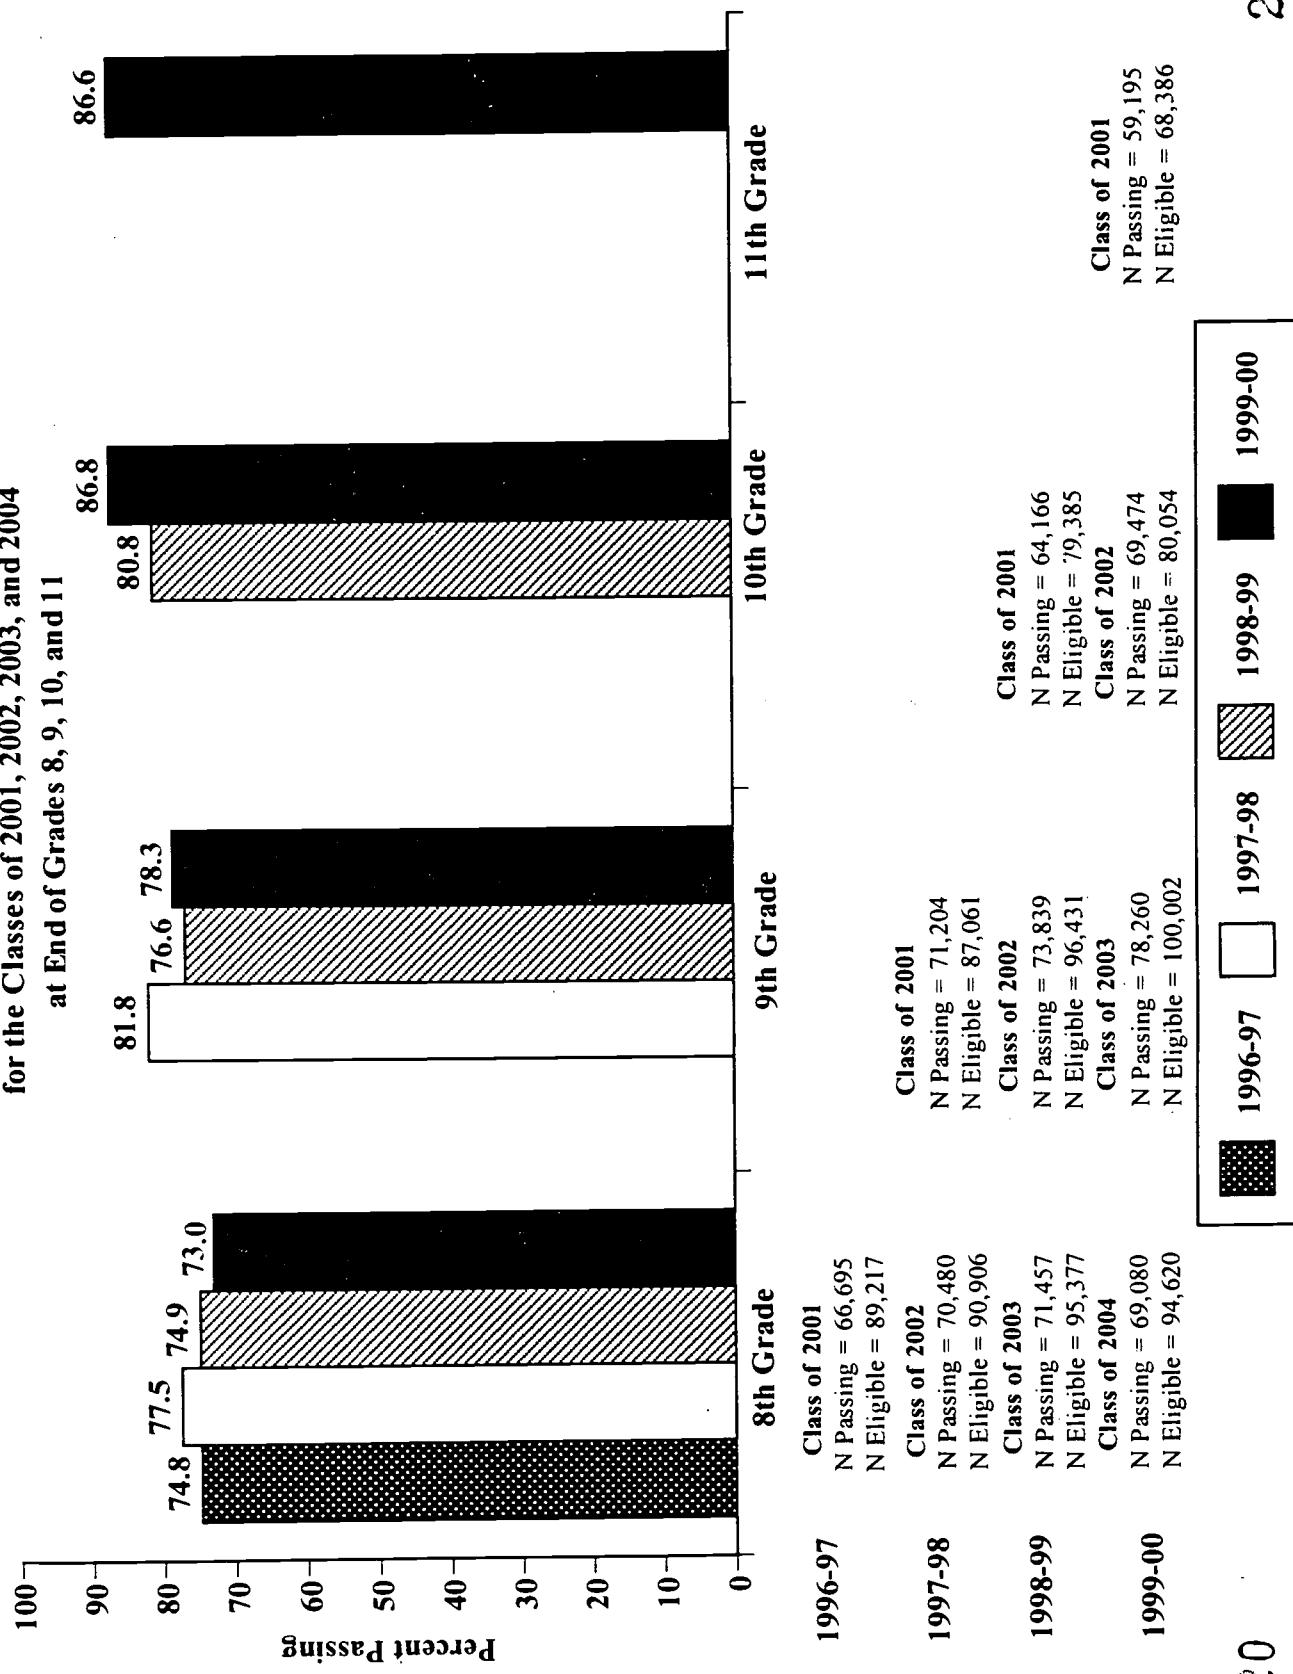

**Eighth Graders
Taking the
Performance
Test for the First
Time in 1999-00**

- In 1999-00 95,365 eighth graders took the computer skills performance test for the first time. About 80 percent of the students passed the performance portion of the requirement on their *first attempt*.
- Disparities were present among subgroups. The Black (63.3%), Hispanic (67.9%), and American Indian (68.8%) subgroups had lower percentages passing the performance test than the Multi-Racial (79.7%), Asian (87.9%), and White (88.4%) subgroups. More females (82.9%) passed than males (77.4%).
- In general, students whose parents had more education passed than students whose parents had less education; however, students whose parents had a four-year degree did slightly better than students whose parents had a graduate degree.
- Students whose school computers were located in a lab setting (77.6%) had lower passing rates than students whose school computers were located in class (80.8%) or in the media center/library (81.8%).
- The percent passing for students with access to computers outside of class (89.1%) was higher than for students with no access (59.8%).
- Students who often have opportunities to use computers to plan, to develop, or to present information, activities, and/or projects (89.4%) had a higher passing rate than students who have such opportunities sometimes (76.0%) or never (62.1%).
- Of the 10,365 students with disabilities who were administered the performance test, 60.0 percent passed.

**Eighth Graders
Taking the
Performance
Test for the First
Time in 1999-00,
continued**

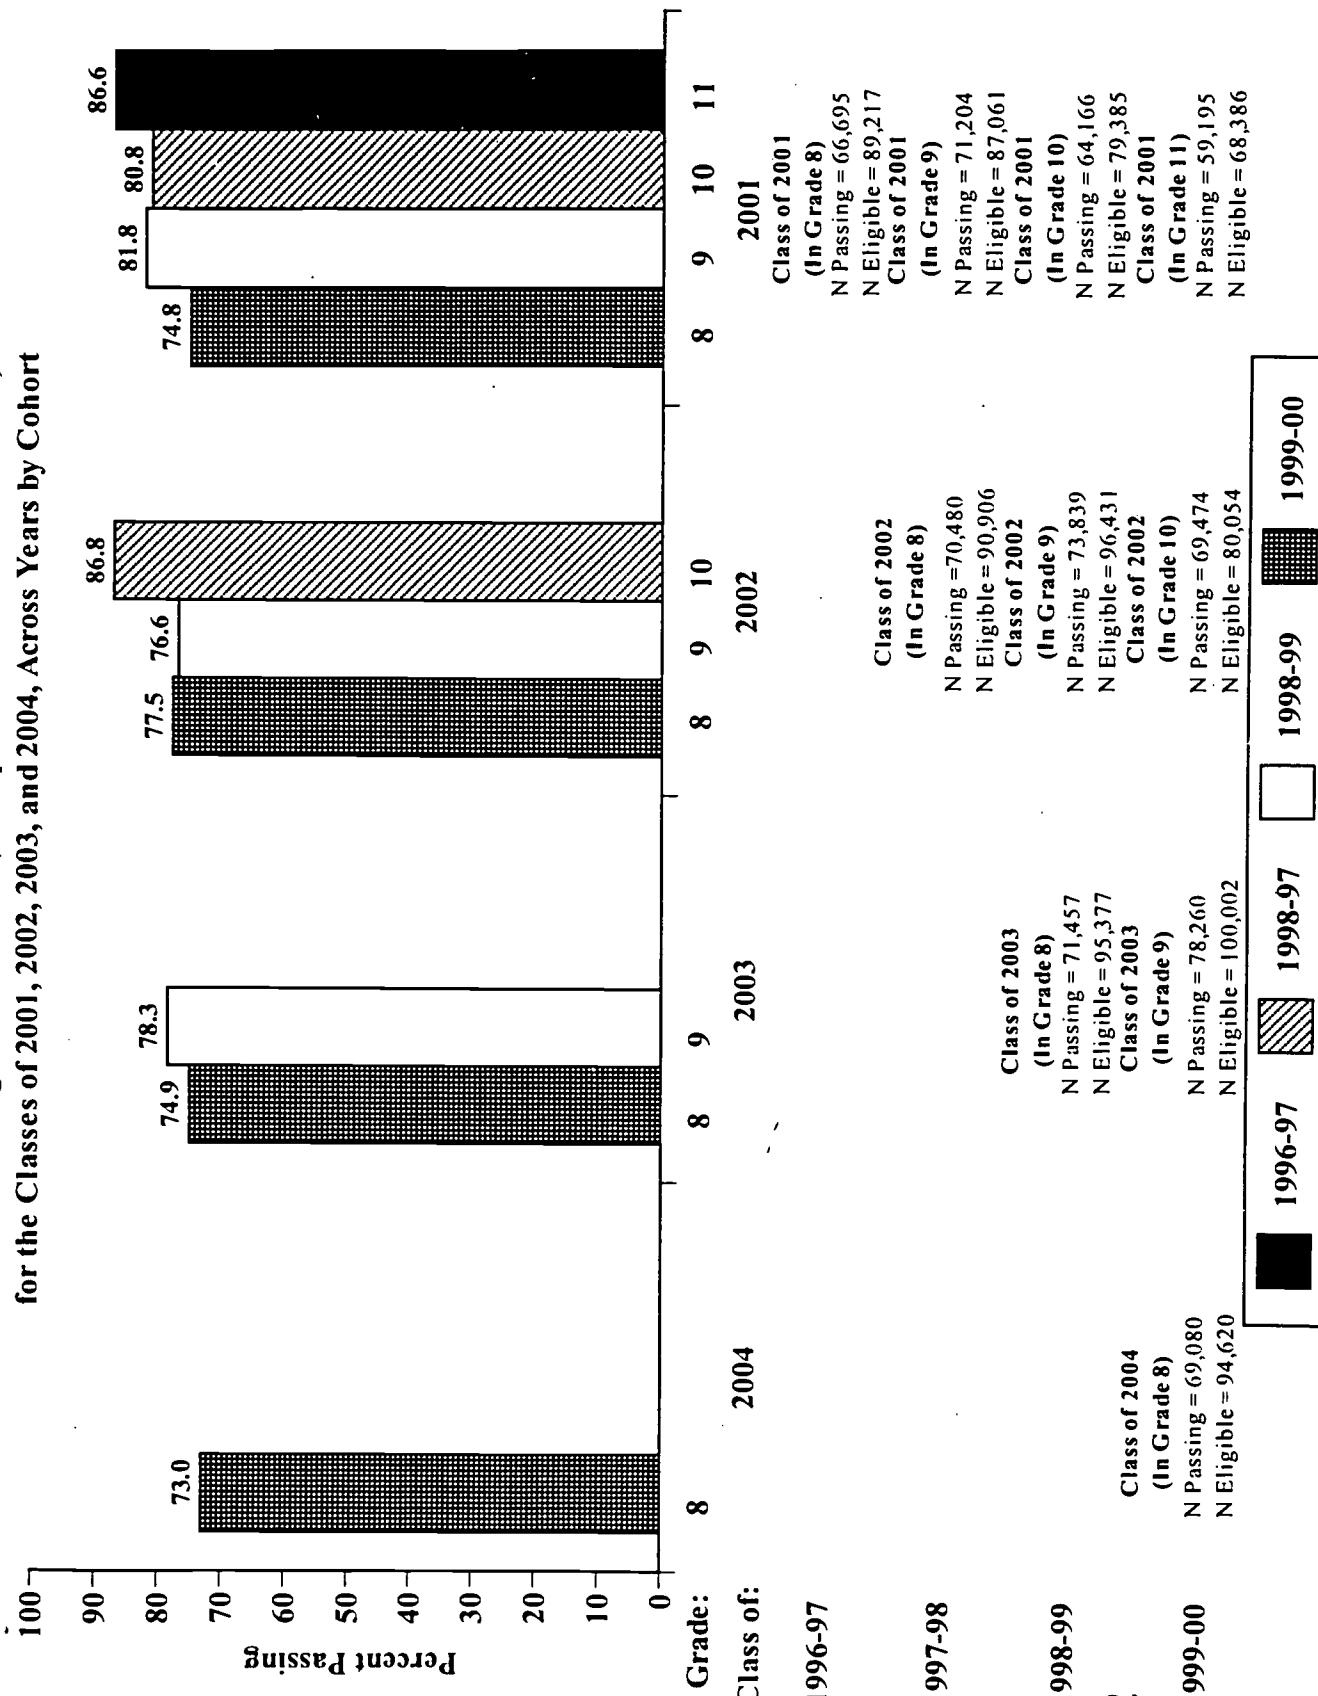

- Students who reported that they learned or used computer skills (spreadsheet, database, word processing/desktop publishing, telecommunications, multimedia) in subject areas (mathematics, science, social science, language arts, business education, other) had passing rates ranging from 76.7 percent to 89.4 percent. No students reported using word processing/desktop publishing in science or multimedia in language arts.

Notes: *These data represent the highest test score of each student for all the test administrations in which the student participated.

**Data cannot be verified in this format.

*Data not reported where number tested is fewer than five. The ethnic categories may not sum to total number tested and total number passing because ethnic category may not have been coded.

**Denotes a charter school. For reporting purposes the charter school name has been abbreviated. The complete name can be found in the Appendix.

Data received from ILEAs after Feb 1, 2001 are not included in this table.

Notes:

* These data represent the highest test score of each student for all the test administrations in which the student participated.

** Data cannot be verified in this format.

• Data not reported where number tested is fewer than five. The ethnic categories may not sum to total number tested and total number passing because ethnic category may not have been coded.

** Denotes a charter school. For reporting purposes the charter school name has been abbreviated. The complete name can be found in the Appendix.

Data received from LEAs after Feb 1, 2001 are not included in this table.

Notes: * These data represent the highest test score of each student for all the test administrations in which the student participated.

† Data cannot be verified in this format.

• Data not reported where number tested is fewer than five. The ethnic categories may not sum to total number tested and total number passing because ethnic category may not have been coded.

• Denotes a charter school. For reporting purposes the charter school name has been abbreviated. The complete name can be found in the Appendix.

Data received from LEAs after Feb 1, 2001 are not included in this table.

| | Multiple Test Sessions | 971 | 552 | 56.8 |
| | Scheduled Extended Time | 8,672 | 5,371 | 61.9 |
| | Testing in a Separate Room | 0 | 0 | 0.0 |
| | English/Native Language Dictionary/Electronic Translator | 167 | 104 | 62.3 |
| | Approved AR-99** | 2 | * | * |

Notes: *No scores are reported for groups with fewer than thirty students.

**The AR-99 code represents the number of students with disabilities who received NCDPI approval to use special accommodations.

Accommodations are available for students with disabilities, limited English proficiency, or temporary disabilities.

All data are rounded to the nearest tenth, therefore accommodation categories may not sum to 100%.

Sample Questions
for the
North Carolina of
Computer Skills

Sample Test Questions*

Multiple-Choice Test

This test consists of 70 questions that ask you about the use of computers in society, hardware and software components, keyboarding, and how to use specific software applications—word processing, database, spreadsheet, and telecomputing.

Directions: To answer a question, first decide which is the *best* answer choice for a particular question. Then, find the question number on your answer grid (below) and make a mark in the circle containing the letter of the correct answer. Remember to mark only one answer for each question.

| | | | | |
|---|-------------------------|-------------------------|-------------------------|-------------------------|
| 1 | <input type="radio"/> A | <input type="radio"/> B | <input type="radio"/> C | <input type="radio"/> D |
| 2 | <input type="radio"/> A | <input type="radio"/> B | <input type="radio"/> C | <input type="radio"/> D |
| 3 | <input type="radio"/> A | <input type="radio"/> B | <input type="radio"/> C | <input type="radio"/> D |
| 4 | <input type="radio"/> A | <input type="radio"/> B | <input type="radio"/> C | <input type="radio"/> D |
| 5 | <input type="radio"/> A | <input type="radio"/> B | <input type="radio"/> C | <input type="radio"/> D |
| 6 | <input type="radio"/> A | <input type="radio"/> B | <input type="radio"/> C | <input type="radio"/> D |
| 7 | <input type="radio"/> A | <input type="radio"/> B | <input type="radio"/> C | <input type="radio"/> D |
| 8 | <input type="radio"/> A | <input type="radio"/> B | <input type="radio"/> C | <input type="radio"/> D |

Performance Test

This test consists of four parts—Keyboarding Techniques, Word Processing/Editing, Database Use, and Spreadsheet Use—that assess how well you can use software to perform specific functions. (The sample performance questions in this handbook, as well as the electronic files, are located on the Internet at www.ncpublicschools.org/accountability/testing/index.html.**) These will provide you with a chance to practice the questions using actual keyboarding, word processing/editing, database, and spreadsheet files. If you need help, talk to your teacher.)

Directions: Read the directions at the beginning of each part. Then complete the task or questions. Either you or the teacher giving the test must print out your work for Keyboarding Techniques and Word Processing/Editing. For the Database Use and Spreadsheet Use parts you should mark your answers in the space provided next to each question.

* This section is an excerpt from the *North Carolina Tests of Computer Skills Student Handbook* (September 2000).

**The electronic files for state computer skills performance tests on the Internet are available in the software packages (PC and Macintosh platforms) that are supported by the North Carolina Department of Public Instruction.

Multiple-Choice Test

1. Doing research by using an online database instead of a printed set of similar information offers which advantage?
 - A more current information
 - B better charts
 - C easier to understand tables
 - D more legible diagrams
2. Upon walking into Mr. Johnson's workroom, Daryl saw a test that would be given the next day on the computer screen. Which of the following can Daryl ethically do?
 - A Correct obvious errors on the test to help Mr. Johnson avoid embarrassment.
 - B Read the questions as a study guide.
 - C Add a few well-chosen questions that Mr. Johnson left out.
 - D Leave the room without reading the test questions.
3. What is the function of a disk drive?
 - A to print sheets of paper
 - B to read from or write information to a floppy disk
 - C to display information or pictures on a screen
 - D to calculate numbers
4. For a social studies report, Fred needs to illustrate the products of North Carolina with pictures and comparison graphs. He would *most likely* use which software programs?
 - A spreadsheet and statistical
 - B spreadsheet and database
 - C graphing and clip art
 - D clip art and drawing
5. For correct keyboarding, what is the recommended placement of fingers on the home row keys?
 - A fingers of the left hand on A-S-D-F and fingers on the right hand on J-K-L-;
 - B fingers of the right hand on A-S-D-F and fingers on the left hand on J-K-L-;
 - C fingers of the left hand on A-S-E-F and fingers on the right hand on J-K-O-P
 - D fingers of the left hand on Q-W-E-R and fingers on the right hand on U-I-O-P

6. Jim is typing a song on his word processor. The song has four verses, and the chorus is repeated after each verse. What would be the ***most efficient*** way to enter the song, making sure the chorus is repeated after each verse?
- A Type the chorus four times.
- B Copy the chorus on a copy machine and then cut and paste it into the document.
- C Use the Copy and Paste Commands on the word processor.
- D Highlight the text and change it to **Bold**.
7. Which is ***not*** an advantage of using computerized spreadsheets?
- A speed of calculation
- B flexibility of moving entries
- C cost of initial set-up
- D ability to generate tables
8. Using an electronic bulletin board, Andy can do all of the following ***except*** which one?
- A send private messages to a friend
- B send a public message to friends interested in one topic
- C send pictures to a friend
- D send a package to a friend

Performance Test

Part I: Keyboarding Techniques

Directions:

1. Key, as accurately as possible, the title and paragraphs below. Remember to use correct keyboarding techniques. Note: Do not worry about any differences in word wrap between what you type and how the paragraphs appear on this page.

2. When you have finished keying the title and paragraphs, print your work.

OUR WEEKLY ASSEMBLY MEETING

Every Wednesday morning the students at Smith Middle School meet in the auditorium for assembly. The program may include

speakers,
musicians,
plays,
or movies.

Most of the students like assembly because we never know what to expect.

Sometimes at the end of the program, the principal tells us about special upcoming events. Every spring my math club makes a presentation. Last spring I explained how a computer does math.

Performance Test

Part II: Word Processing/Editing

Directions:

1. Edit the title and paragraph below. You may use the "Edit Symbol Reference Table" provided below if you need assistance.
2. When you have finished editing the title and paragraph, print your work.

Edit Symbol Reference Table

| | | | |
|-----------|---------------|-----|-----------|
| <u>≡</u> | capitalize | [] | center |
| <u>lc</u> | lower case | [] | indent |
| <u>de</u> | delete | ^ | insert |
| <u>—</u> | replace word | → | move |
| <u>#</u> | insert space | sp | spell out |
| <u>¶</u> | new paragraph | | |

] NORTH CAROLINA AND WORLD WAR II [

Last summer I read a book on the contributions of ^{North} Carolina to World War II. out of a total population of some 3,600,000 people in the state, about 355,000 men and 7,000 women joined the military forces. They participated in all the major battles in Europe and Asia.

Performance Test

Part III: Database Use

Directions: Use your database program and the file called MAGAZDB.

1. Read the *scenario*.
2. Use the database file to respond to the questions below.
3. When asked to "describe the steps you took to find your answer," use appropriate database terms. For example, "Sorted Ad Cost per pg in descending order" or "Searched the Ad Cost per pg for all records greater than 1,000."

Scenario:

Your school is selling magazines to raise money for class trips. Using the database MAGAZDB, your job is to answer questions asked by your classmates who are selling the magazines and other classmates who are handling records of sales.

Sample Record from MAGAZDB Database.*

| | |
|------------------|-----------------------------------|
| TITLE: | American Health |
| CITY PUBLISHED: | New York |
| STATE PUBLISHED: | New York |
| PUBLISHED BY: | Reader's Digest Association, Inc. |
| TYPE OF MAG: | Health |
| #PUB PER YEAR: | 10 |
| AD COST PER PG: | \$34,500 |
| AD COST BCK COV: | \$44.800 |
| COST PER COPY: | \$1.95 |

1. What is the name of the magazine that has the largest circulation?
2. What is the name of the magazine published 6 times per year (# PUB PER YEAR) that has an advertisement cost per page (AD COST PER PG) of \$4,045?

Explanation: Use database terms to describe the steps you took to find your answer.

*NOTE: This example does not contain all fields of the database. It is not representative of a complete record.

Performance Test

Part IV: Spreadsheet Use

Directions: Use your spreadsheet program and the file called SSDRYCL.

1. Read the *scenario*.
2. Use the spreadsheet file to respond to the questions below.

Scenario:

The owners of a new dry cleaning business have pledged to donate 1% of their profit to purchase books for the library at your school. Your Computer Skills class has created the spreadsheet SSDRYCL to help the owners keep accurate records. On assignment at the dry cleaner's, you test the spreadsheet in the following situations.

NOTE: The spreadsheet automatically calculates 6% tax.

Excerpt from SSDRYCL Spreadsheet

| Amount of money available to spend: | | \$0.00 | | |
|-------------------------------------|--------------------|------------------|------------------------------|---|
| | Number of Items | Cost Per Item | Cost of Specific Items | Cost of Specific Item Plus Tax |
| | | | Items | Tax |
| Shirts: | 0 | \$1.55 | \$0.00 | \$0.00 |
| Blouses: | 0 | \$1.60 | \$0.00 | \$0.00 |
| Men's Suits: | 0 | \$5.50 | \$0.00 | \$0.00 |
| Women's Suits: | 0 | \$5.25 | \$0.00 | \$0.00 |
| Sweaters: | 0 | \$2.75 | \$0.00 | \$0.00 |
| Overcoats: | 0 | \$8.25 | \$0.00 | \$0.00 |
| Total Cost of Dry Cleaning: | | | \$0.00 | |
| Amount of money Remaining: | | | \$0.00 | |

-
1. Franco has \$25.00 to pay for cleaning two sweaters and two overcoats. How much change should he get back?
 2. Colleen paid \$8.48 for having a number of blouses cleaned. How many blouses did she have cleaned in all?

Answers to Sample Questions and Notes

Multiple-Choice Test

1. The correct answer is A. This question measures how well you understand how computers are used as a tool for accessing information.
2. The correct answer is D. This question measures how well you understand the ethical use of computers and respect the computer-generated work of others.
3. The correct answer is B. This question measures your understanding of the components of a computer—hardware and software. You may also be asked about other physical components of a computer, their function, and use.
4. The correct answer is C. This question measures your knowledge of the use of software in various subjects to solve problems. You may also be asked about other types of software, e.g., probeware used in science, database programs used in social studies.
5. The correct answer is A. This question measures your knowledge of correct keyboarding skills and finger placement on the home row keys.
6. The correct answer is C. This question measures your ability to use the Copy and Paste functions while word processing. You may also be asked about other functions (e.g., Move, Print) and utilities (e.g., spell checker, grammar checker), and about producing desktop published documents.
7. The correct answer is C. This question measures your understanding of the advantages (or disadvantages) of using a computerized spreadsheet versus a printed spreadsheet. You may also be asked to use a spreadsheet to test simple "What if" statements.
8. The correct answer is D. This question measures your understanding of how an electronic bulletin board works.

Performance Test

Part I: Keyboarding Techniques. This task is scored for typing accuracy, spacing, and length.

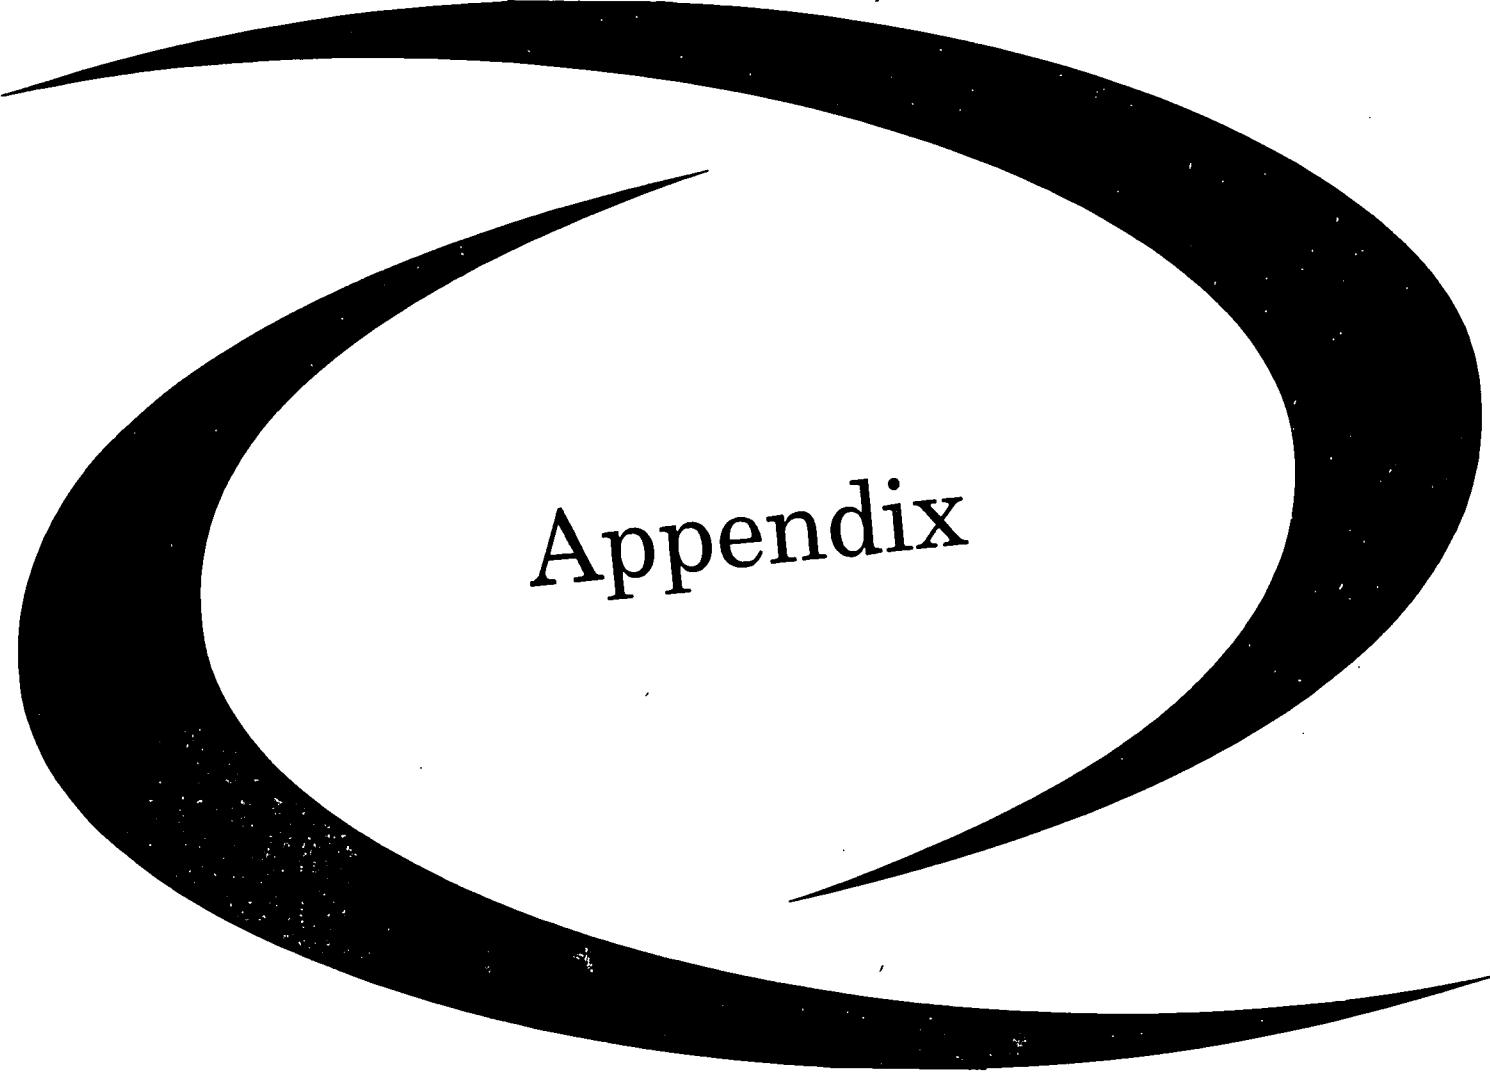

Part II: Word Processing/Editing. This task is scored for the number of correct edits and if other errors are made while editing.

Part III: Database Use.

1. The correct answer is "Reader's Digest." This question measures your ability to sort a database.
2. The correct answer is "American Scientist." Your answer is also scored for how well you explain how you determined your answer to the question ("I searched the field # PUB PER YEAR=6 and searched the field AD COST PER YEAR=\$4,045). This question measures your ability to search a database using more than one criterion to solve a problem.

Part IV: Spreadsheet Use.

1. The correct answer is \$1.68. This question measures your ability to use a spreadsheet to test simple "What if" statements.
2. The correct answer is 5. This question also measures your ability to use a spreadsheet to test simple "What if" statements.
