ABSTRACT

This intermediate level teaching guide, answer key, and English-as-a-Second-Language (ESL) textbook package provides nine career and personal profiles of immigrants to the United States from a variety of countries presently working in the field of environmental protection and regulation. A glossary translates numerous more specialized, environment-related vocabulary into six languages other than English, including Russian, Hmong, Serbocroatian, Somali, Vietnamese, and Spanish. (KFT)

Newcomers and the Environment: Teaching Guide — **Answer Key [and] ESL Textbook. Intermediate Level.**

Newcomers and the Environment

Teaching guide - Answer Key
Intermediate Level

By Charles and Pamela Lakue

Introduction to "Newcomers and the Environment"

This book was written with two purposes in mind: to teach ESL and to teach environmental education. Immigrants who work in the field of environmental education and protection have been profiled. We answer a number of questions about each person. Why did they come to the United States? How did they chose their profession? What information do they want to pass on to other newcomers? These immigrants have come to America and successfully made a new life for themselves, as our students hope to do. They serve as an inspiration, both personally and professionally, to all who use this textbook.

To make the book more understandable there is a glossary of special vocabulary words. The vocabulary words are underlined, and appear throughout the book. When you see an underlined word, go to the glossary to find out what the word means in English, or to see a translation of that word in any of these six languages: Bosnian, Hmong, Russian, Somali, Spanish and Vietnamese. In some of the exercises the vocabulary words are not underlined. The glossary begins on page 61.

Who should use this textbook

There are two versions of this text book: Intermediate and Advanced. The Intermediate textbook is written for ESL students scoring between 200 and 210 on the CASAS, and reading at the 2nd or 3rd grade level.

How to use this textbook

Each chapter begins with a story. Read the story with your students. Read each sentence to them and have them repeat word for word. Stop at the end of each paragraph and quiz them about vocabulary and content. We recommend whenever possible to have the students work cooperatively. Later, there are some examples of ways to have students learn cooperatively when they do the exercises in this book. Most of the answer in the Answer Key are written as complete sentences from the book. You can decide if you want your students to give short answers or answer in complete sentences.

The people profiled in this book are happy to answer any questions that you or your students might have about their profession. Information on how to contact them is provided at the end of each story, along with suggestions on where to get additional information on the subject discussed in that chapter.

Exercise 1 - Reading Comprehension

Exercise 1 in each chapter is a reading comprehension exercise. The students find the correct information in the story, and write their answers to the questions. The instructor can decide if he/she wants the students to write their answers as complete sentences.

Exercise 2 - Text Editing

Exercise 2 in each chapter consists of sentences from the text, however, some words are incorrect. These words are already crossed out. The students need to find the correct word from the text and write it above the crossed out word. When the students are done, the answers can be checked cooperatively with another student. In a classroom setting each student can put one answer on the board, and the class can approve the corrections as a group.

Exercises 3 and 4

Exercises 3 and 4 vary from chapter to chapter. They may be reading comprehension, fill in the blank, matching or discussion exercises. "Fill in the blank" and matching exercises review vocabulary. The discussion exercises ask the students to talk with each other and compare and contrast how things are done in their country, with how things are done here. After the discussion, the class as a whole can review their answers and each student can explain what they learned while talking to their partner.

Cooperative learning activities for your students:

Have students work in pairs whenever possible. If the pairs of students speak different languages it is easier to get them to speak English to each other. Because of this, you may want to chose the pairs that will be working together. This way, students won't automatically pair up with someone with whom they can speak their own language. If you are king one-to-one with a student, consider yourself the student's partner as you go through the exercises.

Have each pair work together to write the correct answers in one of their books. Then have one student dictate the correct answers while the other student writes the answers in his/her workbook. You may find it difficult to get your students to work cooperatively when they both have copies of the text. In that case, when they've completed an exercise, have students close their books. Give a pair of students one copy of the questions and see if they can ask and answer the questions orally with their partner.

Chapter 1

Exercise 1 (page 3)

- 1. Where is Kou from? Laos
- 2. When did the US soldiers leave Laos? 1975
- 3. Why did Kou leave Laos? It was no longer safe.
- 4. When did he get an environmental job? 1996
- 5. What does Kou teach people to do? He teaches them how to compost their garbage.
- 6. What does he do with the soil from his compost pile? He puts this soil on his garden to help his plants grow.
- 7. How many bags of garbage did his family throw away each week, before they started to recycle? 3
- 8. How many bags do they throw away now? 1

Exercise 2 (page 4)

- 1. Kou was serving in the American (Laotian) Army when he was 14 (16) years old.
- 2. Kou and his wife moved to Minnesota (Wisconsin) in 1970 (1980).
- 3. Kou lived in Canada (the US) for many years before he became interested in temperamental (environmental) education.
- 4. The Refusing (Recycling) Program in Eau Claire hired Kou in 1976 (1996).
- 5. The DNR trained Kou to help the Northwest (Southeast) African (Asian) community.
- 6. Kou wants all people to confuse (compost) their tooth paste (yard waste).
- 7. He gets good fertile soap (soil) from the confused (composted) food and yard waste.
- 8. Now his family has only one pack (bag) of luggage (garbage) to throw away each week.

Exercise 3 (page 5) Discuss what happens to garbage using the photos in the book.

- 1. What happens to garbage after we throw it away? It goes to the landfill or waste-to-energy facility (garbage burner).
- 2. Why are reducing and reusing good ideas? It helps keep our landfills from filling up too fast. It helps keep the air cleaner and helps keep the water cleaner. It saves energy.

Exercise 4 (page 6)

Answers will vary.

Chapter 2

Exercise 1 (page 9)

- 1. When she was growing up, what did Stefanie learn? She learned to be happy with what she had.
- 2. What kind of work did she want to do? She wanted to find work where she could help protect the environment.
- 3. What does she like teaching? She likes teaching people how to reduce waste, and how to recycle.
- 4. What calls did she answer at the recycling hotline? At the hotline she answered calls about curbside recycling.
- 5. What is her job now? She is now the Assistant Public Outreach Coordinator, working for the San Francisco Recycling Program.
- 6. Why does she have information translated into Chinese and Spanish? In California, those are the two most common languages spoken in the home, after English.
- 7. Why does she talk to people from different cultures? to find out what they think about protecting the environment
- 8. What is important in the Latino community? Family is very important.

Exercise 2 (page 10)

- 1. She grew up close to factories (nature) and had many toys (pets).
- 2. In her family they didn't keep (throw away) things that they could sell (use) again.
- 3. Stefanie moved to Colorado (California) from Georgia (Germany) in the summer of 1997.
- 4. She wanted to find waste (work) where she could help propose (protect) the environment.
- 5. Everybody sells (buys) things and throws away garbage, no matter what their incline (income) or corporal (cultural) und is.

- 6. At the hothouse (hotline), she answered calls about bedside (curbside) recycling.
- 7. She has some invitations (information) translated into Finnish (Spanish) and Vietnamese (Chinese).
- 8. She hopes that more New Zealanders (newcomers) will look for jobs that help the element (environment).

Exercise 3 (page 12) There can be more than one correct answer.

- 1. glass bottles and jars -- rinse out food
- 2. corrugated cardboard -- flatten or tear down
- 3. newspapers & inserts, boxboard, mixed paper and junk mail, magazines, catalogs and phone books -- put in a paper grocery bag
- 4. cans, glass bottle and jars -- take off labels
- 5. plastic bottles, glass bottles and jars -- take off caps and lids
- 6. glass bottles and jars -- sort by color
- 7. corrugated cardboard -- no pizza boxes
- 8. cereal and other food boxes -- remove any bags from inside
- 9. newspaper -- must be clean and dry
- 10. plastic bottles, glass bottles -- rinse them clean

Chapter 3

Exercise 1 (page 15)

- 1. Where is Girma from? Ethiopia
- 2. When did he come to the US? 1984
- 3. What did he study in Minnesota? He studied environmental engineering (water and wastewater treatment).
- 4. Where did he get a summer job? He got a summer job at the Metropolitan Wastewater Treatment Plant.
- 5. What does he manage now? His job is to manage the treatment of all of the wastewater that runs in the sewer system.
- 6. What would he like <u>immigrants</u> to know? He would like immigrants to know what they can, and what they can not throw in the sewer or storm drains.
- 7. What happens to chemicals that go into storm drains? The water with the chemicals goes into our lakes and rivers.
- 8. What does the <u>wastewater treatment</u> plant do with the dirty water? The treatment plant removes the waste and puts the clean water into the river.

Exercise 2 (page 16)

- 1. Girma left Egypt (Ethiopia) to study engineering in the European (Soviet) Union.
- 2. Because of his political accidents (activities) he could not go back to his job (country).
- 3. At the University of Wisconsin (Minnesota) he studied continental (environmental) engineering.
- 4. He got a winter (summer) job at the Metropolitan Clearwater (Wastewater) Treatment Plant.
- 5. His job is to matter (manage) the treatment of all of the wastewater that runs in the shower (sewer) system.
- 6. "We would like immigrants to know what they can, and what they can not spend (throw) in the shop (sewer) or shopping mall (storm drains)."
- 7. Anything that you pour into a storm drain pollutes our yards and garden (lakes and rivers), where you want to plant (fish).
- 8. Some vegetables (chemicals) are difficult for the treatment plant to repeat (remove).

Exercise 3 (page 18)

- 1. Where should you wash your car? You should wash your car on the lawn.
- 2. Why should you wash it there? That will stop the soap, dirt, rust and water from running into the storm drain.
- 3. What should you do if you see some automotive fluid on the street or driveway? Soak up the fluid with a rag and throw the rag into the garbage.
- 4. If you don't do that, what will happen? It will flow into the storm drain and cause pollution in our lakes and river.
- 5. How will keeping your car well tuned save you money? You will use as much as 20% less gasoline.
- 6. How will keeping your car well tuned cause less air pollution? Because your car will run cleaner.
- 7. What should you check often? Check your tire pressure often.
- 8. How will keeping the correct amount of air in your tires save you money? You will use less gasoline.

Chapter 4

Exercise 1 (page 21)

- 1. Where did Laura grow up? Hong Kong
- Thy did she come to the US? She came to the United States to go to college.

- 3. What did she own in Iowa? She owned an interior design firm.
- 4. What problem did people have when new materials were put in buildings? These people were feeling sick.
- 5. What kind of health problems did new Sudanese families have? The Sudanese families had respiratory illnesses.
- 6. What was causing the problem? Mold and mildew can cause respiratory illnesses.
- 7. What did people take home to kill mold and mildew? Many families took home free chlorine bleach.
- 8. Why did they try to keep their homes warm and humid? "They tried to make their homes as warm and humid as in Africa."

Exercise 2 (page 22)

- 1. Laura grew up in Taiwan (Hong Kong), and came to the United States to go to work (college).
- 2. She settled in Ohio (Iowa), where she owned an exterior sign (interior design) company.
- 3. Many people connected (complained) after the new materials were put in, that they were feeling happy (sick).
- 4. She went to work in the outdoor (indoor) air quantity (quality) office.
- 5. Public school (health) nurses noticed the Sudanese children had category (respiratory) illnesses.
- 6. Cold (Mold) and mildew were the reasons these children got angry (sick).
- 7. It is important to wash cold (mold) and nephew (mildew) with chlorine bleach, to kill it.
- 8. They tried to make their homes as cool (warm) and humid as in Asia (Africa).

Exercise 3 (page 23)

- 1. What do exhaust fans help remove? the moisture in your home
- 2. What are black spots on bathroom walls? Those spots are mold and mildew.
- 3. What can you mix with water to kill mold and mildew? chlorine bleach and TSP
- 4. What else can you do to keep your family healthy? Clean often, vacuum and use exhaust fans.

Exercise 4 (page 24)

- 1. Where can you find these safe cleaning products? You can find all of them in your local supermarket.
- 2. Why are they safer for you and your family? They won't pollute the air in your home.
- 3. Are they cheaper or more expensive then other cleaning products? They usually cost less than other cleaning products.
- 4. What can you use to get your clothes whiter? Add Borax to detergent when washing clothes.
- 5. What can you use to wash windows? Use a spray bottle with water and one tablespoon white vinegar.

Chapter 5

Exercise 1 (page 27)

- 1. When did Niccu move back to Minnesota? 1986
- 2. What did she decide to study? public health, and family health education
- 3. Where did she want to work? She wanted to work in a poor country.
- 4. Why did she stay in Minnesota? She stayed in Minnesota, to work with people coming here from other countries.
- 5. Who did she ask for help? She asked for help from 40 different ethnic leaders.
- 6. What is one of the biggest causes of cancer? Smoking tobacco is one of the biggest causes of cancer.
- 7. Who does she worry about? Niccu especially worries about teenagers who are living in two worlds.
- 8. What do they do that's not healthy? smoking

Exercise 2 (page 28)

- 1. Niccu moved back to Ohio (Minnesota) in 1976 (1986).
- 2. She was interested in wealth (health) education and went back to work (school).
- 3. She planned to work in a rich (poor) country and teach people about truth (health).
- 4. She stayed in Montana (Minnesota), to work with people coming here from other states (countries).
- Watching (Writing) a movie (brochure) on breast cancer was their first project.
- 6. One group wanted vacation (information) on tobacco and drinking (smoking).
- 7. She worries about tea drinkers (teenagers) who are moving (living) in two worlds.
- 8. Sometimes they do things that aren't happy (healthy), like driving (smoking).

Exercise 3 (page 29)

- 1. <u>Secondhand smoke</u> is the smoke C. that comes from a cigarette, pipe, or cigar.
- 2. The <u>lungs</u> of young children E. are hurt by <u>secondhand smoke</u>.
- 3. More than 40 of these chemicals D. can cause cancer.
- 4. Secondhand smoke is a B. serious health risk to children.

breathe secondhand smoke A. it is called passive smoking.

Chapter 6

Exercise 1 (page 33)

- 1. What was Nigatu teaching in Ethiopia? He was teaching agriculture to adults.
- 2. Where did he study the science of farming? South Dakota State University
- 3. What does he teach new <u>immigrants</u> to do? He teaches new immigrants how to grow better crops, and to be more successful farmers.
- 4. What kind of people is the program looking for? people who want to farm for a business
- 5. How big is the average farm in this program? The average size of the farm is between 1 and 3 acres.
- 6. Why does the farm have to be small? So the farmer and his family will be able to take care of it.
- 7. How long can people stay in the New Immigrant Farm Program? for up to three years
- 8. What is important for farmers to learn about farm chemicals? They can be dangerous to people and bad for the environment.

Exercise 2 (page 34)

- 1. Nigatu was both (born) and raised in Ecuador (Ethiopia).
- 2. He graduated from South Minnesota (Dakota) State Anniversary (University).
- 3. The New Immigrant Farm Program is looking for children (adults) who want to farm as a sport (business).
- 4. The average size of the yard (farm) is between 1 and 3 miles (acres).
- 5. The farm size has to be big (small) enough so that the farmer and his friends (family) will be able to take care of it.
- 6. During the rainy (growing) season farmers are very bored (busy).
- 7. Participles (Participants) are able to stay in the New Immigrant Farm Program for up to three months (years).
- 8. Farm chemicals can be good (bad) for the employment (environment).

Exercise 3 (page 36)

- 1. If you are going to use a household chemical, read the label first to see if it is hazardous.
- 2. Be very careful when using all <u>hazardous</u> products.
- 3. When you are using a product, be very careful around children.
- 4. When you are finished, put the product away in a very safe place.
- 5. Keep cleaning products in high places, where children can't see them.
- 6. Buy the safest one that you can find.
- 7. Warning means that product is dangerous.
- 8. Caution means that product is a little dangerous.
- 9. <u>Danger</u> or <u>Poison</u> means that product is very dangerous.

Chapter 7

Exercise 1 (page 39)

- 1. When did Vuthy Pril become a conservation officer? on October 25th, 1999
- 2. How much could they fish in Cambodia? as much as they wanted
- 3. Why did everything change in 1975? The communists overthrew the government.
- 4. When did Vuthy's family arrive in Minnesota? 1983
- 5. What are Conservation Officers sometimes called? hunting and fishing police
- 6. What does Vuthy tell newcomers to do? "Study hard to learn English, and to learn how things are done in this country."
- 7. Why is it different back home in Cambodia? People are hungry.
- 8. Why do they <u>enforce</u> the hunting and fishing laws in Minnesota? So everyone, including our children, will have a chance to catch fish and hunt animals.

Exercise 2 (page 40)

- 1. In 1999, Vuthy Pril became Wisconsin's (Minnesota's) first Southeast Asian Conversation (Conservation) Officer.
- 2. He will help newcomers learn about the invitations (regulations) for fishing and swimming (hunting) in Minnesota.
- 3. "We danced (fished) as much as we wanted, we sang (hunted) as much as we wanted, nobody told us what to do."
- Everything changed in 1995 (1975), when the colonists (communists) overthrew the government.
- 5. These offers (officers) are sometimes called the "hunting or fishing place (police)."
- 6. They teach people how to use outdoor areas slowly (safely), and how to drive (hunt) and fish legally in Minnesota.
- 7. He tells newcomers, "Study hard to learn Spanish (English), and to learn how things are made (done) in this country."
- We have to enforce the views (laws), so our children will have a chance to catch cold (fish) and hunt animals in Innesota.

Exercise 3 (page 42)

- 1. What are hunting and fishing laws called? These are called "game" laws.
- 2. What are the three goals for these laws?
 - 1. To protect wildlife and fish
 - 2. To keep hunting and fishing fair for everyone
 - 3. To keep people safe when they hunt or fish
- 3. What do you need to buy before you go hunting or fishing? a license
- 4. What do we call the time when it's legal to hunt or fish? the season
- 5. Are the laws the same for all animals? No. Almost every fish and animal has a different set of laws.
- 6. What can happen if you break these laws? You can be fined. You may also lose your fishing and hunting equipment.

Chapter 8

Exercise 1 (page 45)

- 1. Where did Pooh and his family live? in a village named Thin Phia.
- 2. When did he come to Minnesota? September of 1980.
- 3. Where did he get his <u>degree</u>? at the University of Wisconsin
- 4. What did he study? Soil Science
- 5. Who does he work with? farmers, and other land users
- 6. How did some families clear land for farming in Laos? by cutting down big trees on the hillside
- 7. What did this type of farming destroy? forests and the places where wildlife lives
- 8. Why do Minnesota farmers use conservation practices on hillsides? to stop soil from eroding

Exercise 2 (page 46)

- 1. Phoukham Vongkhamdy was born in Cambodia (Laos), but left his country when he was 21 (16).
- 2. Pooh studied at the University of Minnesota (Wisconsin), and he received a degree in computer (soil) science.
- 3. Now he's a Soil Reservationist (Conservationist) working with farmers, and other lake (land) users.
- 4. He also teaches conversation (conservation) to different grounds (groups).
- 5. Pooh grew up on a friendly (family) farm which grew fish (rice) and other crops to feed their family.
- :6: "We destroyed our forests and the places where midlife (wildlife) lives by using this kind of shopping (farming)."
- 7. When they farm on hillsides they use conservation examples (practices) on their fields to stop trees (soil) from eroding.
- 8. "Our land is needed for swimming (farming). Our rivers and lakes provide us with facts (fish)."

Exercise 3 (page 48)

- 1. Why is it good to leave grass clippings on the lawn? They are good for your grass.
- 2. What should you do with grass clippings on the sidewalk? Sweep them up.
- 3. What happens when grass clippings are left on the street? When it rains they will flow into the storm drain.
- 4. How far does water <u>flow</u> into the Mississippi River? Water flows from miles away.
- 5. What happens when the leaves <u>decay</u> in the river? They give off nutrients.
- 6. What do the <u>nutrients</u> do to animals and plants in the river? They hurt the animals and some of the plants in the river.
- 7. What can you do to help the Mississippi River? Pick up your leaves and compost them.

Chapter 9

Exercise 1 (page 51)

- 1. What was Khoi's job as a young man? He was in the Army of the Republic of South Vietnam.
- 2. What happened to him in 1975? He was persecuted by the new communist government.
- 3. When did he finally come to the US? 1992
- 4. What's his job now? He is the Coordinator of the Southeast Asian Environmental Education Program for the DNR.
- 5. What is the goal of the program? The goal is to get newcomers to visit the parks and learn park <u>regulations</u>, so that they will feel comfortable coming back to the parks on their own.
- 6. How does he bring groups of <u>immigrants</u> to the State Parks? by bus
- 7. What do Kou and other park workers teach? about the plants, wild life, and recreational activities available there
- 8. How does he think newcomers will benefit by going to state parks? to "enjoy the open air"

Exercise 2 (page 52)

- 1. Khoi Nguyen was in the navy (Army) of the Republic of South Korea (Vietnam) until 1975.
 - tizenship was given to (taken from) him and he was not allowed to study (work).

ERIC Full Text Provided by ERIC

- 3. Khoi tried to leave Vietnam five (three) times, and finally in 1992, he was careful (successful).
- 4. In the US, Khoi found a school (job) that lets him help his own communication (community).
- 5. The goal is to get newcomers to visit the malls (parks) and learn park complications (regulations).
- 6. He and other park workers teach continental (environmental) education, and also how to display (obey) the laws.
- 7. Khoi feels that all newcomers will believe (benefit) by going to the state parks to "expand (enjoy) the open air."
- 8. Minnesota state parks offer a great place to enjoy (escape) the noise and quiet (busy) streets of the city.

Exercise 3 (page 54)

- 1. Which park is in the far northwest corner of the state? Lake Bronson
- 2. Which park is in the far southwest corner of the state? Blue Mounds
- 3. Which park is in the far southeast corner of the state? Beaver Creek Valley
- 4. Which park is in the far northeast corner of the state? Grand Portage
- 5. Which parks are in the Twin Cities Metro Area? Lake Maria, William O'Brien, Fort Snelling, Afton, Minnesota Valley Recreation Area
- 6. Which park is just north of William O'Brien State Park? Interstate
- 7. Which park is just south of Fort Snelling State Park? Nerstrand Big Woods

Chapter 10

Exercise 1 (page 57)

- 1. What do many immigrants enjoy doing? fishing
- 2. What do you need to understand to fish in Minnesota? the rules
- 3. What is Vuthy Pril's job? His job is to teach people about the rules and <u>regulations</u> for fishing, and to <u>enforce</u> fishing <u>regulations</u>.
- 4. How many immigrants from Cambodia fish? almost everyone
- 5. What other immigrants does Vuthy see fishing? Vietnamese and Hmong
- 6. What does Khoi Nguyen teach immigrants to do? use state parks
- 7. Why do people fish in Vietnam? for food to live
- 8. What are new ideas to these immigrants? fishing rules and regulations

Exercise 2 (page 58)

- 1. You don't need to know a lot of energy (English) to fish, but you need to understand the poles (rules).
- 2. Vuthy said, "In the Canadian (Cambodian) Community almost everybody wishes (fishes)."
- 3. They come from a company (country) where fishing is a dirty (daily) activity.
- 4. He said, "They want to catch as few (many) fish as they can, either to tell (sell) them or meet (eat) them."
- 5. "In Vietnam people swim (fish) for food to live, not for a name (game)."
- 6. Newcomers don't understand why they have to limit their swimming (catch) to a certain place (amount) when they have a big family.
- 7. He said, "They don't understand why fish should be sent (thrown) back in the refrigerator (river) and why they are allowed to fish only during the session (season)."
- 8. Both Vuthy and Khoi agree, that with conversation (education), newcomers will learn the languages (rules) and understand why they need to explain (follow) them.

Exercise 3 (page 59)

Answers will vary.

We wish to thank Jeff Ledermann and the Minnesota Office of Environmental Assistance for their funding and support.

To order additional copies of this textbook write to Multi-Cultural Educational Services

Printed on paper containing 30% postconsumer waste with soy-based inks.

We extend our gratitude to those who have shared the story of their lives. Their dedication to protecting the environment made this book possible.

Kou Xiong
Stefanie Pruegel
Girma Yismaw
Laura Au-Yeung
Zahra Niccu Tafarrodi
Nigatu Tadesse
Vuthy Pril
Phoukham (Pooh) Vongkhamdy
Khoi Nguyen

We hope their experiences will encourage our readers to make a positive impact on the environment, and inspire some to enter the fields of environmental education and protection.

About the Glossary

This book contains a glossary beginning on page 61, with vocabulary words translated into Bosnian, Hmong, Russian, Somali, Spanish and Vietnamese, plus English definitions. The vocabulary words are underlined, and appear throughout the book. When you see an underlined word, go to the glossary to find out what the word means. In some of the exercises the vocabulary words are not underlined.

Ova knjiga sadrži glosar na strani 61 sa riječima na srpskohrvatskom jeziku. Te su riječi podvučene u tekstu. Kad naidjete na podvučenu riječ, možete je potražiti u glosaru da pronadjete njeno značenje. Pojedina vježbanja sadrže riječi koje nisu podvučene.

Este libro contiene un glosario que inicia en la página 61, con palabras de vocabulario traducidas al español. Las palabras del vocabulario están subrayadas y aparecen a lo largo del libro. Cuando usted vea un palabra subrayada, consulte el glosario para encontrar el significado de la palabra. En algunos de los ejercicios las palabras del vocabulario no están subrayadas.

Tập sách này có bảng chú giải ở trang 61, với nhiều từ ngữ được dịch sang tiếng Việt. Những từ này được gạch dưới, và xuất hiện rải rác trong toàn tập sách. Khi quý vị thấy từ nào được gạch dưới, lật đến trang chú giải để thấy nghĩa của nó. Trong một số bài tập, nhũng ngữ vựng này sẽ không được gạch dưới.

а1

Chapter 1

Kou Xiong

Hmong <u>Liaison</u> and <u>Wastewater Specialist</u> with the Wisconsin <u>Department of Natural Resources</u> (DNR)

Kou grew up in Laos. In 1972, when Kou was 16 years old he was in the Laotian Army. They were helping the United States fight North Vietnam. The United States CIA pulled their soldiers out of Laos in 1975. After that it was no longer safe for Kou to remain in Laos. He <u>escaped</u> to Thailand, where he married in the <u>refugee camp</u>. He and his wife then came to the US. Later they moved to Eau Claire, Wisconsin. That was in 1980. Now, Kou and his wife have 4 sons and 3 daughters.

Kou lived in the United States for many years before he became interested in <u>environmental</u> education. The Laotian government didn't have any programs that taught ways to <u>reuse</u> products or <u>reduce waste</u>. "Our nation lived without recycling programs, and people didn't worry about <u>pollution</u>," said Kou. These ideas were new to him.

The Recycling Program in Eau Claire hired Kou in 1996. That was his first job in <u>environmental</u> <u>protection</u>. Now Kou is working with the Wisconsin <u>Department of Natural Resources</u> (DNR). He works throughout the state of Wisconsin as a Hmong <u>liaison</u>.

The DNR trained Kou to help the <u>Southeast Asian community</u>. He teaches them how to <u>compost</u> their garbage. Fruits, vegetables, <u>egg shells</u>, paper, and food that has no fat or salt on it can be <u>compost</u>ed. Grass, leaves and all green plant <u>materials</u> can also be <u>compost</u>ed into a <u>fertile soil</u> for good gardens.

Kou is learning new things every day. He wants all people to <u>compost</u> their yard <u>waste</u>. He gets good <u>fertile soil</u> from the <u>compost</u>ed food and yard <u>waste</u> in his <u>compost</u> pile. He puts this <u>soil</u> on his garden to help his plants grow. <u>Composting</u> has <u>reduced</u> their garbage and saved them some money.

Before they began their recycling program, Kou and his family threw away three bags of garbage each week. Reusing and recycling have helped them <u>reduce</u> most of their garbage. They only throw away things that can't be <u>composted</u>, <u>recycled</u>, or <u>reused</u>. Now his family has only one bag of garbage to throw away each week.

Kou is happy to help people understand how to compost and recycle.

To learn more about composting or to talk with Kou, contact:

Reading Comprehension Questions

Write answers to the following questions.

1.	Where is Kou from?
2.	When did the US soldiers leave Laos?
3.	Why did Kou leave Laos?
4.	When did he get an environmental job?
5.	What does Kou teach people to do?
6.	What does he do with the <u>soil</u> from his <u>compost</u> pile?
7.	How many bags of garbage did his family throw away each week, before they started to recycle?
8.	How many bags do they throw away now?

False Sentences

Use the information in the story to edit the following sentences.

The incorrect words are crossed out. Write the correct words above them.

1.	Kou was serving in the American Army when he was 14 years old.
2.	Kou and his wife moved to Minnesota in 1970 .
3.	Kou lived in Canada for many years before he became interested in temperamental education.
4.	The Refusing Program in Eau Claire hired Kou in 1976 .
5.	The DNR trained Kou to help the Northwest African community.
6.	Kou wants all people to confuse their tooth paste .
7.	He gets good fertile soap from the confused food and yard waste.
8.	Now his family has only one pack of luggage to throw away each week.

Why <u>reduce</u>? Why <u>reuse</u>? Why <u>recycle</u>? Write answers the following questions.

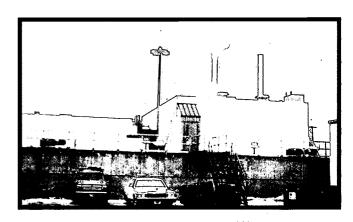

Garbage truck

What happens to garbage after we throw it away?

Landfill

Waste-to-Energy Facility

Why are reducing and reusing good ideas?

Partner Exercises

Ask another student the following questions, and write down their answers.

1.	Where are you from?
2.	Did you <u>recycle</u> in your country?
3.	What did you recycle?
4.	Did you reuse things in your country?
5.	What did you reuse?
6.	Is there more or less <u>pollution</u> in your country than there is here?
7.	Why?

Chapter 2

Stefanie Pruegel

Assistant <u>Public Outreach Coordinator</u> with the San Francisco Recycling Program

Stefanie grew up near Munich, Germany, where she lived close to <u>nature</u>. There were fields around her house and she had many pets. Her family lived a simple life. They didn't throw away things that they could use again. She learned to be happy with what she had.

Stefanie moved to California in the summer of 1997. She wanted to find work where she could help <u>protect</u> the <u>environment</u> in the United States.

"I like teaching people how to <u>reduce waste</u>, and how to <u>recycle</u>, because everybody can relate to it," said Stefanie. "Everybody buys things and throws away garbage, no matter what their income or <u>cultural</u> background is. <u>Success</u> in recycling is easy to measure."

She found a program that needed help with their recycling <u>hotline</u>. For six months she <u>volunteered</u> one day a week, without pay, at the recycling <u>hotline</u>. At the <u>hotline</u> she answered calls about <u>curbside recycling</u>. She also answered questions about all kinds of things people wanted to <u>reuse</u> or recycle.

She is now the Assistant <u>Public Outreach Coordinator</u>, working for the San Francisco Recycling Program. Her job is to explain all of the recycling programs as clearly as possible, and encourage people to <u>recycle</u>. She has some information translated into Spanish and Chinese. In California, those are the two most common languages spoken in the home, after English. She says, "We must do more than just translate a message word by word. It has to be <u>culturally sensitive</u>."

Stefanie talks to people from different <u>cultures</u> to find out what they think about <u>protecting</u> the <u>environment</u>. "I have learned that groups with different <u>cultural</u> backgrounds have different reasons to <u>protect</u> the <u>environment</u>. For example, in the Latino <u>community</u>, family is very important, so they are very interested if I connect recycling with their children's future."

"I hope that more newcomers will look for jobs that help the <u>environment</u>. They can act as a <u>liaison</u> to their <u>immigrant community</u>. Everybody would <u>benefit</u>," said Stefanie.

To learn more about recycling contact:

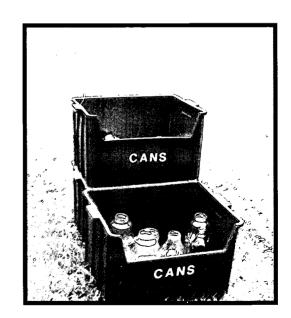

Your local city hall, and ask about curbside recycling.

Minnesota Office of Environmental Assistance Education Clearinghouse 520 Lafayette Road North, 2nd Floor St. Paul, MN 55155-4100

Phone: 651-215-0232 or 1-800-877-6300

web site: www.moea.state.mn.us

Stefanie Pruegel's email: s_pruegel@yahoo.com

Reading Comprehension

Write answers to the following questions.

1.	When she was growing up, what did Stefanie learn?
2.	What kind of work did she want to do?
3.	What does she like teaching?
4.	What calls did she answer at the recycling <u>hotline</u> ?
5.	What is her job now?
6.	Why does she have information translated into Chinese and Spanish?
7.	Why does she talk to people from different <u>cultures</u> ?
8.	What is important in the Latino community?

False Sentences

Use the information in the story to edit the following sentences.

The incorrect words are crossed out. Write the correct words above them.

1.	She grew up close to factories and had many toys .
2.	In her family they didn't keep things that they could sell again.
3.	Stefanie moved to Colorado from Georgia in the summer of 1997.
4.	She wanted to find waste where she could help propose the environment.
5.	Everybody sells things and throws away garbage, no matter what their incline or corpora background is.
6.	At the hothouse , she answered calls about bedside recycling.
7.	She has some invitations translated into Finnish and Vietnamese .
8.	She hopes that more New Zealanders will look for jobs that help the element.

WHAT YOU CAN RECYCLE	HOW TO RECYCLE IT
A. cans	rinse them clean take off paper labels
B. corrugated cardboard	it must be clean <u>remove</u> staples flatten or tear down can not <u>recycle</u> pizza or pop boxes can not <u>recycle</u> plastic coated cardboard
C. glass bottles and jars	rinse out food take off caps and lids remove foil labels you may have to sort by color: clear, brown or green glass
D. newspapers & inserts	must be clean and dry put them in a paper grocery bag or recycling bin
E. plastic bottles- from pop, milk, juice, or water	rinse them clean take off caps or lids
F. other plastic bottles	rinse them clean take off caps or lids
G aluminum foil or trays	rinse off food
H. boxboard- cereal and other food boxes	remove any bags from inside flatten and put them in a paper grocery bag
I. mixed paper and junk mail - typing and computer paper, and all the paper and envelopes that come in the mail	put them in a paper grocery bag
J. magazines, catalogs and phone books	put them in a paper grocery bag

Read the table on the previous page

Write down the name of what to <u>recycle</u> next to the phrase of how to <u>recycle</u> it.

There can be more than one correct answer.

Example:	glass bottles and plastic bottles	Take off caps and lids
1.		Rinse out food
2.		Flatten or tear down
3.		Put in a paper grocery bag
4.		Take off labels
5.		Take off caps and lids
6.		Sort by color
7.		No pizza boxes
8.		Remove any bags from inside
9.		Must be clean and dry
10.		Rinse them clean

Chapter 3

Girma Yismaw

Liquids Business Unit <u>Manager</u> with the Metropolitan Council of <u>Environment</u>al Services

As a young man, Girma left Ethiopia to study <u>engineering</u> in the Soviet Union. There he became involved in some political activities <u>against</u> the government of his home country. Because of these activities, he couldn't go back to Ethiopia or he would have been <u>persecuted</u>.

He traveled to West Germany, and applied to live as a <u>refugee</u> in Germany and in the US. "I was <u>accepted</u> by both countries at the same time. I had to make a choice. I chose to come to the United States. This was in 1984," explains Girma.

Girma already had a <u>degree</u> in <u>engineering</u> and was fairly fluent in English. He didn't know how that would help him get a job here, so he decided to study at the University of Minnesota. He studied <u>environmental engineering</u> (water and <u>wastewater treatment</u>). While he was going to school, he got a summer job at the Metropolitan <u>Wastewater Treatment</u> Plant.

In 1987 there was a full time job opening. He applied and got a job working for the Metro Plant of the Metropolitan Council of <u>Environmental Services</u>. Now Girma is the Liquids Business Unit <u>Manager</u>. His job is to <u>manage</u> the treatment of all of the <u>wastewater</u> that runs in the <u>sewer</u> system.

"We would like <u>immigrants</u> to know what they can, and what they can not throw in the <u>sewer</u> or storm drains," said Girma. The drains that you see in streets and parking lots are called storm drains. It's bad to pour <u>chemicals</u>, like oil into the <u>storm drain</u>. The water with the <u>chemicals</u> goes into our lakes and rivers. It does not go through a <u>wastewater treatment</u> plant, like the one where Girma works. This water is not treated or cleaned. "So, anything that you pour into a <u>storm drain pollutes</u> our lakes and rivers, where you want to fish. Do you want that? I think you don't."

Water from your kitchen sink, and bathroom sinks and toilets goes into the <u>sewer</u>. From the <u>sewer</u>, the dirty water goes into the treatment plant. This is where Girma works. The treatment plant <u>removes</u> the <u>waste</u> and puts the clean water into the river. Some <u>chemicals</u> are difficult for the treatment plant to <u>remove</u>. Be careful what you throw into the <u>sewer</u>.

Girma said, "Rivers and lakes take a long long time to clean themselves. But you can help <u>protect</u> the lakes and rivers without leaving your home. We want to leave a cleaner <u>environment</u> for the future and for our children."

To tour the Metro <u>Wastewater Treatment</u> Plant, or to speak with Girma, <u>contact</u>:

Girma Yismaw Liquids Business Unit Manager, P.E. 2400 Childs Road St. Paul, MN 551066-1626

Phone: 651-602-8809

E-mail: girma.yismaw@metc.state.mn.us

To learn more about how to <u>recycle</u> or how to correctly throw away <u>waste</u>s, <u>contact</u>:

Your county solid waste office to get more information.

Minnesota Pollution Control Agency

Phone: 651-296-6300 or 1-800-657-3864 Web site: www.pca.state.mn.us

Minnesota Office of Environmental Assistance

520 Lafayette Road North St. Paul, MN 55155-4100

Phone: 651-296-3417 or 1-800-657-3843

Reading Comprehension

Write answers to the following questions.

1.	Where is Girma from?
2.	When did he come to the US?
3.	What did he study in Minnesota?
4.	Where did he get a summer job?
5.	What does he <u>manage</u> now?
6.	What would he like <u>immigrants</u> to know?
7.	What happens to chemicals that go into storm drains?
8.	What does the wastewater treatment plant do with the dirty water?

False Sentences

Use the information in the story to edit the following sentences.

The incorrect words are crossed out. Write the correct words above them.

1.	Girma left Egypt to study engineering in the European Union.
2.	Because of his political accidents he could not go back to his job .
3.	At the University of Wisconsin he studied continental engineering.
4.	He got a winter job at the Metropolitan Clearwater Treatment Plant.
5.	His job is to matter the treatment of all of the wastewater that runs in the shower system.
6.	"We would like immigrants to know what they can, and what they can not spend in the shop or shopping mall."
7.	Anything that you pour into a <u>storm drain pollute</u> s our yards and garden , where you want to plant .
8.	Some vegetables are difficult for the treatment plant to repeat .

Tips from Girma on taking good care of your automobile, and not polluting:

Wash your car on the <u>lawn</u>, instead of in the street or on the driveway. That will stop the soap, dirt, rust and water from running into the <u>storm drain</u>, and polluting the lakes and rivers. You will help to keep the <u>environment</u> clean. Plus, the water will be good for your <u>lawn</u>.

Automotive <u>fluid</u> leaks, like oil or <u>antifreeze</u>, that flow into the <u>storm drain</u> cause <u>pollution</u> in our lakes and rivers. If you see some automotive <u>fluid</u> on your street or driveway, soak up the <u>fluid</u> with a rag and throw the rag into the garbage. Help to keep the <u>environment</u> clean. Repair all leaks quickly.

Keep your car well tuned. You will use as much as 20% less gasoline. This will save you money when filling your gas tank. You will also cause less air <u>pollution</u>, because your car will run cleaner. If you use less gas, you will be helping to lower air <u>pollution</u>.

Check your <u>tire pressure</u> often. Make sure to keep the correct amount of air in your tires. For every pound of air that your tires are below the correct amount, you use 1% more gasoline than normal. This makes your car more expensive to run. It also adds more <u>pollution</u> to the air. Help save the <u>environment</u> by keeping the correct amount of air in your tires.

Reading Comprehension

Write answers to the following questions.

1.	Where should you wash your car?
2.	Why should you wash it there?
3.	What should you do if you see some automotive <u>fluid</u> on the street or driveway?
4.	If you don't do that, what will happen?
5.	How will keeping your car well tuned save you money?
6.	How will keeping your car well tuned cause less air pollution?
7.	What should you check often?
8.	How will keeping the correct amount of air in your tires save you money?

Chapter 4

Laura Au-Yeung

Indoor Air Quality Educator with the University of MN Extension Service

Laura grew up in Hong Kong, China. She came to the United States to go to college. She graduated from college with two <u>degree</u>s, and decided to stay in the US.

Later, Laura settled in Iowa where she owned an <u>interior design firm</u>. She designed offices in large buildings. New flooring, carpeting, furniture, and <u>paint</u> were put in these buildings. Many people complained after the new <u>materials</u> were put in. These people were feeling sick.

After that happened, Laura made a big change in her life. She says, "I went back to school to study how <u>chemicals</u> in <u>building materials</u> can make people sick. I came here and got a job with the University of Minnesota, and went to work in the <u>indoor air quality</u> office." After that she took the job as an <u>Indoor Air Quality</u> Educator with the University of MN <u>Extension Service</u>.

Her first job was to help Sudanese <u>immigrants</u>. <u>Public health</u> nurses noticed that the Sudanese families had many visits to the clinic with their children, for <u>respiratory illnesses</u>. They also noticed <u>moisture</u> problems in the homes of these families. Too much <u>moisture</u> in the home causes <u>mold</u> and <u>mildew</u>. <u>Mold</u> and <u>mildew</u> can cause <u>respiratory illnesses</u>. <u>Mold</u> and <u>mildew</u> were the reasons these children got sick so many times.

It was Laura's job to work with the Sudanese <u>community</u>, and help them learn how to keep their house <u>healthy</u>. Laura taught a class to the Sudanese <u>immigrants</u>. The group learned how they could stop <u>mold</u> and <u>mildew</u> from growing in their homes. They learned to wash <u>mold</u> and <u>mildew</u> with <u>chlorine bleach</u>, to kill it. Many families took home free <u>chlorine bleach</u> after the class.

The <u>climate</u> change was a big problem for the Sudanese, who came to Minnesota from a very warm <u>climate</u>. Laura explained, "They tried to make their homes as warm and <u>humid</u> as in Africa." They wanted to be comfortable, so their houses were closed up. They didn't use <u>exhaust fans</u>, and kept all the windows closed. This kept the warm <u>humid</u> air in their homes. But, that <u>damaged</u> their apartments and homes, and it was not <u>healthy</u> for them.

Laura has also helped the Hmong and Somali communities. She teaches many classes to help <u>immigrants</u> learn how to keep their homes <u>healthy</u>.

To learn more about <u>mold</u> and <u>mildew</u>, how to your home <u>healthy</u>, or to speak with Laura, <u>contact</u>:

Laura Au-Yeung Extension Educator University of Minnesota Extension Service 1525 Glenwood Avenue North Minneapolis, MN 55405-1264

Phone: 612-374-8400

University of Minnesota Extension Service 1525 Glenwood Avenue North Minneapolis, MN 55405-1264

Phone: 612-374-8400

Web site: www.extension.umn.edu Look for "Health Issues in the Home," and "Moisture

Problems"

Reading Comprehension

Write answers to the following questions.

1.	Where did Laura grow up?
2.	Why did she come to the US?
3.	What did she own in Iowa?
4.	What problem did people have when new <u>materials</u> were put in buildings?
5.	What kind of <u>health</u> problems did new Sudanese families have?
6.	What was causing the problem?
7.	What did people take home to kill mold and mildew?
8.	Why did they try to keep their homes warm and <u>humid</u> ?

False Sentences

Use the information in the story to edit the following sentences.

The incorrect words are crossed out. Write the correct words above them.

	The incorrect words are crossed out. Write the correct words above them.
1.	Laura grew up in Taiwan , and came to United States to go to work .
2.	She settled in Ohio , where she owned an exterior sign company.
3.	Many people connected after the new materials were put in, that they were feeling happy .
4.	She went to work in the outdoor air quantity office.
5.	Public school nurses noticed the Sudanese children had category <u>illness</u> es.
6.	Cold and mildew were the reasons these children got angry.
7.	It is important to wash cold and nephew with chlorine bleach, to kill it.
8.	They tried to make their homes as cool and humid as in Asia .

Keep your home healthy

Use <u>exhaust fans</u> to help <u>remove</u> the <u>moisture</u> in your home. <u>Exhaust fans</u> also <u>reduce</u> the air <u>pollution</u> in your home. This is very important to keep your family <u>healthy</u>.

You may see small black spots on bathroom walls, around windows, and other places that get wet. Those spots are <u>mold</u> and <u>mildew</u>. The University of Minnesota <u>Extension Service</u> recommends that you wash these spots with <u>chlorine bleach</u> to kill the <u>mold</u> and <u>mildew</u>.

Put three-fourths cup <u>chlorine bleach</u>, and one cup <u>tri-sodium phosphate (TSP)</u> in one gallon of water. Cover your nose and mouth when you wash <u>mold</u> and <u>mildew</u>, so that you do not <u>breathe</u> it in. This will kill the <u>mold</u> and <u>mildew</u>. It will stop it from growing for a while.

Keep your house clean. There are many things in your home that can cause <u>allergies</u>, and make people sick. They can also cause <u>asthma</u>, or make it worse. Clean often, vacuum, and use <u>exhaust fans</u>. You will <u>reduce dust mites</u>, <u>cockroaches</u>, <u>mold</u> and <u>mildew</u>. This will help your family stay <u>healthy</u>.

Exercise 3

Reading Comprehension Questions Write answers to the following questions.

1. What do <u>exhaust fans</u> help <u>remove</u> ?
2. What are black spots on bathroom walls?
3. What can you mix with water to kill mold and mildew?
4. What else can you do to keep your family <u>healthy</u> ?

Look for cleaning products that are safe to use.

There are many products that are very safe to use. You can clean almost anything with one of these five safe products: **vinegar**, **baking soda**, **washing soda**, **Borax and lemon juice**

You can find all of them in your local supermarket. They usually cost less than other cleaning products, so you will save money. They won't <u>pollute</u> the air in your home, so they will be safer for you and your family. By using these products, you will also be saving the <u>environment</u>.

Following are examples of how to use these products. For other cleaning ideas read the product package.

Add Borax to detergent when washing clothes, to get clothes whiter.

Add washing soda to detergent when washing clothes, to get out stains and odors.

Use one cup of vinegar in two gallons of water, to clean your floors.

Use a spray bottle with water and 1 tablespoon white vinegar to wash windows.

Mix 1/4 cup baking soda, 1/2 cup white vinegar and warm water to clean tubs and tile.

Exercise 4

Reading Comprehension

Write answers to the following questions.

1.	Where can you find these safe cleaning products?
2.	Why are they safer for you and your family?
3.	Are they cheaper or more expensive then other cleaning products?
4.	What can you use to get your clothes whiter?
5.	What can you use to wash windows?

Chapter 5

Zahra Niccu Tafarrodi

<u>Multicultural</u> Chair with the American <u>Cancer</u> Society

Niccu was born and raised in Iran. She first came to the United States in 1975. She went to college in Minnesota. When she graduated, she returned to Iran where she was a teacher at a college. She moved back to Minnesota in 1986.

Niccu decided to change her <u>career</u>. She was interested in <u>health</u> education, and went back to college to get <u>degrees</u> in <u>public health</u>, and in family <u>health</u> education. She did not plan to stay in the United States. She wanted to work in a poor country, and to teach people about <u>health</u>.

Her plans changed. She heard about a new project with the American <u>Cancer</u> Society. She stayed in Minnesota, to work with people coming here from other countries. She taught newcomers about <u>health</u> education. It was exactly what she wanted to do.

Her job was to <u>develop</u> a program for <u>multicultural cancer</u> education. She asked for help from 40 different <u>ethnic</u> leaders. Writing a <u>brochure</u> on <u>breast cancer</u> was their first project. They chose breast <u>health</u>, because <u>breast cancer</u> is very high among almost all <u>ethnic</u> groups. They wrote the <u>brochure</u> and had it translated into 46 languages.

People also told Niccu what <u>health</u> information they wanted to learn. For example, one group wanted information on tobacco and smoking.

Smoking tobacco is one of the biggest causes of <u>cancer</u>. <u>Chemicals</u> in cigarettes hurt your <u>lungs</u> and <u>pollute</u> the air. If someone is smoking in the house, they are polluting the air in the house. Everyone who lives in that house is at a bigger <u>risk</u> of getting <u>cancer</u>.

Niccu especially worries about <u>teenagers</u> who are living in two worlds. One world is their parents world. The other is the world of school in America. They want to be Americans, but they also need to please their parents. Sometimes they do things that aren't <u>healthy</u>, like smoking.

Niccu had a <u>brochure</u> written on how smoking gives you a bigger <u>risk</u> of getting <u>cancer</u>. The smoking <u>brochure</u> was translated into 5 different languages. Niccu hopes this will give <u>immigrants</u> the information they need to make the right choice about smoking.

To learn more about <u>cancer</u>, tobacco and smoking, or to speak with Niccu, <u>contact</u>:

Zahra Niccu Tafarrodi American Cancer Society 1096 Raymond Avenue St. Paul, MN 55108

Phone: 651-644-1224

Web site: www.cancer.org

American Cancer Society Minnesota Council 3316 W 66th Street Minneapolis, MN 55435

Phone: 612-925-2772

Reading Comprehension

Write answers to the following questions.

1.	When did Niccu move back to Minnesota?
2.	What did she decide to study?
3.	Where did she want to work?
4.	Why did she stay in Minnesota?
5.	Who did she ask for help?
6.	What is one of the biggest causes of <u>cancer</u> ?
7.	Who does she worry about?
8.	What do they do that's not healthy?

False Sentences

Use the information in the story to edit the following sentences. The incorrect words are crossed out. Write the correct words above them.

1.	Niccu moved back to Ohio in 1976 .
2.	She was interested in wealth education and went back to work .
3.	She planned to work in a rich country and teach people about truth .
4.	She stayed in Montana, to work with people coming here from other states.
5.	Watching a movie on breast cancer was their first project.
6.	One group wanted vacation on tobacco and drinking .
7.	She worries about tea drinkers who are moving in two worlds.
8.	Sometimes they do things that aren't happy, like driving.

What is secondhand smoke?

<u>Secondhand smoke</u> is the smoke that comes from a cigarette, pipe, or cigar. It is also smoke that comes from the <u>lungs</u> of smokers. This smoke contains more than 4,000 <u>chemicals</u>. More than 40 of these <u>chemicals</u> can cause <u>cancer</u>. Many of these <u>chemicals</u> can hurt your <u>lungs</u>. If you <u>breathed</u> <u>secondhand smoke</u>, it is called passive smoking.

Secondhand smoke is a serious heath risk to children.

The <u>lungs</u> of young children are hurt by <u>secondhand smoke</u>. If parents smoke, children have a bigger <u>risk</u> of getting <u>respiratory illness</u>es. They can have problems breathing, and other problems, like coughing. <u>Secondhand smoke</u> can cause too much <u>fluid</u> in the ear. That is the most common reason that children go to the hospital. Secondhand smoke is very bad for children who have <u>asthma</u>, and they can get sick more often if anyone smokes in their house.

Exercise 3

Matching Exercise

Draw a line to connect the first part of the sentence with the second part.

- 1. Secondhand smoke is the smoke
- A. it is called passive smoking.

2. The <u>lungs</u> of young children

B. <u>serious health risk</u> to children.

- 3. More than 40 of these chemicals
- C. that comes from a cigarette, pipe, or cigar.

4. Secondhand smoke is a

- D. can cause <u>cancer</u>.
- 5. If you <u>breathe</u> <u>secondhand smoke</u>
- E. are hurt by <u>secondhand smoke</u>.

29

.,,

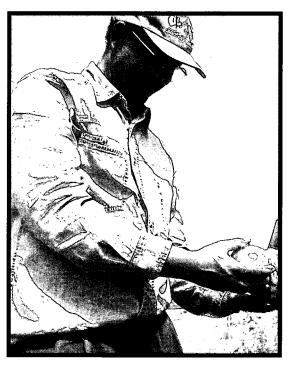

Smoking Questions

Ask another student the following questions, and write down their answers.

Do more or less people smoke in your native country, than in the US?
Are cigarettes more or less expensive there than in the US?
Do women smoke there?
Are there non-smoking areas there?
If yes, where?
Can children buy cigarettes in your country?
If no, at what age can people buy cigarettes?
Do you think smoking is a health problem in your country?
Do you think smoking is a health problem in your country?

Chapter 6

Nigatu Tadesse

Extension Educator and <u>Assistant Professor</u> with the University of Minnesota New <u>Immigrant</u> Farm Program

Nigatu was born and raised in Ethiopia. After he finished college, he worked for the <u>Extension</u> <u>Service</u>, teaching <u>agriculture</u> to adults. He was a crop improvement researcher in Ethiopia.

Nigatu came to the US to go to South Dakota State University. He graduated with doctorate <u>degrees</u> in Agronomy (the science of farming). In 1998, Nigatu got a job with the University of Minnesota in the New <u>Immigrant</u> Farm Program. He was excited to teach <u>agriculture</u> again. He teaches new <u>immigrants</u> how to grow better crops, and to be more <u>successful</u> farmers.

The program helps people who want to become farmers in the United States. Some people were farmers in their native country. Some people are new to farming. The New Immigrant Farm Program helps people who want to farm for a business.

If they have an idea of how they can sell their crops, they can learn how to farm. "We help people who have a good plan to sell their crops," said Nigatu.

The average size of the farm is between 1 and 3 acres. The <u>participants</u> are often beginners. Because they grow vegetables, flowers and other plants, they have to work hard on their land. The farm has to be small enough so the farmer and his family will be able to take care of it.

During the <u>growing season</u> farmers are very busy. Nigatu goes to the farmers in the fields and gives them information and advice. Teaching one-to-one is good because he can teach exactly what each new farmer needs to know.

<u>Participants</u> are able to stay in the New <u>Immigrant</u> Farm Program for up to three years. After 3 years they must buy or rent land someplace else, and use the skills that they have learned to become self-sufficient farmers.

It's important for farmers to learn how to keep their crops and their farms safe. <u>Pesticides</u> help keep <u>pests</u> away, but they can also be dangerous to people. Farm <u>chemicals</u> can also be bad for the <u>environment</u>. Nigatu teaches the new farmers how to use these <u>chemicals</u> safely and correctly.

To learn more about the New <u>Immigrant</u> Farm Program, or how to farm safely, <u>contact</u>:

Reading Comprehension

Write answers to the following questions.

1.	What was Nigatu teaching in Ethiopia?
2.	Where did he study the science of farming?
3.	What does he teach new <u>immigrants</u> to do?
4.	What kind of people is the program looking for?
5.	How big is the average farm in this program?
6.	Why does the farm have to be small?
7.	How long can people stay in the New Immigrant Farm Program?
8.	What is important for farmers to learn about farm <u>chemical</u> s?

False Sentences

Use the information in the story to edit the following sentences.

The incorrect words are crossed out. Write the correct words above them.

1.	Nigatu was was both and raised in Ecuador .
2.	He graduated from South Minnesota State Anniversary.
3.	The New Immigrant Farm Program is looking for children who want to farm as a sport .
4.	The average size of the yard is between 1 and 3 miles .
5.	The farm size has to be big enough so that the farmer and his friends will be able to take care of it.
6.	During the rainy season farmers are very bored .
7.	Participles are able to stay in the New Immigrant Farm Program for up to three months.
8.	Farm chemicals can be good for the employment .

Use **Chemicals** Safely

Farmers need to learn to use <u>chemicals</u> safely, and you do too. Many cleaners, <u>paints</u>, and other <u>household chemicals</u> are <u>hazardous</u>. If you are going to use a <u>household chemical</u>, read the label first to see if it is <u>hazardous</u>. Words like <u>caution</u>, <u>warning</u>, and danger tell how <u>hazardous</u> a product is.

Be very careful when using all <u>hazardous</u> products, even <u>household</u> cleaning products. They can be dangerous to people and the <u>environment</u>.

When you are using a product, be very careful around children. Small children always put things in their mouth, and these products can make them very sick. <u>Hazardous</u> products could poison them. When you are finished, put the product away in a very safe place. Keep cleaning products in high places where babies and children can't see them or reach them.

Read the label before you buy any product! Then, buy the safest one that you can find.

"Caution" means it's a little dangerous to use, so be careful.

"Warning" means it's dangerous to use, so be very careful.

"Danger" or "poison" means it's very dangerous, so be very, very careful!

Fill in the missing words.

1.	If you are going to use a <u>household</u> <u>hazardous</u> .	, read the	first to see if it is
2.	Be very careful when using all	products.	
3.	When you are using a product, be very	careful around	
4.	When you are finished, put the	away in a very safe plac	ce.
5.	Keep cleaning products in	places, where	can't see them.
6.	Buy the one that you can	ı find.	
7.	means that product is da	ingerous.	
8.	means that product is a li	ittle dangerous.	
9.	means tha	t product is very dangerous.	

Chapter 7

Vuthy Pril

Minnesota's first <u>Southeast Asian</u> <u>Conservation</u> Officer with the Minnesota <u>Department of Natural Resources</u>

On October 25th, 1999, Vuthy Pril became Minnesota's first <u>Southeast Asian Conservation</u> Officer. That was an exciting day for Vuthy, because he worked long and hard to reach this goal. He is now working for the Minnesota <u>Department of Natural Resources</u>. He will help newcomers learn about the <u>regulations</u> for fishing and hunting in Minnesota, and how to <u>protect</u> our <u>natural resources</u>.

Vuthy was born in Batnambang, in Cambodia. Everyone fished in the rivers and everyone hunted to feed their families. People could also fish in other people's <u>rice patties</u> as long as they didn't destroy the plants. It was understood that people didn't own the fish, just the land. "We always did this back home. We fished as much as we wanted, we hunted as much as we wanted, nobody told us what to do."

Everything changed in 1975, when the <u>Communists overthrew</u> the government. After four years the Cambodian government was back. The Pril family tried to move back into their home, but it had been destroyed. They went to a <u>refugee camp</u> in Thailand. They waited years, and finally came to the US. "That was one of the happiest moments in my life," said Vuthy. They arrived here in 1983.

Vuthy likes his job as a <u>Conservation</u> Officer. These officers are sometimes called the "hunting or fishing police." They also teach people how to use outdoor areas safely, and how to hunt and fish <u>legally</u> in Minnesota.

Many <u>immigrants</u> come from countries where there are no <u>conservation</u> laws. They often have problems because they don't understand. "The fishing and hunting rules and <u>regulations</u> here are hard to understand." As a Minnesotan from Southeast Asia, Vuthy can help them understand these rules. He tells newcomers, "Study hard to learn English, and to learn how things are done in this country."

"Back home it's different. People are hungry. They want to catch as many fish as they can, either to sell them or to eat them. It's different here. No one is dying from hunger, so they should be able to understand," said Vuthy. "We have to <u>enforce</u> the laws so everyone, including our children, will have a chance to catch fish and hunt animals in Minnesota. We live here now, and we have to conserve the natural resources."

To learn more about hunting and fishing regulations, or to talk to Vuthy, contact:

Reading Comprehension

Write answers to the following questions.

1.	When did Vuthy Pril become a <u>conservation</u> officer?
2.	How much could they fish in Cambodia?
3.	Why did everything change in 1975?
4.	When did Vuthy's family arrive in Minnesota?
5.	What are <u>Conservation</u> Officers sometimes called?
6.	What does Vuthy tell newcomers to do?
<i>7</i> .	Why is it different back home in Cambodia?
8.	Why do they enforce the hunting and fishing laws in Minnesota?

False Sentences

Use the information in the story to edit the following sentences.

The incorrect words are crossed out. Write the correct words above them.

1.	In 1999, Vuthy Pril became Wisconsin's first Southeast Asian Conversation Officer.
2.	He will help newcomers learn about the invitations for fishing and swimming in Minnesota.
3.	"We danced as much as we wanted, we sang as much as we wanted, nobody told us what to do."
4.	Everything changed in 1995 , when the colonists overthrew the government.
5.	These offers are sometimes called the "hunting or fishing place."
6.	They teach people how to use outdoor areas slowly , and how to drive and fish legally in Minnesota.
7.	He tells newcomers, "Study hard to learn Spanish, and to learn how things are made in this country."

animals in Minnesota.

40

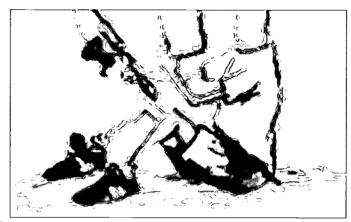

We have to enforce the views, so our children will have a chance to catch cold and hunt

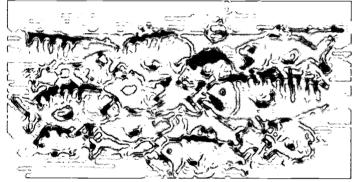

Hunting and Fishing Laws

There are laws for hunting and fishing in Minnesota. These are called "game" laws.

These laws have three different goals:

- 1. To protect wildlife and fish
- 2. To keep hunting and fishing fair for everyone
- 3. To keep people safe when they hunt or fish

In many countries, there are no limits on hunting and fishing. Many newcomers to Minnesota are surprised that they need to buy hunting and fishing <u>licenses</u>. Even when you have a fishing <u>license</u> or a hunting <u>license</u>, there are still times when it is not <u>legal</u> to hunt or fish. This also surprises many newcomers.

The times when it is <u>legal</u> to hunt and fish are called <u>season</u>s. Almost every fish and animal has a different set of laws. There are laws about how many fish you can catch when they are in <u>season</u>. There are also laws that tell how many animals you can kill during hunting <u>season</u>.

Learning all of the <u>regulations</u> is hard. But, it is important for you to learn them if you want to hunt and fish. You need to <u>obey</u> the laws so that you are fishing and hunting <u>legally</u>. If you break the laws you can be <u>fined</u>. You may also lose your fishing and hunting equipment.

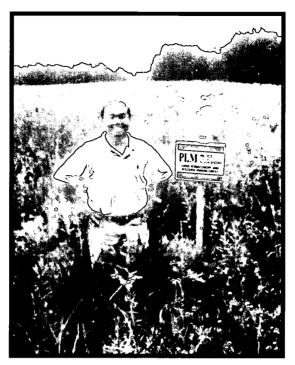

Reading Comprehension

Write answers to the following questions.

1.	What are hunting and fishing laws called?
2.	What are the three goals for these laws?
3.	What do you need to buy before you go hunting or fishing?
4.	What do we call the time when it's <u>legal</u> to hunt or fish?
5.	Are the laws the same for all animals?
6.	What can happen if you break these laws?

Chapter 8

Phoukham (Pooh) Vongkhamdy

District <u>Conservation</u>ist with the <u>Natural Resources Conservation</u> Services

Phoukham (Pooh) Vongkhamdy was born in Laos. He and his family lived in a village named Thin Phia. When he was 16 years old, he decided to leave his family behind and <u>escape</u> from the <u>communist</u> Laotian government. That was in September of 1980. Five months later he was <u>accepted</u> as an <u>immigrant</u> to come to the United States. In February of 1981, he came to Saint Cloud, Minnesota, to live with his <u>sponsor</u> family.

Pooh graduated from high school and then studied at the University of Wisconsin. There he received a <u>degree</u> in <u>Soil</u> Science. In May of 1991, he was hired by the <u>Natural Resources</u> <u>Conservation Service</u> (NRCS). As an NRCS <u>Soil Conservation</u>ist, he spends most of his time in the field working with farmers, and other land users. He also teaches <u>conservation</u> to different groups.

Land use in Laos is totally different than in Minnesota. In Laos, Pooh grew up on a family farm. They grew rice and other crops to feed their family. His family used <u>water buffaloes</u> to help them farm the land. Some farmers cleared land by cutting down big trees on the hillside. This way of farming was known as "<u>slash and burn</u>." Pooh says, "We destroyed our forests and the places where <u>wildlife</u> lives by using this kind of farming. We never thought much about the <u>conservation</u> of our land."

In Minnesota most farms are big. The farmers grow crops to earn money. They use big tractors to prepare the land for farming. When they farm on hillsides they use <u>conservation</u> practices on their fields to stop <u>soil</u> from eroding. The US government has many programs like the one where Pooh works. They educate and help all land users learn about <u>conservation</u>.

Pooh thinks, "It is very important for <u>immigrants</u> to know about <u>conservation</u>. Our land is needed for farming. Our rivers and lakes <u>provide</u> us with fish. Our air is needed to <u>breathe</u>. The forests <u>provide</u> us with wood, and a place for <u>wildlife</u> to live."

"Now we live in a country that still has a lot of <u>natural resources</u>. This is very important to our life. We should conserve and <u>protect</u> the <u>natural resources</u> for our children," said Pooh.

To learn more about conserving our <u>natural resources</u> or to talk with Pooh, <u>contact</u>:

Pooh Vongkhamdy USDA-Natural Resources Conservation Service 900 5th Street SW Milaca, MN 56353

Phone: 320-983-2154

email: pooh.vongkhamdy@mn.usda.gov

Department of Soil, Water, and Climate 439 Borlaug Hall 1991 Upper Buford Circle University of Minnesota St. Paul, MN 55108-6028

Phone: 612-625-1244

Reading Comprehension

Write answers to the following questions.

1.	Where did Pooh and his family live?
2.	When did he come to Minnesota?
3.	Where did he get his degree?
4.	What did he study?
5.	Who does he work with?
6.	How did some families clear land for farming in Laos?
<i>7</i> .	What did this type of farming destroy?
8.	Why do Minnesota farmers use <u>conservation</u> practices on hillsides?

False Sentences

Use the information in the story to edit the following sentences.

The incorrect words are crossed out. Write the correct words above them.

1.	Phoukham Vongkhamdy was born in Cambodia , but left his country when he was 21 .
2.	Pooh studied at the University of Minnesota, and he received a degree in computer science.
3.	Now he's a Soil Reservationist working with farmers, and other lake users.
4.	He also teaches conversation to different grounds .
5.	Pooh grew up on a friendly farm which produced fish and other crops to feed their family.
6.	"We destroyed our forests and the places where midlife lives by using this kind of shopping
7.	When they farm on hillsides they use conservation examples on their fields to stop trees from eroding.
8.	"Our land is needed for swimming. Our rivers and lakes provide us with facts."

Clean up our lakes and rivers without leaving your yard

Keep grass and leaves off the street.

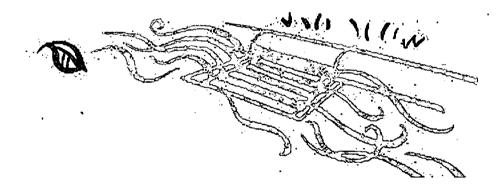

Leave <u>grass clippings</u> on the <u>lawn</u>. They are good for your grass. If you leave the <u>grass clippings</u> on your <u>lawn</u> every time you mow it, that is the same as putting <u>fertilizer</u> on your <u>lawn</u>.

<u>Sweep</u> up any <u>grass clippings</u> that are on the street, <u>sidewalk</u>, or driveway. Put them on your <u>lawn</u>, or <u>compost</u> them.

Don't leave <u>grass clippings</u> in the street. When it rains they will <u>flow</u> into the <u>storm drain</u>. Then they will go into the Mississippi River, or other lakes and rivers.

Water <u>flows</u> into lakes and rivers from miles away. If people leave <u>grass clippings</u> and leaves on the <u>sidewalk</u>, driveway and street, it can cause a big problem.

As leaves and grass clippings decay, they give off <u>nutrients</u>. These <u>nutrients</u> help the grass in your yard, but they hurt the animals and some of the plants in the river. They are not <u>healthy</u> for the river.

Even if you don't live close to the river you can still help it. If you pick up your leaves and <u>compost</u> them, you are helping the Mississippi River, and other lakes and rivers in your neighborhood.

(Reprinted with permission of Hamline University Graduate School of Education)

Reading Comprehension

Write answers to the following questions.

1.	Why is it good to leave grass clippings on the lawn?
2.	What should you do with grass clippings on the sidewalk?
3.	What happens when grass clippings are left on the street?
4.	How far does water <u>flow</u> into the Mississippi River?
5.	What happens when the leaves <u>decay</u> in the river?
6.	What do the <u>nutrients</u> do to animals and plants in the river?
7.	What can you do to help the Mississippi River?

Chapter 9

Khoi Nguyen

Southeast Asian Environmental Education Program Coordinator for the Minnesota Department of Natural Resources

As a young man Khoi Nguyen was in the Army of the Republic of South Vietnam. This was during the war in Vietnam. He first came to the US in 1969 for military leadership training, and then went back to fight in the war. When he was a soldier, he worked with the US Army to fight the <u>communists</u>s. When the Vietnam war ended in 1975, he was <u>persecuted</u> by the new <u>communists</u> government. They put him in a <u>concentration camp</u> for six years.

When he was finally released from the <u>concentration camp</u>, his citizenship was taken from him and he was not allowed to work. He tried to leave Vietnam three times, and finally in 1992, Khoi was <u>successful</u>. He and his wife, along with their two daughters and two sons, received <u>asylum</u> in the United States as <u>refugees</u>.

49

٠, ١, ٠

In the US, Khoi found a job that lets him help his own <u>community</u>. He is the Coordinator of the <u>Southeast Asian Environmental</u> Education Program for the DNR. This program is called the <u>Cultural Exchange Program</u>. The goal is to get newcomers to visit the parks and learn park <u>regulations</u>, so that they will feel comfortable coming back to the parks on their own.

Khoi works hard to bring groups of <u>immigrants</u> to Minnesota State Parks. They bring each group to the park by bus. Khoi teaches them about the plants, wild life, and <u>recreation</u>al activities available there. He and other park workers teach <u>environment</u>al education, and how to <u>obey</u> the hunting and fishing laws. Khoi has brought in some groups for classes on how to safely use a gun, and to go hunting. Many groups have learned about fishing <u>regulations</u>, and other park activities. People enjoy their trips to the park.

Khoi feels that all newcomers will <u>benefit</u> by going to the state parks to "enjoy the open air." Newcomers often live in apartments or small houses with large families. Minnesota state parks offer a great place to <u>escape</u> the noise and busy streets of the city, and to enjoy <u>nature</u>. He has seen people come to the park feeling unhappy, and leave feeling better after a few hours.

Khoi has also worked with the Sudanese and other groups of <u>immigrants</u>. He wants to help all newcomers use the state parks.

Reading Comprehension

Write answers to the following questions.

What was Khoi's job as a young man?
What happened to him in 1975?
When did he finally come to the US?
What's his job now?
What is the goal of the program?
How does he bring groups of <u>immigrants</u> to the State Parks?
What do Kou and other park workers teach?
How does he think newcomers will benefit by going to state parks?

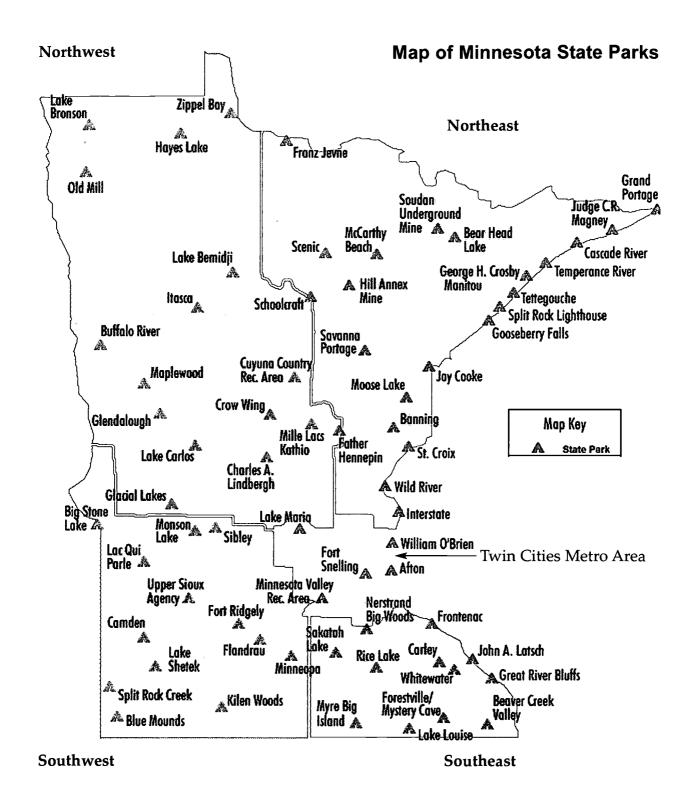

False Sentences

Use the information in the story to edit the following sentences.

The incorrect words are crossed out. Write the correct words above them.

1.	Khoi Nguyen was in the navy of the Republic of South Korea until 1975.
2.	His citizenship was given to him and he was not allowed to study .
3.	Khoi tried to leave Vietnam five times, and finally in 1992, he was careful.
4.	In the US, Khoi found a school that lets him help his own communication.
5.	The goal is to get newcomers to visit the malls and learn park complications.
6.	He and other park workers teach continental education, and also how to display the laws.
7.	Khoi feels that all newcomers will believe by going to the state parks to "expand the open air."
8.	Minnesota state parks offer a great place to enjoy the noise and quiet streets of the city.

Map Reading

Use the Map of the State Parks on the previous page, to answer these questions.

1.	Which park is in the far northwest corner of the state?
2.	Which park is in the far southwest corner of the state?
3.	Which park is in the far southeast corner of the state?
4.	Which park is in the far northeast corner of the state?
5.	Which parks are in the Twin Cities Metro Area?
6.	Which park is just north of William O'Brien State Park?
7.	Which park is just south of Fort Snelling State Park?

Chapter 10

Minnesota Fishing

Many <u>immigrants</u> coming to Minnesota enjoy fishing. It's one of the first things they learn to do here. You don't need to know a lot of English to fish, but you need to understand the rules.

In this chapter we will review some of the things we've learned in this book about fishing.

In Chapter 7, we learned about Vuthy Pril who is a <u>Conservation</u> Officer for the DNR. His job is to teach people about the rules and <u>regulations</u> for fishing, and to <u>enforce</u> fishing <u>regulations</u>.

Coming from Cambodia, he understands that people have different ideas about fishing. "In the Cambodian <u>community</u> almost everyone fishes. I've never seen anybody who hasn't fished. They come from a country where fishing is <u>daily</u> life, a <u>daily</u> activity. I see a lot of Vietnamese. I see a lot of Hmong also," said Vuthy.

Vuthy explains the difference between many other countries and the US. "Back home it's different. People are hungry. They want to catch as many fish as they can, either to sell them or to eat them. It's different here. No one is dying from hunger, so they should be able to understand."

In Chapter 9 we met Khoi Nguyen, who is from Vietnam. Now he works for the DNR and teaches <u>immigrants</u> to use state parks. He knows that they might not understand fishing rules and <u>regulations</u>.

Khoi said, "We have the opportunity to teach them something about the state parks, about the plants and the animals. We also teach them how to follow the law, because we don't have such laws as fishing <u>regulations</u>, or hunting <u>regulations</u> in our country."

"In Vietnam people fish for food to live, not for a game," said Khoi. Newcomers don't understand why they have to limit to their catch to a certain amount when they have a big family, and when they can eat as many fish as they can catch. "They don't understand why fish should be thrown back in the river, and why they are allowed to fish only during the 'season.' Fishing rules and regulations are a very new ideas to them," said Khoi.

Both Vuthy and Khoi agree, that with education, newcomers will learn the rules and understand why they need to follow them.

Web site: www.health.state.mn.us

Reading Comprehension

Write answers to the following questions.

1.	What do many immigrants enjoy doing?
2.	What do you need to understand to fish in Minnesota?
3.	What is Vuthy Pril's job?
4.	How many immigrants from Cambodia fish?
5.	What other immigrants does Vuthy see fishing?
6.	What does Khoi Nguyen teach <u>immigrants</u> to do?
7.	Why do people fish in Vietnam?
8.	What are new ideas to these <u>immigrants</u> ?

Exercise 2

False Sentences

Use the information in the story to edit the following sentences.

The incorrect words are crossed out. Write the correct words above them.

1.	You don't need to know a lot of energy to fish, but you need to understand the poles.
2.	Vuthy said, "In the Canadian Community almost everybody wishes ."
3.	They come from a company where fishing is a dirty activity.
4.	He said, "They want to catch as few fish as they can, either to tell them or meet them."
5.	"In Vietnam people swim for food to live, not for a name ."
6.	Newcomers don't understand why they have to limit their swimming to a certain place when they have a big family.
7.	He said, "They don't understand why fish should be sent back in the refrigerator and why they are allowed to fish only during the session."
8.	Both Vuthy and Khoi agree, that with conversation , newcomers will learn the languages and understand why they need to explain them.

58

Exercise 3

Discussion Exercise

Discuss the following questions in class.

1.	Did you fish in your country?
2.	If yes, did you fish in the lakes, rivers, or in the ocean?
3.	Do you or your family fish in Minnesota?
4.	Do you fish from shore or from a boat?
5.	What kinds of fish do you catch?
6.	Do you eat the fish you catch?
7.	How often do you eat fish from lakes or rivers?
8.	Is fishing in Minnesota better or worse than in your country?
9.	Why?

	lidka-barafka	anticongelante	chống đông
Assistant Pr	rofessor a university teacher		
	asistent profesora tus Loo ntav	wm tus Xib Hwb Qhia Ntawv	старший преподаватель
	Macallin jaamacadeed kalkaaliye	ah Profesor Asistente	phụ tá giáo sư
asthma	a disease that makes it difficult to	breathe	
	astma	mob hlab ntsws nqia	астма
	cudurka neefta	asma	bệnh hen, suyễn
asylum	a safe place to stay		
	azil	kev tiv thaiv	убежище
	magangalyo	asilo	tị nạn, nơi ẩn náu
benefit	be helped		
	korist, profitirati	ib qho zoo	оказывать благотворное действие
	faa'iido	beneficio	có ích, có lợi
breast cance	er a malignant growth in the che	est	
	rak dojke	ka xaws (cancer) ntawm mis	рак груди
	burada ama kaansarta naaska	cáncer en el seno	ung thư vú
breathe	inhale and exhale air		
	disati	nqus pa	вдыхать
	neefso, neefta hoos u jiid	respirar	thở, hít thở

brochure	information booklet		
	brošura	daim ntawv qhia	брошюра
	buug yar	folleto to buom, to	ập sách quảng cáo hoặc giới thiệu
building m	ŭ	make a building, such as lumber, v	vindows, carpet, paint
	gradjevinski materijal	tej khoom ua tsev	строительные материалы
	alaabta dhisma	materiales de construcción	vật liệu xây dựng
cancer	a malignant growth disease		
	rak	ka xaws (cancer)	рак
	buro, kaansar	cáncer	ung thư
career	occupation or profession		
	karijera	txoj hauj lwm	карьера
	meherad, shaqo nololeed	carrera	nghề nghiệp
caution	be careful, this is a little dangerou	15	
	upozorenje	ceeb toom	предупреждение
	digniin	cuidado	chú ý
chemical	man made substance for cleaning	, farming, etc.	
	hemijski, hemikalija	tshuaj tov хиг	иическое вещество, химикалий
	kiimiko	químico	hoá chất
chlorine bl	each a chemical that makes cloth	es whiter, and kills mold and mild	ew
	varikina	tshuaj ntxhua khaub ncaws daw	ь хлорный отбеливатель
	dhar-cadeeye/biliij kalooriin ah	cloro blanqueador	chấy tẩy chlorine
climate	the usual weather in a place		
	klima	huab cua	климат
	cimilo, xilli	clima	thời tiết, khí hậu
cockroache	es a small insect that lives in we	t places	
	bubašvabe, žohari	kab laum	тараканы
	baranbaro	cucarachas	con gián
Communis	sts people who believe in commi	unism	
	komunisti	Koom Tshas	коммунисты
	Shuuciyiin	Comunistas	Cộng Sản
community	y a social group of people with a co	ommon culture	
	zajednica	zej zog	община
	beel	comunidad	cộng đoàn
compost		bstances, such as dead leaves, grass	s clippings, and food waste
1	kompost, organski otpad	chiv	компостировать
	qudhmi/huuri wax si bacrimiye (na	afaqeeye) dhul u noqdo abono	phân bón (phân trộn với lá khô)

concentrat	ion camp political prison			
	koncentracioni logor	lub yeej raug txim	концентрационный лагерь	
	xero maxaabiis	campo de concentración	trại tập trung	
conservation	on protecting nature		-	
	očuvanje	kev txuag	консервация, сохранение	
	madhxinta khayraadka	conservación	sự bảo tồn thiên nhiên	
conserve	to protect	·		
	očuvati	txuag	сохранять, консервировать	
	madhxi (khayraadka dabiiciga)	conservar	bảo tồn, duy trì	
contact	to call, write or talk to			
	kontaktirati	tiv tauj	обратиться, контактировать	
	la xidhiidh	contactar	liên lạc	
culture	ways of living in different places	or countries		
	kultura	kab lis kev cai	культура	
	dhaqan	cultura	văn hoá	
curbside re	ecycling recycling that is picked odlaganje otpada za recikliranje i	l up at the curb in front of your ho spred mjesta stanovanja txo	use j kev rov qab siv khoom qub dua	
	сбор отходов, выставленных у обочины, для повторной переработки			
	dhigista jidka alaabta dib-u-dhaqa đặt những vật liệu có thể tái sử dụ	angalinta ụng hoặc có thể dùng để tái chế phá	reciclaje ẩm ra lề đường để xe rác tới lấy đi	
daily	every day			
,	svakodnevan	txhua hnub	ежедневно	
	maalin walba	diario	hàng ngày	
damaged	harmed			
	oštećen	puas tsuaj	повреждение	
	waxyeelo gaadhay	dañadas	làm hỏng, hư hại	
decay	rot, decompose	dunidus		
<i>j</i>	trunuti	lwj	гниение	
	qudhan, burbur	descomponer	thối rữa	
degree	diploma from college or universit			
O	diploma	dis plaus mav	степень	
	shahaado	título universitario	bằng cấp	
Departmen		vernment agency that protects natu	re and controls hunting & fishing	
•	_	Rooj Tsav Xwm Saib Xyuas Khoom Ntia	•	
		Departamento de Recursos Naturales	Phân Khoa Tài Nguyên Thiên Nhiên	
develop	to start a new program			
1	razvijati	npaj	разработать, создать	
	soo saar (barnaamij, alaab)	desarrollar	phát triển, thành lập	
			_	

dust mites	very small insects that live in thing sićušni mikroorganizmi koji žive u k	•	sofas клещи (живущие в бытовой пыли)
	caarada siigada een ishu qaban	gorgojo	con mạt đất, con ve, con bọ
egg shells	the hard outside covering of an eg	g	
	ljuspe od jajeta	plhaub qes	яичная скорлупа
	qolofta ukunta/beedka	cáscaras de huevo	vỏ trứng
enforce	to get people to follow the law		
	sprovoditi	yuam kom ua raws li	обеспечить соблюдение (законов)
	fuli, hirgali	hacer cumplir	áp đặt, ép buộc
engineering	the science of building things		-
	inžinjerstvo txoj kev ua tse	v, ua kev, thiab ua cav tsheb	инженерное искусство
	injineernimo	ingeniería	(làm) kỹ sư
environmen	nt the air, land, water, animals and	l plants around us	
	okolina	chaw puag ncig	окружающая среда
	deegaanka, bay'ada	medio ambiente	môi trường
escape	to get away from		
	pobjeći	khiav tawm	утечка (воздуха); побег
	ka baxso	escapa	thoát, trốn thoát, chạy thoát
ethnic	from one culture group		
	etnički	haiv neeg	этнический
	ummad, u gaara ummad	étnico	chủng tộc, sắc dân
exhaust fan	s bathroom and kitchen fans that	blow humid air to the outside	
	izduvni ventilatori	kiv cua tshuab tawm	вытяжные вентиляторы
	marawaxadaha naqaska	ventiladores de extracción	quạt gió, quạt xả hơi
Extension S	Service a university program tha	t teaches adults who are not u	niversity students
	podružnica, ispostava	Kev Pab Sab Nraud курсов	зая система занятий для взрослых
	Adeega Fidinta	Servicio de Extensión	dịch vụ mở rộng phạm vi phục vụ
fertile	good for growing plants		
	plodan	Z00	плодородный
	aaran, wax dhala	fértil	(đất) tốt, màu mỡ
fertilizer	compost or chemicals that help pla	ants grow	
	gnojivo, djubrivo	chiv	удобрение
	bacrimiye, kordhiya aarannimada	fertilizante	phân bón
fined	when you have to pay money to the	he government because you br	oke the law
	oglobljen	raug nplua	оштрафованный
	ganaaxay	multado	bị phạt
