## ABSTRACT

The Office of Inspector General (OIG) continues to focus its energies on some of the significant challenges facing the U.S. Department of Education. It completed implementation and end-to-end testing of its internal systems for Y2K compliance, though it could not ensure compliance of its trading partners. The OIG advised the Department as it developed a sound and integrated information-technology architecture. The OIG also found that the Department needed to improve its contract-monitoring oversight and recommended corrective actions. The Department's new accounting system poses problems, including its inability to perform a year-end closing process, resulting in auditors not being able to express an opinion for fiscal year 1998. The OIG is working with the Department to resolve these problems. Issues regarding student financial assistance were examined, such as inappropriate discharge of student loans, eligibility, default, and refund fraud, and cost-study follow-ups. Schoolwide programs now allow schools to use federal funds for whole-school improvement projects instead of specific programs. Concluding charts include reporting requirements, Inspector General's reports with questioned costs and recommendations for better use of funds, a list of unresolved reports prior to April 1, 1999, cumulative prosecutive actions, and a statistical profile for April 1-September 30, 1999. UNITED STATES DEPARTMENT OF EDUCATION  
OFFICE OF INSPECTOR GENERAL

THE INSPECTOR GENERAL

October 29, 1999

Honorable Richard W. Riley  
Secretary of Education  
Washington, DC 20202

Dear Mr. Secretary:

*I am pleased to submit this semiannual report on the activities of the Department's Office of Inspector General (OIG) for the six-month period ending September 30, 1999. Submission of this report is in accordance with section 5 of the Inspector General Act of 1978 (Public Law 95-452, as amended). The Act requires you to transmit this report within thirty days to the appropriate Congressional committees and subcommittees, along with any comments you may wish to make.*

*As the Department's new Inspector General, I am encouraged by the willingness of Department managers to work with OIG to resolve issues our audits, investigations and inspections have raised. My office has closely monitored the Department's progress toward Year 2000 readiness, advised the Department in its implementation of the Government Performance and Results Act, and provided substantial feedback on the Modernization Blueprint to overhaul the student financial assistance programs. The Department has offered cooperation and assistance to address the problems we are identifying.*

*I look forward to continuing to work with you and Department managers in the year ahead, as we seek to ensure the efficiency, effectiveness and integrity of Education Department programs and operations.*

Sincerely,

Lorraine Lewis

Enclosure

---

## **INSPECTOR GENERAL'S MESSAGE TO CONGRESS**

---

---

*In June of this year, I became the Inspector General of the U.S. Department of Education and immediately found myself a member of two distinguished communities: the Department of Education and the President's Council on Integrity and Efficiency (PCIE). The last several months have been instructive for me, and I am encouraged by the working relationships I have developed with the Secretary and other Department officials, Members of Congress and their staff, and other Inspectors General.*

*I am cognizant of the exceptional character and singular significance of the mission of the Office of Inspector General. I am committed to that mission. My office is working cooperatively with both the Secretary and the Congress so that our audits, investigations, inspections and other work products help the Department carry out its own mission with the highest levels of efficiency, effectiveness and integrity. For example, we continue to oversee the critically important efforts to ensure that the Department, its grantees and contractors are Year 2000 (Y2K) compliant. In July, we issued our second report to Congress on the Y2K readiness of the Department's student financial assistance programs.*

*My office is providing Student Financial Assistance — the Department's Performance-Based Organization — with continual feedback on the Modernization Blueprint and recommendations for improving accountability and fraud control. I am proud to announce that the PCIE recently honored this Office for a successful long-running investigation to root out fraud in the Pell Grant program.*

*We previously reported that our audit of the Department's financial statements would be delayed because the Department's financial records were not ready for audit. In mid-November we will be transmitting a disclaimer of opinion on the Department's Fiscal Year 1998 financial statements, primarily because of financial reporting weaknesses in the Department's automated system. The Department also did not adequately perform reconciliations and could not provide sufficient documentation supporting transactions. My office and the*

*Department are working to address these issues and are committed to achieving the March 1, 2000 statutory reporting date.*

*We are focusing on the Department's implementation of the Government Performance and Results Act. My office has worked with the Department to develop data quality training for managers and staff to help them prepare the fiscal year 1999 performance report. We will be reviewing the Department's processes to ensure that data on its programs are reliable and valid. These efforts will assist Congress in their review of the Department's first performance report.*

*I look forward to continuing our work with the Secretary and other Department officials and the Congress, helping them ensure that our education programs serve the nation's students and taxpayers.*

*Lorraine Lewis*

# SIGNIFICANT ACTIVITIES AND ACCOMPLISHMENTS

The Office of Inspector General (OIG) continues to focus its work effort and resources on some of the most significant challenges facing the U.S. Department of Education (ED or the Department and Congress). Chief among these challenges are the preparation for Year 2000 (Y2K), the Department's production of auditable financial statements, and the Student Financial Assistance Programs (SFA) modernization effort and management of the SFA programs.

## **YEAR 2000**

Our review of the Department's Y2K compliance for processing, delivery, and administration of the SFA programs found that the Department substantially completed implementation and end-to-end testing of its internal systems. Survey results raise concerns that a significant percentage of postsecondary institutions might be at risk for Y2K-related failures. The seriousness of this issue warrants outreach by Congress (*page 2*).

## **FINANCIAL STATEMENTS**

The Department will receive a disclaimer of opinion on its Fiscal Year (FY) 1998 financial statements, primarily because of financial reporting weaknesses in its automated system. The Department also did not adequately perform reconciliations and could not provide sufficient documentation supporting transactions. The Department is working to address these issues, and the OIG and its independent public accountant are working closely with the Department on the FY 1999 financial statements. The Department and the OIG are committed to achieving the March 1, 2000 statutory reporting date (*page 4*).

## **STUDENT FINANCIAL ASSISTANCE**

The SFA programs continue to constitute one of the Department's greatest management challenges. Congress authorized creation of a Performance-Based Organization (PBO) in SFA. This period we identified both systemic weaknesses and individual instances of fraud that have caused financial losses to the Department and to taxpayers ranging from a few thousand dollars to millions of dollars. The Department is working to address many of the recommendations we have made for improving accountability and fraud control. During the reporting period, OIG provided comments and technical assistance relating to SFA's drafts of the Customer Service Task Force Report, the Modernization Blueprint, and the Five Year Performance Plan (*page 6*).

## **ADDITIONAL SIGNIFICANT ACTIVITIES**

The OIG also reviewed the Department's contract monitoring oversight and various initiatives and programs in the elementary and secondary education area, specifically, school-to-work and schoolwide programs. We continue to advise the Department in its implementation of the Government Performance and Results Act.

The OIG is committed to improving the quality of independent public accountant (IPA) audits of participants in the Department of Education grant and loan programs. We provide a high level of technical assistance to IPAs, and we also perform quality control reviews of their audits.

Descriptions of these and other significant OIG activities and accomplishments of the reporting period appear below. They are organized under the major headings of Departmental Operations and Departmental Programs. Tables containing statistical information pursuant to the requirements of the Inspector General Act of 1978 (Public Law 95-452, as amended) follow on page 14.

## DEPARTMENTAL OPERATIONS

### INFORMATION TECHNOLOGY

The OIG continued to focus its efforts on the Department's management of information technology. During this period, we closely monitored the Department's progress toward Year 2000 readiness. We also resolved pending recommendations from our 1998 audit of the Department's Clinger-Cohen Act implementation, and reported on the acquisition process for the SFA information systems. Additionally, the Department recently hired a new chief information officer (CIO), and SFA filled a CIO position in its organization. We will work with both CIOs to discuss their priorities and will address them in our work plans.

### YEAR 2000

The Department has made significant progress in preparing for the Year 2000. This period, the Department reported that its mission-critical systems were renovated, tested, and implemented by the March 31, 1999 deadline set by the Office of Management and Budget. The OIG continues to monitor the Department's progress in preparing for the Year 2000.

#### **Y2K Compliance of SFA Delivery Systems**

Our review of the Department's Y2K compliance for processing, delivery, and administration of the SFA programs (*ACN: S11-90016, issued July 16, 1999*) was the second of two reports on Y2K required by the Higher Education Act Amendments of 1998. We found that ED substantially completed implementation and end-to-end testing of its internal systems. The Department performed extensive outreach efforts with its trading partners to promote awareness, provide technical assistance, and learn about the progress these entities had

made. However, ED cannot ensure that its trading partners will be Year 2000 compliant.

We reported our concerns about the Y2K readiness of postsecondary institutions. Survey results indicate that a significant percentage of postsecondary institutions could be at risk for Y2K-related failures. Because of the seriousness of this problem, we recommended that members of Congress promote Y2K awareness at postsecondary institutions in their districts and states.

ED has made substantial progress in developing its business continuity and

contingency plans, but the Department needs to continue its efforts to develop, test and refine its plans.

### **Y2K Readiness at Guaranty Agencies**

Our review of Y2K readiness at six guaranty agencies (*ACN: 11-80015, issued May 4, 1999*) identified three issues the Department needs to address as it continues to monitor the 36 guaranty agencies participating in the Federal Family Education Loan Program.

First, entities could receive erroneous data or no data if one or more of their data exchange/trading partners have computer failures. These failures could make the entities incapable of

performing their functions effectively. Second, we found that five of the six agencies had not established Y2K contingency plans, although three of the five had plans to do so. Third, the Department needs to actively monitor guaranty agencies that implement new systems in 1999.

OIG conducted assessments at five additional guaranty agencies. We will report the results in our next *Semiannual Report*.

In September the Inspector General spoke to a group representing guaranty agencies, and discussed the results of OIG's Y2K work.

## **MANAGEMENT OF INFORMATION TECHNOLOGY**

OIG activities related to the Department's management of information technology were wide-ranging.

### **Clinger-Cohen Act**

The Clinger-Cohen Act of 1996 (Public Law 104-106) requires agency chief information officers to develop, maintain, and facilitate the implementation of a sound and integrated information technology architecture. Student Financial Assistance has made progress in resolving the concerns we raised about its ability to comply with Clinger-Cohen Act requirements in our 1998 audit report (*ACN: A11-70001, issued March 1998*). This period, we advised the Department that we consider the issue resolved. The Department has developed a comprehensive corrective action plan and is working to implement all of our recommendations. We will continue to monitor the Department's compliance with Clinger-Cohen requirements.

### **Information Technology Acquisition**

Our audit of the Department's acquisition process for the SFA information systems (*ACN: 11-80004, issued May 17, 1999*) disclosed several weaknesses in SFA's process for acquiring information technology (IT) systems. Most critical was the absence of a formal IT acquisition process that clearly defined the roles and responsibilities of involved parties and offices, resulting in inconsistency, poor communication, and indecisiveness. We also noted inadequate planning, acquisition timeframes that were too lengthy to be practical, and the fact that most of the employees with key roles in the process had limited training, experience, and education in the field of electronic data processing. The Department's response indicated general

agreement with our audit findings. We concluded fieldwork in October 1998, prior to the creation of SFA as a Performance-Based Organization.

### **GAPS Configuration Management Process**

Our review of the Grant Administration and Payment System (GAPS) configuration management process (*ACN: A11-90004, issued May 7, 1999*) found areas where Office of Chief Financial Officer

(OCFO) management could strengthen overall accountability and control. We recommended that OCFO management implement its configuration management plan. This included addressing all key roles and responsibilities, improving the identification of key configuration components, addressing configuration management controls, and performing configuration audits. OCFO expressed agreement with our audit findings.

## **MANAGEMENT OF INFORMATION TECHNOLOGY CONTRACTS**

In January 1998, the OIG initiated a two-year project to review information system contractors for SFA programs. The review included evaluation of performance monitoring by the contractor and Department staff.

### **The Department Can Improve Its Contract Monitoring Oversight**

We found that Department officials

- ❑ authorized new tasks, but had not formalized the tasks into the contract (*SFA Action Memorandum 99-01, dated October 1998*);
- ❑ did not monitor reimbursements due the Department on one contract (*SFA Action Memorandum 99-02, dated November 1998*); and

- ❑ were not aware of key personnel changes, or that key personnel were not dedicated to the contract as required (*ACN: A07-80018, dated May 1999*).

Without effective oversight, the Department has no assurance that contractors adhered to contract terms and provided the products or services for which they were paid. We recommended corrective actions, with which the Department agreed, to address the problems we identified.

## **FINANCIAL STATEMENT AUDIT**

### **FISCAL YEAR 1998 FINANCIAL STATEMENT AUDIT**

The draft audit reports on the Department's Fiscal Year (FY) 1998 financial statements will be released in November 1999. The independent public accountant under contract to the OIG will issue a disclaimer of opinion on the FY 1998 financial statements.

### **New Accounting System Poses Problems**

The Department of Education operated under a new accounting system in FY 1998, and the auditors discovered several limitations in the financial reporting process. These weaknesses,

such as the system's inability to perform a year-end closing process or produce automated consolidated financial statements, were significant factors in the Department's inability to prepare accurate consolidated financial statements in a timely manner.

### **Auditors Could Not Express Opinion For FY 1998**

Because of these and other problems — including the fact that the Department did not adequately perform reconciliations and could not provide sufficient documentation supporting transactions — the scope of work was not sufficient to enable the auditors to express an opinion on the FY 1998 financial statements. The Department is currently replacing part of its financial systems. In the interim, the Department has developed short-term automated solutions that it believes will allow it to overcome some of the serious systems

problems in time for the preparation of FY 1999 financial statements.

### **Department Needs to Resolve Issues**

In addition to disclaiming an opinion, the report on internal controls identified other issues which are systemic in nature, and which the Department must address to prepare timely and accurate financial statements. The Department is working to address system limitations and internal control weaknesses, and the OIG and its independent public accountant are working closely with the Department on the FY 1999 financial statements. The OIG and the Department are committed to achieving the March 1 statutory reporting date.

## **GOVERNMENT PERFORMANCE AND RESULTS ACT**

The Results Act required federal agencies to submit five-year strategic plans and annual plans beginning with Fiscal Year 1999. The Results Act also requires agencies to prepare annual performance reports beginning with fiscal year 1999. The first report is due in March 2000.

### **OIG Advisory Efforts**

During this period, we continued to participate in an advisory capacity to the Department in its implementation of the Results Act. The OIG worked with the Department on its data quality standards and the development of training on those standards. Department managers will use the standards to make an assertion about the reliability of data used to inform performance indicators in the annual performance report.

### **Ensuring the Reliability of Data**

This period, we presented to Department managers the preliminary results of our

review to identify controls that ensure the reliability of data submitted by state education agencies (SEAs) for the Title I of ESEA and Perkins Vocational Education programs. We will detail the results of this work in an information report that we will issue during the next reporting period. The OIG is currently performing similar work assessing the Individuals with Disabilities Education Act, Part B data that SEAs submit. In addition, the OIG has begun a readiness assessment to determine if the Department's program offices will be prepared to report on the performance indicators for the March 2000 report.

# DEPARTMENTAL PROGRAMS

## STUDENT FINANCIAL ASSISTANCE

The SFA programs have historically constituted the greatest portion of OIG's investigative caseload, as well as a significant percentage of our audit effort.

### MODERNIZATION BLUEPRINT

The Modernization Blueprint is SFA's plan to overhaul the Department's student aid delivery system. We provided feedback on drafts of the Blueprint. Our comments presented suggestions to help SFA manage risks during implementation of the Blueprint. The Blueprint is available on the Internet at [www.easi.ed.gov](http://www.easi.ed.gov). During the reporting period, we also provided comments on drafts of the Customer Service Task Force Report and the Five-Year Performance Plan.

### HIGHER EDUCATION AMENDMENTS

On October 7, 1998, the President signed into law the Higher Education Amendments of 1998, amending the Higher Education Act of 1965. Before publishing any proposed regulations to implement programs under Title IV, the Secretary was required to conduct a negotiated rulemaking process to develop proposed regulations.

#### OIG Staff Contributions to Negotiating Committees

The Secretary of Education formed negotiating committees to address issues pertaining to lender and guaranty agencies, loans, refunds, program and student eligibility, and institutional eligibility. The committees met from January through June 1999. Representatives from the Office of Inspector General attended the sessions

to provide appropriate advice and technical assistance to the Department.

After publishing the Notice of Proposed Rulemaking for each regulatory package resulting from the process, the Department prepared the Final Regulation package based on comments received. The Department published the Final Regulations on November 1, 1999.

### DISCHARGE OF STUDENT LOANS

SFA requested an audit of the process for forgiving student loans. Our audit report "Improving the Process for Forgiving Student Loans" (ACN: 06-80001, issued June 7, 1999) revealed control weaknesses in the discharge of student loans. Correcting these deficiencies could result in the better use of \$35 million annually.

### **Inappropriate Discharges**

Our audit disclosed that student loans are being discharged (forgiven) for total and permanent disability and death, even though the borrowers are apparently not totally and permanently disabled or deceased. Inappropriate discharges are occurring because of control weaknesses in the current system for determining borrower eligibility for the disability or death discharge. We recommended that SFA implement enhanced procedures, and provide guidance to guaranty agencies. These recommendations are intended to improve accountability and fraud control.

### **Departmental Actions**

Following the issuance of our audit report, representatives of OIG and SFA met to collaborate on methods for identifying borrowers who may have submitted false death or disability forms to have their student loans discharged. This joint initiative is one of the

### **COST STUDY FOLLOW-UP**

In our last *Semiannual Report* (No. 38, pages 6 and 20), we discussed the study that we conducted to assess the impact of cost issues on the Federal Family Education Loan and Federal Direct Loan Programs.

### **Testimony on Cost Issues**

This period, the Assistant Inspector General for Audit testified before the House Subcommittee on Criminal Justice, Drug Policy and Human Resources, Committee on Government Reform about this cost study. The testimony reported our two principal conclusions: 1) that in any given year, Federal Direct Loan Program (FDLP) or Federal Family Education Loan Program (FFELP) total costs (administrative and subsidy) may be greater, given the effect of prevailing economic conditions on subsidy costs; and 2) that inefficiencies

Department's many planned corrective actions in response to our audit report. The intent is to identify suspected abusers, reinstate the loans with accrued interest, and pursue criminal prosecution when warranted.

### **Guilty Plea in Fraudulent Discharge**

The first OIG criminal case involving disability discharge fraud was indicted during this period and the defendant recently entered a guilty plea. On September 1, 1999, a student borrower was indicted in Ohio on two counts of false statements. The investigation revealed that the student made misrepresentations about his medical condition to obtain a doctor's certification stating that he was permanently and totally disabled. The certification discharged his obligation to repay five federally guaranteed student loans involving accrued interest and administrative fees totaling \$27,855.

likely affect the Department's administrative costs in both programs. The testimony stated that neither program, FDLP nor FFELP, was cheaper or more efficient than the other.

Additionally, we shared our report's recommendations designed to address cost inefficiencies and improve the management of both programs. The Acting Deputy Secretary and the Chief Operating Officer, SFA, also testified at this hearing.

## **PATTERNS OF FRAUD**

OIG investigations continue to identify patterns of fraud against both the loan and Pell Grant programs. This period the majority of our cases fell into three general areas: eligibility fraud, default fraud, and refund fraud.

Our efforts in investigating eligibility fraud were recognized by the President's Council on Integrity and Efficiency in September 1999, when agents from our New York office and two federal prosecutors received an Award for Excellence. The award was based upon the investigation and conviction of four members of a multi-million dollar Pell Grant fraud scheme at Toldos Yakov Yosef Seminary (see *Semiannual Report No. 38*, page 23).

### **Eligibility Fraud**

Our investigations revealed school owners who fraudulently obtained Pell Grants, student loans, and other SFA program funds for persons who never attended the schools. Employees at postsecondary institutions also sometimes took advantage of their positions to defraud the SFA programs. In addition, we conducted investigations of Free Application for Federal Financial Aid fraud by recipients.

The schemes involved a variety of means including falsification of documents leading to prosecution under federal criminal statutes covering SFA fraud, wire fraud, mail fraud, and other criminal charges.

- ❑ The owner of Midwest Career College, Indianapolis, Indiana, pled guilty to student aid fraud and conspiracy. Investigation found that he obtained Pell Grants for persons who did not attend the school. He also failed to pay Pell Grant and student loan refunds. He was recently sentenced to 41 months incarceration and ordered to pay restitution of \$205,000.
- ❑ A college work-study employee at Lassen Community College, Alturas, California, was sentenced to 30 months imprisonment and ordered to pay restitution of \$38,848. The defendant obtained SFA for ineligible students by filling out false enrollment applications.
- ❑ A student was sentenced in Milwaukee, Wisconsin, to 17 months incarceration, three years supervised release, and ordered to pay \$87,832 restitution. Investigation disclosed that he falsely represented having a baccalaureate degree, thereby obtaining Pell Grants for which he was not eligible.

OIG continues to devote investigative resources to cases involving individuals who have defrauded the Federal Family Education Loan Program by falsely claiming enrollment in foreign institutions. Recent investigations reinforce our concern that FFELP is still vulnerable to fraud in the area of individuals who procure financial aid, but fail to attend foreign schools. In a 1997 report, the OIG brought the vulnerabilities to the Department's attention, and made recommendations for improving accountability and fraud control.

- ❑ Between 1996 and 1999, an individual allegedly submitted about 37 FFELP applications falsely claiming enrollment at four schools in Mexico. At the time, he

was on federal supervised release. (He had previously been convicted of defrauding the FFELP of some \$160,000 by falsely claiming attendance at a foreign medical school). The 37 applications, which he allegedly submitted to four guaranty agencies, resulted in the disbursement of approximately \$319,680. He was re-arrested in August 1999.

- Two defendants were sentenced to lengthy probation periods and ordered to make full restitution in Sacramento, California, for engaging in a scheme to commit mail fraud to receive federal student loan funds allegedly to attend Le Cordon Bleu School of Cooking, United Kingdom. Our investigation showed that they falsified various documents to make it appear that they were attending the cooking school. Instead, they and one other individual defrauded or attempted to defraud ED out of approximately \$73,000.

### **Default Fraud**

Our investigative efforts have identified instances of default fraud by both schools and student recipients.

Schools are subject to termination from SFA programs – including the Pell Grant programs and the loan programs – when their cohort default rate for the three most recent consecutive years is equal to or greater than 25 percent. Our investigations have disclosed school owners and officials who fabricate or forge loan deferments and forbearances for their former students, who would otherwise go into default and cause the school's cohort default rate to reach above the threshold rate for the termination in the third year.

- The owner of Franklin School of Cosmetology in New Jersey was sentenced to more than four years of incarceration, and ordered to pay restitution in excess of \$840,000 for his role in a scheme to lower his school's cohort default rate. Under his direction, employees submitted hundreds of forged and fraudulent documents to two loan-servicing agencies in an effort to place students unknowingly into forbearance and deferment. The owner's sister pled guilty, and two school employees were sentenced for their roles in the fraud. The effect of their action was to reduce the school's cohort default rate in the third year from 55.3 percent to 9.5 percent, and maintain eligibility for SFA for another year.

The OIG believes a provision of the Higher Education Amendments of 1998 will make this type of fraud significantly more difficult, if not impossible, to prove in the future. Congress deleted the requirement that forbearance requests be in writing (Section 428 (c)(3)). The OIG used the fraudulent written forbearance requests prepared by the Franklin School of Cosmetology to prove the fraud and tie it to particular individuals.

Individuals who have previously defaulted on a student loan are ineligible for subsequent student loans, unless the debt is resolved or the loan is rehabilitated. Investigations have identified individuals who have on their student aid applications concealed previous defaults, thereby obtaining SFA for which they were ineligible.

- Our National Default Project focused on student borrowers who received financial aid after having previously defaulted on

student loans. (See *Semiannual Report No. 37*, page 18, for a description of our audit report, "Applicants with Defaulted Student Loans Continue to Receive Student Aid," ACN 06-70004, issued June 23, 1998.) The results of the project included 21 prosecutions with \$323,580 in criminal restitution and civil recoveries. Not all of the prosecutions were in this reporting period, and some actions are still pending.

### **Refund Fraud**

OIG investigations continue to identify school officials who fail to pay Pell Grant and loan refunds to the Department of Education or lenders when students withdraw, or fail to attend.

- ❑ The owner of Interstate Business College in North and South Dakota was sentenced to 18 months of

incarceration for failure to refund more than \$500,000 in Title IV refunds for 278 students. After the students withdrew or stopped attending, the owner retained the funds that should have been returned to ED. As a part of her plea, she agreed to pay \$914,000 in restitution for unpaid refunds and credit balances owed to students.

- ❑ After nine years of investigation, prosecution, and appeals, the owner and operator of California Institute in Long Beach, California, was sentenced to 46 months of incarceration and ordered to pay \$250,000 restitution. Investigation disclosed that he had retained about \$6.3 million in guaranteed student loans for students who did not complete their training.

### **CIVIL FILINGS**

The following civil actions took place during the reporting period.

- ❑ The United States Attorney for the Northern District of Illinois filed a False Claims Act lawsuit against Chicago-based Corus Bankshares, Inc., and its subsidiary Corus Bank, N.A. The lawsuit alleges that Corus submitted thousands of fraudulent insurance claims for defaulted student loans during the period 1988 through 1994. The alleged fraudulent claims resulted in payments totaling in excess of \$11.8 million. Corus Bankshares, Inc. and Corus Bank, N.A. filed an answer denying liability and a counter-claim and third-party complaint in response to the lawsuit.

Two civil settlement agreements were filed in U.S. District Court, Northern District of Ohio, between the United States in a False Claims Act suit and a school owner and his son. The owners agreed to pay \$1 million and the corporation agreed to pay an additional \$500,000. In 1986 the school owner admitted that Programming & Systems, Inc. misrepresented its withdrawal rates to the Department and accrediting agencies. The school chain misrepresented the rates in order to maintain their accreditation, a prerequisite for federal financial aid.

The United States filed a False Claims Act suit in U.S. District Court for the District of Columbia against CSC Accounts Management, Inc., doing business as CSC Credit Services. The Department of Justice intervened in a *qui tam* action filed previously by several former employees of the firm. CSC Accounts Management, Inc. was a private debt-collection agency under contract with ED to collect defaulted student loans. The complaint alleges

that CSC submitted false and fraudulent claims to the Department for the payment of commissions in 1995 and 1996. The scheme allegedly involved the falsification of loan documents and the making of false certifications concerning student loan consolidations. Many of these newly consolidated loans have since defaulted. The United States seeks damages in excess of \$5 million.

## **MATCHING RECORDS**

In *Semiannual Report No. 37* (page 5) we discussed the systemic weaknesses that facilitate certain types of fraud against the student aid programs. We noted our office's strong support for the legislation to allow for the matching of applicant income data with Internal Revenue Service (IRS) records. While the Higher Education Act Amendments of 1998 authorized such a match, the IRS believes that additional legislation is needed. At the end of this reporting period, the Department of Education and the Department of the Treasury had not entered into an agreement to implement a match.

## **ELEMENTARY AND SECONDARY EDUCATION**

The OIG's efforts in elementary and secondary education this period focused on several areas.

### **EDUCATION FLEXIBILITY PARTNERSHIP ACT OF 1999**

The Education Flexibility Partnership Act of 1999, or Ed-Flex (P.L. 106-25), allows states to grant waivers to local school districts exempting them from certain provisions of the Elementary and Secondary Education Act (ESEA). Congress considered OIG's "Perspectives Paper," described in our last *Semiannual Report* (pages 4 and 17), in developing some of Ed-Flex's provisions.

#### **Act Includes OIG-Recommended Provisions**

The Act includes oversight and reporting provisions that we recommended in our ESEA Perspectives Paper. First, it requires state education agencies to annually monitor the activities of local

education agencies and schools receiving waivers. Second, it requires each state to include, as part of its annual report on the results of such oversight, data demonstrating the degree to which progress has been made toward meeting the state's educational objectives.

### **SCHOOL-TO-WORK**

This period we issued "An OIG Perspective on the Sustainability of State School-to-Work Systems" (ACN: S07-90001, issued May 14, 1999) that summarizes findings from four recent ED/OIG and Department of Labor OIG audits on the sustainability of state school-to-work (STW) systems. Our report provided recommendations to assist the

National School-to-Work Office in helping states to develop STW systems that will be sustained after federal program funding ceases. Department officials concurred with our recommendations.

## **SCHOOLWIDE PROGRAMS**

The Elementary and Secondary Education Act (ESEA) gives schools greater latitude in determining how to spend their federal funds. Instead of having to use these funds for specific programs, schools may now use them in Schoolwide Programs, which by definition employ strategies designed to improve the whole school.

### **OIG Staff Engage in Discussions on Schoolwide Issues**

OIG staff were active participants and contributors in many meetings with the Department, congressional staff, states and school districts on Schoolwide Program issues this period. We met with school officials in Tennessee and South

Carolina to discuss ways to combine funds in schoolwide programs. We also gave presentations on the subject at conferences in Texas, North Carolina, Vermont, and Mississippi. We also met with staff of the House of Representatives Title I Issues Group to discuss the flexibility that Schoolwide Programs provide.

## **TITLE I FRAUD**

The former principal of the Beth Rachel School for Girls, Brooklyn, New York, pled guilty to a federal mail-fraud conspiracy. Investigation disclosed that he conspired to obtain Title I and New York tax-levy funds to which the school was not entitled. The defendant arranged to have individuals placed on the New York City Board of Education payroll even though they were not entitled to the salary.

The defendant paid \$1 million of restitution at his sentencing. Three Board of Education employees involved in this scheme were sentenced to probation and fined \$1,000 each.

## **QUALITY OF NON-FEDERAL AUDITS**

Participants in Department programs are required to submit annual financial statements and compliance audits performed by an independent certified public accountant (CPA). The Inspector General Act directs the Inspector General to take appropriate steps to assure that work performed by non-federal auditors complies with federal government auditing standards. OIG publishes audit guidance specific to Department programs to assist CPAs in performing independent audits.

## **RESULTS OF REVIEWS**

This period we performed 51 quality control reviews of audits performed by independent public accountants.

- Based on our reviews, we determined
- 66% were acceptable or contained only minor audit deficiencies,
  - 22% were substandard requiring corrective action by the auditor, and

- 12% contained significant inadequacies that the Department could not rely upon.

For the audits containing significant inadequacies we have, in some instances, made referrals to the American Institute of Certified Public Accountants and the appropriate State Boards of Accountancy for possible disciplinary action. We also issued one suspension and debarment action against a non-federal auditor.

### **OIG Suspends CPA Firm**

After reviewing several audits of proprietary schools participating in Title IV programs, performed by the CPA firm Daniel G. Falk & Associates (DGF&A), OIG concluded that the firm failed to adhere to professional standards. OIG therefore issued to Daniel Falk and DGF&A a Government-wide Suspension and Notice of Proposed Debarment from

Federal Procurement and Nonprocurement Transactions.

While not agreeing to the allegations or violations of applicable audit standards, Daniel Falk and DGF&A agreed to be voluntarily excluded until July 1, 2001 from participating in any primary and lower tier covered transactions, pursuant to the Government-wide suspension and debarment regulations.

### **Improving Audit Quality**

To improve audit quality, we communicate the types of audit deficiencies identified during our quality control reviews to other non-federal auditors in the form of "Dear CPA" letters. We will continue our efforts to assure that any work performed by IPAs complies with the standards established by the Comptroller General as set forth in the Inspector General Act.

## COLLECTIONS FROM AUDITS AND INVESTIGATIONS

The House Report (H. Rept. 105-635) to accompany H.R. 4274 directs the Inspector General of the U.S. Department of Education to submit reports detailing recoveries and savings generated by its work. The following tables reflect that information.

### AUDIT

FY	RPTS ISSUED WITH QUEST/UNSUPP		RPTS WITH QUEST/UNSUPP		RECOMMENDED QUEST/UNSUPP		MANAGEMENT DECISION		WRITE OFFS ADJUSTMENTS		COLLECTED/RECOVERED		BALANCE
	QUEST/UNSUPP	RECOMMENDED	QUEST/UNSUPP	RESOLVED	QUEST/UNSUPP	RESOLVED	DECISION	ADJUSTMENTS	RECOVERED	RECOVERED	RECOVERED	RECOVERED	
FY 98	11	\$17,011,401	8	\$6,162,004	\$1,669,155	0	\$1,669,155	0	\$1,669,155*	0	\$1,669,155*	0	
FY 99	11	\$69,804,793	1	\$131,653	\$26,482	0	\$26,482	0	\$22,215	0	\$22,215	\$4,267	
TOTAL	22	\$86,816,194	9	\$6,293,657	\$1,695,637	0	\$1,695,637	0	\$1,691,370	0	\$1,691,370	\$4,267	

\*\$769,709 collected as a prospective rate adjustment

### INVESTIGATION

FY	CASES *	FINES, RESTITUTIONS, SETTLEMENTS AND JUDGEMENTS		AMOUNT COLLECTED		AMOUNT COLLECTED PRIOR PERIOD(S)	AMOUNT COLLECTED
		SETTLEMENTS AND JUDGEMENTS	FINES, RESTITUTIONS, SETTLEMENTS AND JUDGEMENTS	CURRENT PERIOD	AMOUNT COLLECTED		
FY 98	293	\$48,208,055	\$1,658,800	\$29,068,289	\$30,727,089		
FY 99	133	\$19,154,906	\$7,001,533	\$29,068,289	\$7,001,533		
TOTALS	426	\$67,362,961	\$8,660,333	\$29,068,289	\$37,728,622		

\* Number of cases for which collection was ordered during the fiscal year.

# STATISTICAL PROFILE

## April 1 – September 30, 1999

	Six-month Period Ending 9/30/99	Fiscal Year Ending 9/30/99
<b>OIG AUDIT REPORTS ISSUED.....</b>	<b>14</b>	<b>26</b>
Questioned Costs.....	\$ 38,008,075	\$ 44,664,417
Unsupported Costs.....	\$ 25,140,376	\$ 25,140,376
