ABSTRACT

This manual contains information about social skills and self-advocacy and provides strategies for teaching these skills to adults with disabilities who may need to act as their own advocates for accommodation in a variety of settings, including work and education. This strategy is cued by the acronym TARGET, which stands for the following steps: Target the topic, Address the need, Relate the reasons for the need, Give a plan or ask for help, Explain why the plan will work, and Tie down future plans. TARGET provides teachers with a way to instruct students in a social skills strategy cued by the acronym FACT (Face the person, Activate eye contact, Check expression, and Talk clearly), that helps them act in the most effective way when discussing an accommodation request with another person. The manual contains a scripted guide to instruction in social skills, self-advocacy, role-playing, and strategies. The guided script is followed by cue cards and a planning form with samples. The cue cards are designed to be used in conjunction with the preceding part of the manual. Lesson plans explain each step of the TARGET and FACT strategies. (CR)

Introduction

The *Target Self-Advocacy Strategy Manual* contains information about social skills and self-advocacy, as well as strategies to teach students about each of those topics. The strategies have been designed for use by adults with disabilities who may need to act as their own advocates for accommodations in a variety of settings, including work and education.

The purpose of the *Target Self-Advocacy Strategy Manual* is to provide teachers with a way to instruct students in a self-advocacy strategy. This strategy, cued by the acronym TARGET (Target the topic; Address the need; Relate the reasons for the need; Give a plan or ask for help; Explain why the plan will work; Tie down future plans), allows students to plan for self-advocacy in discussing a topic such as a job, addressing a need such as an accommodation, discussing reasons for the need, offering a plan, explaining the plan, and making future plans based on the discussion. It also provides teachers with a way to instruct students in a social skills strategy cued by the acronym FACT (Face the person; Activate eye contact; Check expression; Talk clearly), that helps them act in the most effective way when discussing a request with another person.

This manual contains a scripted guide to instruction in social skills, self-advocacy, role-play and strategies. The guided script is followed by Cue Cards and a Planning Form with samples. These Cue Cards are designed to be used in conjunction with the preceding part of the manual.

Instructors might choose one of two instructional plans for teaching TARGET and FACT. The first instructional plan follows a traditional learning strategy model. In this plan, detailed information is given for presenting each of the lessons. A script is offered as well as the activities for learners. This first plan is especially recommended for instructors who are new to learning strategy instruction and for instructors whose learners require very structured lessons and direct instruction to learn and retain information.

The lessons are very prescriptive of the steps and activities for teaching the strategy. Our experience shows that for learners with disabilities, this instructional plan was more supportive of their learning styles and more likely to be useful to them.

The second instructional plan is for instructors who are more likely to have learners who can learn new material quickly and do not need the support of highly structured lessons. These learners are highly motivated and can acquire new information with minimal assistance from peers or instructors. With these learners, the instructor might use only the cue cards to review and practice the FACT and TARGET steps.

This manual and its strategies were developed in response to the needs of adults with disabilities to function in the most efficient and effective way possible, based on their legal rights and responsibilities. It should be used when teachers and students agree that students have a right to an accommodation due to a disability and when students are receptive to learning the strategies described on the previous page.

TARGET was developed in accordance with researched methods in learning strategies by the University of Kansas Center for Research on Learning. Similar in nature to the TARGET strategy, *The Self-Advocacy Strategy for Education and Transition Planning* by Anthony K. Van Reusen, Candace S. Bos, Jean B. Schumaker and Donald D. Deshler, has been proven to work effectively with adults in AE programs and is available for purchase without training. Purchasing information about this strategy and other Strategy Integration Model (SIM) materials is available by contacting Edge Enterprises at (785)749-1473.

Introduction to Self-Advocacy**Definitions**

1. **Self-Advocacy-** a way of acting that helps you tell others about what you need in a way that gets the job done right.

2. **Social Skills-** the skills we use to interact with people in a positive way. This includes how we stand or sit, make eye contact, look, and sound.

3. **Strategy-** a way to approach a task. A strategy has steps that organize the approach to the task. Strategies are often cued by words called acronyms. An acronym is a word formed from the initial letters of a series of words.

4. **Role-play-** to act a part. In role-play, a situation is imagined. The situation usually represents one that the student may encounter. The student may be asked to take the role of himself or herself or another person such as a teacher or employer.
