ABSTRACT

Based on the 1998 Arkansas English Language Arts Curriculum Frameworks, this sample curriculum model for grade eight language arts is divided into sections focusing on writing; reading; and listening, speaking, and viewing. The writing section's stated goals are to help students employ a wide range of strategies as they write; use different writing process elements appropriately to communicate to different audiences for a variety of purposes; and apply knowledge of language conventions to print and non-print texts. Reading strategies are structured to help students comprehend, evaluate, and respond to works of literature and other kinds of writing which reflect their own cultures and developing viewpoints as well as those of others. The reading section also focuses on guiding students to demonstrate a willingness to use reading to continue to learn, to communicate, and to solve problems independently. The listening, speaking, and viewing strategies focus on helping students develop and apply these communication skills through a variety of informal and formal opportunities. Each section lists student learning expectations; eighth grade benchmarks; assessments; and strategies/activities. In addition, the writing section includes a four-item list of definitions of general performance standards; an explanation of scoring student responses to writing prompts; and a five-item list of domains and definitions. "Introduction to the Revised Language Arts and Mathematics Frameworks (K-12)"

The curriculum frameworks revision committees suggested that the Arkansas Department of Education create sample grade level benchmark documents to model how a local district could use the frameworks to direct curriculum work. This effort has resulted in the sample Benchmark documents and sample Curriculum model documents in Language Arts and Mathematics for grade clusters K-4 and 5-8. The grade level benchmarks are tied directly to the curriculum frameworks. They contain *suggestions* for classroom assessments (and cite the options listed in the framework) and *suggestions* for strategies/activities.

The grade level benchmarks are intended to support local curriculum work; they are not intended to replace local curriculum work.

Benchmarks and Model Curriculum are based on the
1998 Arkansas English Language Arts Curriculum Frameworks

Definitions of General Performance Standards

Advanced students demonstrate superior performance well beyond proficient grade-level performance. They can apply Arkansas's established reading, writing, and mathematics skills to solve complex problems and complete demanding tasks on their own. They can make insightful connections between abstract and concrete ideas and provide well-supported explanations and arguments.

Proficient students demonstrate solid academic performance for the grade tested and are well-prepared for the next level of schooling. They can use Arkansas's established reading, writing, and mathematics skills and knowledge to solve problems and complete tasks on their own. Students can tie ideas together and explain the ways their ideas are connected.

Basic students show substantial skills in reading, writing, and mathematics; however, they only partially demonstrate the abilities to apply these skills. They demonstrate a need for some additional assistance, commitment, or study to reach the *Proficient* level.

Below Basic students fail to show sufficient mastering of skills in reading, writing, and mathematics to attain the basic level.

Grade 8: Writing

Scoring Student Responses to Writing Prompts

Domain Scoring

In domain scoring, which was developed in conjunction with Arkansas educators, the observation of writing is divided into several domains (categories), each comprised of various features. Each domain is evaluated holistically; the domain score indicates the extent to which the features in that domain appear to be under the control of the writer. The score is a judgment of the entire domain with all features being of equal importance.

Domains are weighted to reflect the more fundamental importance of some domains.

The domain scores, along with an awareness of the features comprising each domain, are used to plan developmental or remedial instruction for the student.

Scoring Scale

Each domain is scored independently using the following scale.

- 4 = The writer demonstrates **consistent**, though not necessarily perfect, control* of almost all of the domain's features.
 - 3 = The writer demonstrates **reasonable**, though not consistent, control* of almost all of the domain's features, indicating some weakness in the domain.
 - 2 = The writer demonstrates enough **inconsistent** control* of several features to indicate significant weakness in the domain.
 - 1 = The writer demonstrates **little** or no control* of most of the domain's features.
- *Control: The ability to use a given feature of written language effectively at appropriate grade level. A paper receives a higher score to the extent that it demonstrates control of the features in each domain.

DOMAINS AND DEFINITIONS

CONTENT: (C)

The Content domain includes the focusing, structuring, and elaborating that a writer does to construct an effective message for a reader. It is the creation of a product, the building of a writing intended to be read. The writer crafts his/her message for the reader by focusing on a central idea, providing elaboration of the central idea, and delivering the central idea and its elaboration in an organized text. Features are **central idea, elaboration, unity, organization**. Weight: 3

STYLE: (S)

The Style domain comprises those features that show the writer purposefully shaping and controlling language to affect readers. This domain focuses on the vividness, specificity, and rhythm of the piece and the writer's attitude and presence. Features are **selected vocabulary, selected information, sentence variety, tone, and voice**. Weight: 2

SENTENCE FORMATION: (F)

The Sentence Formation domain reflects the writer's ability to form competent, appropriately mature sentences to express his/her thoughts. Features are **completeness, non-enjambment, expansion through standard coordination and modifiers, embedding through standard subordination and modifiers, and standard word order**. Weight: 1

USAGE: (U)

The Usage domain comprises the writer's use of word-level features that cause written language to be acceptable and effective for standard discourse. Features are **standard inflections, agreement, word meaning, and conventions**. Weight: 1

MECHANICS: (M)

The Mechanics domain includes the system of symbols and cuing devices a writer uses to help readers make meaning. Features are **capitalization, punctuation, formatting, and spelling**. Weight: 1
