

Educational and Demographic Profile

Sacramento County

This profile uniquely presents a variety of educational and socioeconomic information for Sacramento County, nearby counties, and the state.

The profile highlights the relationship between various factors that affect the economic well-being of individuals and communities. This presentation of information provides a framework for enhanced communication and collaboration between the myriad agencies, at both the state and local level, that have responsibility for education, economic development, workforce training, or social services.

The relationship between educational attainment and income is clearly depicted by the maps on pages 4 and 10. These maps, along with the other data presented in the profile, unmistakably show how socioeconomic conditions vary from place to place in California.

This geographic variation must be taken into consideration in the development, implementation, and evaluation of policies to give Californians better opportunities to succeed in school and in life.

Highlights for the county

- 35% of recent high school graduates completed college preparatory courses, compared to 35% statewide. See **Preparation for College**, page 2.
- 18% of recent high school graduates entered CSU or UC, compared to 18% statewide. See **College-Going**, page 3.
- 25% of the county population has a Bachelor's or higher-level degree, compared to 27% statewide. See **Educational Attainment**, page 6.
- 3.4% of children in the county are not proficient in English, compared to 5.8% statewide. See **Immigration and Language Skills**, page 12.
- Median household income in the county is \$43,800, compared to \$47,500 for the state as a whole. See **Income and Poverty**, page 11.
- Sacramento County has 20 degree-granting institutions. See **Local Colleges and Universities**, page 14.

Education Commission**

Preparation for College

Percent of recent public high school graduates completing college preparatory courses

Three-year average 1999–2002

Values are based on course completions reported by schools to the California Department of Education

Teal band shows the range for California counties

Completion rates by race and ethnicity

Rates are shown only for ethnic groups having more than 50 graduates in the three-year period

■ Sacramento County
■ California

Trends 1985-2002

College preparation rates are shown only for ethnic groups having more than 50 graduates each year

— American Indian
— Asian, Pacific Islander
— Black, African-American
— White
— Latino

Green shaded area shows rates for all graduates

All data on this page from CPEC

Statewide, the proportion of high school students taking college preparatory courses increased steadily until the late 1990s.

The general increase in college preparation rates has not closed the gap between ethnic groups. Rates of Latinos, American Indians and African-Americans are significantly lower than the rates for Whites and Asians. The college preparation rate for African-American students has fallen in recent years.

College-Going

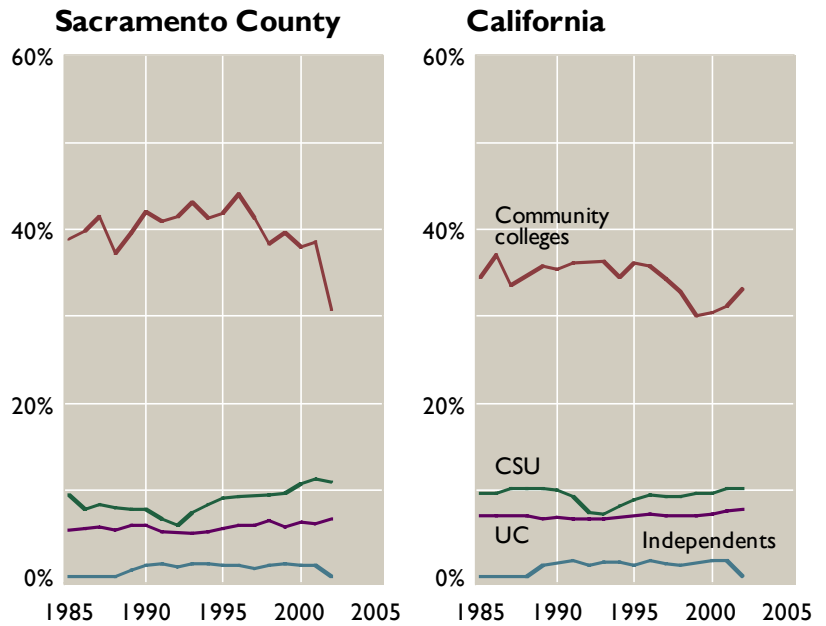

College entry rates

Percent of recent public high school graduates entering colleges and universities
Three-year average, 1999–2002

	Sacramento County	California
Community colleges	36%	32%
CSU	11%	10%
UC	6%	8%
Independents	1%	1%
Total	54%	50%

Data for independent colleges and universities is incomplete. Total excludes graduates entering other degree-granting institutions. See back page for a description of the postsecondary education systems.

Data from CPEC

College choices

Total entrants from Sacramento County high schools, 1999–2002

Top 6 community colleges and top 6 universities shown. A college in the top 6 is not shown if it takes less than 1% of the college entrants from the county.

The total college entrants for the county does not include out-of-state colleges and colleges in California that have not reported enrollments to CPEC.

Total entrants, all colleges	18,627	100%
Community colleges		
American River College	4,168	22%
Sacramento City College	3,215	17%
Cosumnes River College	2,970	16%
Sierra College	1,397	8%

— Asian, Pacific Islander
— Black, African-American
— White
— Latino

Figures for American Indians include Alaska Natives

Green shaded area shows rates for all graduates

Older students

Percent of population aged 25 to 34 attending a college or university

Teal band shows the range for California counties

A significant number of California students are older than the traditional college age range. Many of these students attend college while working and supporting a family. Statewide, 1,384,000 students aged 25 and over are enrolled at universities and colleges reporting enrollment by age to CPEC. Of these, 85% attend community colleges and 11% attend the California State University.

Educational Attainment

Education pyramid for persons 25 years and older

Each step on the pyramid shows the percentage of people 25 years and older who have attained or exceeded the specified level of education

A thinner pyramid indicates a less-well educated population. If the blue line for a given ethnic group is inside the shaded background, the district's population is less well educated than the state as a whole.

If the blue line for a given ethnic group is outside the shaded background, the district's population is better educated than the state as a whole.

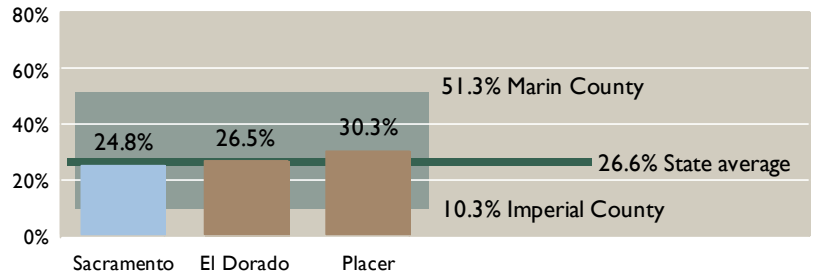

The numbers on the pyramids are for Sacramento County.

Educational Attainment

Percent of population with a bachelor's or higher degree

Percentage of people 25 and older with a graduate or professional degree, or a bachelor's degree
Teal band shows the range for California counties

Percent by race and ethnicity

Percent of population with no college

Percentage of people 25 and older with no education above the high school level
Teal band shows the range for California counties

Percent by race and ethnicity

Education attainment varies significantly from place to place in California. Areas where the educational attainment of the adult population is low tend to have low college-going rates. As a result, existing inequities in income and opportunities for advancement tend to persist.

Racial and Ethnic Composition

Racial and Ethnic Composition

Population of Census Block group

- More than 70% Latino
- More than 50% Latino
- More than 70% African American
- More than 50% African American
- More than 70% White
- More than 50% White
- More than 70% Asian & Pacific
- More than 50% Asian & Pacific
- No race or ethnicity predominates
- Area with no residents

Data from 2000 U.S. Census

Lack of English Proficiency

Percent of children aged 5–17 who speak another language at home and speak English “not well” or “not at all”

Sacramento County has a total of 248,800 children aged 5–17. Of these, 8,500 are not proficient in English. The language spoken at home by these children is as follows:

	Sacramento County	California
Spanish	39%	84%
Asian & Pacific languages	34%	12%
Other languages	27%	4%

Data from 2000 U.S. Census

Data are not available for racial and ethnic groups

Prison-going

Prison population

	Sacramento County		California	
	Number	Pct	Number	Pct
African American	2,900	2.2%	47,800	2.0%
Latino	1,160	0.7%	56,600	0.5%
White	2,450	0.3%	46,500	0.3%
Other ethnicity	410	0.2%	8,800	0.2%
Total	6,930	0.6%	159,700	0.4%

The prison population is the number of prisoners committed from locations in Sacramento County, regardless of where they are incarcerated.

The percentages are the prison population as a percentage of the county population.

Postsecondary Education in California

The California Community Colleges

The community college system consists of 72 locally governed districts operating 109 campuses. A Board of Governors appointed by the Governor serves as a regulatory agency for the local districts.

Community colleges offer academic and technical programs leading to associate degrees and technical certificates. Many community college programs give course credits that can be transferred to 4-year institutions. In addition, community colleges provide instruction in basic skills, English as a second language, and citizenship classes.

The California State University

The 23-campus CSU system has programs leading to the bachelor's and master's degree and awards doctorates jointly with UC or an independent university. In 2002, CSU had 407,000 students enrolled, one third of whom were part-time.

The University of California

UC has 9 general campuses, one health science campus, and numerous special research facilities. The UC has constitutional status as a public trust. UC awards bachelor's, master's and professional degrees and has sole authority among public institutions to award doctoral degrees.

Independent Colleges and Universities

The Association of Independent Colleges and Universities (AICCU) consists of 75 institutions accredited by the Western Association of Schools and Colleges (WASC). These institutions range from large, world-renowned universities to smaller liberal arts institutions and professional schools. AICCU institutions enrolled over 217,000 students in 2001.

Other WASC-Accredited Private Institutions

Forty-eight additional California institutions are accredited by WASC, but are not members of AICCU. These institutions enroll some 30,000 students, and also range from universities to smaller institutions and professional schools.

Other Degree-Granting Institutions

California has about 300 other institutions that are authorized under state law to award degrees. These include religious seminaries, schools of alternative medicine, law schools, and universities accredited by organizations other than WASC.

In addition, California has an estimated 3,000 schools that offer programs not leading to a degree. This category includes schools providing training for careers in computer technology, health care, and other business and technical occupations. All of these schools and colleges are regulated by the Department of Consumer Affairs, Bureau for Private Postsecondary and Vocational Education (BPPVE).

The California Postsecondary Education Commission

The California Postsecondary Education Commission is a citizen board established in 1974 to coordinate the efforts of California's colleges and universities and to provide independent, non-partisan policy analysis and recommendations to the Governor and Legislature.

Contact the Commission
